Actually, the state in which we find ourselves is far from hopeless. We have the material and, above all, the human resources to change our methods and to win. It is not the fault of the Government or its leaders or any political party that we have acted as we have. It is the temper of the whole Nation. If knowledge of the problem becomes widespread, and if the enthusiasm of the people can be aroused, then we can succeed. As Cordell Hull once said, "The Government of the United States is never far ahead of the American public; nor is it very far behind."

Mr. SALTONSTALL. Mr. President, the bill which I have filed with the Senator from Montana [Mr. MANSFIELD] would insert in the Foreign Service Act of 1946 a statement of policy to govern the appointment of chiefs of mission and Foreign Service officers which could profitably be adopted by all Americans who go overseas. In a very real sense, any of us who goes abroad is representing the United States, regardless of our purpose. Whether such representation of our country will serve her well or ill will largely depend on the extent to which we apply to ourselves the policy which the bill would prescribe for the appointment of chiefs of mission and Foreign Service officers.

Mr. President, the policy declaration contained in section 1 of my bill reads as follows:

It is the policy of the Congress that chiefs of mission and Foreign Service officers appointed to serve the United States in foreign countries shall have, to the maximum practicable extent, among their qualifications a useful knowledge of the principal language or dialect of the country in which they are to serve, and knowledge and understanding of the history, the culture, the economic, and political institutions, and the interests of such country and its people.

The responsible officials of the Department of State have unquestionably, in my judgment, been working hard at the task of improving the foreign language proficiency of our Foreign Service officers. Because of the limited funds for salaries and administrative and training expenses which the Congress appropriates to the State Department, the rate of progress possible in this vital aspect of training leaves much to be desired. Section 2 of my bill would add to the Foreign Service Act a new section to establish the framework within which a more vigorous program of foreign language training could be established, assuming that the Congress appropriates the funds necessary for its full implementation.

Sections 3 and 4 of the bill would make significant additions to the authority of the Secretary of State in order further to facilitate tapping to the full the excellent training activities of the Foreign Service Institute and to create incentives for all Foreign Service personnel to take advantage of such activities.

Mr. President, we must leave no stone unturned in our efforts to assure that our Foreign Service personnel have the utmost in qualifications that institutionalized training can give—especially in the field of foreign languages. In addition to their ramified duties as representatives of the United States, the people of our Foreign Service are our first line of defense and the strongest offensive force which our peace-loving society can muster.

Mr. President, in closing, I ask unanimous consent to have printed in the RECORD a number of articles relating to the subjects I have discussed.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New Bedford (Mass.) Standard-Times, Jan. 21, 1959]

SILENT SPOKESMEN ABROAD

John B. Fisher, former administrative assistant and chief political aid to Senator SALTONSTALL, Republican, Massachusetts, recently returned from his fourth trip to the Middle East with some forthright criticism of the U.S. Foreign Service.

A New Bedford audience heard Mr. Fisher direct particular attention to the language training of State Department representatives abroad, which he described as so elementary as to be no training at all—in our embassies abroad fewer than five or six Americans in an Embassy can speak the language of the country in which they serve.

In Belgrade, only 3 of 44 Americans can speak the Yugoslav national tongue.

In Athens, only 6 of 79 Americans in the Foreign Service can speak modern Greek dialects fluently.

In New Delhi, the United States has no personnel who can speak the several Indian dialects required for effective communication there. By contrast, the Russians have specific training courses in Moscow devoted exclusively to training diplomats for Indian service.

As Mr. Fisher concluded on the basis of this unenviable record, "In other words, our spokesmen abroad can't speak—hence, are no spokesmen at all."

This is a dangerous, if not tragic, situation in a world in which nations must know in precise detail what is going on virtually every minute. To be uninformed could mean failure to survive in the present East-West power struggle of the cold war.

If, as Mr. Fisher declared, "the State Department almost automatically rejects every proposal to improve our Foreign Service," Congress should embark upon a study of the situation, aimed at overriding and overhauling the State Department system. The program for training Foreign Service officers should be broadened and intensified.

With regard to language abilities of Americans in general, there is another approach that might be made, Dr. James Bryant Conant, president emeritus of Harvard, has been studying America's high schools for the last 2 years. Dr. Conant commented, "Almost without exception, I found a deplorable state of affairs in regard to foreign languages. Too many students with limited ability were studying a foreign language for 2 years; too few able students were studying one language long enough."

Americans must devote earnest attention to this problem, all the way from the high school class to the level of the Secretary of State. To misunderstand or to be misunderstood in the delicately balanced family of nations is riskier than ever these days.

[From the Reading (Mass.) Chronicle, Feb. 5, 1959]

OUR REPRESENTATIVES ABROAD

Our foreign policy has many angles. It is criticized by many who know very little about the actual situation in many of the countries involved. Then again, it is sometimes constructively criticized by someone with some real knowledge of foreign countries.

"A little simple honesty in our relations abroad—a little old-fashioned patriotism at home"—these words of wisdom were recently spoken by John B. Fisher, a partner in Joyce & Fisher Associates of Washington and Boston before a joint service clubs luncheon in Washington. Fisher is a former administrative assistant and chief political aid to Senator SALTONSTALL and has recently returned from his fourth trip to the Middle East in the past 12 months. He was emphatic in his criticism of the Department of State and of our Foreign Service in that part of the world.

"East is East and West is West, but the twain have met—long since," said Fisher, "a fact of which our diplomatic representatives abroad seem wholly unconscious. Our policies and practices in Greece, Turkey and Iran, for example, threaten disaster for us and for them. We seem to do even the right things in the wrong way.

"I found our Department of State disliked and distrusted throughout this area. I found our Foreign Service personnel considered fearfully ill-equipped to deal with the people and problems among which they work. And this, I know from other travelers abroad, is not an unusual situation.

"Our Foreign Service is, on the whole, inadequate to America's vital needs abroad—inadequate in its recruitment program, in the training of its personnel and in its protocol-ridden, ingrown operations in countless cities around the world.

"The Department of State almost automatically rejects every proposal to improve our Foreign Service. The dangerous implications of this are beyond description:

"The recommendation that a Foreign Service Academy be established comparable to West Point and Annapolis is dismissed for the most absurd of reasons.

"The language training of our Foreign Service personnel is so elementary as to be no training at all—in our embassies in a dozen major capitals abroad fewer than five or six Americans on embassy duty can speak the language of the country in which they serve.

"For example: In Belgrade, the capital of Yugoslavia, only 3 of 44 Americans on duty in that Embassy there can speak Serb-Croat, the Yugoslav national tongue; in Athens, not more than half a dozen of our 79 Americans in Foreign Service can speak modern Greek dialects fluently; in New Delhi, the capital of India, we have no personnel who can speak the several Indian dialects required for effective communication there, whereas the Russians are known to have specific training courses in Moscow for Indian service alone.

"In other words, our spokesmen abroad can't speak—hence are no spokesmen at all. This is worse than a crime; it is a political blunder of the first magnitude—and we, as American citizens, are to blame for not insisting on the very best representation abroad, in our own interest, in our own defense.

"Most important of all, perhaps, is our Government's failure to make use of our able, well-informed businessmen in these nations.

[From the Louisville (Ky.) Courier-Journal, Mar. 30, 1958]

AN AMBASSADOR NEEDS THE POWER OF SPEECH

Senator SALTONSTALL, of Massachusetts, believes it is important for American officials in Foreign Service to speak the language of the country in which they are serving. He has introduced a bill to advance his idea. He would require that certain posts in certain countries be filled by Foreign Service officers who can speak the native tongue.

This might seem elementary in diplomacy, as it would in business. But Senator SALTONSTALL had apparently read a recent story by James Reston of the New York Times. It revealed that 50 percent of our Foreign Service officers have no speaking knowledge of any foreign language. These are men and women, remember, who sought a lifetime career in diplomacy. Mr. Reston further disclosed that our Ambassador in Moscow, Llewellyn Thompson, is the only one we have in a Communist country who speaks the native language; that only two American Ambassadors in the nine Arab States speak Arabic; and that even in the West, we have Ambassadors in eight NATO countries who suffer from a similar handicap.

Such language failure puts us at a severe disadvantage, by comparison with the Russians and all other leading nations. We are the only ones who do not demand language proficiency for Foreign Service. We are the ones, too, who are most likely to be thought arrogant and superior when we ignore the languages of other nations.

The Saltonstall bill may start something of a revolution in our Foreign Service. The reform is painfully overdue. Daniel Defoe determined long ago that he would venture the injury of giving a woman more tongues than one. Our Foreign Service could hardly venture less, in sending men and women out to represent us in the capitals of a troubled and sensitive world.

[From the Foreign Service Journal, June 1957]

OUR TONGUETIED FOREIGN SERVICE

(By Leon and Leila Poullada)

An editorial in the October 1956 issue of the Journal, from which the title of this article is shamelessly borrowed, pointed up the need to develop adequate language skills in the Foreign Service. While the Department has been making noteworthy progress in the matter of language and area training at the Foreign Service Institute more vigorous efforts are required if we are really to untie the tongues of our Foreign Service employees.

Language training programs can, like Gaul, be divided into three parts:

1 Programs designed to arouse the interest of Foreign Service employees and their dependents in languages: The Foreign Service Institute has done commendable work on programs of this type and they are gradually gaining momentum and popularity. No matter how well-conceived this type of program may be, however, its limitations should be recognized. Its principal values lie in the psychological effect on the foreign population of having Americans sufficiently interested in their country to try to learn their language, and the satisfaction the student feels in being able to communicate with servants, shop in the bazaar, and so forth. By its very nature, however, this type of general program cannot produce a corps of fluent language experts.

2. Programs designed to meet the need for Foreign Service officers to acquire and retain fluent command of at least one world language (French, Spanish, German, Russian, Arabic, Chinese): It has been axiomatic in the diplomatic services of all countries (including until recently our own) that anyone who aspired to enter the career ranks would come equipped with command of at least one world language. It is disturbing to learn from a recent survey that 50 percent of the officers in our Foreign Service are not adequately equipped (even by their own self-appraisal) in any world language. It also revealed that language deficiencies are largely concentrated in three groups of officers; (a) A few senior officers who have allowed their language skills to lapse; (b) officers, recently integrated under the Wriston program, whose previous employment did not require foreign language proficiency; and (c) new entrants to the bottom ranks of the service who, under relaxed standards of admission, have been admitted on the understanding that they will make up their language deficiency within a stated period.

It is interesting to contrast briefly the deficiencies in language studies in the United States with the extensive programs reportedly being carried on in the Soviet Union. In all south Asian countries where the writers have served, the number of Soviet diplomats fluent in the local language has been impressive. A recent article in the New York Times revealed the full scope of the Soviet language effort. According to this article not only are foreign languages a compulsory part of the curriculum in the elementary and secondary schools of the U.S.S.R. but a drag-net system of scholarships brings the ablest language students into institutes of higher learning such as the National Institute of Foreign Languages, where they are subjected to a strenuous 5-year course in which one or more foreign languages constitute the core of the curriculum. It is from schools of this kind that the Soviet diplomatic service draws many of its officers and the results already observable abroad are indeed impressive.

However, the only forthright solution is for the Foreign Service to provide a combination of adequate study facilities coupled with a system of sanctions and incentives. Taking into account the heavy work-load and social duties (also work) of most officers, the penalties for failure to acquire minimum language skills will have to be considerable to arouse the necessary individual effort. On the basis of experience both in learning and teaching languages, the writers have reluctantly concluded that Draconian measures will be needed to bring all officers in the Service up to the required mark. In the writers' opinion nothing less than a time limit for passing required examinations (given on a servicewide basis) coupled with loss of promotion eligibility for failure to pass, will achieve the desired results. Some measures in this direction have already been taken by the Department in recent instructions to the field such as that requiring efficiency reports to include specific statements about the officers' efforts to improve his language ability. These measures will no doubt stimulate the more conscientious, but for the Service as a whole stiffer requirements will be needed.

So much for the stick approach. Any effective program of personnel management must also include the "carrot." In the long run, the latter will, of course, produce more lasting results. Incentives should therefore be devised for rewarding employees who achieve fluency in certain languages. The Foreign Service Institute should prepare a list which would include all the world languages plus other languages of importance to the Foreign Service in which an actual or potential shortage of fluent speakers exists. In the writers' opinion, Arabic and perhaps Chinese and Russian, should be considered world languages for this purpose—in addition to French, Spanish and German. No special incentive would be offered to Foreign Service officers for fluency in only one of these world languages, since this should be considered a basic requirement for employment. But fluency in any additional language on the list should receive special recognition.

What form should these incentives take? Two possibilities are suggested here. No doubt others can be devised. A number of

European countries offer monetary "language bonuses" to their diplomatic officers. The systems vary from country to country but the British method is fairly typical. Anyone who feels qualified, applies for an examination in the language of his choice. The test is both oral and written. Different tests are given for varying levels of proficiency, additional cash bonuses being awarded for each examination successfully passed. The bonus is an increment to yearly salary usually averaging about 100 pounds. This is a permanent increment and is not lost with promotion to a higher salary bracket.

The department might do well to investigate, if it has not already done so, the various incentive programs of other countries and devise a suitable one for our Foreign Service. Perhaps a better incentive than money would be to offer "language preference" points towards promotion. This might work as follows: A separate language dossier could be prepared on each officer, listing the languages on which he has successfully passed examinations and for which he is entitled to receive a certain number of promotion points. After selection boards have rated all eligible candidates on a competitive basis without reference to language ability, the language dossiers would be handed to the boards and additional points would be awarded to those officers entitled to language credit. Thus, of two officers originally rated at the same level, the one with superior language qualifications would earn preference for promotion. This would indeed be a powerful incentive and stimulus to serious language study. It would also spur officers to gain ever higher language proficiency since this would progressively enhance promotion opportunities throughout their entire career. A similar system could be worked out for the staff corps. Administrative details would admittedly present some difficulties but if the need for developing language skills is as great as everyone seems to agree it is, the obstacle could be overcome.

3. The Foreign Service also faces a critical shortage of language and area experts, particularly in the so-called exotic areas which have in recent times become increasingly important to the foreign relations of the United States. To improve the quantity and quality of language and area training will require a greater effort than has thus far been made.

To be really effective a language and area specialist should acquire a deep understanding of the history, art, religion, social structure, and economy of the region. He must also have a good command of the language. Unless he can converse with government officials, businessmen, merchants and leaders of religious and minority groups, and can at least read the local press in the vernacular, his specialized training will not pay full dividends. Measured by these standards, language and area specialization programs, in south Asia, at least, have in the past been indequate though we understand that greater emphasis is now being given to reading especially during the latter stages of specialist training.

The problems involved in establishing an effective corps of language and area specialists are many and complex. To surmount them will, in the writers' opinion, require improved training programs. The following minimum considerations are suggested: (a) recognition of the special difficulties involved in the study of the so-called exotic languages; (b) improvement of initial and followthrough training programs; (c) improvement of teaching methods; (d) provision of special incentives.

It is a fact that most of the exotic languages in which the Foreign Service is deficient are languages which are not easily learned by Westerners in general or Americans in particular. The structure, syntax, and the cultural concepts embedded in these languages are quite unfamiliar to the American student. Often the student is faced with a bewildering multiplicity of local language variants and dialects. South Asia alone, according to some linguists, offers 17 major language groups and several hundred variants. To be really effective in this area a south Asia language officer should know well at least three basic languages: Hindustani (which is really two languages, Urdu and Hindi, with a common spoken vocabulary of perhaps 40 percent, but different roots and scripts), Bengali, and at least one south Indian language, probably Tamil (a Dravidian language of different ancestry from Hindustani and Bengali which are Indo-European). In addition to these three major languages, he would also find at least a basic knowledge of Persian essential in Afghanistan and important in Pakistan as well as in Muslim areas of India.

In addition to multiple languages, the area specialist is often confronted with different levels of speech within the same language. These exist in nearly all languages but rarely in so exaggerated a form as in the exotic ones. Within one language, different vocabularies and forms are often matters of rigid social prescription and wide variances are found in classical as against contemporary literature with still different forms used for official occasions, everyday polite speech and colloquial conversation. It is difficult to find equivalent examples in any Western language unless we hark back to Roman times and compare the classical Latin of Horace with the contemporary Vulgate and the still more common idiom of the plebeian masses. The language and area specialist must somehow command the major languages of his region and sort out the various speech levels for the proper social occasions and groups.

Recognition of these special problems points the way to the improvements which should be made in language and area training. Perhaps the first and most important step is to gain acceptance for the concept that once an officer is selected for language and area specialization he becomes part of a marked group whose needs and problems necessarily differ from those of other officers. Routine administrative and personnel practices cannot meet these peculiar requirements. Special consideration will have to be given to this group with the Foreign Service Institute playing a more prominent and controlling role in such matters as assignments, tours of duty, advanced training details, etc.

Until recently, initial training for most language and area specialists consisted of a year's study at a university. Both area and language studies had to be compressed into this relatively short time. After the study tour, the specialist was largely on his own. He often had to scramble by his own efforts for an assignment where his training could be put to use. In some cases lack of vacancies and shortage of personnel resulted in assignments to posts where his newly acquired language was not generally spoken. In many cases what had been learned became rusty from disuse and ground was lost instead of gained.

Then again there appeared to be no attempt at career planning for the language and area specialist as such. There was, and still seems to be, no planned program of assignments aimed at safeguarding and developing the Government's initial investment in the specialized training. Assignments to future posts depended, and still do, on the vagaries of existing vacancies, position classifications, coincidence of homeleave and transfer schedules of officer replacements and all the usual paraphernalia of personnel redtape. Recently there have been signs of improvement. The initial training period has been lengthened and is usually preceded by intensive language training at the Foreign Service Institute. Language schools, such as the one for Arabic in Beirut, have been set up in a country where the language is spoken to give the student practical experience along with academic training. A number of other improvements have been instituted or are on the way. But much more is needed.

In the writers' opinion, an adequate training program for a language and area specialist (particularly for south Asia) would consist of a period of initial training and a period of followthrough training. The initial training would include:

1. Three months' full-time intensive language training at the Foreign Service Institute.

2. One full year of academic language and area studies at a university.

3. Eighteen months of travel, residence, and study in the area, nine months of which could be at a university with a specific research assignment to fulfill.

4. Assignment to a post in the area where the language is widely spoken.

This initial training period should be followed by a 10-year planned program of assignments which would constitute the followthrough training. This career-planning phase should be started as soon as the officer is selected for training. Before he finishes his university assignment both the Department and he should know in a rather definite way what his assignments for the next 10 years will be. The objective of this plan would be to insure that this period of followup training will develop the language and area skill acquired during the initial training period. The career planning office recently established in the Department could make an excellent start by giving priority to planning the careers of language and area specialists in whom the Government already has a very substantial investment which should not be dissipated by haphazard assignments. To insure that future slots exist at the right time and place for language and area officers, would it not be possible to establish one or more unclassified positions at appropriate posts and in the Department? This would permit assignments in accordance with career-planning needs rather than as dictated by the fortuitous existence of vacancies in the right grades at the right times. At present it is only rarely and by bare chance that the right officer and the right vacancy coincide. Only by creating extra positions not subject to rigid personnel classification can this difficulty be overcome. The actual duties of an officer occupying one of these positions would depend on his rank and special abilities. To establish such positions will require understanding and cooperation from the personnel and budget offices in the Department and perhaps special congressional action, but this or some similar plan is an indipensable step.

Another problem which requires more study than can be given to it in this article is the question of language teaching methods. This is a murky and somewhat controversial field in which one risks drawing down the wrath of the linguistic scientists who have strongly influenced language teaching since the last war. Not being linguistic scientists, the writers are not qualified to enter into the merits of this controversy from a scientific viewpoint. Our comments are simply based on actual field experience in learning and teaching languages and we are interested in the practical question: What actually produces the best results from the standpoint of the student? These observations have led us to conclude that the new teaching techniques have much to commend them and are especially effective for students who want a quick, useful, but not necessarily accurate, command of a language. They are therefore better suited for general language programs than for training language and area specialists whose needs are of a different order.

The new systems of language teaching have discarded traditional methods in favor of

shortcut or direct teaching courses in which the primary emphasis is on the spoken language. These lessons are often written in transliterative systems which employs so many diacritical marks to represent the strange sounds of the exotic language that in many cases it is just as easy to learn the foreign script as to learn the romanized transliteration.

Language schools for missionaries in south Asia with many years of experience in language teaching have long ago concluded that for students who careers are to be in the area, it is just as easy and ultimately far more fruitful, to teach the local scripts from the beginning. Their language tests are therefore written in the native alphabets. Progress at first may be slower but in the long run the ability to read fluently gives the student a deeper and broader knowledge of the language. This principle is perhaps even more applicable to the language and area specialist whose language needs are of the same long-range nature but even more demanding than those of the missionary.

A similar argument can be made for the study of grammar. It is sometimes overlooked that grammar itself is a short-cut to language. It can be learned empirically or inductively from numerous examples, but for many adult students it is much quicker to learn the rule which is the essence of the many instances and then apply it to individual cases, rather than the other way around. A great deal depends, too, on the propensities of each student. It is the writers' feeling that these differences in susceptibility to various teaching methods have not been sufficiently recognized. Just as educational psychologists now recognize that some students are eye-minded and some ear-minded, experience in teaching languages shows that some students learn more readily by methods which side-step grammar and rely heavily on direct spoken exercises whereas others can advance further and more quickly by learning the basic rules of the language and applying them to individual speech situations.

As the reader may have guessed, this is a plea that the teaching methods now in general use for the training of language and area specialists, be carefully reviewed. Not all traditional ways of learning a language are necessarily bad, any more than all the new methods are necessarily good. Perhaps the solution lies in a reasonable synthesis of the two systems which, after testing in the crucible of experience rather than in speech laboratories, would incorporate the best aspects of both.

Lastly, the problem of providing adequate incentives to language and area specialists must be tackled. Judging from appeals which have been periodically circulated to the field, the Department encounters considerable difficulty in attracting sufficient numbers of candidates for language and area training. This has been especially true for those regions of the world, such as the Middle East and south Asia, where needs for specialists are growing. The reasons for the reluctance of Foreign Service officers to volunteer for this training are clear. To the candidate for language and area training, many disadvantages and few advantages are visible. If he applies for this training he must take 1 or 2 years out of his regular career while his colleagues in substantive assignments presumably enhance their chances for promotion. After his training he and his family have to look forward to a lifetime of service in a series of hardship posts with only occasional relief by assignment to Washington, which to many in the Service, is just another hardship post. In spite of references in the precepts to selection boards there has been little in the performances of past boards to indicate that the language and area specialist serving in Madras, Jidda, or Vientiane is viewed with any particular preference for promotion over his nonspecialist colleagues in Madrid, Buenos Aires, or Sydney. Furthermore, he may discover that prolonged service in one area will adversely affect his finances. He will find that his household appliances, clothing, and car wear out much faster than they would in nonhardship areas and that cost-of-living allowances will seldom cover these added expenses. Not only must he reequip himself and his family more frequently but he will find this process is more expensive than for his nonspecialist colleague.

An illustration will make this clear: Officer X, an area specialist, and officer Y, a nonspecialist, serving at Lahore are transferred. Following normal Foreign Service practice they order from the United States a car and other items needed to equip themselves at their next post. As an area specialist, X is transferred within his area to Bombay. As a nonarea specialist, Y is available for worldwide assignment and is transferred, let us say, to Rome. X at once finds that he must buy many items for Bombay which Y does not need to purchase for Rome. But even worse, in accordance with Foreign Service regulations, X must pay the difference between what it would have cost to ship his purchases Lahore-Bombay and the actual shipping cost New York-Bombay.

All these considerations add up to rather powerful deterrents, even for those whose natural interests attract them to these uncomfortable areas of the world. The language and area specialist thus finds himself a member of a select group but one that is singled out for penalty more often than for privilege. This, of course, has its psychological advantages in creating a certain élan and esprit de corps among the specialist group. The Marine Corps and the Foreign Legion have found it advantageous to elevate this masochism (latent to some extent in all men) to heights of heroism. But although this may have some appeal to the language and area candidate, the task of building a solid and effective corps of specialists will require powerful and positive incentives.

These incentives should be both psychological and material. The former category could include some of the reforms suggested in this article such as effective initial training and a planned followthrough series of assignments. The language and area officer should be given the feeling, supported by tangible evidence, that he belongs to a specially selected group over which the Department, and particularly the F.S.I., maintain a vigilant eye.

In the category of material incentives, the logical first step should be to remove or minimize some of the obvious inequities which now accompany the mere fact of being a language and area specialist. In addition to correcting obviously discriminatory procedures, positive incentive, either in the form of pay increments or through some system of promotion preference similar to that suggested for general language programs in the first part of this article, should be instituted. In this case too, separate dossiers could be prepared on language and area specialists which would be handed to selection boards only after all eligible officers have been rated, so that as between two officers of equal ability, the language and area specialist would receive promotion preference. Incidentally, a specialist officer who was extraordinarily gifted in language might thus earn a double promotion credit, one for his language and area specialization and one along with other officers who had successfully passed examinations in language listed for promotion credit. The languages of his area of specialty would, of course, not earn him credit in the general language incentive program.

To sum up, the problem which faces the Foreign Service in its attempt to untie the tongues of its employees is a complex and difficult one. Different types of programs will be needed for the different groups that have to be reached: one for employees interested only in acquiring a useful knowledge of the local language; another for all officers who need to have a command of at least one world language; and again another for the particular needs of language and area specialists. The key to the solution of these problems lies in the formulation and institution of adequate training programs and of incentive systems tailored to the results which the Department hopes to achieve.

[From the Foreign Service Journal, February 1959]

FOREGN LANGUAGE: CHINK IN AMERICA'S ARMOR?

(By Jacob Ornstein)

"The United States is probably weaker in foreign language abilities than any major country in the world," declared Marion Folsom, former Secretary of Health, Education, and Welfare, before a Senate committee in January 1958. He added, "If we are to gain and hold the confidence and good will of peoples around the world, we must be able to talk to them not in our language but in theirs." In recent months a growing number of statements of this kind by public leaders has caused thinking Americans to become more than a little concerned about the shocking state of our foreign language preparation.

In the pre-sputnik days warnings about the poor state of our linguistic preparedness were greeted by yawns, or at best, mild interest. The Soviet satellites circling about the earth brought us face to face with some very disquieting facts. One of the most upsetting of these has been the news that of the 1,400 or so Soviet technical journals received by our libraries, less than 50 have until now been regularly translated.

Does it matter? In 1951 an article on contact relay networks appeared in the Journal of the U.S.S.R. Academy of Sciences. So few of our scientists read Russian that it was not noticed until 1955. In the opinion of Dr. William Locke of the Massachusetts Institute of Technology, this oversight cost us at least $200,000 in duplicated research, not to mention the time-lag.

A survey by the author published last year by the State Department's External Research Staff revealed that of our 1,800 or so colleges less than 180 were teaching Russian—to about 5,000 students. By contrast, in the U.S.S.R. an estimated 10 million Russians of all ages are busy mastering English.

World War II left the United States in a position of leadership for which we were ill-prepared linguistically. Decades of neglect had brought language training to its lowest level in our history. When Hitler invaded Poland in 1939 about 20 colleges were teaching Russian, while an insignificant number offered the languages of Poland, Czechoslovakia, Yugoslavia, and other strategic areas. The Armed Forces and the Government scrambled to set up emergency teaching programs where weary-eyed GI's raced against time to get a smattering of Japanese, Norwegian, Bulgarian, and some 40 other tongues urgently needed to conduct the war on our farflung battlefronts.

The postwar period brought an aggravation of the language problem. The tasks of occupation and of dealing with new states created an unprecedented demand for linguistic know-how. Since the end of the war at least 15 sovereign states have been born, many employing languages not offered by any American school. India alone has at least 100 dialects and 14 official tongues. Of these, Hindi, spoken by about 150 million persons, is taught by a mere half dozen American universities.

Those whose stock answer to this problem is "Let 'em learn English" are simply blind

to the international facts of life. The dangers of linguistic ignorance are dramatically shown by a story which has become well-known in Foreign Service circles. When the American Embassy was set up in a certain new Far Eastern state, we had not a single officer with competence in the language and had to hire local interpreters. Wishing to please their employers, they translated everything to sound very flattering to the United States.

When we were able to train and send out our own linguists, we were horrified to find that anti-American sentiment was raging fiercely in that country.

Secretary of State Dulles, in requesting additional funds for language training at the 85th Congress last year, pointed out that less than half of our Foreign Service officers had a practical speaking and reading knowledge of French, German, or Spanish, while barely 25 percent of the incoming trainees had a working knowledge of these tongues. For this reason, he observed, the State Department had been obliged to relax severely its language requirement in recruiting new officers. Perhaps the most telling commentary on these figures has been provided by Secretary Dulles himself when he asserted that "the effectiveness of our efforts to create a stable pattern of international relations hinges to an important degree on the establishment of understanding between peoples. Language can both aid and obstruct this vital understanding."

While American high school students have been enrolled in driver education, basket-weaving, and telephone techniques, the Soviets have left no stone unturned to provide their citizens with the ordnance of foreign language. Writing in the New York Times, Mr. Theodore Shabad a few months ago described the ambitious network of schools being established throughout the Soviet Union where at the tender age of 8 bright youngsters are launched on all-out programs of language mastery. In Moscow there are three schools where youngsters are getting their three R's exclusively in French, German, or English. In Leningrad two elementary boarding schools put the children through their paces in Chinese and Hindi. Special schools have been established in the Soviet Republic of Uzbekistan to introduce youngsters to Chinese, Hindi, Arabic, and other languages.

In vivid contrast to the intense Soviet language drive, the linguistic picture in the United States is a depressing one. According to Modern Language Association figures, of the 24 major languages of the world, each spoken by more than 20 million persons, only Spanish and French are studied by an appreciable number of Americans. It is hardly any wonder, therefore, that of our representatives abroad perhaps 1 out of 40 can speak effectively any language but English.

That this problem reared its ugly head as early as the Colonial Period is revealed by John Adams in a letter addressed to the Treasury Board. In it he commented:

"I found myself in France ill-versed in the language, the laws, customs, and manners of the country, and had the mortification to find my colleagues little better informed than myself, vain as this may seem."

Referring to Benjamin Franklin, he noted that the latter "spoke the language imperfectly and was able to write bad French."

However, the language needs of those early diplomats appear trifling compared with those of today. At a conference in linguistic needs in government, held by the U.S. Office of Education in March, 1957, it was learned that a total of 106 foreign tongues are required for our Government agencies and armed services. As our schools have simply not been producing enough qualified linguists, the services and many Government agencies have been obliged to create special schools. At the Army Language School, for example, intensive training, lasting from 6 to 15 months, is provided in 29 languages, ranging from French to Vietnamese.

Despite the acute need for Americans who can speak languages, few students enrolled in college language courses go far enough in their study to be able to carry on a simple conversation or read a newspaper editorial; worse yet, too few colleges provide courses which give insight into the background of areas other than Western Europe. The Conference on Asian Affairs recently reported that fully 40 percent of our colleges have no courses on the Far East where over half the world's population resides.

Condemning the short-sightedness of many of our universities, Dr. Grayson Kirk, president of Columbia University, last year stated, "We must make an effort to know more of the life and thought of the great Asian leaders who have had such profound influence on the lives of hundreds of millions of men and women. It will be a long time," he added, "before Asoka and Akbar and the Gupta Kings are commonplace terms along with Julius Caesar, Henry IV of France, and the Tudor Kings of England."

The Modern Language Association of America, in a 4-year study supported by the Rockefeller Foundation, has revealed facts and figures on language in our schools which give little reason for complacency. Surveying 971 American colleges and universities, the Association found that more than half of these schools offer no language other than French, Spanish, or German. It concluded that three-quarters of the world's population speaks languages not taught in American universities.

While the Soviets are busy courting the uncommitted neutrals through a never-ending series of cultural, scientific missions, dance groups and sports teams—all well supplied with linguists—we have the doubtful distinction of sending more tongueties persons abroad than any other modern country. Unhappily, this is not limited to the average citizen who invests in a summer cruise, but applies to our intellectual and school leaders as well. Commenting on this, the distinguished teacher and writer, Henri Peyre, of Yale University, has written: "Americans have taken refuge in the easy but paralyzing prejudice—totally groundless, in fact—that they are not gifted for languages. * * * They have been afflicted by shyness when confronted by the need to master another tongue and have cultivated inhibitions which a little courage would soon dispel. American scientists, scholars, and diplomats have thus done incalculable damage to the prestige of their country abroad, through their placid assumption that everyone should understand English."

Is there any way out of the language muddle? Indeed, the situation has become so critical that Government leaders have decided to take action. Public Law 85–864, passed by the 85th Congress, authorizes $887 million for a 4-year program of development in science, mathematics, and languages.

The plan proposes some daring innovations. It calls for a system of language institutes to be established at colleges for the purpose of providing language teachers and supervisors with training intended to improve the quality and effectiveness of instruction. In addition, the proposal provides for the development of foreign-language training and service centers at selected institutions to furnish instruction in rare but strategic tongues rarely or never taught in the United States.

This is certainly a step in the right direction. However, despite the merit of such a plan, it is still an emergency measure which does not attack the problem at the very core. The solution to our linguistic dilemma can come only through a thorough overhauling of our language teaching system.

First of all, it is necessary to streamline our teaching methods. Most of the Nation's 25,000 language instructors are capable and devoted individuals. Unfortunately, there are still a considerable number who teach a language by the well-known expedient of keeping one page ahead of the class. Elsewhere, well qualified teachers find themselves hamstrung by a rigid program of study stressing grammatical analysis and translation of literary classics. This has resulted in drab, uninteresting instruction which has caused many generations of Americans to abhor language study, recalled by them as a tortured exercise in the memorization of irregular verbs and adjectives.

Part and parcel of the improvement of teaching methods is the need for increased use of audiovisual aids and laboratories. Although no panacea for language problems, the use of magnetic tape recorders and other equipment in soundproof laboratories has proved to be a boon to the teaching of foreign languages, especially for the speaking and understanding phases.

A sweeping change must be made with regard to the age at which young Americans are introduced to foreign languages. In no other civilized country is the mistake made of presenting a second language to the individual so late in his school career. The findings of physiological, psychological, and linguistic researchers indicate clearly that by the age of 5 a child has mastered his own tongue and is ready to learn one or several foreign tongues.

Fortunately, America is witnessing the development of a vigorous trend—the movement to introduce foreign languages in the elementary schools, known as FLES by educators. Sparked by Earl J. McGrath while he was U.S. Commissioner of Education in 1952, the movement has had a meteoric career. In 5 years, the number of grade-school youngsters has risen from insignificant numbers to some 300,000 junior linguists enrolled in French, Spanish, German, Italian, and other languages. Even so, at the present time, less than one youngster out of a hundred can get started in a foreign lauguage at a time when he can learn it perfectly and effortlessly.

In the modern program of language instruction which America so badly needs today, the youngster would begin the study of a foreign language by the third grade and continue it through high school and into college, until he has a good speaking, writing, and reading knowledge. Let it be remembered that a Soviet youngster who wishes to attend college must present at least 6 years of a modern language and that he must usually continue it there for several years more.

In addition to increasing the number of years that a foreign lauguage is studied, it is essential that we expand greatly the range of languages taught in our schools. Most high schools and colleges are still offering the same languages which they taught 30 years ago. There is an urgent need to introduce important world languages like Russian, Polish, Czech, Chinese, Japanese, Indonesian, Arabic, Swahili, and others.

Moreover, the language profession needs to be made much more attractive. Dr. H. B. Wells, president of Indiana University, has called attention to the declining number of students going into the linguistic field. "Last year," he noted in 1957, "of the entire graduating class a mere 1.6 percent was specializing in languages, a mere drop in the bucket compared to our needs." It is, however, little wonder that present-day youth is giving this field a cold shoulder, when incentives are so poor. The training of a language teacher or translator requires from 7 to 10 years. Consequently, many youngsters prefer to go into fields where the training is less rigorous and rewards are greater.

In the final analysis, there can be no lasting solution to the language problem until the general public is made aware of the linquistic problem and demands from its

schools the type of language training suited for a jet-propelled world where borders are constantly shrinking.

A start has been made in acquainting Americans at the grassroots with language problems. The U.S. Commission for UNESCO, in cooperation with the Modern Language Association, has, during the past few years held several hundred "citizen consultation" meetings intended to acquaint laymen and leaders in typical American communities with the facts and figures on our language snarl. Electrified into action, many individuals and civic groups have acted through their school boards and administrators to improve language facilities at the local level.

Americans are beginning to wake up to our dangerous language lag—a weak chink in the Nation's armor. As a leader in the free world, the United States cannot afford to continue to be tonguetied in the world arena. Language—the verbal stuff of international communication—deserves a new deal in the American classroom.

[From the New York Times, Mar. 19, 1958]

FOREIGN SERVICE WOES: A COMMENT ON INABILITY OF U.S. ENVOYS TO TALK LANGUAGE OF NATIONS THEY'RE IN

(By James Reston)

WASHINGTON, March 18.—Sometimes a small incident tells more about the problems of U.S. foreign policy than a month's debate in the Senate. President Eisenhower's luncheon yesterday with the Advisory Committee of the Foreign Service Institute is a case in point. The purpose of the meeting was to discuss the sad state of language training in the Foreign Service, which is primarily responsible for the administration of U.S. foreign policy at home and overseas.

Actually, what it turned out to be was a briefing session, primarily by men outside the Government, for the President on just how poorly trained in languages his staff is.

The facts are as follows:

Fifty percent of the entire Foreign Service officer corps do not have a speaking knowledge of any foreign language.

Seventy percent of the new men coming into the Foreign Service are in the same state.

Llewellyn E. Thompson, U.S. Ambassador in Moscow, is the only U.S. Ambassador in a Communist country who speaks the language of the country to which he is assigned.

In the nine Arabic-speaking countries, the only U.S. Ambassadors who speak Arabic are Raymond Hare in Egypt and Parker T. Hart in Jordan.

In the non-English-speaking countries of the North Atlantic Treaty nations, the U.S. Ambassadors do not have a workable knowledge of the language in Belgium, France, Germany, Iceland, the Netherlands, Portugal, Turkey, and Greece.

Vinton Chapin, the Ambassador in Luxembourg, is fluent in French; Val Peterson, in Copenhagen, claims a fair knowledge of Danish; Frances E. Willis, in Oslo, says she can speak fair Norwegian, and James D. Zellerbach, in Rome, says merely that he is studying Italian.

The same state of affairs, or worse, exists in the U.S. embassies of Asia, and naturally enough, the President was not only interested but enthusiastic about doing something about it.

Those at the White House luncheon were Gen. Alfred M. Gruenther, of the Red Cross; Robert Calkins, of the Brookings Institution; Hamilton Fish Armstrong, editor of Foreign Affairs; Dr. Clyde K. Kluckhohn of the Peabody Museum; Charles E. Saltzman, former Assistant Secretary of State; and Henry M. Wriston, former president of Brown University.

Also, for the administration, Under Secretary of State Christian A. Herter; Deputy Under Secretary of State Loy Henderson; Gen. Robert Cutler, an assistant to the President; Harold B. Hoskins, Director of the Foreign Service Institute; and the newly appointed Director of the Bureau of the Budget, Maurice H. Stans.

It is the function of the Foreign Service Institute to provide language training for Foreign Service officers, but its funds have repeatedly been cut, with little or no effort by the President to do anything about it.

Though he is responsible for the appointment of ambassadors, and though the Foreign Service officers who head our embassies overseas are his personal representatives, the President's attitude was reported to be: "Why didn't somebody tell me about this?"

He was sincerely disturbed, and even angry, about the difficulty in getting adequate funds to provide the necessary language training. He observed that a former secretary of his was recently given a 4-year training course at a university on Air Force funds, and he wondered why it was not possible to get even a few months' training for the men who were involved in one of the most lively periods of diplomatic activity in recent years.

REPRESENTATIVE ROONEY INVOLVED

His visitors told him in plain and simple terms. The reason, as almost everybody familiar with the State Department's problems knows, is Representative JOHN J. ROONEY, Democrat, of the 14th District of New York (Kings County).

Mr. ROONEY is chairman of the House Appropriations subcommittee that presides over the State Department budget. He has been slashing that budget for years, is less than enthusiastic about giving ambassadors the necessary language training or representation allowances, and is generally regarded, despite his obscurity, as one of the most powerful men in America, in a negative way, so far as U.S. foreign policy is concerned.

The President was interested in Mr. ROONEY and offered to do something about talking to him. He could not have been more sympathetic to the problems placed before him and his visitors came away convinced that they had had a most useful luncheon.

But at least some of them wondered why the language and training problem had not been discussed and dealt with at the highest level of the Government more than 5 years ago, or at least in 1956, when the embassies were filled with presidential appointees who could not speak the language of the countries to which they were assigned.

[From the Christian Science Monitor, July 5, 1959]

WHERE AMERICA IS LAST

Recently when some Americans were visiting a school in Moscow a Russian girl of high school age arose and addressed the visitors in English.

It was rather broken English, but it was intelligible. And one of the American visitors, Jenkins Lloyd Jones of the Tulsa Tribune, confessed to sadness that there was not a public school in the United States where a single pupil could welcome Russian visitors in the Russian language.

While English is taught in most of the leading schools of Russia the Russian language is taught in few public schools in the United States.

A few weeks ago a convoy of three Russian airplanes landed at the capital city of one of the countries of the southwestern Pacific. Every one of the 125 visiting Russians was able to speak the native language. They had been trained in that language before they undertook their mission. But in the American Embassy in that island capital there was only one employee who could speak the native language, and he was a native of the island, an interpreter employed by the United States.

It is unusual for an American Ambassador to be able to speak the language of the country to which he is assigned. This ignorance of foreign languages has its handicaps. To begin with it is a positive embarrassment, because an ability to speak many languages is considered the hallmark of an educated person in most of the world's capitals.

Hence no matter how skilled the American representative may be in the language of his own country he is written down as ignorant when he shows his inability to speak another tongue.

It has been argued for years that no one should be sent abroad to represent the United States officially unless he is able to speak the language of the country to which he is assigned. But nothing important has ever resulted from the argument. Primarily the United States is simply unable to find competent diplomats who are acquainted with foreign languages. So we continue to send into the capitals and cultural centers of the world men who are unable to understand one word of the language they hear in councils or on the streets.

Nothing corrective is likely to be done about this for a long time. You can imagine what would happen to the American lawmaker who launched a movement to require the teaching of the Russian language in all American schools. Yet Russian speech is gradually becoming the court language of half the world. (Daily Oklahoman.)

IMPORTANCE OF THE RAILROAD INDUSTRY

Mr. JOHNSTON of South Carolina. Mr. President, sometimes we are prone to forget and to neglect a word of tribute or praise to an industry—and to the men who are engaged in it—which plays so important a role in the lives of every one of us and which is so essentially a fundamental part of our progress and development as a Nation. We are fortunate in the great and diversified types of our American industry. Our past development has been possible because of the progress these industries have made through their growth and expansion. We owe them much for that.

Our future progress may well depend upon the preservation and continued healthy existence of these vital industries. Too many of our citizens have their private funds invested in them for that investment to be neglected. Too many workers depend upon their continued employment in all our industries for us to allow any one to be the object of discriminatory practices or policies.

In my opinion, one of the most vital of our industries today is our railroads. To neglect this segment of our economic system would indeed have dire and far-reaching consequences. Thousands of workers depend upon our great railway system for their employment—trackworkers, repairmen, engineers, brakemen, conductors, station agents, office workers, and executives. So we must not overlook any of them when such a vital industry requires our thoughtful consideration for its future well-being.

I have prepared a brief statement relative to this great industry, and I desire to have my statement incorporated in the RECORD. Later, I shall expand my remarks, for this vital and ingenious

American enterprise deserves our most careful consideration.

TRIBUTE TO A VITAL INDUSTRY

For the past few years, I have become increasingly concerned about the physical and financial condition of our great American railroad industry. I followed with much interest the hearings which were held last winter under the able leadership of our colleague, the Senator from Florida [Mr. SMATHERS]. I was much encouraged, of course, when the Congress, in August, enacted the Transportation Act of 1958, and removed the onerous 3 percent excise tax on freight shipments.

These two pieces of legislation were, of course, very helpful, and, in my opinion, constituted a good beginning. We must, however, continue to look for a complete solution to the still present problems of discriminatory regulation, subsidization, and excessive taxation—all of which still plague this great industry. The ultimate solution of these problems can be accomplished only when the Congress acts to take into account the railroads' essentiality and importance to the economy of this country.

More than $35 billion of private capital has been invested in an immense railroad plant of shops, signals, communications, and rolling stock. More than 2 million freight and passenger cars weave in and out across the 220,000-mile network of rails, and carry almost half of the Nation's intercity freight traffic and nearly one-third of its commercial passenger load.

The accomplishments of the railroads are staggering. In just a 60-minute period, more than 1,000 freight and passenger trains start on scheduled runs all over the Nation, and the same number pull into terminals. More than 3½ million tons of goods will move some 20 miles during the same hour. On the passenger side, trains will perform transportation equivalent to carrying 3 million people 1 mile. Yet, even in the light of these facts, some persons think that the railroads are dying.

Let me say a word about the human side of railroading. At the end of 1956, more than 1 million persons were regularly employed in our railroad industry. Today, because of the problems which are still hanging around the necks of the railroads, and because of the recession, railroad employment has dropped to about 825,000 people, who receive about $5 billion a year in wages. Another half-million people work for companies which are directly dependent upon the $3 billion the railroad industry spends in an average year for materials, supplies, new plants, and equipment. Still more people—a million, in fact—have invested their savings in railroad stocks and bonds.

What about the financial support the railroads give to local and State governments and to the Federal Government? More than $1 billion is paid by the industry in a normal year in the form of taxes which help the States build and maintain our schools and other important projects. All of this makes America a better place in which to live. Some of the railroads' tax money even finds its way into the construction of highways, waterways, airways, and airports. This is a remarkable benefit to competing carriers.

So this is a vital industry which reaches into Hometown, U.S.A. Hundreds of thousands of men and women providing essential services, bread and butter payrolls for railroaders and suppliers, a flow of investment returns, and a veritable torrent of tax payments—all of which contribute to bringing progress and prosperity to our country.

I am certain that you will agree with me, Mr. President, that America needs and will continue to need its railroads. I cannot possibly see how this need can diminish in the future. If we are to believe the Census Bureau forecasts of a 60 million increase in our population by 1975, accompanied by a possible doubling of our output of goods and services, we shall need an even greater railroad system than we have today. More people mean more production—which will certainly increase the demand for volume transportation.

And in this area the railroads can concentrate a fantastic amount of transportation in a limited space, and can turn out a maximum of transportation with a minimum of manpower, fuel, and materials.

The ability to expand capacity rapidly is another feature which is characteristic of the railroads. During World War II, for example, using their same basic plant, the railroads doubled their freight traffic load over previous years, and carried more than four times as many passengers.

So here we have a very efficient type of transportation—one which can expand tremendously, one whose capacity is huge, one that feeds the economy of the country with a $5 billion annual payroll, and, finally, a form of transportation that, in spite of all I have told, Senators, earns far less on its net investment than does any other large industry in America—not even 3 percent.

One might well ask at this point: Why, with all their virtues and capabilities, are the railroads in such serious trouble today? The answer is fairly simple—grossly discriminatory governmental policies and practices.

Let me point out the disastrous consequences these governmental practices and policies have brought the railroad industry. Carloadings dropped from 35½ million in 1957 to about 30 million in 1958—or a decrease of 15 percent. Net income declined in 1958 by 20 percent under the previous year. Gross capital expenditures on property and equipment dropped from $1,383 million in 1957 to $740 million last year—a whopping 46½ percent. This reduction in purchasing not only impairs the physical condition of the railroads, but it seriously affects the supply industry, along with its hundreds of thousands of employees. Because of the serious decline in railroad employment, increased benefits to the unemployed have placed a serious burden upon the unemployment compensation fund. This is not a pretty picture, is it?

The financial illness of the railroads did not spring up overnight. It is in the form of creeping paralysis which has been coming on for years. If we do not begin immediately to try to cure it, the defense of America will be in serious jeopardy.

In any new national emergency, our country would again find itself short of trucks, gasoline, rubber tires, and necessary automotive parts. Our biggest and fastest airplanes, particularly the jets, would be diverted to military spots throughout the world. The railroads, as in World War II, would then be called upon to carry both our military personnel and the vast numbers of civilians diverted from the highways and airways. The Department of the Army recently told the Interstate Commerce Commission that the ability of the railroads to provide passenger service has declined to the point where further reductions would endanger our national defense.

Department of Defense officials have told the railroads that their freight car fleet is inadequate to meet the demands of full mobilization. Perhaps it is; I do not know. I do know, however, that there were only about 28,000 new freight cars on order as of last December 1. But how can we expect the railroads to repair its old cars and buy new ones as long as the industry, hamstrung by adverse public policies, is prevented from earning any more than 3 percent?

This country of ours must have a healthy and prepared railroad industry that will have the capacity to exceed even the great job it did in World War II, when our railroads hauled 90 percent of all domestic military freight and 97 percent of all organized troop movements.

What is the answer—nationalization? Nationalization in any vital industry accomplishes little. The possibilities of permanent harm is always present when Government attempts to do what private industry can do better. Furthermore, nationalization of any industry is contrary to our American concepts of free enterprise. No, I do not believe that nationalization is the answer, and I think Senators will agree with me after I tell them what happened 40 years ago. Most Senators will remember that the Government took over the railroads in 1918 and operated them for 26 months during the First World War. A comparison between the performance of the railroads under public and private operation is astounding and frightening. With one-fourth fewer employees, one-third fewer locomotives, one-fourth fewer freight cars, and one-third less passenger cars than we had in 1918, the railroads moved almost twice as much freight and more than twice as many passengers in World War II when they were privately operated. Deficits resulting from Federal operations cost the taxpayers nearly $2 million a day during World War I, while the railroads during World War II paid taxes to our Government averaging $3½ million a day. And that is not the whole story.

Serious as is the effect of Government ownership upon the railroads, its effect upon Government itself is equally serious. The most immediate effect if the railroads were nationalized today would

be the addition of nearly a million employees to Government payrolls. A second effect upon our Government would be an increase of its public debt as a result of having to pay billions of dollars to the present owners of the railroads. All of us know what a time we are having with the country's debt ceiling today. We can imagine the impact of the loss of tax money on our States and thousands of our communities across the United States if the railroads were Government-owned and tax free. Such a thought is indeed frightening.

But what about the effect of Government ownership upon the related economic systems? At present, railroad service is supplied by hundreds of private companies, each one independent with its own operations and its own services, yet working with others to create a unified national transportation service. In addition, of course, thousands of trucking firms and hundreds of water carriers, airlines, pipelines, and such are furnishing transportation. All of these companies are in competition not only between and among the several forms of transportation but also with each other. If we ever come to Government-operated railroads, we would thus produce competition between private and public enterprise—at least until the other forms of transportation came under the aegis of Government. After this nationalization, then what? Steel, coal—but why go on? We cannot let this come to pass. Nationalization would result ultimately in socialism in full bloom. Socialism, as we know it, is only one step removed from communism.

If Senators agree with me, and I am sure they do, that nationalization is out of the question, what can be done to restore the railroads to a healthy competitive position so that they can earn enough to attract additional capital to maintain their plants adequately and to expand to meet the needs which might well come tomorrow from a national emergency and which certainly will come from peacetime growth?

Frankly, I do not have the answer today. I ask, however, if and when transportation legislation comes before the Congress, that all of us consider such legislation in the light of the railroads' far-reaching essentiality and great importance to the economy of our country. Our railroads are indispensable. America cannot afford to let this vital industry wither on the vine.

If I were asked to what industry America owes more than to any other for its expansion and development, I would in all candor be bound to say that our debt is to the railroad industry. Consequently, we owe to it, the past, and to our future, that we preserve this great industry—so vital and so needed for further peace and prosperity—and so indispensable for us in case of a national emergency.

IMPORTANCE OF THE AMERICAN MERCHANT MARINE TO THE NATIONAL ECONOMY

Mr. MAGNUSON. Mr. President, the importance of the American merchant marine to the national economy, as well as to national security, fortunately is recognized by many civic and industry groups throughout the country. One of the business associations most steadfast and vocal in this regard is the Mississippi Valley Association, which includes in its membership the major business, industrial, public and agricultural interests of the mid-continental and gulf coast areas. At its recent 40th annual convention, the 1,300 delegates present unanimously pledged their active support to the country's privately owned merchant fleet, in an all-out endorsement that deserves the thoughtful attention of every Member of Congress. I ask unanimous consent that the resolution be printed in the RECORD at this point in my remarks.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

MERCHANT MARINE

We pledge our active support to the promotion and maintenance of a strong, well balanced, privately owned and operated U.S. merchant marine to provide the shipping services essential to our industry, agriculture and commerce in time of peace, capable of implementing our international policies and ready to serve our national security in time of war.

We strongly urge that U.S. industry voluntarily patronize American-flag ships in order to assist in developing and strengthening the American merchant fleet.

We commend the chairman of the Joint Chiefs of Staff for his forthright declaration of the continuing need for an American merchant marine for the defense of our Nation; and the maritime industry for its efforts to demonstrate that in addition to its defense role, the industry makes a substantial contribution to the economic welfare of our country.

We affirm our support of the 50–50 law requiring that at least 50 percent of the cargoes generated by the U.S. Government should be transported in U.S.-flag ships to the extent they are available at reasonable rates.

We reaffirm our support of the basic principles and procedures of the 1936 Merchant Marine Act and its program of Federal support, based upon the principles of parity and of essential trade routes operated by American companies which are domiciled, owned and controlled in the domestic areas which they serve.

We condemn certain practices of foreign nations, which discriminate directly or indirectly against American-flag shipping and we urge increased effort by the Department of State to seek their elimination.

We commend the efforts being made by industry and the administration, with congressional support, to begin the largest peacetime vessel replacement program in our history and we urge adequate appropriations by the Federal Government so as to insure that, when combined with private investment, there will be sufficient funds to maintain an orderly and economic replacement schedule.

We recommend an expanded Government research program on ship design, ship propulsion and port facilities so that the latest and best information will be available to various segments of the American merchant marine.

We recommend that, in the event of mobilization, the merchant marine be placed under the jurisdiction of the Maritime Administration so that the experience and knowledge of the management of privately owned steamship companies may be effectively utilized.

We support the U.S. Government policy of encouraging effective steamship conference for the purpose of insuring rate stability, and fair and equal treatment of shippers and receivers in international commerce.

We also endorse the principle that such steamship conferences, to be effective and to meet the competition of nonconference steamship lines unwilling to accept the responsibilities of conference membership, must be permitted to continue entering into reasonable contractual arrangements with shippers and receivers tying together the parties to the contract.

AUTHORITY FOR PRESIDENT OR PRESIDENT PRO TEMPORE OF THE SENATE TO SIGN BILLS DURING RECESS OR ADJOURNMENT OF THE SENATE

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President of the Senate or the President pro tempore be authorized to sign bills during the recess or adjournment of the Senate.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

INVESTIGATION BY COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 49, Senate Resolution 27.

The PRESIDING OFFICER. The resolution will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A resolution (S. Res. 27) authorizing the Committee on Interstate and Foreign Commerce to investigate certain matters within its jurisdiction.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the resolution (S. Res. 27) authorizing the Committee on Interstate and Foreign Commerce to investigate certain matters within its jurisdiction, which was reported from the Committee on Interstate and Foreign Commerce with an amendment, and subsequently reported from the Committee on Rules and Administration without additional amendment.

The amendment of the Committee on Interstate and Foreign Commerce was, on page 3, line 4, after the word "exceed", to insert "$225,000", so as to make the resolution read:

Resolved, That the Committee on Interstate and Foreign Commerce, or any duly authorized subcommittee thereof, is authorized under sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdictions specified by rule XXV of the Standing Rules of the Senate, to examine, investigate, and make a complete study of any and all matters pertaining to—

(1) interstate commerce generally;
(2) foreign commerce generally;
(3) maritime matters;
(4) interoceanic canals;
(5) transportation policy;

(6) domestic surface transportation, including pipelines;
(7) communications;
(8) Federal power matters;
(9) civil aeronautics; and
(10) fisheries and wildlife.

SEC. 2. For the purposes of this resolution the committee, from February 1, 1959, to January 31, 1960, inclusive, is authorized (1) to make such expenditures as it deems advisable; (2) to employ, upon a temporary basis, technical, clerical, and other assistants and consultants: *Provided*, That the minority is authorized to select one person for appointment, and the person so selected shall be appointed and his compensation shall be so fixed that his gross rate shall not be less by more than $1,200 than the highest gross rate paid to any other employee; and (3) with the prior consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1960.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $225,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, what is the pending question?

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Committee on Interstate and Foreign Commerce to the resolution.

Mr. MAGNUSON. Mr. President, this is a resolution authorizing the Committee on Interstate and Foreign Commerce to investigate certain matters within its jurisdiction, and providing funds for the operation of the committee.

The resolution was reported from the committee unanimously, with a quorum present. Some members were not present, but I have had no indication from those members of any opposition to the amount of money for which we have asked.

The ranking Republican member of the committee, the Senator from Kansas [Mr. SCHOEPPEL], and I appeared before the Committee on Rules and Administration and submitted a long and detailed statement concerning the work of the Committee on Interstate and Foreign Commerce and the anticipated work for the coming session. Without burdening the Senate by reading the entire report, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks a letter addressed to the Senator from Missouri [Mr. HENNINGS], chairman of the Committee on Rules and Administration, and signed by myself on behalf of the Committee on Interstate and Foreign Commerce, setting forth not only the jurisdiction of the committee, but all of the anticipated work.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON INTERSTATE
AND FOREIGN COMMERCE,
January 28, 1959.

Hon. THOMAS C. HENNINGS, Jr.,
Chairman, Committee on Rules and Administration, U.S. Senate, Washington, D.C.

DEAR CHAIRMAN HENNINGS: Senate Resolution 27 is now before your committee for consideration and action. This resolution would authorize the Committee on Interstate and Foreign Commerce to expend not more than $225,000 between February 1, 1959, and January 31, 1960, upon studies and investigations of any and all matters within its jurisdiction. This is the same amount that was granted under Senate Resolution 224, 85th Congress, 2d session, which authority expires on January 31, 1959, with unexpended funds in the amount of approximately $40,680.

During the 2d session of the 85th Congress, the Committee on Interstate and Foreign Commerce approved 56 of the 109 bills submitted to it, and the Senate passed 51 of them, 2 of which were vetoed. Forty-three of these measures were signed into law by the President.

During 1958, the committee held 126 days of open hearings and 27 executive meetings. Fifteen major and 574 routine nominations were reported and confirmed.

The Committee on Interstate and Foreign Commerce, in accordance with section 136 of the Legislative Reorganization Act, has the responsibility of exercising continuous watchfulness of the execution by the administrative agencies concerned of any laws, the subject matter of which is within the jurisdiction of such committee. This committee has legislative jurisdiction over a greater number of quasi-judicial agencies than has any other committee; in fact, six of these arms of Congress come under the jurisdiction of the committee. They are: The Interstate Commerce Commission; the Federal Communications Commission; the Federal Trade Commission; the Civil Aeronautics Board; the Federal Power Commission; and the Federal Maritime Board.

In addition to these quasi-judicial boards and commissions, our responsibility to legislatively oversee certain of the agencies in the executive branch of the Government is a major one. Practically all of the activities of the Department of Commerce, for example, are within the jurisdiction of this committee. To a lesser degree, this committee finds within its jurisdiction matters which are the concern of the State, Treasury, Defense, Agriculture, and Interior Departments, and the General Services Administration.

With respect to the foregoing, some examples of such jurisdiction would be international air agreements, the Coast Guard, Military Air Transport Service, Military Sea Transport Service, transportation of farm commodities, fisheries, and transportation of Government freight. The committee also shares with the Committee on Armed Services jurisdiction over the Panama Canal.

I am listing below a brief summary of anticipated activities of the committee:

SURFACE TRANSPORTATION

Surface transportation, like other forms of transportation, will be faced with many problems in Alaska. We also expect requests for legislation that would allow the ownership of one form of transportation by a competing form, i.e., railroad ownership of trucklines. In addition, hearings may be necessary to legislatively oversee the effectiveness of the Transportation Act of 1958, the first major overhaul of railroad and truck legislation in many years. We are informed the Interstate Commerce Commission will submit at least 11 legislative proposals for introduction.

COMMUNICATIONS

During the last Congress, extensive hearings were held on the many problems presented to us by the communications industry. This committee appointed a special ad hoc committee of outstanding experts to look into the allocation of TV channels. Its report has been received, is now being studied by the FCC, and we expect their comments shortly. The UHF-VHF problem will unquestionably need further hearings.

The "FCC Network Study" (1,485 pages) recommending considerable change in TV regulation is completed, and specific recommendations from it will come to the committee this session. Subscription, or pay TV will be before us again, and bills have already been introduced on this controversial subject.

Television network practices are under continuing study. A staff report has been issued on this subject and forwarded to the FCC and the Department of Justice. When the comments from these agencies are received, the committee can proceed with whatever legislation is proposed.

In the summer of this year, an international conference on international frequency allocations will be held. No change has been made in these allocations since 1947. This committee will be heavily involved in this proceeding.

We anticipate hearings on legislation concerning communications common carriers in the domestic and international fields. Over 16 years ago, Congress issued a mandate requiring Western Union to divest itself of its international operations. For a variety of reasons, this company has not been able to accomplish this divesture. Legislation may be necessary which will entail exhaustive hearings.

On January 27, 1959, we opened hearings on S. 12, the educational TV bill. Unless some action is taken in this field by the Federal Government, we are endangering the channels reserved for this purpose.

Just recently the FCC declared TV boosters illegal, an action that some claim will take away the benefits of TV reception from many of our small communities, and people living in fringe-reception areas. Yesterday, the Commission extended the time for compliance from 90 days to 6 months, and announced they would again study the legal and technical aspects of boosters. Almost at the same time the original order was issued, this committee issued a staff report on "The Problem of Television Service for Smaller Communities." Specific recommendations for action by the FCC were made. It is our intention to hold hearings on this problem as soon as possible. Certainly we should be sure that television is made available to all who want it.

AVIATION

Last year the President vetoed the airport-aid bill. This legislation has been reintroduced (S. 1) and hearings started January 22, 1959. The competition of military transportation with commercial airlines must be investigated, and the vexing problem of the awarding of international air routes to foreign carriers, a sort of continuous giveaway, must again be looked at. Our international air policies may need an overhaul.

MERCHANT MARINE

Preservation and updating of the Nation's privately owned commercial ocean fleet, subsidized and unsubsidized, will be a major matter for consideration and action. The President's budget for 1960 recommended review and (if needed) modernization of the national maritime policies set down in the 1936 act, with reference to such basic questions as subsidies, useful life of vessels and

transfers to foreign registry. Any Department of Commerce proposals in any of these fields will require lengthy public hearings and committee decisions of vital importance to the future of American shipping.

Meanwhile, with bulk cargoes now totaling nearly 75 percent of the country's total foreign trade, something must be done, promptly, to provide incentives for replacement and strengthening of our remaining fleet of bulk vessels, which are presently inadequate for immediate, let alone future or emergency needs.

As a corollary proposition, the desirability of Government's participation, through mortgage insurance, in needed modernization of port facilities to keep step with technical improvements in ship construction and cargo handling, requires committee attention.

Provision for increased safety on the Great Lakes, through requirements for the use of experienced pilots on all vessels navigating U.S. waters thereon, must have immediate attention, in advance of the opening of the St. Lawrence Seaway this summer to vessels of 27-foot draft.

Further utilization of atomic propulsion units for commercial vessels is of the highest importance, as is the need for an atomic icebreaker to advance this country's knowledge of, and security in, the Arctic regions.

The 85th Congress enacted a stopgap bill preserving for 2 years conference dual rates in the foreign, oceanborne commerce of the United States. It is imperative that this field of regulation, untouched for 40 years, be reexamined and revised where necessary in the 86th Congress.

A bill providing for licensing and the terms of payment of foreign freight forwarders was received from the House too late for complete study in the 85th Congress. This field of cargo expediting has been the source of heated controversy for many years and requires committee study.

All industries in any way associated with the merchant marine have expressed their unanimous support for a consolidation of the shipping and maritime statutes. Consistent with the President's budget for 1960, such a program would include a reevaluation of the policies and objectives expressed in the various laws presently governing American ocean shipping.

During the adjournment following the 85th Congress, the committee began an initial investigation of the costs of shipping through the various west coast ports, to be followed by a study of east and gulf port costs, if necessary. Completion of the study in the 86th Congress will considerably enhance legislation directed at improving port facilities and encouraging increased use of commercial docks by military shipping.

BOARDS AND COMMISSIONS

We anticipate legislation to make the terms of office of the members of these agencies uniform as to expiration, so that all under our jurisdiction remain in office until their successor has been nominated and qualified, allow all such agencies to elect their chairman as some do now, and to spell out a workable code of ethics.

ALASKA

The advent of the 49th State into the Union will create problems in all of the fields for which this committee holds responsibility. As an example, transportation will now be regulated in the State of Alaska, but the sole railroad operating there is owned by the United States, and is not regulated. Joint rail-water rates, and jurisdiction over them, will necessitate considerable study.

FOREIGN COMMERCE

It is the intent of the committee to continue to evaluate the work of the Department of Commerce and other agencies in the field of foreign commerce. It appears that over 80 percent of the firms which utilize the services of the Department of Commerce are small businessmen who cannot afford export departments to aid them in the conduct of trade abroad. The committee is of the opinion much more can be done to promote the sale of American products overseas.

We would like to stimulate a hard, all-out competition for world markets, and thereby increase our exports, so necessary to the economic welfare of our country. We should understand that we are in an all-out fight in this field, a fact first pointed out by Khrushchev on October 19, 1957, when he said, "We declare war upon you in the peaceful field of trade. We declare war. We will win over the United States. The threat to the United States is not the ICBM, but in the field of peaceful production. We are relentless in this, and it will prove the superiority of our system." Just yesterday Mr. Khrushchev was quoted in the daily papers to the same effect under the headline "Khrushchev Outlines Economic Offensive." The article points out that a campaign for the economic conquest of the West has been launched.

In addition, we expect the Federal Power Commission to submit proposed legislation dealing with both the Federal Power Act, and the Natural Gas Act.

The workload of the Interstate and Foreign Commerce Committee is extremely heavy and covers a range of important subjects, vital to the well-being of our Nation. Our plans, as outlined above, plus the additional legislation that will be referred to the committee from the Senate will determine our workload. In view of our wide jurisdiction and the essential volumes of work it involves, we believe our request is a modest one.

Sincerely yours,

WARREN G. MAGNUSON,
Chairman.

Budget of the Committee on Interstate and Foreign Commerce to investigate certain matters under its jurisdiction pursuant to S. Res. 27, for the period of Feb. 1, 1959, through Jan. 31, 1960

Position	Number	Base salary (per annum)	Gross salary (per annum)	Monthly salary (gross)	Total for period of budget (gross)
STAFF					
Professional staff members in following general fields:					
Aviation, fisheries and wildlife, merchant marine and Coast Guard, MATS-MSTS study, auto-marketing practices, general transportation, television inquiry, and communications.	5	$8,000	$14,979.45	$1,248.28	$74,897.25
	1	6,000	11,709.76	975.81	11,709.76
	1	5,520	10,925.02	910.41	10,925.02
	1	4,680	9,466.33	788.86	9,466.33
	1	4,620	9,358.42	779.86	9,358.42
	1	4,200	8,568.87	714.07	8,568.87
	1	4,080	8,342.80	695.23	8,342.80
Clerical staff:					
	1	4,200	8,568.87	714.07	8,568.87
Clerical assistants and stenographers	2	2,940	6,195.07	516.25	12,390.14
	1	2,580	5,516.84	459.73	5,516.84
	1	2,460	5,290.76	440.89	5,290.76
	1	2,100	4,612.55	384.37	4,612.55
Clerk-messenger	1	1,920	4,273.42	356.11	4,273.42
Total	18				173,921.03
ADMINISTRATIVE					
Contribution to civil service retiremend fund (6½ percent of total salaries)					11,399.68
Travel (inclusive of field investigations)					15,000.00
Hearings (inclusive of reporters' fees)					10,000.00
Stationery, office supplies					1,000.00
Communications (telephone, telegraph, postage)					3,000.00
Newspapers, magazines, documents					200.00
Contingent fund					10,479.29
Total administrative expense					51,078.97
Total S. Res. 27					225,000.00

Mr. MAGNUSON. Also, I should like to submit for the RECORD a brief summary of the Government activities under the jurisdiction of the committee, in connection with the 1960 budget requests, which total some $2,581,499.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

Government activities under the jurisdiction of the Senate Committee on Interstate and Foreign Commerce—1960 budget requests

ACTIVITY AND AMOUNT	
1. Department of Commerce, including—	
(a) General administration	$2,940,000
(b) Civil Aeronautics Board	70,118,000
(c) Coast and Geodetic Survey	14,100,000
(d) Business and Defense Services Administration	6,030,000
(e) Area assistance activities	55,000,000

Government activities under the jurisdiction of the Senate Committee on Interstate and Foreign Commerce—1960 budget requests—Continued

ACTIVITY AND AMOUNT	
1. Department of Commerce, including—Continued	
(f) Bureau of Foreign Commerce	$6,632,000
(g) Office of Business Economics	1,405,000
(h) Maritime activities	278,816,000
(i) National Bureau of Standards	19,215,000
(j) Weather Bureau	51,855,000
Total	506,111,000
2. Federal Aviation Agency	602,400,000
3. U.S. Coast Guard	260,300,000
4. Interior Department—Fish and Wildlife Service	68,055,000
5. Panama Canal	22,030,000
6. Federal Communications Commission	11,000,000
7. Federal Trade Commission	6,975,000
8. Federal Power Commission	7,478,000

Government activities under the jurisdiction of the Senate Committee on Interstate and Foreign Commerce—1960 budget requests—Continued

ACTIVITY AND AMOUNT	
9. Interstate Commerce Commission	$20,150,000
Grand total	1,504,499,000
10. MATS (1956)	596,000,000
11. MSTS (1956)	481,000,000
Total	2,581,499,000

(NOTE.—The committee is also directly concerned with activities of the Department of Defense (MSTS, MATS), Department of State (foreign trade promotion), National Advisory Committee for Aeronautics, and other operations.)

Mr. MAGNUSON. Certain other activities are set forth in the report, including activities in connection with the automobile-marketing field, and the entire problem of surface transportation, maritime fisheries, communications, trucks, railroads, buslines, the Coast Guard, boards, and Commissions, including, as the present occupant of the chair well knows a proposed inquiry into certain aspects of our foreign trade, which is under the direct jurisdiction of our committee.

We think we have asked for a modest sum. The record of the committee will show that whenever we have not found it necessary to proceed with certain inquiries and studies we have turned a part of the money back. Every year we have turned back a portion of the amount for which we have asked.

I believe the present request is modest. In the maritime field alone we must investigate the entire problem of dual rates, which the Supreme Court declared to be technically illegal last year.

A study is long overdue relating to the consolidation and codification of maritime laws, which has never been done.

The committee has under its jurisdiction the opening of the St. Lawrence Seaway and the entire problem of communication and navigation on the seaway, as between Canada and the United States, including the activities of pilots.

We have a port facility and rate study under way, which would include some problems in the new State of Alaska.

In the field of communications it seems that the problems are never ended.

Many Senators have been vitally concerned with the problem of booster stations, particularly in the West, where television cannot operate to the benefit of smaller communities.

There is a long-standing problem, which will require a great deal of the time of the committee, in connection with the question of mergers of international common carriers, involving a new cable across the Atlantic. That will require legislation.

We have the continuing problems in connection with the regulation of broadcasting networks. The airport-aid bill has passed the Senate, but that subject is under our jurisdiction.

We had the problem of MATS versus commercial airlines, and the entire question of international air policies, which have a great effect upon our commercial system.

Under Senate Resolution 29, next on the calendar, the committee would be directed by the Senate to make a complete study and inquiry into the entire field of surface transportation.

Considering the jurisdiction of the committee over all the agencies I have mentioned, in connection with a budget of $2,581,499,000, I believe that we have asked for a very modest sum.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. ELLENDER. Is the Senator advocating the theory that since his committee has jurisdiction over agencies which spend $2½ billion, then that justifies the $225,000 he is asking?

Mr. MAGNUSON. Yes.

Mr. ELLENDER. Then the Senator's committee expects to look into the expenditure of $2½ billion by these agencies?

Mr. MAGNUSON. We do it all the time.

Mr. ELLENDER. Last year the Senate granted $225,000 for that purpose to the committee. Yet, the committee spent only $182,886. To what extent did the committee go into the expenditure of the moneys appropriated by the Congress for the various agencies?

Mr. MAGNUSON. We make constant inquiries into the Federal Trade Commission, the Federal Communications Commission, and the Interstate Commerce Commission. We all remember the excellent work the Senator from Oklahoma did with respect to the marketing of automobiles. We used some of the money to look into the policy of automobile marketing. Finally we brought out proposed legislation to compel the manufacturers of automobiles to put detailed price lists on automobiles.

We continually look into all the Commissions. Hardly a month goes by that we do not have to consider the reappointment of an official or the nomination of an official of one of these Commissions. We must have our staff look into all these questions. We must look into how the Commissions are spending their money, and many times we must direct them in their respective fields.

For example, the Senator from Louisiana has joined me, unofficially, in starting an inquiry into the Federal Trade Commission. The Senator has been interested in that subject. It deals with the price of drugs. I do not know at the present time how much money we have saved the people of the United States by that inquiry alone.

Every time a Commissioner is appointed or reappointed, we must look into his qualifications. A staff must investigate all of these matters. Our committee considers 78 percent of all the nominations that are sent to the Senate for confirmation.

Mr. ELLENDER. What does the committee's regular staff do? How many staff members does the committee have now?

Mr. MAGNUSON. I will file the exact number in the RECORD.

Mr. ELLENDER. Under the Reorganization Act the committee is authorized to employ four professional staff members and six clerical assistants.

Mr. MAGNUSON. Yes.

Mr. ELLENDER. Is it not a part of their duty to investigate matters connected with nominations, and to do similar work?

Mr. MAGNUSON. It is a part of their duty to do the best they can. For example, we are now considering the nomination of the new Secretary of Commerce. Our committee is looking into that matter. It would take a little FBI organization to run down information of the kind that must be looked into. We do not have the people to do it. Our people are doing the very best they can. All of them are kept busy. There are countless items of that kind which must be looked into. I will put into the RECORD the exact number of people employed by the committee.

Mr. ELLENDER. The resolution asks for $225,000.

Mr. MAGNUSON. That is what we had last year.

Mr. ELLENDER. Last year the committee expended $182,886.32.

Mr. MAGNUSON. That is correct.

Mr. ELLENDER. Why does the Senator ask for more than the committee spent last year?

Mr. MAGNUSON. Because I cannot anticipate fully exactly what we will have to spend this year. Last year we went into the textile matter. A study was made by a group headed by the Senator from South Carolina and the Senator from Rhode Island. Then along came the fall, and everyone became very busy, and the Senator from Rhode Island had to go into a campaign for reelection. Therefore we did not spend as much money as we thought we would spend during last year. We are now continuing that textile inquiry. We held hearings on the textile labeling bill, and that took almost $9,000 in expenditures merely for the reporting of the hearings.

Mr. ELLENDER. I am sure money for that purpose is provided by the committee.

Mr. MAGNUSON. Yes; but we do not have enough money.

Mr. ELLENDER. The subcommittee can always come to the Senate for more money.

Mr. MAGNUSON. That is what we are doing today.

Mr. ELLENDER. Why can the regular staff not handle such problems?

Mr. MAGNUSON. The regular staff, under the Reorganization Act, of which the Senator from Oklahoma [Mr. MONRONEY] was one of the authors, could not possibly handle all that work in our committee, and every member of the committee knows that to be a fact.

Mr. ELLENDER. Our good friend from Oklahoma knows all about the Reorganization Act. He is one of the authors of it. It merely seems to me that the costs which have been added to the operation of Congress in recent years are unconscionable.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. ELLENDER. As of this date—and I am informed that we have not seen the end of these requests for addi-

tional funds to conduct special investigations by various subcommittees—if the Senate approves these two resolutions before us today we will increase the total authorizations for this purpose during this session of Congress by $4,082,000. A few weeks ago I complained about the huge amount of money which has been allocated to the Committee on the Judiciary for special investigations to be conducted by its many subcommittees. That committee, as well as the Committee on Interstate and Foreign Commerce and any other major committee, has a regular stipend allotted to it of one hundred twenty-and-some-odd-thousand dollars. With the funds it can employ four professional staff members and six clerical assistants. In addition, each of these committees receives $10,000 to pay for printing and carrying on of hearings. I could well understand, if the Senator's committee needs more money with which to hold hearings, that it would be appropriate to grant additional money, because practically all of the committees do get additional money for that purpose. However, in this instance, I wish to point out to my good friend from Oklahoma that during this Congress—and we are not through by any means—the two resolutions before us would raise the total amount authorized for special hearings to $4,082,000, in contrast to the total last year of $3,708,500, for these identical investigations.

Mr. MONRONEY. Will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. MONRONEY. We have come to the floor of the Senate to show that we did not spend all the money that was allocated to us last year. We were frugal and economical. We doubled up wherever we could on the joint use of the staffs on many hearings. Although we did all that, the Senator from Louisiana now says, "Because you did save some $40,000 for the Government, we do not dare trust you with the money you ask for now, which is $225,000."

I ask the Senator not to charge us with $4 or $5 million of expenditures. I remind the Senator that our committee is the basic business committee of the Senate.

Every major part of our transportation industry and our communications—whether it be telephone or telegraph or radio or television—and our railroads and airlines and trucklines—almost every facet of this great Nation's flow of commerce comes before our committee. We could, of course, bring to the Senate bills on which no hearings had been held—bills unheard of or unsung, so to speak—and ask the Senate to pass such bills. On the contrary, we have always tried to bring to the floor bills on which full hearings have been held. I call attention particularly to the fact that, as the RECORD will show, about 90 percent of the bills we have brought to the floor were passed almost without opposition. A great deal of good has come to the consumer as the result of our efforts. As has been mentioned, for example, a great deal of good flowed to the consumer as the result of the automobile pricing law. We have brought to the Senate bills to help rehabilitate the railroads. The $225,000 is a very small percentage in proportion to the two dozen or so types of industries which the committee has in charge so far as legislation is concerned. We hear all about their problems and try to bring about some sensible solutions.

Mr. ELLENDER. Does the Senator mean to say that the investigations are brought about by complaints on the part of some people; or just how does the committee handle these matters?

Mr. MONRONEY. I can say that all with which I have been connected—and I am sure this is also true of those with which the chairman of the committee has been connected—have been investigations which have been urged for a period of time. We take preliminary steps, and, if the facts warrant it, a full-dress investigation is made. That was the case in the automobile industry, where we uncovered abuses in the small business field. Those abuses were eliminated completely by the committee's action. Last year that cost about $10,000. I venture to say that the results have been worth hundreds of millions of dollars to little business.

I would say that the results of the savings from the automobile pricing act have saved upwards of a billion dollars in the case of automobile purchasers.

These things do not come about accidentally. They come about as a result of hard staff work. They come about as a result of great concentration and effort.

When we wrote into the Reorganization Act the provision that each committee may employ four staff experts, we realized that there would be some variations with respect to the workload of the various committees. I serve on committees which do not need even two experts. I am sure the Senator has found that to be true from his experience.

It should be remembered also that our workload has been increased, and the Senate took note of it last month when it increased the membership of our committee. That alone is evidence of the increase in the workload of our committee.

The Senate would indeed be penny wise and dollar foolish if it expected our committee to do less than good staff work. The only way we can get good staff work done is by employing competent attorneys who know the law and who understand the problems and who are able to advise the members of the committee. They must help us draft legislation to bring about a correction of the abuses we find to exist. The Senator knows, I am sure, that we cannot get lawyers in Washington to work for the Government for $5,000 a year.

Mr. ELLENDER. If every committee were to pursue that course, we would have to apropriate three times as much as we have appropriated in the past. I am just wondering about the necessity of it all.

Mr. MONRONEY. I am saying that it is necessary to have someone who studies all the hearings to know what the requirement is.

Mr. ELLENDER. In addition, there is another resolution pending before the Senate which seeks to have $290,000 appropriated for the use of this committee, or a total of $515,000 for various investigations.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. MAGNUSON. This is for the general work of the committee. The other resolution pertains to another matter. I shall be glad to discuss it with the Senator from Louisiana when it is called up.

Mr. ELLENDER. I point out that in addition to the regular amount which is authorized to operate the committee, it is proposed to authorize additional funds for these two subcommittees.

Mr. MAGNUSON. If the Senator will defer that matter until we come to it, I shall explain it then; and if he wants to vote against it, he may do so. The investigation to be conducted under the next resolution was directed by the Senate, not by the committee itself, and I think the Senator from Louisiana voted for the investigation.

Mr. ELLENDER. The committee of which the distinguished Senator from Washington is the chairman is a close competitor, in the use of money, with the Committee on the Judiciary. I think the Senator once served on the Committee on the Judiciary.

Mr. MAGNUSON. Yes.

Mr. ELLENDER. Believe it or not, as I have pointed out, the Committee on the Judiciary, of which my good friend, the distinguished Senator from Mississippi [Mr. EASTLAND], is the chairman, leads all other committees in the amount of extra money spent for special investigations. The Committee on the Judiciary, aside from the $156,000 it receives to pay its regular staff, has been authorized to spend almost $1,400,000.

The Committee on Interstate and Foreign Commerce, of which the Senator from Washington is the chairman, will be a close second to the Committee on the Judiciary, if the entire amount requested here today is allowed. The $225,000 which is requested in the pending resolution and the $290,000 requested in the resolution to follow make a total of $515,000, aside from the $126,000, as I recall the amount, which is provided for each standing committee.

I think some of these investigations should be curtailed. But since we are now providing fine new offices for special committees, I suppose we may expect them to grow in number, rather than to diminish. The new Senate Office Building provides from five to six rooms for each Senator, and extra rooms for the special committees. The special investigating committees and subcommittees will find their quarters so nice, I presume, that they will try to perpetuate themselves, as has been done for the past 20 years.

I have often pointed out to the Senate that in 1940 the total amount which was spent for investigations did not exceed $140,000. The amount which was spent by each standing committee was about half the amount it gets now. But

in the field of special investigations, this year we have already provided for more than $4 million, in contrast with the $3,708,000 provided for these identical investigations last year. And we are not finished yet. Mark what I am saying, many more resolutions will come before the Senate to augment the current sum of $4,082,000 to authorize investigations during the first session of this Congress.

Mr. JAVITS. Mr. President, I intended to ask some questions of the distinguished Senator from Washington, who is chairman of the committee, rather than to seek the floor myself. But I must be off to a session of the Committee on Labor and Public Welfare, so I hope he will forgive me if I take a minute or two to ask him some very burning questions.

Mr. MAGNUSON. Very well.

Mr. JAVITS. They do not relate to the resolution now being considered; they relate to the next resolution. That is why I intended to seek the floor in my own right. The questions concern commuters. There is a real, serious crisis in the whole commuter business around New York, the State which I have the honor, in part, to represent. New York has most of the commuters of the Nation. There are 370,000 daily commuters to New York City alone. All of them are working people, most of them the heads of families. They are in very grave danger right now of losing a very large part of the service on which they depend. I note with satisfaction that the committee of which the distinguished Senator from Washington is the chairman intends to have this problem considered by the special committee which is proposed.

I refer to the letter to the chairman of the Committee on Rules and Administration, which discusses a study of the problems of commuter service as an integral part of the policy consideration of the kind and amount of railroad passenger service necessary to serve the public and provide for the national defense.

Our problem is that the horse may have died long before any further action can be taken. The problem stems from the debate on the Transportation Act, which was enacted only last year. In that act, the Senator from Washington will recall, Congress allowed, for the first time, discontinuances of commuter services standing by themselves; that is, each commuter service standing on its own feet instead of in the context of the whole railroad system.

The Senator will remember that I fought against that, because I thought I saw what was coming. I was unhappily overruled at that time. But now there has already been discontinued in the State of New York a piece of railroad called the Putnam Division of the New York Central Railroad. Also, there has just been a decision by the Supreme Court affirming the discontinuance by the Delaware, Lackawanna & Western Railroad of a ferry carrying passengers between New Jersey and New York.

The distinguished senior Senator from New Jersey [Mr. CASE], who is not in the Chamber at the moment, has been fighting the battle very manfully as a member of the Committee on Interstate and Foreign Commerce and is trying very hard to get something done to remedy this condition.

Drastic remedies will have to be used to maintain the commuter service, outside of bankrupting the railroads themselves. Money must be found to continue the commuter service. That service is highly essential to the business of my home city. It is essential to the transportation of important people. It is essential to the growth and development of the suburbs, which are very desirable from the point of view of the country, and essential to the national defense.

I have risen to ask a question on the assumption that an urgent crisis confronts the commuters of the Nation. I am delighted to see in the Chamber the distinguished Senator from Florida [Mr. SMATHERS], who has led the subcommittee with respect to this matter. My question is: Can we expect that the committee which undertakes the special investigation will address itself on a crash basis to the matter of commuter service? Whatever one may think about the advisability of the Transportation Act, or its inadvisability, the fact is that the commuter service is in a serious crisis. It is getting hurt, and badly hurt. We cannot wait. Therefore, the body which gave birth to the power in the Interstate Commerce Commission to allow discontinuances should also give birth to some remedies of the crisis which has been brought about by those in authority in the ICC.

Will the Senator from Washington be so kind as to give me some information?

Mr. MAGNUSON. I appreciate the deep interest which the Senator from New York has in this matter, as well as in many others which come from the congested areas. Chicago has the same problem. So has New Jersey.

Last year, when Congress passed the broad Transportation Act, which required weeks and months of hearings, which were presided over by the Senator from Florida [Mr. SMATHERS], we went into the commuter problem to the extent that we said to the railroads that they could do something about the situation themselves, rather than to have the State commissions hold up the discontinuance of some services. But we never suggested that those services should be abandoned when a State commission had unanimously said to the Interstate Commerce Commission that such service was vital and necessary. The Interstate Commerce Commission has not so acted.

But in order to provide for the so-called crash program for the railroads last year, Congress passed a broad transportation act, the Transportation Act of 1958.

In the bill, S. 3778, the Senate directed that other things be done, since this was an emergency program. It permitted guaranteed loans to be made to railroads, and provided many other necessary amendments to the Interstate Commerce Act. It was provided also in the report on the bill that the Committee on Interstate and Foreign Commerce should proceed, as was stated in the speech made today by the Senator from South Carolina, to look at the whole surface transportation problem, especially as it pertained to the railroads. The Senate unanimously directed the committee to make such an investigation in Senate Resolution 303. Obviously, the committee could not do that without extra help. At its last meeting in August, before Congress adjourned, the committee decided to wait until this year and then to go into the matter in some detail. Hence a resolution was submitted which is substantively the same as Senate Resolution 303 adopted by the Senate last year, asking the Committee on Rules and Administration to authorize the funds.

The Senator from New York will note that the authorization provides seven fields in which we would generally examine transportation problems. The Senator from New York will see that number 5 relates to policy considerations "for the kind and the amount of railroad passenger service necessary to serve the public and to provide for the national defense"—which is very important. We found, for instance, that no one had yet figured out—and I direct the attention of the Senator from Illinois to this matter—how railroad cars would be transported from Texas to Pennsylvania, in the event that the Chicago railroad yards were bombed. Likewise, we found that consideration was needed in the case of similar problems relating to the national defense.

The Senator from Florida and the Senator from Kansas, who is not present at this time, spent weeks on the study and inquiry to bring us up to date, in order to determine whether we could help our entire transportation system, including the railroads, to be strong. If the pending resolution is agreed to, that will definitely be a part of our intention. I think the Senator from Florida can answer more fully on that point.

Mr. JAVITS. I am attempting to make clear to my colleagues that an emergency has developed. In my opinion, that has occurred because of the new authority given by the Transportation Act which Congress passed last year. Therefore, in view of the fact that that problem has developed, as some of us anticipated, following the enactment of the proposed legislation which was reported by the same committee, I believe we are entitled to have the same committee take promptly the action I have called for. I believe we are entitled to crash attention to the proposed legislation which has been submitted.

I have introduced proposed legislation, and so has the Senator from New Jersey [Mr. CASE], asking the agency to go slow in these instances.

It seems to me that we are entitled to have action taken promptly in order to do something at the commuter level for the railroads; and I believe we are entitled to have a review made of the authority which recently has been given to the Interstate Commerce Commission, under the new Transportation Act.

The fact is that communities and people are being hurt right now; and they cannot wait for long study and long de-

liberation. They are entitled to emergency consideration of pending legislation or newly proposed legislation which is needed in order to deal with their situation. It is that for which I am pleading to the chairman of the committee.

So, Mr. President, I hope to obtain a reply from my colleague, the Senator from Washington [Mr. MAGNUSON] or from my colleague, the Senator from Florida, as to what we can expect by way of prompt consideration of proposed legislation to deal with this particular subject.

Proposed legislation of this sort is now before the Committee on Interstate and Foreign Commerce. Of course, I cannot make that committee reply. Perhaps the committee will wish to think over the matter and determine what it can do.

But let me assure the committee that in the case of Federal taxation, loans, and perhaps even direct financial aid, it can do something to help in this situation; and I strongly urge the committee to do it promptly. I feel that this is a proper place and a proper time—now that the subject is raised, in connection with a proposed investigation—to request such action.

The people in my community and the people in all other commuter areas have a right to ask for action by the Congress; and they lay their troubles at the door of this Transportation Act. Let us make no mistake about that.

I join them in that position; and I hope very much that prompt action will be taken by the committee.

The PRESIDING OFFICER (Mr. DODD in the chair). The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the resolution as amended.

The resolution (S. Res. 27), as amended, was agreed to.

STUDY OF TRANSPORTATION POLICIES IN THE UNITED STATES

Mr. MONRONEY. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 50, Senate Resolution 29, which provides for a study of transportation policies in the United States.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oklahoma.

The motion was agreed to; and the Senate proceeded to consider the resolution (S. Res. 29) providing for a study of transportation policies in the United States, which had been reported from the Committee on Interstate and Foreign Commerce with an amendment, and subsequently reported from the Committee on Rules and Administration without additional amendment.

Mr. MAGNUSON. Mr. President, Calendar No. 50, Senate Resolution 29, deals with a separate matter before the Committee on Interstate and Foregn Commerce. That committee appeared before the Committee on Rules and Administration; and in a letter of January 28, 1959, to the Committee on Rules and Administration, the Committee on Interstate and Foreign Commerce set forth the justification for the study, as directed to the committee by the Congress last year.

We also have submitted to the Committee on Rules and Administration a well-thought-out budget for the type of staff which would be necessary for this very comprehensive and very complex job. I ask unanimous consent that the letter and budget be printed at this point in the RECORD.

There being no objection, the letter and tabulation were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON INTERSTATE
AND FOREIGN COMMERCE,
January 28, 1959.

Hon. THOMAS C. HENNINGS, Jr.,
Chairman, Committee on Rules and Administration, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The purpose of this letter is to transmit a proposed budget to your committee for use in connection with Senate Resolution 29, a resolution providing for a study of transportation policies in the United States.

Late in the last Congress, Senate Resolution 303, a similar resolution, was approved by your committee and, in turn, was approved by the Senate. Due to circumstances beyond our control, only background work has been done under the resolution. Consequently $95,919.20 of the initial $100,000 appropriated under Senate Resolution 303 remains unspent.

It is the opinion of the committee that these important transportation studies should be continued. Sweeping hearings held by the Surface Transportation Subcommittee last year indicate that such action is imperative.

The resolution would authorize the study of any and all matters pertaining to—

1. The need for regulation of transportation under present-day conditions and, if there is need for regulation, the type and character of that regulation;

2. The area of Federal policy dealing with Government assistance provided the various forms of transportation and the desirability of a system of user charges to be assessed against those using such facilities;

3. The subject of the ownership of one form of transportation by another;

4. Federal policy on the subject of consolidations and mergers in the transportation industry;

5. Policy considerations for the kind and amount of railroad passenger service necessary to serve the public and provide for the national defense;

6. The problems arising from action by the Interstate Commerce Commission in permitting the charge of more for a short than a long transportation haul over the same line in the same direction; and

7. Additional matters of Federal regulation (and exemption therefrom) and Federal promotional policy in regard to the various forms of transportation.

High on the agenda of the committee among the foregoing would be a study of Federal policy on the subject of consolidations and mergers in the transportation industry; a study of the problems of commuter service as an integral part of the policy considerations for the kind and amount of railroad passenger service necessary to serve the public and provide for the national defense; and a study of policy considerations relating to the ownership of one form of transportation by another.

The $290,000 requested to carry on the work under Senate Resolution 29 is proposed to be spent as shown in the budget attached.

Sincerely yours,
WARREN G. MAGNUSON,
Chairman.

Budget of the Committee on Interstate and Foreign Commerce to make a study of the transportation policy in the United States pursuant to S. Res. 29, for the period Feb. 1, 1959, through Jan. 31, 1960

Position	Number	Base salary (per annum)	Gross salary (per annum)	Monthly salary (gross)	Total for period of budget (gross)
Professional staff:					
Staff director	1	$8,000	$14,979.45	$1,248.28	$14,979.45
Transportation experts	5	8,000	14,979.45	1,248.28	74,897.25
Transportation lawyers	3	8,000	14,979.45	1,248.28	44,938.35
Transportation economists	4	8,000	14,979.45	1,248.28	59,917.80
Clerical and stenographic:					
Clerks	5	2,040	4,490.50	374.98	22,452.50
Stenographers	8	2,040	4,490.50	374.98	35,924.00
Total					253,109.35
ADMINISTRATIVE					
Contribution to civil service retirement fund (6½ percent of total salaries)					16,452.11
Travel (inclusive of field investigations)					6,000.00
Hearings (inclusive of reporters' fees)					4,000.00
Communications (telephone, telegraph, postage, etc.)					1,500.00
Stationery and office supplies					250.00
Newspapers, magazines, and documents					150.00
Contingent fund					8,538.54
Total administrative expense					36,890.65
Total, S. Res. 29					290,000.00

Mr. MAGNUSON. Mr. President, many persons have been deeply interested in this matter, and have felt that we should even do much more than we intend to do by means of this study. The Senator from Florida, the Senator from Kansas, and I cut almost in half the amount that many persons thought should be a minimum figure. The study will entail a most difficult job. I am convinced it is needed. The Senate was convinced last year that it was needed. The House was convinced it was needed in the last Transportation Act. Although there was enacted what I thought was very well thought out legislation in the field of railroad transportation, railroad financing, and other matters, I think we all appreciated the legislation was of a temporary nature. Railroads were in dire financial trouble. Things look a little better now, but the

whole problem of our national transportation system is involved, as related to the question of mergers, commuter service, ownership of one form of transportation by another and other relevant matters. These problems should be looked into.

I think we have asked for a modest sum. I know of no group that worked harder, spent more time, more hours and weeks, with a very small staff, to bring out a transportation bill, which was hailed by the whole business community, than the group which considered the bill proposed by the Senator from Florida last year. But we did not complete the job. The problem is a continuing one. All of us know the problem of transportation involves national defense and other facets of our economy.

Surely, the Senator from Florida and the Senator from Washington do not particularly like this job. It is not going to be easy. It is going to require much hard work. It is going to mean the same kind of hard work which is done by the Subcommittee on Public Works. We had many witnesses last year. I am willing to wager there will be more this year. The committee is not looking for this job. It decided the job must be done. The job is not glamorous. It will not create newspaper headlines. It will not involve personalities. It will mean hard work and digging for the facts. I think our transportation system is worth that amount of effort.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield the floor.

Mr. ELLENDER. I appreciate the remarks my friend the Senator from Washington has made about the Appropriations Committee's Subcommittee on Public Works. However, I must point out that most of the work of that subcommittee is done by individual Senators, and not by an enlarged staff.

I notice that last year the Committee on Interstate and Foreign Commerce was provided a total of $225,000 and that it expended a total of $182,886. Among the items to be studied was transportation policy. I notice the present resolution provides for a study of transportation policies in the United States.

Why is it necessary to create a separate subcommittee for the study of that subject? If it is necessary, will a portion of the force of the committee for which the Senate provided $225,000 be reduced and transferred to the new subcommittee which will have at its disposal $290,000?

Mr. MAGNUSON. No. The money provided for the committee was for day-to-day problems.

Mr. ELLENDER. Such as what?

Mr. MAGNUSON. Such as amendments to the Interstate Commerce Act, freight rates, the question of whether or not the Interstate Commerce Commission should do this or that, examining into confirmations of nominations—all the day-to-day problems. We have a staff man, and he is now present in the Chamber, who does that work almost singlehanded. The Senator from Florida and the Senator from Kansas will assure the Senator from Louisiana that witness after witness stated this study would merely touch the subject. Many witnesses stated such a study is necessary. The study contemplated would be a broad one. I have in my hand the seven different fields which it would cover. The study could not be done by the present subcommittee.

Mr. ELLENDER. Does any one of the seven points listed for this new subcommittee cover any of the work which was done by the subcommittee to which the Senate provided $225,000?

Mr. MAGNUSON. The studies will not overlap. The committee hopes to use the experts the committee has for the day-to-day work on transportation problems to supervise the personnel to be used in the special study.

Mr. ELLENDER. So the committee plans on using the personnel of the subcommittee which received $225,000 to work on the subcommittee which will receive $290,000?

Mr. MAGNUSON. Yes.

Mr. ELLENDER. Why would the committee do that?

Mr. MAGNUSON. Because the committee has experts who will help the employees in that field.

Mr. ELLENDER. Last year this new subcommittee was allowed $100,000, and it spent only $5,000. Why was the study delayed? Why did not the committee consider it last year?

Mr. MAGNUSON. For the simple reason that the transportation bill, which provided for the inquiry, was not passed until July 30. It was not signed by the President until near the middle of August. Shortly thereafter Congress adjourned. It being a year when many Members were in their home States and quite busy, the committee decided to postpone the study until the beginning of this session.

Mr. ELLENDER. Why was it necessary to wait for the enactment of the bill last year?

Mr. MAGNUSON. Because this resolution was a part of the transportation bill.

Mr. ELLENDER. What about the $100,000 the subcommittee received last year?

Mr. MAGNUSON. The committee did not use it because the committee did not get into a study last year. The committee had no time to go into the question between November and December. The committee had no time to pick a staff. We were unable even to get the committee together. Congress had adjourned. Otherwise the committee would have gone into the matter pretty deeply, and would probably be asking for more money by now. The committee could have justified the request, too.

Mr. ELLENDER. Am I correct in stating that both subcommittees will continue work in the transportation field in some way or other?

Mr. MAGNUSON. The committee has day-to-day problems to consider.

Mr. ELLENDER. I recognize the words the Senator is saying, but for the life of me I cannot understand how there will not be duplication of work. Why is it necessary to provide over a half million dollars——

Mr. MAGNUSON. Because the committee has a transportation expert doing the normal day-to-day work.

Mr. ELLENDER. Why is it necessary to provide that amount of money to study a problem which the committee has supposedly been studying for the past 3 or 4 years? The providing of the amount of $225,000 has been a yearly expenditure for how long now—4 or 5 years?

Mr. MAGNUSON. Yes.

Mr. ELLENDER. And the subjects to be studied, among other things, were transportation policies, for which the committee is now requesting $290,000.

Mr. MAGNUSON. Among the subjects the committee has to study are:

Interstate and foreign commerce generally.

Regulation of interstate railroads, buses, trucks, and pipelines.

Communication by telephone, telegraph, radio, and television.

Civil aeronautics.

Merchant marine generally.

Registering and licensing of vessels and small boats.

Navigation and the laws relating thereto.

Rules and international arrangements to prevent collisions at sea.

Merchant marine officers and seamen.

Measures relating to the regulation of common carriers by water and to the inspection of merchant marine vessels, lights and signals, lifesaving equipment, and fire protection on such vessels.

Coast and Geodetic Survey.

The Coast Guard, including lifesaving service, lighthouses, lightships, and ocean derelicts.

The United States Coast Guard and Merchant Marine Academies.

Weather Bureau.

Panama Canal and Interoceanic Canals generally.

Inland Waterways.

Fisheries and Wildlife.

Bureau of Standards.

I could give the Senator a list which would comprise five more pages.

Mr. ELLENDER. The Senator has obtained that list from the Reorganization Act. All committees have such duties. But is it necessary to investigate every facet of a particular field just because the committee has jurisdiction of it?

Mr. MAGNUSON. Seventeen Members of the committee so decided.

Mr. ELLENDER. I know that. I presume that the force which will be required to make that study will include 20 or 30 employees, will it not?

Mr. MAGNUSON. That was a budget worked out by the Subcommittee on Surface Transportation.

Mr. ELLENDER. Yes.

Mr. MAGNUSON. I approved it, because I thought it was given the best of consideration.

Mr. ELLENDER. With the increase in the personnel and subject matter of all the committees and subcommittees, I can now well understand the necessity for our expanding building program. We will need a lot of space to take care of all these additional workers on the

Hill. The great trouble is that our Government is building so rapidly and is becoming so heavy that some day it will fall on us.

SEVERAL SENATORS. Vote! Vote! Vote!

Mr. MAGNUSON. I want to point out to the Senate there is a time limitation on the bill, so the study will not be a permanent and continuing thing. That is provided in the bill itself.

Mr. ELLENDER. That provision can be easily amended, which is what usually takes place.

Mr. SMATHERS. Mr. President, without getting involved in the colloquy between the able Senator from Louisiana and the able chairman of the committee, I venture to say that everyone recognizes the importance of transportation to our Nation. The transportation industry pays 20 percent of all taxes. Two out of every ten jobs in the United States are related to our transportation industry in one form or another. Transportation is vital to our prosperity, vital to our growth, and vital to our national defense. I am certain everyone appreciates the importance of an efficient and healthy transportation system.

This whole study is designed only to see to it that we continue to have a healthy transportation industry.

Mr. President, the able senior Senator from Ohio [Mr. LAUSCHE] called me earlier today and said he wanted to offer an amendment to the resolution to the effect that such study and investigation shall not cover any matters relating to or contemplating either the payment of new subsidies or payment of any increase in the existing subsidies paid by the Federal Government to any of the various modes of transportation.

I asked the able Senator from Ohio not to offer the amendment, and the Senator said he would not if I would, in my remarks on the floor, state for the RECORD that so far as I knew none of the money would be used for the purpose of increasing any subsidies which are now paid to some forms of transportation, and, so far as I knew, the money would not be used for the creation of a subsidy program for any forms of transportation. I believe that is true. insofar as I can speak, and I know of nobody on the committee who thinks that the study is going to lead to the creation of a subsidy program.

I wish to make that statement for the RECORD, in order to live up to my part of the bargain. The Senator from Ohio did not offer his proposed amendment, and so I make that statement for the RECORD.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. SMATHERS. I yield to the Senator from Washington.

Mr. MAGNUSON. As a matter of fact, we hope to look into the justification for some of the present subsidies.

Mr. SMATHERS. Exactly. As a matter of fact, we like to think that the study will result in a lesser payment of subsidy for some of the methods of transportation now receiving subsidies.

The PRESIDING OFFICER. The amendment of the committee on Interstate and Foreign Commerce will be stated for the information of the Senate.

The CHIEF CLERK. It is proposed, on page 3, line 21, after the word "exceed," to insert "$290,000."

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Committee on Interstate and Foreign Commerce.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the resolution as amended.

The resolution (S. Res. 29), as amended, was agreed to, as follows:

Whereas a sound national transportation system is essential to the continued economic development and defense of the United States; and

Whereas fair and equitable Federal policies are necessary to assure such a sound national transportation system; and

Whereas hearings held by the Surface Transportation Subcommittee of the Committee on Interstate and Foreign Commerce have disclosed there is urgent need for a comprehensive study of such transportation policy and related problems by the Congress, to the end that sound policies may be evolved: Now, therefore, be it

Resolved, That the Committee on Interstate and Foreign Commerce, or any duly authorized subcommittee thereof, is authorized under sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate, to examine, investigate, and make a complete study of any and all matters pertaining to—

1. the need for regulation of transportation under present-day conditions and, if there is need for regulation, the type and character of that regulation;

2. the area of Federal policy dealing with Government assistance provided the various forms of transportation and the desirability of a system of user charges to be assessed against those using such facilities;

3. the subject of the ownership of one form of transportation by another;

4. Federal policy on the subject of consolidations and mergers in the transportation industry;

5. policy considerations for the kind and amount of railroad passenger service necessary to serve the public and provide for the national defense;

6. the problems arising from action by the Interstate Commerce Commission in permitting the charge of more for a short than a long transportation haul over the same line in the same direction; and

7. additional matters of Federal regulation (and exemption therefrom) and Federal promotional policy in regard to the various forms of transportation.

SEC. 2. For the purposes of this resolution the committee, from February 1, 1959, to January 31, 1960, inclusive, is authorized (1) to make such expenditures as it deems advisable; (2) to employ on a temporary basis, technical, clerical, and other assistants and consultants: *Provided,* That the minority is authorized to select one person for appointment, and the person so selected shall be appointed and his compensation shall be so fixed that his gross rate shall not be less by more than $1,200 than the highest gross rate paid to any other employee; and (3) with the prior consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1960.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $290,000 shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

The preamble was agreed to.

CORRECTION OF CERTAIN DECISIONS OF THE SUPREME COURT OF THE UNITED STATES

Mr. EASTLAND. Mr. President, I introduce for appropriate reference a number of bills to carry out the recommendations of the American Bar Association to correct certain decisions of the Supreme Court of the United States.

The PRESIDING OFFICER. The bills will be received and appropriately referred.

The bills introduced by Mr. EASTLAND were received, read twice by their titles, and referred to the Committee on the Judiciary, as follows:

S. 1299. A bill to protect the effectiveness of State antisubversive laws against unintended Federal preemption;

S. 1300. A bill to define the term "organize" as used in the Smith Act;

S. 1301. A bill to make full disclosure respecting loyalty to the United States a condition of Government employment;

S. 1302. A bill to amend sections 241 and 242 of the Immigration and Nationality Act;

S. 1303. A bill to amend the Immigration and Nationality Act with respect to travel in time of war or national emergency and passport procedures;

S. 1304. A bill to broaden the application of the Summary Suspension Act of 1950; and

S. 1305. A bill to amend section 2385 of title 18 of the United States Code.

Mr. EASTLAND. Mr. President, I ask unanimous consent that a brief explanation of each of these bills be printed in the RECORD.

There being no objection, the résumé was ordered to be printed in the RECORD, as follows:

RÉSUMÉ OF BILLS TO IMPLEMENT RECOMMENDATIONS OF THE AMERICAN BAR ASSOCIATION TO ELIMINATE OBSTACLES TO THE PRESERVATION OF INTERNAL SECURITY

1. To define the term "organize" as used in the Smith Act.

Bar association recommendation: "Amend the Smith Act to define the word 'organize' to include the recruitment of new party members, the formation of new party units, and the regrouping, expansion or other activities of an organizational nature performed by members of existing clubs, cells, classes, and other units so as to insure the applicability of this section of the act to Communist actionists, agents, organizers, colonists or members currently performing organizational work."

This proposed bill would accomplish the precise purpose of the bar association recommendation. The Supreme Court decision in the Yates case rendered the organizing section of the Smith Act unenforcible against current Communist activity. Enactment of this bill would restore the effectiveness and applicability of this section of the law.

2. To protect the effectiveness of State antisubversive laws against unintended Federal preemption.

Bar association recommendation: "That wherever there are reasonable grounds to believe that as a result of court decisions weaknesses in internal security has been disclosed,

remedial legislation be enacted by the Congress of the United States, including a specific pronouncement of congressional intention that State statutes proscribing sedition against the United States shall have concurrent enforcibility."

The bill as drafted is confined to the specific recommendations of the bar association.

3. To make full disclosure respecting loyalty to the Unitd States a condition of Government employment.

Bar association recommendation: "Establish the right of each branch of Government to require as a condition of employment that each employee thereof shall not refuse to answer a query before a duly constituted committee of the Congress or before duly authorized officers of either the executive or judicial branches of the Government with respect to Communist, Communist-front, or other subversive activities or any other matter bearing upon his loyalty to the United States, as the Government has a right to know his record."

This proposed bill comports exactly with the recommendation of the bar association. It would cover refusals based upon a claim of fifth-amendment privilege, or upon any other claim of constitutional privilege, or for any other reason. Under this bill, if enacted, it would be the refusal by an employee to answer a question bearing upon his loyalty to the United States which would constitute a breach of a condition of his employment, not the reason, if any, claimed by the employee as justification for his refusal.

4. To amend sections 241 and 242 of the Immigration and Nationality Act.

Bar association recommendation: "Invest in the executive branch of the Government the right to protect our internal security against the activities of aliens who were or became Communists at any time subsequent to their entry into the United States by providing for their deportation without any deprivation of due process; and the right to make and enforce reasonable restrictions on aliens awaiting deportation to prohibit them from engaging in any activities identical or similar to those upon which the aliens' deportation order was based, with further right fully to interrogate aliens awaiting deportation concerning their subversive associates or activities."

This bill will fully carry out the recommendation of the bar association. Since existing law already provides for deportation, the bill concerns itself with the right to make and enforce reasonable regulations on aliens awaiting deportation, consonant with due process.

The first section of the bill would overcome the effect of the Supreme Court decision in *Bonetti* v. *Rogers*, and would restore the applicability of the deportation provisions of the Immigration and Nationality Act to any alien who has been a member of the Communist Party at any time after any entry into the United States.

5. To amend the Immigration and Nationality Act with respect to travel in time of war or national emergency and passport procedures.

Bar association recommendation: "Restore to the executive branch of Government the right to deny passports to persons knowingly engaged in subversive activities, or activities designed or intended to further international communism by the establishment of criteria and standards to be applied in the issuance or denial of passports. These criteria and standards should be clear and unequivocal, and in addition contain a specific authorization to the Secretary of State empowering him or the Acting Secretary to withhold a passport in the national interest based upon confidential information and upon which he shall certify that it is contrary to the interests of this Nation that a passport be issued to the applicant; and further, to prevent foreign espionage agents from departing this country for the purpose of carrying out their espionage pursuits or to escape disclosure or prosecution; and that such legislation establish adequate appeal procedures which would insure due process of law so as to provide recourse to the individuals concerned in the event of any arbitrary and capricious exercise of discretion not properly founded."

This bill embraces all the recommendations of the bar association with respect to passport legislation.

6. To broaden the application of the Summary Suspension Act of 1950.

Bar association recommendation: "Restore to the executive branch of our Government the right to determine and to dismiss, if required, those who are security risks in both sensitive and nonsensitive positions in the Government service."

This bill accomplishes the objective of the bar association recommendation in the manner suggested by the Supreme Court itself in the case of *Cole* v. *Young*, that is, by making the summary suspension authority applicable to all departments and agencies of the Government.

7. To amend section 2385 of title 18 of the United States Code.

Bar association recommendation: "Amend the Smith Act to make it a crime intentionally to advocate the violent overthrow of the Government of the United States or to teach the necessity, desirability, or duty of seeking to bring about such overthrow; in order that (1) this Nation might take protective steps to prevent acts which, if not prevented, could result in bloodshed and treachery; and (2) this Nation need not be forced to delay the invoking of the judicial process until such time as the resulting damage has already been wrought."

This bill would implement the recommendation of the bar association report. At the same time, the bill does not attempt to proscribe the "mere abstract teaching" of Marxist doctrine; rather, the bill is directed against the teaching or advocacy of an alleged duty or necessity or desirability or propriety of overthrowing the Government by force or violence.

The second section of this bill focuses on the intent back of teaching or advocacy. No question is involved here of the results of such an attempt; it is the attempt itself, by the performance of an overt act intended to cause the violent overthrow of the Government, which is made a crime.

Mr. EASTLAND. Mr. President, the text of the report of the American Bar Association Special Committee on Communist Tactics, Strategy and Objectives, criticizing numerous decisions of the Supreme Court of the United States and pointing out the adverse impact those decisions have had upon the internal security of this country, was placed in the RECORD a few days ago by a Member of the other body. Ordinarily, under such circumstances, I would not ask that this material be printed in the RECORD again. However, I propose to speak about this report at some length, and to quote from it, and to introduce legislation based upon the recommendations contained in the report. Therefore, and in order that my colleagues and others reading the record of my remarks may have the text of the report itself to refer to, I ask unanimous consent that the full text of this report, including the 1-page statement of transmittal from the board of governors of the American Bar Association, may be printed in the RECORD at this point as a part of my remarks.

There being no objection, the statement and report were ordered to be printed in the RECORD, as follows:

STATEMENT OF THE BOARD OF GOVERNORS TO THE HOUSE OF DELEGATES TRANSMITTING THE REPORT OF THE SPECIAL COMMITTEE ON COMMUNIST TACTICS, STRATEGY, AND OBJECTIVES

The board of governors herewith transmits to the house of delegates the report of the special committee without any deletion or alterations excepting a minor correction in recommendation No. 1.

The board recommends approval by the house of the several recommendations in the report and their transmittal to the Congress of the United States in order to correct legislative defects in the field of internal security revealed by particular decisions cited in the report.

In making its recommendations for approval, the board does not in any way intend to indicate censure of the Supreme Court nor an attack upon the independence of the judiciary. Indeed, the obligation of the bar to defend the Supreme Court as an institution is emphasized in the first resolution proposed by the committee's report.

The recommendation for approval, in the case of this report as in the case of all other reports of association sections and committees, does not constitute endorsement of statements in the report itself, such statements being those of the individual members of the committee.

AMERICAN BAR ASSOCIATION REPORT OF THE SPECIAL COMMITTEE ON COMMUNIST TACTICS, STRATEGY, AND OBJECTIVES

FOREWORD

International communism continues its worldwide conquest with the same vigor which has enabled it to bring 900 million people under its control while covering one-quarter of the earth's surface. In these United States its threat increases as far too many of us fail to comprehend its sinister purpose. The objective of worldwide communism has never changed—only do its tactics change in order to more effectively infiltrate life in America, to lower resistance to its propaganda and to cripple our defenses against this tyrannical and deadly way of life.

There is not one home in our land which is not affected by communism in some manner. Above all, our national economic security has been underminded by the necessity of building our defenses against the threat of Soviet aggression and through the Red impact on world trade. The U.S. gold reserves are becoming alarmingly low. Our country is the lone nation in the civilized world which admits foreign capital from undisclosed owners.

Our internal security has been weakened by a lackadaisical attitude on the part of the public and technicalities raised in judicial decisions which too frequently in the public mind have had the effect of putting on trial the machinery of the judicial process and free the subversive to go forth and further undermine our Nation. Lenin once stated as a prerequisite for a revolutionary situation which the Communists could exploit, the fact that "The ruling classes can no longer govern." Must we admit that we have reached that point?

The Soviet advances in seeking superiority in the control of space have doubtless been aided by the theft of secrets from American scientists in the same manner in which the Soviets gained the know-how to develop nuclear weapons. Should the United States come under attack, it will then be too late to allocate responsibility. Corrective action must be taken now. Time is running out on us.

It is now an established fact that every institution, every force and every person ac-

tively engaged in the forefront of the defense of our country against the rising menace of communism becomes the target of attack and vilification by Communists, crypto-Communists, fellow travelers, their stooges and innocent but beguiled persons.

The agencies of Government charged with protecting our internal security have demonstrated by past performance their ability to protect our Nation. We take pride that a lawyer, Director J. Edgar Hoover, of the Federal Bureau of Investigation, and his staff, composed largely of lawyers and others with legal training, have been in the forefront most often under very difficult circumstances. In war and peace the FBI has demonstrated the ability to carry out its responsibilities to the American people in a truly American manner avoiding the excesses of both the NKVD and the Gestapo. It therefore merits the wholehearted support and continued confidence of the bar and of the American public.

The fight to keep America free and secure must be strengthened by providing those agencies of our Government which are responsible for our internal security with the means to maintain the security of our shores; the fight for a free America cries out for a furthering of the educational program to combat the evil ideas of communism with truth, and the American bar's responsibility has never been so great as at the present time to assume leadership in the preservation of the freedoms so gallantly won by our forefathers.

RECOMMENDATIONS

I

Whereas the Supreme Court of the United States and an independent judiciary created by the Constitution have been and are the ultimate guardians of the Bill of Rights and the protectors of our freedom, and as such it is the duty of the members of the bar to defend the institutions of the judiciary from unfair and unjust attacks; and

Whereas this association recognizes that sharp differences have been expressed as to the soundness of some of the recent decisions of the U.S. Supreme Court affecting the National and State security, with particular reference to the activities of domestic and foreign Communists within our country; and

Whereas such differences have given rise not only to severe criticisms of the decisions, but unfortunately to condemnation of the Court itself, and to omnibus proposals for limiting its appellate jurisdiction; and

Whereas, while members of this association view some of the decisions to be unsound and incorrect, they deem such broad omnibus proposals at this time unwise and likely to create more problems than they will solve: Therefore, be it

Resolved, That the American Bar Association disapprove proposals to limit any jurisdiction vested in the U.S. Supreme Court; and be it further

Resolved, That wherever there are reasonable grounds to believe that as a result of court decisions weaknesses in internal security have been disclosed, remedial legislation be enacted by the Congress of the United States, including a specific pronouncement of congressional intention that State statutes proscribing sedition against the United States shall have concurrent enforcibility.

II

Whereas recent declarations by the U.S. Supreme Court (notably in *Watkins* v. *U.S.*, 354 U.S. 178) have been construed as holding that the House of Representatives has not spelled out with sufficient clarity or detail the authority granted to the Committee on Un-American Activities and queries whether the said committee has been carrying out properly its congressional mandate, which interpretation has resulted in the reversal of trial court convictions for contempt of Congress; and

Whereas it has been deemed by many Members of the Congress, the bar and the public that such declarations and interpretations thereof tend to impede the work of the Congress through its committees and thereby create a problem, the solution to which must be found; and

Whereas it is the view of this association that the quickest and best solution is for the House of Representatives to rewrite its resolution of authority to its congressional committee investigating internal security and Communist activities in terms so thoroughly, carefully and precisely worded as to leave no area for reasonable misunderstanding or evasion: Now, therefore, be it

Resolved, That this association recommend to the Congress that the House of Representatives rewrite and adopt its basic resolution of authority for the Committee on Un-American Activities under the same name or such name as such legislative body shall designate setting forth that the purpose in creating said committee is to study the operation of existing laws and the requirements of further legislation, in addition to defining clearly and adequately the powers of such committees.

III

Whereas your committee deems it advisable that the precise terms of the basic authority of the congressional committee which subpenas the witness to appear and testify should be made available to each witness subpenaed, for his enlightenment in advance of the hearing: Now, therefore, be it

Resolved, That this association recommends to the Congress that whenever any of its committees subpenas a witness to appear and testify or to give evidence, such committee should furnish the witness at the time he is subpenaed with a copy in writing of the precise terms of the basic authority of the committee.

IV

Whereas recent decisions of the U.S. Supreme Court, in cases involving National and State security and with particular reference to Communist activities, have been severely criticized and deemed unsound by many responsible authorities; and

Whereas problems of safeguarding National and State security have been exposed or created thereby which this association feels would be best solved by the careful study of each decision, and the prompt enactment of sound amendments to existing laws within the constitutional powers of the Congress: Now, therefore, be it

Resolved, That this association recommend to the Congress the prompt and careful consideration and study of recent decisions of the United States Supreme Court and the preparation and passage of separate amendments to the laws involved so as to remove any doubt as to the intent of the Congress, and to remedy any defect in the existing law revealed by the decisions; and be it further

Resolved, That legislation be promptly enacted to eliminate obstacles to the preservation of our internal security in the following areas:

(a) Amend the Smith Act to define the word "organize" to include the recruitment of new party members, the formation of new party units, and the regrouping, expansion or other activities of an organizational nature performed by members of existing clubs, cells, classes, and other units so as to insure the applicability of this section of the act to Communist actionists, agents, organizers, colonists, or members currently performing organizational work.

(b) Amend the Smith Act to make it a crime to intentionally to advocate the violent overthrow of the Government of the United States or to teach the necessity, desirability, or duty of seeking to bring about such overthrow; in order that (1) this Nation might take protective steps to prevent acts which, if not prevented, could result in bloodshed and treachery; and (2) this Nation need not be forced to delay the invoking of the judicial process until such time as the resulting damage has already been wrought. (See *Yates* v. *U.S.*).

(c) Establish the right of each branch of Government to require as a condition of employment that each employee thereof shall not refuse to answer a query before a duly constituted committee of the Congress or before duly authorized officers of either the executive or judicial branches of the Government with respect to Communist, Communist front or other subversive activities or any other matter bearing upon his loyalty to the United States, as the Government has a right to know his record.

(d) Invest in the executive branch of the Government the right to protect our internal security against the activities of aliens who were or became Communists at any time subsequent to their entry into the United States by providing for their deportation without any deprivation of due process; and the right to make and enforce reasonable restrictions on aliens awaiting deportation to prohibit them from engaging in any activities identical or similar to those upon which the aliens' deportation order was based, with the further right fully to interrogate aliens awaiting deportation concerning their subversive associates or activities.

(e) Strengthen the effectiveness of the Foreign Agents Registration Act of 1948 by a requirement that political propaganda by agents of foreign principals be labeled for what it is where such agents are situated outside the limits of the United States, but nevertheless directly or indirectly disseminate such propaganda within the United States.

V

Whereas the respective records of the Subcommittee on Internal Security of the Senate Judiciary Committee and of the House Un-American Activities Committee both charged with the duty of investigating internal security and Communist activities are records of accomplishment and great service to the Nation; and

Whereas the continuation of the work of these committees is essential to the enactment of sound and adequate legislation to safeguard the National and State security: Now, therefore be it

Resolved, That the American Bar Association recommends that the House of Representatives continue to maintain a committee to investigate matters relating to national security with particular emphasis on Communist activities invested with adequate jurisdiction to accomplish its purpose, and that the Senate continue to maintain and support its Subcommittee on Internal Security; and be it further

Resolved, That such committees maintain close liaison with the intelligence and security agencies, as well as with the Attorney General of the United States, to the end that they may be kept advised as to legislative needs of the executive branch of the Government required to carry out its responsibilities for internal security.

REPORT

Inasmuch as the house of delegates of the association referred back to the committee on Communist tactics, strategy, and objectives, to study the recommendation that the association endorse H.R. 12949 and the recommendation that the association endorse S. 1411 in cooperation with the special committee on individual rights as affected by national security, this committee submits its recommendations with the body of the report. Such a procedure is followed because the two committees to which the recommendations were referred for further study have not had a sufficient opportunity to

jointly discuss their findings. The recommendations are submitted herewith:

Be it resolved, That this committee recommends that legislation be promptly enacted to eliminate obstacles to the preservation of our internal security in the following areas:

1. Restore to the executive branch of our Government the right to determine and to dismiss, if required, those who are security risks in both sensitive and nonsensitive positions in the Government service.

2. Restore to the executive branch of Government the right to deny passports to persons knowingly engaged in subversive activities, or activities designed or intended to further international communism by the establishment of criteria and standards to be applied in the issuance or denial of passports. These criteria and standards should be clear and unequivocal, and in addition contain a specific authorization to the Secretary of State empowering him or the Acting Secretary to withhold a passport in the national interest based upon confidential information and upon which he shall certify that it is contrary to the interests of this Nation that a passport be issued to the applicant; and further, to prevent foreign espionage agents from departing this country for the purpose of carrying out their espionage pursuits or to escape disclosure or prosecution; and that such legislation establish adequate appeal procedures which would insure due process of law so as to provide recourse to the individuals concerned in the event of any arbitrary and capricious exercise of discretion not properly founded.

It is with a profound sense of high privilege and grave responsibility that your committee submits the following report to the house of delegates and, through it, to the bar and to the public.

UNLESS

International communism will enslave the peoples of every nation of the free world—including the United States—unless they:

Awaken from their apathy and their indifference to the dangers that exist and threaten.

Learn and appreciate the freedom and the human rights they enjoy—and are determined and prepared to fight to preserve them for themselves and for their children.

Learn and appreciate the meaning of enslavement of the individual as it exists under communism.

Learn and appreciate the difference between the idealistic pretensions of communism and its inhuman reality.

Learn that the Communist ultimate goal of dominating and controlling every nation and every human being, never changes—though its tactics vary from day to day.

Understand that wishes and prayers alone will not suffice to overcome communism or to avoid its menace.

Know that only by unity, determination, strength—moral, scientific, and military—and a willingness to state their position in advance, and to be ready to fight for it, can they best safeguard the free world and its institutions.

Remember that Communists respect only those with equal or greater strength.

Know that the plea for peaceful coexistence is a fraudulent tactic of international communism seeking to blind the American people to the Soviet record of broken promises and aggression and intended to paralyze and disarm the free world in advance of the coming Soviet onslaught.

Never forget that international communism—particularly the Soviet—has the worst record for broken treaties in all history.

Remember that communism has never sold itself on its merits nor has it ever been adopted by a free vote of a free people.

Realize that free industry and free labor unions in any country are free only so long as communism does not dominate there—and that both industry and labor carry grave responsibilities in the defense of their nations against communism.

Realize and warn that partisan politics by those occupying or seeking public office may be a great aid to international communism and a serious handicap to one's own country.

Remember that subversion—aided by treason and treachery of domestic citizens—has been the most successful tool and tactic of international communism in gaining control of now-enslaved nations or in weakening or dulling the resistance by those nations which remain free.

Never forget that international communism still maintains as one of its fundamental tenets—where and when necessary—the overthrow by force and violence of any free nation when such overthrow can be successfully accomplished.

Know that one of the Communists' chief tactics is to keep the free world on the defensive by prodding and creating problem spots in every area of the globe.

Know that without sacrifice free nations cannot be protected or prepare themselves for defense from communism's constant assaults or against outright war.

Realize that the process of weakening the free nations is constantly carried out in many ways through subtle and persistent propaganda, and that the weapon of counterpropaganda by truth has not as yet been adequately or affirmatively used against the Communists.

Never forget that while from time to time we may have to confer and negotiate with Communist Russia or other Communist enslaved nations, their agreements have no sacred or serious meaning to them, will be breached when it is expedient for them to do so, and that such negotiations should be carried on by duly constituted officials of government and not by self-appointed apologists.

Remember that international Communists continue to talk peace but relentlessly wage war in its many forms at the same time.

Never confuse Communists with the freedom-loving peoples of the Nations they dominate and control, or fail to appreciate that these peoples crave freedom and a better way of life, peace and understanding with other nations

But, if the peoples of the free world are alert to what communism is and how it operates and what it costs in determination, dedication, toil and sacrifice to protect our freedoms and our way of life, then the free world will survive and communism will ultimately dissipate or destroy itself and its devoted followers.

Most persons who are informed on communism think our country now faces its greatest danger. The thesis of J. Edgar Hoover's new book, "Masters of Deceit", is:

"Communism is the major menace of our time. Today it threatens the very existence of our western civilization." [1]

In his speech to the 1957 National Convention of the American Legion, Mr. Hoover warned:

"To dismiss lightly the existence of the subversive threat in the United States is to deliberately commit national suicide. In some quarters we are surely doing just that."

And on December 22, 1958, Mr. Hoover added:

"* * * Sensing a more favorable atmosphere, the Communist Party, U.S.A., and its dupes and sympathizers gained further courage and became more vocal in their attacks upon law enforcement and other professions which are dedicated to preserving our freedoms."

[1] P. vi.

The lawyer-author of the Gaither report to the President on national security recently told our association:

"Our security is in unprecedented peril. * * * The ultimate objective of international communism is world domination, and the Soviet Union will pursue this objective ruthlessly and relentlessly, employing every possible political, economic, subversive, and military stratagem and tactic." [2]

COURT DECISIONS RELATED TO COMMUNISM

Mr. Justice Jackson in *American Communications Association* v. *Douds* [3] concluded that the Communist Party, U.S.A., is not a political party but "Is a conspiratorial and revolutionary junta organized to reach ends and to use methods which are incompatible with our constitutional system." Likewise, former Chief Justice Stone reached a similar conclusion several years earlier in *Schneiderman* v. *United States.* [4] So, too, did former Chief Justice Hughes when, as Secretary of State, he refused to recognize the Communist government of Russia, and former Chief Justice Vinson in *Dennis* v. *United States* [5] which decision upheld the convictions under the Smith Act of the American Communist leaders.

Similar pronouncements are contained in the preambles to many State sedition laws as well as in the preamble to the Communist Control Act of 1954, where Congress stated specifically that "The Congress finds and declares that the Communist Party of the United States, although purportedly a political party, is in fact an instrumentality of a conspiracy to overthrow the Government of the United States * * *." Likewise, the Subversive Activities Control Board has, after protracted hearings, found the Communist Party to be a Communist-action organization required to register under the Internal Security Act of 1950.

In spite of this, much dicta has appeared in recent decisions of the Supreme Court to the effect that the Communist Party is a political organization of a lawful nature similar to the Republican, Democratic, or Socialist Parties, hinting that disclosure of membership therein or association therewith is entitled to the protection of the first amendment. While this view has not been actually held in any known case, language contained in many of the decisions has invited confusion.

Many cases have been decided in such a manner as to encourage an increase in Communist activity in the United States through invalidation of State sedition statutes, and limitation of State and Federal investigating powers in the field of subversion although these cases might readily have been disposed of without so broadly limiting national and State security efforts. The paralysis of our internal security grows largely from construction and interpretation centering around technicalities emanating from our judicial process which the Communists seek to destroy, yet, use as a refuge to masquerade their diabolical objectives. This trend was treated fully in the Conference of State Chief Justices last year when they called upon the U.S. Supreme Court to exercise the power of judicial self-restraint. The dissenting opinions of certain Supreme Court Justices have been crystal clear in charting the effect of the failure of the majority to recognize the underground forces that are at work and to appreciate how these decisions affect our internal security.

It has frequently been said that "Justice delayed is justice denied." The delays in arriving at final determinations in criminal

[5] 341 U.S. 494.

proceedings have invited criticism of the American judicial process. In no area has this been more tragically illustrated than in cases dealing with Communists. The proceeding against the Communist Party before the Subversive Activities Control Board is a case in point which makes a mockery of justice. Eight years have now elapsed since the enactment of the Internal Security Act of 1950. The status of the Communist Party continues to remain unadjudicated. The constitutionality of the act remains to be determined by the Supreme Court of the United States. The Communists have used every tactic to delay the determination of this case and subsequent enforcement of this act.

Your committee wishes to make clear that this delay is not the fault of the Subversive Activities Control Board itself which is composed of men and women of great talent who have diligently and courageously maintained a rare judicial attitude and composure despite the Communist vilification which has been heaped upon the Board and the members personally. They have endured frustrations imposed upon them by judicial delays and failures to meet the issues in a decisive manner so that justice might inure to the American people as well as to the accused.

The Subversive Activities Control Board, under the mandate of the Internal Security Act of 1950, issued its order on April 20, 1953.[6] That order, issued after exhaustive hearings and documented in a scholarly manner on a legal basis, found that the Communist Party, U.S.A., was a Communist-action organization and directed that it must comply with the act. This order remains to be enforced. We reassert the views stated in the brief which the American Bar Association filed in the U.S. Supreme Court in support of the Internal Security Act of 1950. If any part of the said act violates the Constitution, the courts should so hold. Congress should then enact new legislation or amend the present act to conform to any constitutional requirements as determined by the courts. If the act is constitutional, the Communist Party should not continue to enjoy immunity from its security provisions during many years of protracted litigation.

The importance of the Communist Party proceeding before the Subversive Activities Control Board justifies a brief résumé of this matter:

1. The Supreme Court did not determine the constitutionality of the act but rather remanded the case to the Board for exploration of charges supported by affidavit made by the party in the Court of Appeals concerning the credibility of three Government witnesses, namely, Crouch, Johnson, and Matusow. The charges made by the Communist Party in the court of appeals were not controverted by counteraffidavit of the Department of Justice for the reason that there was other overwhelming evidence to sustain the Board's order. The Supreme Court stated that since the assertions were not challenged by the Department it must remand the case to the Board for exploration.

2. When the case was returned to the Board the Department of Justice did not undertake to challenge the veracity of the charges made against these three witnesses. Accordingly under the Supreme Court's opinion the Board had no alternative but to expunge their testimony in its entirety from the record, and on the basis of the remainder of the evidence—testimony and documentary—the Board entered a new order.

[6] Subversive Activities Control Board Report, S. Doc. No. 41, 83d Cong. 1st sess., April 23, 1953.

3. The case again was argued before the court of appeals. After oral argument there and prior to decision by the court of appeals, the Supreme Court handed down its opinion in the Jencks case (noted later in this report). The party thereupon filed motions invoking the Jencks doctrine. The court of appeals then remanded the case to the Board for production of documents in relation to witness Mary Markward. The Communist Party then filed a petition for rehearing and a motion to adduce additional evidence in relation to Witness Budenz. In the course of preparing a reply to the petition for rehearing and the motion the Department discovered the existence of a recording of the initial interviews with Budenz after he left the party, the substance of which had been previously reported. This discovery was made known to the appellate court and it thereupon remanded the Budenz question also for production of documents.

4. All documents ordered by the Court to be produced have been furnished by the Department to the Subversive Activities Control Board in relation to the two witnesses. It developed, however, that Budenz was unavailable for further cross-examination due to a grave heart condition. The party now has a motion pending to reopen the case for cross-examination of all FBI agents who interviewed Budenz, claiming among other items that there are inconsistencies between the documents produced and the testimony of Budenz before the Board.

5. On February 9, 1959, The S.A.C.B. in an order for the third time after months of additional study, required the CPUSA to register in accordance with the Internal Security Act of 1950. In its most recent order, the Board rejected the Communist Party claim that false testimony had been given by a witness in another proceeding. Another round of appeals no doubt will be sought by the Communist Party to further delay a final adjudication of this case.

The following are the principal cases that have been criticized by the public, public officials and the bar in varying degrees as illustrative of how our security has been weakened:

1. *Pennsylvania* v. *Steve Nelson* (350 U.S. 497 (April 2, 1956)): The Court held 6 to 3 that the Federal Smith Act which prohibits the knowing advocacy of the overthrow of the U.S. Government by force and violence, suspends the enforcibility of the Pennsylvania Sedition Act in certain respects—which act proscribes the same conduct—on the grounds that Congress has preempted the field of sedition against the United States to the exclusion of parallel State legislation that the dominant interest of the Federal Government precludes State intervention, and that the administration of the State act would conflict with the operation of the Federal plan. Three justices dissented in every respect and pointed out that the Court should not void State legislation without a clear mandate from Congress.[7]

2. *Communist Party U.S.A.* v. *Subversive Activities Control Board* (351 U.S. 115 (April 30, 1956)): The Board found the Communist Party to be a Communist-action organization subject to the registration provisions of the Subversive Activities Control Act of 1950. The Communist Party appealed to the U.S. Court of Appeals and filed a motion for leave to introduce additional evidence before the Board alleging that three Government witnesses had committed perjury in other similar cases which motion was denied. The Government did not challenge the allegations in the motion, but simply contended that the Board's order was amply supported by evidence other than the testimony of the witnesses in question. The Supreme Court held 6 to 3 that the Court of Appeals had erred in denying the motion and remanded to the Board to permit the evidence to be introduced. Three justices dissented on the grounds that denial of the motion was within the lower court's discretion and that there had been no abuse of discretion. The dissent criticized the refusal of the majority to deal with the constitutional issues presented.

3. *Watkins* v. *U.S.*, 354 U.S. 178 (June 17, 1957): A union officer appearing as a witness before a subcommittee of the House Committee on Un-American Activities refused to answer questions as to past Communist Party membership of certain persons, objecting on grounds of lack of pertinency to the subject under inquiry by the subcommittee. The Supreme Court held 6 to 1 (two Justices not participating) that under the applicable statute a congressional investigating committee must upon objection of a witness on the grounds of pertinency, state for the record the subject under inquiry at that time and the manner in which the propounded questions are pertinent thereto. The Court stated that the phrase "Un-American Activities" was vague and that the evidence failed to show that the question under investigative inquiry was ever made specifically known to the witness. The dissent declared that the pertinency of the questions asked to the matter under investigation had been sufficiently shown. (This decision has led to a continuing discussion and challenge by witnesses as to the pertinency of questions. No court could function smoothly under such an impediment.)

4. *Cole* v. *Young*, 351 U.S. 536 (June 11, 1956): An employee in the U.S. Health, Education, and Welfare Department, who was charged with "sympathetic association" with individuals reliably reported to be Communists and making contribution to an allegedly subversive organization, was summarily dismissed by the agency head under the authority of the Summary Suspension Act of 1950 which authorizes heads of specified agencies to summarily dismiss employees "in the interests of the national security of the United States." The act provides that the determination of the agency head is conclusive and final. The Supreme Court in a 6 to 1 decision overturned the dismissal on the ground that the Summary Suspension Act has reference only to those activities directly concerned with the Nation's safety, and that the employee in question did not occupy a sensitive position. Three Justices dissented holding that the clear purpose of Congress was being frustrated in that the statute had been intended to authorize summary dismissal of employees whose retention would be inimical to the national interests regardless of the sensitivity of their positions.

5. *Leedom* v. *International Union of Mine, Mill, and Smelter Workers*, 352 U.S. 145 (December 10, 1956): The National Labor Relations Board after an administrative investigation and hearing found that an officer of the plaintiff union had filed a false non-Communist affidavit. The Board, in accordance with the National Labor Relations Act which denies the benefit of the act to unions whose officers have not filed such affidavits and makes union officers who have filed false affidavits subject to criminal penalties, issued a decompliance order barring the union from the benefits of the act until it complied. The U.S. Supreme Court held that this order was beyond the Board's authority and that the only remedy which the act permits in the case of false affidavits is the criminal penalty.

[7] The frequency of dissents in the Supreme Court decisions on matters relating to Communists reflects how the Court is divided and supports the thesis of this committee that corrective action is called for by enactment of legislation.

6. *Amalgamated Meatcutters and Butcher Workmen of North America* v. *National Labor Relations Board*, 352 U.S. 153 (December 10, 1956): An officer of plaintiff union had been convicted of filing a false non-Communist affidavit. The Board issued an order directing the employer to correct an unfair labor practice. The court of appeals refused to enforce this order on the ground that the union was not in compliance with the act and thus not entitled to its benefits. The Supreme Court reversed, reiterating the view stated in the Leedom case that the sole penalty for false filing of a non-Communist affidavit is the criminal penalty.

7. *Gold* v. *U.S.*, 350 U.S. 985 (January 28, 1957): Defendant president of a labor union was convicted of having filed a false non-Communist affidavit with the NLRB. On defendant's appeal to the U.S. Court of Appeals the conviction was affirmed. It appeared that an FBI agent investigating another similar case telephoned or visited three members of the jury during defendant's trial and inquired whether they had received any propaganda literature. The issue reaching the Supreme Court was whether the impact of these contacts on the jurors was so prejudicial as to require reversal. The Court so held in a per curiam opinion. Four Justices dissented on the ground that no effect upon the jurors adverse to the defendant could reasonably be anticipated by virtue of the accidental intrusion on their privacy.

8. *U.S.* v. *Witkovich*, 353 U.S. 194 (Apr. 29, 1957): The Immigration and Nationality Act of 1952 requires that an alien against whom a deportation order has been outstanding for more than 6 months shall be required "to give information under oath as to his nationality, circumstances, habits, associations and activities, and such other information, whether or not related to the foregoing, as the Attorney General may deem fit and proper." Appellee being an alien against whom a deportation order had been outstanding for 6 months refused to answer questions put to him by the appropriate immigration authorities regarding his present Communist relationships. He was indicted under the criminal provisions of the act. The Supreme Court held, 6 to 2, that the statute authorized only questions reasonably calculated to keep the Attorney General advised regarding the continued availability for departure of aliens whose deportation is overdue and ruled for dismissal of the indictment. Two Justices dissented expressing the view that under the statute an alien could properly be questioned as to activities indicated by past conduct and that the statute raised no constitutional question.

9. *Schware* v. *Board of Examiners of New Mexico*, 353 U.S. 232 (May 6, 1957): Schware's application to take the New Mexico bar examination was denied on the ground that petitioner had not shown good moral character in view of his past membership in the Communist Party, his use of aliases and his record of arrests. Schware, unlike other individuals, did not invoke the fifth amendment and was frank and candid with regard to his past Communist activities. While the petitioner made out a good case on his conversion from Communist ideology, nevertheless the decision casts grave doubt on the propriety of the Supreme Court to substitute its standard of fitness for the bar of New Mexico in place of the standard established by the bar and the courts of New Mexico. The Supreme Court reversed the State Supreme Court of New Mexico holding that Schware's exclusion violated due process, stating that the record did not support the State court's conclusion that petitioner had not shown good moral character.

10. *Konigsberg* v. *State Bar of California*, 353 U.S. 252 (May 6, 1957): Petitioner refused to answer questions as to present and past membership in the Communist Party put to him by the California State Bar Examiners. He was thereupon refused admission to the bar on the grounds that he had failed to prove that he was of good moral character and did not advocate the overthrow of the Federal or State Governments by unconstitutional means. Five Justices of the Supreme Court overruled the California Supreme Court holding that petitioner's right of due process had been violated since the evidence did not rationally support the finding that he had failed to prove that he was of good moral character and that he did not advocate the overthrow of the Federal or State Government by force and violence. Two Justices dissented on the ground that refusal to answer questions relevant to fitness without constitutional justification justified the committee's refusal to certify petitioner for admission to the bar. One Justice dissented on procedural grounds. (This decision is the greatest inroad on the traditional right of each State to establish its standard of fitness for its own bar and was severely criticized by former President David F. Maxwell in his annual address to this association.)

11. *Jencks* v. *U.S.*, 353 U.S. 657 (June 3, 1957): An officer of a labor union was indicted for filing a false non-Communist affidavit with the NLRB. At his trial he filed a motion requesting an inspection of reports made to the FBI by Government witnesses as to event and activities to which they had testified at the trial. His motion was denied and he was convicted. The U.S. Supreme Court overturned this conviction, five Justices concurring; stating that the defendant was entitled to examine these reports. The former practice of submitting Government documents to the trial judge for his determination of relevancy and materiality was disapproved and the Court held that if the Government wished to exercise its privilege to withhold the reports in the public interest then the criminal action must be dismissed. Three Justices dissented in part, holding that the documents should be produced for the examination of the trial court in camera to determine their relevancy as well as the applicability of the Government's claim of privilege in the public interest. One Justice dissented en toto.

12. *Service* v. *Dulles* (354 U.S. 363 (June 17, 1957)): Plaintiff, a Foreign Service officer, was on numerous occasions investigated as to loyalty and standing as a security risk. These investigations involved extensive hearings. In the most recent one the State Department gave him clearance and this action was approved by the Deputy Under Secretary. However, on a post audit the Loyalty Review Board of the Civil Service Commission made unfavorable findings and recommended his discharge. The Secretary of State accepted these findings without making an independent review of the evidence. The U.S. Supreme Court reversed the action of the Secretary of State and of two Federal courts holding that Dulles' action was in violation of the loyalty and security regulations under which the Secretary of State was bound to make an independent determination after a review of the evidence.

13. *Yates* v. *U.S.* (354 U.S. 298 (June 17, 1957)): Defendants were charged with conspiring to advocate and teach the forcible overthrow of the Government of the United States and to organize as the Communist Party of the United States, a society of persons who so advocate and teach, all in violation of the Federal Smith Act. The Supreme Court reversed convictions in two lower Federal courts and held that teaching and advocating the abstract doctrine of the forcible overthrow of the U.S. Government was not punishable under the Smith Act as long as it was "divorced from any effort to instigate action to that end." The Court further held that the term "organize" as used in the Smith Act referred only to acts entering into the creation of a new organization and stated that since the Communist Party was organized in 1945 and the indictment not returned until 1951, that the prosecution on this charge was barred by the 3-year statute of limitations. This decision is characterized by numerous partial dissents and partial concurrences on the part of the various Justices. Two Justices in dissent stated that overt acts in furtherance of the conspiracy could be proved from the record.

14. *Raley, Stern & Brown* v. *Ohio* (354 U.S. 929)): The Supreme Court vacated the judgment of the Ohio Supreme Court and remanded for consideration in the light of *Sweezy* v. *N.H.*, a case concerning the conviction of three men who had refused to answer questions about Communist activities put to them by the Ohio Un-American Activities Commission. One Justice dissented for the reasons stated in his dissenting opinions in Sweezy and Watkins and another Justice dissented indicating his desire to note probable jurisdiction and set the case for argument. On remand the Ohio Supreme Court reiterated its earlier conviction and the case is once more pending appeal.

15. *Sweezy* v. *New Hampshire* (354 U.S. 234 (June 17, 1957)): In the course of an investigation of subversive activities in New Hampshire a witness refused to answer questions concerning a lecture given by him at the State University and questions concerning the Progressive Party and its adherents asked by the New Hampshire attorney general acting as a one-man legislative committee. The Supreme Court reversed the contempt conviction by the State court, four Justices basing their decision on the ground that the State Legislature had not made clear in the authorizing legislation that it desired the information sought by the attorney general and deemed the lack of authorization to be a lack of authority on the part of the attorney general. Two Justices dissented from this reasoning saying that the distribution of powers on the State level is not a matter of Federal concern, but concurred in the result on the ground that the State had failed to show that the protection of State interests justified the invasion of the witness' constitutionally protected academic and political freedoms. Two Justices dissented from the result in its entirety.

16. *Slochower* v. *Board of Education of the City of New York* (350 U.S. 551 (April 9, 1956)): Under the terms of a New York City charter provision which had been long in effect a City College professor was discharged without notice or hearing for claiming his privilege against self-incrimination when asked about Communist Party membership by a congressional committee investigating matters of national security. It seemed that the professor had answered similar questions put by a State investigating body and that this information was in the hands of city authorities at the time of his discharge. The Supreme Court reversed the decisions of three New York courts and held that this automatic discharge was unconstitutional because of alleged lack of due process. Four Justices dissented.

17. *United Mine Workers* v. *Arkansas Oak Flooring Co.*, 351 U.S. 62 (April 23, 1956): Louisiana State courts had enjoined picketing by a union which had failed to file the non-Communist affidavits and other data required by the National Labor Relations Act. The Supreme Court held that the State courts had no power to enjoin the picketing on the ground that while the union could not resort to the NLRB because of its failure to comply with the filing requirements, it could nevertheless take other lawful action, e.g., peaceful picketing. One justice dissented on the ground that the said act contained no implied limitation on the State power exercised under these facts.

18. *Sacher* v. *U.S.*, 78 S. Ct. 842 (May 19, 1958): Sacher refused to answer three questions put to him by a subcommittee of the Internal Security Subcommittee of the Senate Committee on the Judiciary. His contempt conviction was upheld by the Court of Appeals. The Supreme Court remanded the case for reconsideration in the light of *Watkins* v. *U.S.* The case was reargued before the Court of Appeals and the conviction reaffirmed. The Supreme Court again reversed the order of conviction and found that questions relating to proposed legislation barring Communists from practice at the Federal bar constituted an excursion outside the committee's authorized scope of inquiry. The grant of certiorari and reversal order were made at the same time and in the same per curiam decision. Two justices dissented on the grounds that the questions were pertinent to the authorized inquiry and that the Court had refused to hear argument from Government attorneys.

19. *Kent & Briehl* v. *Dulles*, 78 S. Ct. 1113 (June 16, 1958): The Secretary of State turned down passport applications of Kent and Briehl on the grounds that they were Communists and that they had had constant and prolonged adherence to the Communist Party line. The Supreme Court reversed two lower Federal courts and held that since statutes provided that it is unlawful for a citizen to enter or leave the United States without a valid passport, the Secretary of State did not have authority to promulgate regulations denying passports to Communists or to persons whom evidence showed were going abroad to further Communist causes, or regulations demanding non-Communist affidavits from citizens applying for passports. Three justices dissented in all regards stating that the Secretary of State's passport power permitted the regulation in question.

20. *Dayton* v. *Dulles*, 78 S. Ct. 1127 (June 16, 1958): Dayton, a native born citizen, is a physicist who has been connected with various Federal projects. He applied for a passport to enable him to travel to India in order to accept a position as a research physicist there. This application was turned down by the Secretary of State for three reasons: (1) his alleged association with various Communists, (2) associations with persons suspected of being part of the Rosenberg espionage ring, (3) his alleged presence in an apartment in New York which was allegedly used for microfilming material obtained for the use of a foreign government. Basing its reasoning on *Kent* v. *Dulles*, the Supreme Court overruled two lower Federal courts and held that the passport could not be denied to a U.S. citizen on the ground that it was believed he was going abroad to engage in activities which would advance the Communist movement. Four justices dissented on the same grounds as the dissent in *Kent* v. *Dulles*.

21. *Yates* v. *U.S.*, 78 S. Ct. 128 (November 25, 1957): Yates and 13 others were indicted and convicted of conspiring to violate the Smith Act. In the course of the trial Yates refused to answer 11 questions relating to whether other persons were members of the Communist Party. The trial court held her in contempt for each refusal and imposed 11 concurrent sentences of 1 year each. Supreme Court reversed two lower Federal courts holding that this action constituted an improper multiplication of contempts because the witness when first inquiry was made stated that she would not identify any Communist Party members. The Supreme Court reversed all but the first conviction which was vacated and remanded for resentencing "in the cool reflection of subsequent events". Three justices dissented to the remand of the first conviction holding that all the convictions should be thrown out.

22. *Bonetti* v. *Rogers*, 78 S. Ct. 976 (June 2, 1958): Bonetti was an alien admitted to the United States for permanent residence in 1923 who joined the Communist Party in 1932 and left it in 1936. In 1937 he went to Spain to fight the Spanish Civil War. In 1938 he returned and was admitted for permanent residence as a quota immigrant and thereafter continued to reside in the United States, except for a 1-day visit to Mexico in 1939. The Internal Security Act of 1950 provides for deportation of any alien who was at the time of entry into the United States, or has been at any time thereafter a member of the Communist Party. The Supreme Court reversed two lower Federal courts and held that plaintiff's time of entry for purposes of the act was 1938 not 1923, and not having been a party member then or subsequently, was not deportable. Three justices dissented stating that this construction deletes the phrase "at any time" out of the act and reads the word "last" into the statute and thereby "cripples the effectiveness of the act."

23. *Flaxer* v. *U.S.*, 79 S. Ct. 191 (December 15, 1958): Flaxer was convicted of contempt of Congress and failing to produce pursuant to a subpena duces tecum issued by the Senate Internal Security Subcommittee records of his union showing names and addresses of members employed by the Federal, State, or local government. The Supreme Court remanded the case for reconsideration in the light of *Watkins*. Upon reaffirmation of Flaxer's conviction the Supreme Court reversed on the ground that the indictment named October 5, 1951, as the date of contempt when actually the subcommittee had given him 10 days from that date in which to comply. The Court states "Yet for all we know, a witness who was adamant and defiant on October 5 might be meek and submissive on October 15."

24. *Uphaus* v. *Wyman*, 355 U.S. 16 (1957) (pending): Appellant Uphaus appealed from affirmance by the New Hampshire Supreme Court of his conviction of contempt of court for refusing on grounds of the first amendment to produce a response to subpena duces tecum, a guest list and certain correspondence with speakers at World Fellowship, Inc., a summer camp in Albany, N.H., of which appellant was executive director. The documents were subpenaed by a State legislative committee in the course of a State investigation of subversive activities. The U.S. Supreme Court without hearing argument on October 14, 1957, vacated the judgment of the New Hampshire Supreme Court and remanded the case for further consideration in light of *Sweezy* v. *N.H.*, whereupon the New Hampshire Supreme Court reaffirmed its former decision and appellant again appealed. This case was argued before the U.S. Supreme Court on November 15, 1958, and a further decision is now pending.

The Sheiner case (Florida): In accordance with the resolution of the house of delegates and authorization of the board of governors, our committee—on the request of the State attorney for cooperation—applied for and obtained permission to appear as amicus curiae in the appeal pending in the Supreme Court of Florida from the order of dismissal of the disciplinary proceedings against Leo Sheiner. Leo Sheiner had twice previously been ordered disbarred by the Circuit Court of Florida.

Our committee prepared and submitted a brief to the Supreme Court of Florida in which its views were set forth with relation to the duty of the bar and of the courts concerning the responsibilities in maintaining the high standards of fitness required of lawyers. The committee further defined its concept of an acceptable standard for attorneys. Any member of the bar who, in appropriate proceedings persists in refusal to answer pertinent questions concerning his activities in the Communist Party or Communist-dominated fronts on the ground that his answers to such questions concerning his activities might tend to incriminate him is unfit. It is inconceivable to us that an attorney and officer of the court may continue in good standing while he pleads self-incrimination in refusing to answer questions relating to subversive activities.

The brief pointed out that labor-union officials, teachers, Government employees, and employees of private industry, have been safeguarded in invoking the fifth amendment to inquiries which might tend to incriminate them. However, in so doing, they demonstrate lack of candor required of attorneys and forfeit their positions of trust and responsibility. The Sheiner case is most important to the bar. Other States having such problems await the final decision.

The appeal was argued before the Supreme Court of Florida on February 8, 1958. Julius Applebaum, a member of our committee, argued as amicus curiae for this association. On July 24, 1958, the court ordered further argument on September 5, 1958, and requested supplemental briefs as to the application of three decisions, *Max Lerner* v. *Hugh J. Casey et al.*; *Herman A. Beilan* v. *Board of Public Education, School District of Philadelphia;* and *Milton Knapp* v. *Mitchell D. Schweitzer et al.*, rendered by the United States Supreme Court on June 30, 1958. Our committee prepared a supplemental brief on behalf of the association and participated in the supplemental argument. As of this writing, the Supreme Court of Florida has not yet rendered its decision. The committee is willing to appear in similar cases upon direction of the house of delegates or board of governors.

In sharp contrast to the due process afforded Sheiner is the Associated Press dispatch of September 16, 1958. By decree of the Communist regime in Hungary, 3,500 lawyers were disbarred. They were deemed to lack approved political qualifications.

COMMUNIST TACTICS

The Communists have set forth their master plan of world conquest even more forthrightly than did Hitler in "Mein Kampf." The Communist Manifesto is specific: "The Communists disdain to conceal their views and aims. They openly declare that their ends can be attained only by the forcible overthrow of all existing social conditions."[8] Communists have never deviated from the theory enunciated by Marx and the strategy devised by Lenin.

The Communist master plan for world conquest has been outlined by both Lenin and Stalin as entailing the violent smashing and overthrow of all non-Soviet governments, including those of Great Britain and the United States. Prior to this overthrow and to prepare for it in each instance, the Communist Party is to make transmission belts of all possible nonparty agencies for the diffusion of the Communist line, weakening the country to be overthrown. Already this has become an historical fact to which once free peoples, now enslaved, can testify. Need we have more evidence of Soviet intent?

During the last 25 years, the United States has participated in hundreds of meetings with the Communists, including those held at Teheran, Yalta, Potsdam, Panmunjom and Geneva. All this talk has led to many major agreements and Soviet Russia has broken almost all of them. The Communists have followed Lenin's dictum about

[8] "Manifesto of the Communist Party" by Karl Marx and Friedlich Engels (International Publishers, New York, 1932), p. 44.

treaties and agreements: "Promises are like pie crusts—made to be broken." [9]

The United States has met on countless occasions with the Chinese Reds to negotiate the release of American prisoners. The record is a dismal one. In June 1954 a total of 76 Americans were held in Red China. On August 1, 1955, 35 were released. An additional 28 were released at the end of 1955. Since then nine more have been released. On January 9, 1958, the Reds in China were holding four Americans and in October 1958 had arrested a fifth American, a Roman Catholic priest. The Communists have followed Stalin's principle of diplomatic intercourse:

"Words must have no relation to action—otherwise what kind of diplomacy is it? Words are one thing, actions another. Good words are a mask for concealment of bad deeds. Sincere diplomacy is no more possible than dry water or iron wood." [10]

HINDSIGHT OR SOUND APPRAISAL

On June 17, 1958, when the Soviet news agency, Tass, announced the executions of former Hungarian Premier Imre Nagy, Gen. Pal Maleter, and two other leaders of the anti-Communist rebellion of 1956, Western leaders expressed shock and dismay. General Maleter, the hero of the rebellion, had been seized by the Soviets when he met with them under a flag of truce to negotiate the withdrawal of the Red army from Budapest. Nagy and his associates were executed, although they had received in advance a written guarantee of safe conduct when they left their asylum in the Yugoslav Embassy.

In March 1945, 16 top leaders of the Polish Government were invited to Moscow to participate in the conduct of negotiations. They were promised on the word of honor of the Soviet Government that they would be afforded safe conduct. All 16 were arrested and then vanished. Nothing further was heard of any of them until 10 years later, when the wife of Gen. Leopold Okulicki was notified of his death 9 years before in a Soviet prison.[11] Since the Katyn Forest massacre, which came to light in 1943, where thousands of Polish officers who were prisoners of the Soviets were shot and buried in a trench, it has been obvious that coexistence with communism is a contradiction in terms.

Marx and Engels stated this objective in the Communist Manifesto:

"The theory of the Communists may be summed up in the single sentence: Abolition of private property." [12]

Lenin gave this command to Communists:

"It is necessary to agree to any and every sacrifice, and even, if need be—to resort to all sorts of stratagems, maneuvers, and illegal methods, to evasion and subterfuge." [13]

On another occasion, Lenin added:

"As long as capitalism remains we cannot live in peace. In the end one or the other will triumph—a funeral requiem will be sung over the Soviet Republic or over world capitalism." [14]

On September 17, 1955, Nikita Khrushchev warned us: "If anyone thinks that our smiles mean the abandonment of the teachings of Marx, Engels, and Lenin, he is deceiving himself cruelly. Those who expect this to happen might just as well wait for a shrimp to learn how to whistle." [15]

Khrushchev made this statement to Western diplomats at a Moscow reception on November 18, 1956:

"If you don't like us, don't accept our invitations and don't invite us to come to see you. Whether you like it or not, history is on our side. We will bury you." [16]

Khrushchev appeared on our American television screens on June 2, 1957, and confidently told us: "Your grandchildren will live under socialism."

William Z. Foster dedicated his book, "The Twilight of World Capitalism," to his great-grandson, "who will live in a Communist United States."

The key to Communist tactics is the dialectic; expressed through what is known as historical materialism. By constant examination of the directive documents which flow from Moscow to the Communist parties of the world, and adapted in turn by them to the conditions of each country, we see the dialectic at work through the Communist line.

Under the theory of the dialectic, as it allegedly works in society and history, the triumph of the world Soviet dictatorship or socialism, leading to world communism, is inevitable. No action of any human agency can halt this fatalistic process. But it is not a progress that is made on a straight line or even on a curve; it is a zigzag movement due to the struggle of contending forces and their relative strengths from time to time, a course which, however, leads ever onward toward world dictatorship. This results at times in Communist advances, at times in retreats. Each development must be taken advantage of by Red tactics and strategy to forward the course of world dictatorship to the maximum under the prevailing conditions.

Stalin has stated clearly the object of the strategy of retreat or apparent retreat when he says: "The object of this strategy is to gain time, to demoralize the enemy, and to accumulate forces in order later to assume the offensive." [17] This follows Lenin's tactics which have been described in his work "One Step Forward, Two Steps Backward".[18]

The result of the strategy and tactics thus devised, to take into account the relationship of forces at any particular time, is the appearance of forward and backward movements, which are all designed by their zigzag course to lead to furthering Soviet advances. Because of the general lack of knowledge in the United States of these tactics and strategy, as laid down by Lenin and Stalin and summed up in the latter's "Foundations of Leninism," the Soviet advance made during the past 25 years has been little less than amazing.

History now records the facts of Communist dialectics at work. Under Stalin the change from hostility to apparent friendship and back to hostility were changes by periods. There was the Hitler-Stalin pact period (time of hostility), the World War II period (time of apparent friendship), and the postwar period (time of hostility again). Under Khrushchev Stalin was damned, Lenin exalted, and then at a 1957 diplomatic reception Khrushchev switched and said, "God grant that every Communist should fight for the interest of the working class as Stalin did." The Communist strategy under Lenin, Stalin, and Khrushchev is to use both hot and cold methods at once. Thus in the past few months we have witnessed the shelling of Quemoy and threats to Berlin coupled with cultural exchanges and the trip of Soviet Deputy Premier A. I. Mikoyan. We saw his smiles and snarls. The Communists aim to keep us complacent until the choice is annihilation or surrender, at which time they confidently expect us to submit to a negotiated surrender.

Also during the past year, the Communists went forward with the rocks and garbage thrown at Vice President NIXON in South America; backward with the smiles of Menshikov; forward with the executions of Nagy and Maleter; backward by allowing Tito to make a few anti-Soviet statements; forward with the defeats of anti-Communists in Syria and Indonesia—all with the same unity of purpose that makes everything contribute to their plan of world conquest.

Current Communist tactics include the following:

1. Nullification of the Smith Act and other anti-Communist legislation. FBI Director J. Edgar Hoover testified January 16, 1958, at a House hearing made public in May, that 49 of the 108 Communist leaders convicted by Federal juries under the Smith Act have been set free by Supreme Court decisions.[19] As of January 25, 1959, only 33 convictions of Communists remain as such while of the 108 convicted 75 have been released. Judge Richard H. Chambers, of the U.S. court of appeals, in a decision releasing 11 of these convicted Communists, said that Supreme Court decisions have left the Smith Act, as to any further prosecution under its provisions, a virtual shambles.

J. Edgar Hoover has testified that a top Communist functionary described the Supreme Court decision in the Smith Act case of June 17, 1957, as the greatest victory the Communist Party in America has ever received.[20] The Daily Worker summed up the Yates, Watkins, and other cases of that same day in these words: "The curtain is closing on one of our worst periods." [21] The Sunday Worker of May 11, 1958, contains strong opposition to any legislation to overcome the Supreme Court's rulings on internal security.

Other anti-Communist laws which have been targets of the Communist Party and which are now nullified or weakened by the judicial decisions are the Subversive Activities Control Act of 1950, the anti-sedition laws of 43 States, and Hawaii, key security provisions of the Immigration and Nationality Act of 1952, and the Summary Suspension Act of 1950.

2. Muzzling the FBI and congressional investigations. For years the Communist Party has poured out its most hysterical language against that which the Reds call "the Gestapolike FBI," and congressional "inquisitions and witch hunts." This tactic has been so successful that it is now said that the Communists don't have to tell congressional committees anything. The effectiveness of the Communist propaganda machine is attested to by the frequency of attacks from sources of presumed respectability. It is significant to note the similarity of these so-called respectable verbal and written brickbats with Communist poisoned darts. As the world Communist onslaught continues, an intensification of attacks on the FBI, congressional committees, and, indeed, all other effective anti-Communist forces can be expected. In fact an excellent criteria of the effectiveness of any group which labors to preserve the American way of life is the intensity of Communist and radical attacks directed at them.

[21] Editorial, June 19, 1957.

Judge Robert Morris, chief counsel for the Senate Internal Security Subcommittee for 6 years, said: "The power of the Congress to learn the underlying facts of the [Communist] conspiracy has been hamstrung" since the decision in the Watkins case.

There appears to us to be little question that the dicta in such cases as Watkins and Sweezy have compounded the difficulties of investigating committees in the security field. Witnesses, dominated by the Communist Party, have used the dicta to impede the function of Congress in its legislative responsibility. On this basis Communists have adopted the tactic of invoking the first amendment rather than the fifth amendment in refusing to answer obviously pertinent and important questions.

In the first session of Congress subsequent to the Watkins decision, hearings by the House Un-American Activities Committee was practically brought to a halt and the Senate Internal Security Subcommittee suffered a similar plight. On July 5, 1958, the press reported that congressional investigations into the Communist conspiracy have reached an all-time low for the last two decades. However, committee files are bulging with data on the conspiracy which are crying for exploration to form the basis for corrective legislation.

The experience of France, and more particularly, Germany, show the danger of restricting legislative investigations.[22] Bismarck so feared the power of parliamentary investigation that he dissolved the Prussian Parliament when it attempted to assert its right of investigation. Historians agree that the lack of legislative investigation was the greatest single cause for the authorization of Imperial Germany.

When the Weimar Republic was created, article 34 of the constitution granted the Reichstag the power to appoint investigating committees. When the Reichstag attempted to exercise its constitutional right, the German Constitutional Court, in two key cases, narrowed the scope of parliamentary inquiry so considerably that the investigating powers of the Reichstag were inadequate to its tasks. As a result, the Reichstag never exposed the Nazi, purges by Hitler, concentration camps, and secret police. The success of the Nazi conspiracy taught the German Supreme Court a lesson. On August 17, 1956, it handed down a scholarly 375-page opinion which outlawed all activities of the Communist conspiracy in West Germany.

Notwithstanding some mistakes—fewer than generally charged—the service to our country by the Senate Internal Security Subcommittee and the House Un-American Activities Committee has been incalculable and worthy of far greater praise than has been accorded to them. The Communist and radical propaganda against these committees has never subsided. Our committee, therefore, recommends the adoption of Resolution V.

This committee has been astonished to read the proposal to the Congress that one of its committees charged with investigating National and State security and Communist activities be discontinued. We regard any attempt to terminate or to curtail the work of the committee of each House charged with this vital duty as a distinct disservice to the Nation.

3. Ultimate elimination of Federal and State security programs. This tactic has been successful with regard to nonsensitive position in government and evidence is abundant that the Communist conspiracy considers nonsensitive position vitally important. Government employment is not a right but a privilege.

[22] Ehrmann, Henry W., The Duty of Disclosures in Parliamentary Investigations: A Comparative Study, 11 University of Chicago Law Review, 117–153, February 1944.

4. Communism is worldwide in its scope of operations which require travel on the part of its propaganda and espionage agents. For this reason Communists and their dupes aided by innocents have long been carrying on a vigorous campaign to break down, or weaken, passport control in the United States. Meanwhile, they maintain strict controls in the Soviet Union, Red China, and other satellite countries.

5. The peace offensive. On April 1, 1951, the House Un-American Activities Committee issued a report called "The Communist Peace Offensive; a Campaign To Disarm and Defeat the United States." This document showed in detail how intellectuals, professors, writers, and others who influence public opinion, were attracted to various Communist peace fronts. This report said: "The most dangerous hoax ever devised by the international Communist conspiracy is the current worldwide peace offensive."

Today, under the slogans "peace" and "peaceful coexistence," we are witnessing an intensification of this Communist peace offensive. The Czechs and Hungarians found that coexistence with communism is enslavement. Peaceful coexistence means Communist conquest without war. In his February 1956 report to the 20th Congress of the Communist Party of the Soviet Union Khrushchev asserted in Aesopian language that peaceful coexistence would lead to the victory of world communism.[23]

Dr. Fred C. Schwarz, in his testimony before the House Un-American Activities Committee, has accurately described what the Communists mean by peace: "Every act that contributed to the Communist conquest is a peaceful act. If they take a gun, they take a peaceful gun, containing a peaceful bullet, and kill you peacefully and put you in a peaceful grave. When the Chinese Communists murder millions, it is an act of peace. When the Russian tanks rolled into Budapest to butcher and destroy, it was glorious peace." This is what J. Edgar Hoover calls "semantic sabotage."

In describing the recent case involving the Communist spy Rudolph Ivanovich Abel, J. Edgar Hoover testified:

"I mention this case particularly, Mr. Chairman, because there are some people who think that the matter of Soviet espionage is a thing of the past and no longer exists in view of the theme of peaceful coexistence the Soviets continue to expound. Many of the incidents in the Abel case occurred in 1957." [24]

We must realize that Communist governments resort to blackmail, counterfeiting, forgery, kidnaping, lying, mass murder, slavery, subversion, theft, and treaty breaking as part of their official state policy. It is a matter of historical record that the Kremlin blackmailed the Allies into concessions during World War II by threatening to sign a separate peace with Hitler; that Communist governments have counterfeited American money and forged American passports; kidnaped American citizens and held them for ransom; kidnaped 28,000 Greek children in the most cruel mass abduction in modern history; murdered thousands of Polish officers at Katyn Forest[25], 6,112 American soldiers whom they captured in Korea,[26] and thousands of boys and girls in Hungary; forced millions of Polish, Latvian, Lithuanian, Esthonian, Czech, Hungarian, and Ukrainian citizens to work as slave laborers in Siberia; stole 600 tons of gold bars worth $600 million from the Government in Spain in 1936; [27] destroyed by subversion the postwar Republics of Bulgaria, Czechoslovakia, Hungary, and Poland; and violated 50 of their last 52 treaties.

6. Summit conference: Pressures exercised to influence the President of the United States to arrange for a summit conference with Khrushchev are unfortunate. Such pressures have been applied by friendly nations and by some inexperienced but well-meaning citizens. Communists have the most deplorable record in all history for violation of sacred treaties. It is the policy of Communists to promise anything and to perform nothing unless it serves their immediate needs. Communists should first demonstrate by concrete actions their good faith in their stated desire for peace. Without such evidence of good faith any conference becomes merely a Communist vehicle for their propaganda purposes. It is hopeless and futile to rely upon voluntary compliance with treaties by Communists. The Communists, through Khrushchev can free East Germany, Hungary, Poland, Czechoslovakia, and other enslaved nations and thus demonstrate in 24 hours their good faith and a true desire for peaceful coexistence.

Experts on communism testified before the U.S. House Un-American Activities Committee on April 30, 1958, that the Kremlin looks upon a summit conference solely as another weapon in its program for global conquest. Time will tell us the influence which the Soviet Deputy Premier A. I. Mikoyan, in his "open sesame" tour of the United States last January has exerted to entrap the United States into another summit conference.

7. Cultural exchanges: Nikita Khrushchev's famous report of 1956 lists cultural and business exchanges as one of those developments which will bring about the growing weakness of the United States and advance world socialism. On June 2, 1957, Khrushchev appeared on American television screens and called for a wider exchange of cultural delegations.

On December 22, 1957, the Communist Daily Worker desecrated the greatest religious holiday in Christendom by declaring that perhaps the best Christmas present Santa Claus will bestow on America will be the widespread cultural exchange of certain Americans with Soviet agents coming to this country.

On January 27, 1958, the United States signed a 2-year agreement with the Soviet Union for the exchange of persons in the cultural, scientific, technical, and educational fields. The primary activity of every one of Moscow's cultural delegates while in this country is to promote the Communist world revolution. E. H. Cookridge, former British secret service agent and an authority on Soviet espionage, had this to say: "Every Soviet football team, every athlete competing at an international sport event, Soviet scientists attending a congress abroad, the Moscow Ballet performing in a Western capital or a group of Soviet artists at a film festival are invariably accompanied by special agents of the Soviet secret police." Judge Robert Morris, who has spent the last 17 years intensively studying and exposing the Communist conspiracy, said: "In past years of the exchange, secret police have passed as farmers, ice skaters, clergymen, and scientists, for the purpose of conducting espionage operations in this country." Professor Seymour Mellman of Columbia University at a disarmament conference held in Washington, D.C., on January 23, 1959, stated (as reported in the Washington Daily News of that date) that, "Owing to the possibility of moving

[27] "Scope of Soviet Activity," pt. 51, pp. 3434, 3435.

nuclear warheads in small containers, it is not excluded that the principal cities of the world may already be mined with atomic warheads and their appropriate firing devices." Under these circumstances, what guarantee do we have that Soviet visitors may not engage in such destructive practices? AFL–CIO President George Meany said, on cultural exchanges: "No believer in the basic principles of free trade unionism could today conceivably desecrate these principles by undertaking to visit a country whose tyrannical leadership has for the 40 years of its existence been the avowed and uncompromising enemy of all human rights."

Cultural exchange with Soviet Russia should not be a one-way street. There can be no doubt that understanding could come from an honest two-way cultural exchange program where there is a full disclosure of the identities of visitors to any country. So when a Mikoyan visits the United States, those who fete him should know who he is and that for which he stands.

The *responsible* Newsweek magazine has this to say about Mikoyan in its issue of January 12, 1959:

"Mikoyan is one of the butchers of Budapest. It was he who helped engineer the great doublecross that crushed the Hungarian revolt in October 1956. To lull the leaders of the revolt Mikoyan endorsed Imre Nagy as the new premier; at the same time, he made plans for the Communist puppet Janos Kador to take over. His promise to withdraw the Russian forces from Hungary lured Nagy's Defense Minister to a meeting where Soviet troops could arrest him."

Henry A. Wallace, in a frank article published in 1952, related that he did not realize during his tour of Soviet Russia how the Communists were making feverish efforts to hoodwink him. Wallace said that it was only much later that he learned how a Communist slave labor camp had been transformed into a show city, with prisoners herded out of sight and watchtowers torn down, merely to deceive the American Vice President. Elinor Lipper verifies this in her book, Eleven Years in Soviet Prison Camps. As a prisoner in a slave camp visited by Wallace, she gives an inside account of how American tourists in Russia are deceived.

8. Recognition of Red China. Much of the propaganda in this country which supports recognition of Red China is Communist-inspired or encouraged. Diplomatic recognition is helpful to Communist subversion. The Communist espionage apparatus uses the diplomatic immunity of its embassies and consulates to establish spy centers. It requires the unbroken seal of the diplomatic pouch to transmit orders to its spies and to receive in turn their reports and microfilmed documents.

The Red diplomatic apparatus functions are described in detail in the report of the Canadian Royal Commission [28] which investigated code clerk Igor Gouzenko's revelations. They may be found, too, in the Report of the Australian Royal Commission [29] which investigated Embassy Secretary Vladimir Petrov's confession. They are told as well in the Senate Internal Security Subcommittee investigation of United States Communists working for the U.N.[30] conducted by Senator Herbert O'Conor, immediate past chairman of this committee:

That Red China will model her tactics after the tactics of Soviet Russia is made clear by the statement of Premier Chou En-lai in the Communist magazine International Affairs:

"The great Communist Party of China, organized by progressive elements of the Chinese people, was founded and developed under the influence of the October Revolution, and was modeled on the Communist Party of the Soviet Union." [31]

The most important loss that would be sustained by our recognition of Red China would be (1) the prestige that the Communist regime would attain therefrom and (2) the demoralization of and hurt to the free nations, particularly in Asia. Moreover, can we give recognition to a government that is presently destroying the very fabric of human relations—the family—and enslaving its people in the manner that even the Communist rulers in Russia have not dared attempt? Responsible governments of free nations still have some responsibility to mankind and civilization. History has shown the recognition of the Soviet Union to have been a grievous error. We should not repeat that error with Red China.

9. Halt nuclear tests: The Communist tactic to obtain an agreement with the West halting nuclear tests is similar to Soviet exploitation of the agreement made at Panmunjom, namely, not to rearm the North and South Koreans with jet planes and other modern weapons. The Soviets promptly violated this agreement. Then they violated its inspection clause by refusing to permit the neutral inspection team to inspect North Korean airfields.

The suspension of nuclear tests without complete inspection would result in the United States termination of testing. However, within the vast, isolated Soviet land mass there would be a circumvention of this ban on testing.

10. East-West trade: Khrushchev's report of February 14, 1956, before the 20th Congress of the Communist Party of the Soviet Union, calls for East-West trade; [32] and this has been a part of the Communist line for many years. Foreign trade to a Communist country is a political weapon to be turned on and off in accordance with its military strategy as a means of waging cold war. It is a means of obtaining from the outside world the strategic materials with which it can arm itself for world conquest. Trading with the Communist bloc would be a psychological as well as a military defeat for the United States. The goods we might sell to the Communist bloc will be used against us just as the superb Rolls Royce engines sold to Russia were used to power the Mig–15's against us in Korea.

In May 1958, Khrushchev sent an 8-page letter to President Eisenhower in which he brazenly suggested that the United States grant Soviet Russia long-term dollar credits in order to finance trade with the United States. We would not gain by trading our machinery for Soviet I O U's or even Russia's raw materials. The Senate report on the "Accessibility of Strategic and Critical Materials" issued July 9, 1954, shows that the Western Hemisphere contains all the 77 critical and strategic materials needed for military security. The bait of foreign trade is held out with the objective of developing pro-Soviet sympathy within the United States and thus undermining our national unity.[33]

1. Propaganda: Communists are spending billions annually on propaganda around the world and it is reaching every city and hamlet in our Nation. This propaganda comes not only from the Soviet Union but also from Red China, from Iron Curtain countries, and from Western Europe. Much additional Red propaganda is published in the United States by Communist publishers.

12. Humiliation: The Communists use the tactic of humiliation. This tactic had already been used by the Communists on American prisoners in Korea. Communists have been active in supporting insulting demonstrations all over South America. On July 18, 1958, a mob of 100,000 Communists gathered in front of the American Embassy in Moscow and threw ink bottles and stones which shattered many of the windows on the first five floors. There has been a wave of demonstrations against the American information agencies in various parts of the world, accompanied by burnings of the American libraries. A number of Americans are being held captive behind the Iron Curtain.

13. The Communist tactics of vilification: One of the most constantly used tactics and tools of the Communists, and those deliberately aiding them, or misled by them, is the effort to defame, destroy, or becloud the reputation of anyone, whatever his position or standing, who exposes or fights communism. No regard for truth is ever permitted to halt such campaign. Lies and half truths are effective with the unthinking or the indifferent.

Example after example can be cited. Every member of congressional investigating committees has been the victim of this tactic. The FBI and its dedicated Director have been a prime target—and will continue to be so long as they are effective in combating communism. Every judge who did not respond to their arguments became a subject for this tactic.

The irony of fate has frequently decreed that this tactic be used by ruling Communists—temporarily in power—against their "comrade rulers" of yesterday when the simple struggle for power makes their "comradeships" a threat within the ruling clique. The guillotine of office or rank—followed by the routine, groveling, demoralizing "confession" is frequently not enough. The campaign of vilification and defamation must still be pursued. The degradation of Communists knows no bottom.

We plead with the bar—its leaders and members and the American people to understand this prime tactic of Communists and not to be misled by it. When the bar thinks an American agency or public official deserves criticism let them do it in the American way by going first to the public official or responsible administrator and call the facts to his attention. Perhaps there is another side to the issue. Those who charge violation of due process can strengthen their position by first practicing the principles of due process. When the enforcement machinery of our State, county, municipal or Federal Government comes under unjust attack it is the duty of members of the bar as community leaders to come to their defense.

With each succeeding act of Soviet bad faith, many Western spokesmen express surprise. When anti-Communists reply "You should have expected this," the politically naive make a common rejoinder: "That is mere hindsight; no one could have predicted that the Communists could be that bad." It is appropriate to point out that informed anti-Communists have always known and publicly stated that it is impossible to negotiate with international communism.

It was not hindsight, it was sound appraisal when Secretary of State Bainbridge Colby said on August 10, 1920:

"The existing regime in Russia is based upon the negation of every principle of honor and good faith. * * * The responsible leaders of the regime have frequently and openly boasted that they are willing to sign agreements and undertakings with foreign powers while not having the slightest intention of observing such undertakings or carrying out such agreements. * * * Upon numerous occasions the responsible spokesmen of this power, and its official agencies, have declared that it is their understanding that the very existence of Bolshevism in Russia, the maintenance of their own rule,

[33] The U.S.S.R. still owes vast sums to the United States that are overdue and unpaid.

depends, and must continue to depend, upon the occurrence of revolutions in all other great civilized nations, including the United States, which will overthrow and destroy their governments and set up Bolshevist rule in their stead. They have made it quite plain that they intend to use every means, including, of course, diplomatic agencies, to promote such revolutionary movements in other countries. * * * We cannot recognize, hold official relations with, or give friendly reception to the agents of a government which is determined and bound to conspire against our institutions; whose diplomats will be the agitators of dangerous revolt; whose spokesmen say that they sign agreements with no intention of keeping them." [34]

It was not hindsight, but sound appraisal when Secretary of State Charles Evans Hughes stated on March 21, 1923:

"We are just as anxious in this Department and in every branch of the administration as you can possibly be, to promote peace in the world, to get rid of hatred, to have a spirit of mutual understanding, but the world we desire is a world not threatened with the destructive propaganda of the Soviet authorities, and one in which there will be good faith and the recognition of obligations and a sound basis of international intercourse." [35]

It was not hindsight, it was sound appraisal when Robert F. Kelley, Chief of the Division of Eastern European Affairs in the Department of State, wrote in a memorandum dated July 27, 1933:

"The fundamental obstacle in the way of the establishment with Russia of the relations usual between nations in diplomatic intercourse is the world revolutionary aims and practices of the rulers of that country. It is obvious that, so long as the Communist regime continues to carry on in other countries activities designed to bring about ultimately the overthrow of the government and institutions of these countries, the establishment of genuine friendly relations between Russia and those countries is out of the question." [36]

It was not hindsight, it was sound appraisal when United States Ambassador to Moscow Laurence Steinhardt reported, on June 17, 1941:

"My observation of the psychology of the individuals who are conducting Soviet foreign policy has long since convinced me that they do not and cannot be induced to reopen to the customary amenities, that it is not possible to create 'international good will' with them, that they will always sacrifice the future in favor of an immediate gain, and that they are not affected by ethical or moral considerations nor guided by the relationships which are customary between individuals of culture and breeding. Their psychology recognizes only firmness, power and force, and reflects primitive instincts and reactions entirely devoid of the restraints of civilization. I am of the opinion that they must be dealt with on this basis and on this basis alone." [37]

CURRENT FALLACIES ABOUT COMMUNISM

So much misinformation is current about communism that it is appropriate to expose some of the major fallacies.

1. "Communism in the United States is dwindling in power because the party is dwindling in numbers."

This popular belief shows a complete misunderstanding of Leninism. Lenin's great contribution to communism was his principle of the dedicated few. He coined the expression "the fewer, the better." He originated the party of professional revolutionaries subject to military discipline. He rejected the idea of a popular party, and enunciated the principle that no one should be given party membership unless he was under discipline. This is how Lenin was able to establish communism in Russia with only a handful of supporters and later to take over Russia with only 40,000 followers.

It is just as false to measure the strength of communism in the United States by comparing the small number of party members with the large number of non-Communists, as it would be to measure the seaworthiness of a ship by comparing the area of its holes with the area of its hull. A few strategically placed holes can sink the largest ship.

A substantial strength of communism in the United States is the number of non-Communist organizations and individuals who will collaborate with the Communists. For every Communist Party member, there may be 10 non-Communists who will do the work of the Communists.

The Communists have had hundreds of fronts. In addition, they have fronts in front of the fronts. Making use of their fellow travelers and dupes, plus their united-front tactic, the Communists boast they can have 50,000 letters on any issue sent to Capitol Hill or the White House inside of 72 hours.

The strength of the Communist Party was succinctly dealt with by J. Edgar Hoover in his book "Masters of Deceit" where on page 5 he states:

"The party's membership in this country reached a low in 1930 when it had 7,500 members, and a peak of 80,000 in 1944: its membership at 5-year intervals since 1930 has been as follows: 1935—30,000; 1940—55,000 (a drop of 15,000 from 1939); 1945—64,600 (a drop of 15,400 from 1944); 1950—43,200; 1955—22,600; and by the summer of 1957 membership had further declined.

"Fluctuations in the American party parallel those in foreign countries. The record clearly establishes that Communist parties have the power of swift and solid growth when the opportunity arises. The following figures reflect how party membership can dwindle and then spurt:

"In Italy, party membership went from 6,000 in 1943 to 2,500,000 in 1951; in France, from 20,000 in 1929 to 400,000 in 1956; in Syria, from 250 in 1931 to 10,000 in 1956; in Brazil, from 25,000 in late 1947 to 100,000 in 1956; and in Indonesia, from 30,000 in 1953 to 500,000 in 1956.

"When the Communist Party was at its peak in the United States it was stronger in numbers than the Soviet Party was at the time it seized power in Russia.

"The size of the party in the various Soviet satellites at the time each came under Soviet control discloses how a well-organized band of revolutionaries can impose its rule over the majority population."

	Date of Communist takeover	CP membership on that date	Population on that date
Bulgaria	September 1945	20,000	7,020,000
Rumania	March 1945	800,000	16,409,000
Poland	January 1949	1,000,000	25,225,000
Czechoslovakia	May 1948	1,329,000	12,338,000
Hungary	August 1947	750,000	9,383,000
Albania	December 1945	12,000	1,120,000
Yugoslavia	Mid-1945	141,000	14,500,000

2. "The Communist Party is just another political party."

It has been established by the hearings of the Subversive Activities Control Board in 1951 and 1952, by 20 years of investigation by congressional committees, and by the prior decisions of the Supreme Court in *Dennis* v. *United States* [38] and in *American Communications Association* v. *Douds*,[39] that the Communist Party, U.S.A., is not just a minor political party like the Prohibition Party. In the Dennis case, Chief Justice Vinson rightly described the Communist Party as "a highly organized conspiracy, with rigidly disciplined members subject to call when the leaders, these petitioners, felt that the time had come for action."

Like an iceberg, eight-ninths of the Communist Party has always been underground. The crypto-Communists who carry no cards, and whose names appear on no party records, are the most dangerous Communists. Top Communist agents such as Klaus Fuchs, Guy Burgess, and Donald MacLean never marched in a May Day parade, never carried a hammer-and-sickle banner, never raised a clenched fist at a Red rally. They were effective agents because they were always underground conspirators, and never aboveground. Communism will never win or gain followers on the basis of merit of its ideology or of truth. Ironically there are also those who have been infected with the Communist propaganda of inevitability. Secretary of State John Foster Dulles dealt with this matter in a speech before the National Council of Churches in Cleveland, Ohio, last November when he said:

"There are some who seem to feel that because international communism is a powerful and stubborn force, we should give way before it.

"Nothing could be more dangerous than to operate on the theory that if hostile and evil forces do not readily change, it is always we who must change to accommodate them.

"But let us make our opposition not just a barren negative, but a positive alternative." [40]

3. "Poverty breeds communism."

This is the false "stomach" theory of communism. Communism is not a disease caused by an empty stomach; it is a disease of the mind and soul. Communism does not always originate with the poor, the uneducated, the exploited, or the working class. These groups are the victims of exploitation by the Communists. On the other hand, the world's roster of Communists contains the names of many who were well educated and came from families of immense wealth. The list of important Communist agents who were once known as student intellectuals is an endless one. All that is needed is to call the roll of important Communist leaders and secret agents and among them will be found once well-fed ingrates who were traitors to their society, in their quest for personal power.

4. "The only alternative to peaceful coexistence is world war III with nuclear destruction of our cities."

The Communists do not want to destroy us or our cities if they can take our cities intact as they captured Prague and the giant Skoda munitions works. They plan to capture America with native Communists, just as they took Czechoslovakia with Czechs, China with Chinese, Indochina with Indochinese, South Korea with Koreans, and almost took Spain with Spaniards. Why should they want to destroy our productive might if they can win it by subversion and convert it to furthering the Communist world?

Sir Winston Churchill, whose ability to look ahead has been established as a historical fact said, more than 20 years ago:

"Communism is not only a creed. It is a plan of campaign. A Communist is not only the holder of certain opinions; he is the pledged adept of a well-thought-out means of enforcing them. The anatomy of discontent and revolution has been studied in

[34] U.S. Senate Internal Security Subcommittee, Second Report, Mar. 22, 1954, p. 41.

[35] U.S. News & World Report, Dec. 17, 1954, p. 128.

[36] Ibid., p. 130.

[37] Ibid., July 4, 1958, p. 72.

[38] 341 U.S. 494.

[39] 339 U.S. 382.

[40] New York Times, Nov. 19, 1958, p. 6.

every phase and aspect, and a veritable drill book prepared in a scientific spirit for subverting all existing institutions. The method of enforcement is as much a part of the Communist faith as the doctrine itself.

"At first the time-honored principles of liberalism and democracy are invoked to shelter the infant organism. Free speech, the right of public meeting, every form of lawful political agitation and constitutional right are paraded and asserted. Alliance is sought with every popular movement toward the left.

"The creation of a mild Liberal or Socialist regime in some period of convulsion is the first milestone. But no sooner has this been created than it is to be overthrown. Woes and scarcity resulting from confusion must be exploited. Collisions, if possible attended with bloodshed, are to be arranged between the agents of the new government and the working people. Martyrs are to be manufactured. * * *

"Pacific propaganda may be made the mask of hatreds never before manifested among men.

"No faith need be, indeed may be, kept with non-Communists.

"Every act of good will, of tolerance, of conciliation, of mercy, of magnanimity on the part of governments or statesmen is to be utilized for their ruin.

"Then when the time is ripe and the moment opportune, every form of lethal violence from mob revolt to private assassination must be used without stint or compunction. The citadel will be stormed under the banners of liberty and democracy; and once the apparatus of power is in the hands of the brotherhood, all opposition, all contrary opinions, must be extinguished by death.

"Democracy is but a tool to be used and afterward broken; liberty but a sentimental folly unworthy of the logician.

"The absolute rule of a self-chosen oligarchy, according to the dogmas it has learned by rote, is to be imposed upon mankind without mitigations progressively forever.

"All this, set out in prosy textbooks—written also in blood in the history of several powerful nations—is the Communists' faith and purpose." [41]

The need for all Americans is to know the Communist objectives and what they stand for. In 1937 Pope Pius XI asked a searching question about communism:

"How is it possible that such a system, long since rejected scientifically and now proved erroneous by experience, how is it, we ask, that such a system could spread so rapidly in all parts of the world?"

He answered his own question in these words: "The explanation lies in the fact that too few have been able to grasp the nature of communism."

Twenty-one years later, an additional 750 million human beings have been swept behind the Iron Curtain. But it is unfortunately still true that all too few people understand what communism is. Two years ago our committee reported:

"The greatest asset the Communists have at the present time is not the hydrogen bomb, certainly not Soviet satellites, but world ignorance of their tactics, strategy, and objectives."

When our enemy was Nazi Germany, our Government and military leaders studied every detail of the enemy and his strategy. George S. Patton was one of the truly great generals of the European campaign. Early in World War II, when the Germans were advancing, General Patton was asked one day if he wasn't discouraged. His answer was precise:

"I have studied the German for 40 years. I have read the memoirs of his great men. I have studied every detail of all his military campaigns. I have attended some of his staff courses. I know exactly how he will react under any given set of circumstances. He does not know what I will do. For this reason, when the time comes, I shall beat the hell out of him."

And this he did. The tragedy is found in the fact that there are too few George Pattons.

We can no more save our Republic from communism merely by saying we are against communism, than parents can save their children from polio by fervently being against polio. To conquer any disease requires intelligent study to isolate the germ and discover the vaccine. As the number-one killer in the world today, communism is a disease which merits our urgent study.

REPORT ON COMMUNIST LEGAL SUBVERSION

On Monday, February 16, 1959, the House Un-American Activities Committee made public its report on Communist legal subversion—the role of the Communist lawyer.

We shall not attempt in this already long report to summarize this congressional report. The report should be read not only by every member of this association, but particularly by the officers of the various State and local bar associations of which some of the attorneys mentioned in the report are members. The report does not name every attorney who is a Communist or a member of the Communist Party, but sufficient of them are named to constitute a challenge to the bar. The American Bar Association, while ready to assist, nevertheless, has deemed it more properly to be within the jurisdiction of the State and local associations to take action of investigation, and, where warranted, disciplinary proceedings concerning and against members on their rolls. Our committee feels that no new resolution need be passed by the house of delegates as it has already recommended proper action by the State and local associations against attorneys unworthy of membership in the provision by reason of their activities and their disloyalty to our form of government and to their oaths of office.

On this serious problem, the duty of cleansing our ranks of unworthy or questionable members is that of the bar, and the entire bar will suffer until the stigma on its rolls is removed. With sincere regret our committee must publicly state that the State and local bar associations have not fulfilled their duty to the public. the courts, or the bar.

CONCLUSION

Upon the bar of each nation primarily falls the duty to protect and defend its constitutional form of government and courageously to lead and soundly to advise the peoples and their governments. By their very training and experience, none more than lawyers should be aware of the dangers and the menace of international communism—and, therefore, none is more responsible for the protection of the free world.

Remember, there is no bar worthy of the name in Communist enslaved countries.

Only by alertness and dedication can the organized bar and each of its members perform their duty.

The danger and the menace of communism are worse than ever. Precious time is running out.

Wishes and prayers are not enough.

Respectfully submitted,

Peter Campbell Brown, chairman; Julius Applebaum, James S. Cremins, Egbert L. Haywood, Ray Murphy, Louis B. Nichols, Kendrick Smith, Henry J. TePaske, Jackson A. Wright, Louis C. Wyman.

APPENDIX—RECOMMENDED READING

Books play a vitally important part in the history of government and economics. One need only mention "Das Kapital," the "Wealth of Nations," "Uncle Tom's Cabin," and the "Federalist Papers" to be reminded that books have started wars, changed the economy of great nations, and established new governments.

A number of books published in the past by some of the world's top experts on communism testify to the overriding importance of the Communist issue, and to the unhappy reality that the United States is losing the battle against international communism. A study of the following books and reports could halt the rising tide of world communism.

1. Congressional committee hearings and reports: For 20 years the House Un-American Activities Committee has been patiently investigating the Communist conspiracy. The reports of its hearings, and those of its Senate counterpart, the Internal Security Subcommittee, are an encyclopedia of information on this continuing conspiracy. The abuse which has been heaped upon these committees by the Communists and their fronts is itself an attestation of the value of these reports.

2. "Masters of Deceit": The story of communism in America and how to fight it by FBI Director J. Edgar Hoover (Henry Holt & Co., New York, 1958, $5). Mr. Hoover's preeminence as an authority on communism is unchallenged. This book provides us with a valuable primer on communism in the United States; its history, strategy, membership, and future. He describes the day-to-day operations of the Communist Party, what goes on underground, and how discipline is enforced. He shatters many anti-anti-Communist arguments and shows why this is no time for complacency regarding internal subversion.

3. "What We Must Know About Communism," by Dr. Harry and Bonaro Overstreet (W. W. Norton & Co., Inc., 1958, $3.95). These well-known educators and foremost authorities in adult education examine communism and report from an educator's viewpoint in a clear factual manner. Many authorities on communism regard this book as one of the great contributions to anti-Communist literature.

4. "No Wonder We Are Losing," by Judge Robert Morris (the Bookmailer, New York, 1958, $2.50). Judge Morris has put into this book his personal record of 17 years' investigation of communism on behalf of the New York State Legislature, Naval Intelligence, and as Chief Counsel for the Senate Internal Security Subcommittee. Particularly important chapters concern the famous hearings on the Institute of Pacific Relations, communism's reach into education, and methods and rules of congressional committees.

5. "I Was a Slave in Russia," by John H. Noble (Devin-Adair Co., New York, 1958, $3.75). The author, an American citizen, was captured by the Russians just after V–E Day in 1945 and held prisoner for 9 years. In this book, he tells of his shocking experiences as a slave laborer in Siberia; of other Americans who are still there; and of the millions of political prisoners and how they are treated. This book is especially useful for those who believe in summit conferences and cultural exchanges with the Communists.

6. "Communist Psychological Warfare: Consultation with Edward Hunter," by the U.S. House Un-American Activities Committee (U.S. Government Printing Office, March 13, 1958). In 25 pages of testimony under questioning by Staff Director Richard Arens, Edward Hunter gives a brilliant analysis of current Communist strategy and how it follows here the pattern so successful in Asia. A distinguished journalist, author, and expert on communism in the Far East, Mr. Hunter first translated the term "brain-

[41] Great Contemporaries, by Winston Churchill (G. P. Putnam & Sons, New York, 1937), p. 168.

washing" from the Chinese. In this report he warns that Communist psychological warfare is now winning such extensive victories in the United States that the Red bloc will not need to employ direct military force against us in order to win the total war which they are waging.

7. "International Communism: Consultation with Dr. Fred C. Schwarz," by the United States Un-American Activities Committee (U.S. Government Printing Office, May 29, 1957). Dr. Schwarz is an Australian physician who is one of the world's top authorities on communism, particularly on the Communist mind. In this testimony, Dr. Schwarz gives his expert diagnosis, prognosis, and recommended treatment for the disease of communism. He shows how the first step in the Communist conquest of every country is the ideological conquest of the student mind.

8. "A Guide to Anti-Communist Action," by Dr. Anthony T. Bouscaren (Henry Regnery Co., Chicago, 1958, $4). Dr. Bouscaren is the author of a number of authoritative works in the field of international Communist operations. He is a professor of political science at Marquette University, Milwaukee, Wis., and is currently teaching at the National War College, in Washington, D.C. This book provides specific answers to the question of how individual Americans can combat communism with knowledge and facts.

9. "The Naked Communist," by W. Cleon Skousen (the Ensign Publishing Co., Salt Lake City, Utah, 1958). The author was formerly with the FBI and on the faculty of Brigham Young University and now chief of police, Salt Lake City, Utah; has been a student of communism for the better part of his adult life. His book is a painstaking account of the rise of communism, its philosophy, methods, and tactics. The book is well indexed and documented and belongs on the bookshelves of anyone who has a desire to learn of communism and its worldwide objectives.

Mr. EASTLAND. Mr. President, in a foreword to its report, the bar association committee on Communist tactics, strategy, and objectives has said a number of things that needed to be said, and has said them in language which can hardly be improved upon. I quote from this foreword:

The objective of worldwide communism has never changed—only do its tactics change in order to more effectively infiltrate life in America, to lower resistance to its propaganda and to cripple our defenses against this tyrannical and deadly way of life.

There is not one home in our land which is not affected by communism in some manner. * * *

Our internal security has been weakened by a lackadaisical attitude on the part of the public and technicalities raised in judicial decisions which too frequently in the public mind have had the effect of putting on trial the machinery of the judicial process and free the subversive to go forth and further undermine our Nation. * * *

* * * Should the United States come under attack, it will then be too late to allocate responsibility. Corrective action must be taken now. Time is running out on us.

It is now an established fact that every institution, every force and every person actively engaged in the forefront of the defense of our country against the rising menace of communism becomes the target of attack and vilification by Communists, crypto-Communists, fellow-travelers, their stooges and innocent but beguiled persons.

* * * * *

The fight to keep America free and secure must be strengthened by providing those agencies of our Government which are responsible for our internal security with the means to maintain the security of our shores; the fight for a free America cries out for a furthering of the educational program to combat the evil ideas of communism with truth, and the American bar's responsibility has never been so great as at the present time to assume leadership in the preservation of the freedoms so gallantly won by our forefathers.

I am glad that the American Bar Association report has in unequivocal terms called the attention of the American people to the inexcusable failure of the Supreme Court to discharge its constitutional responsibility in passing upon the Subversive Activities Control Act. I think part of what the American Bar Association committee had to say on this point is worth quoting here:

It has frequently been said that "justice delayed is justice denied." The delays in arriving at final determinations in criminal proceedings have invited criticism of the American judicial process. In no area has this been more tragically illustrated than in cases dealing with Communists. The proceeding against the Communist Party before the Subversive Activities Control Board is a case in point which makes a mockery of justice. Eight years have now elapsed since the enactment of the Internal Security Act of 1950. The status of the Communist Party continues to remain unadjudicated. The constitutionality of the act remains to be determined by the Supreme Court of the United States. The Communists have used every tactic to delay the determination of this case and subsequent enforcement of this act.

Your committee wishes to make clear that this delay is not the fault of the Subversive Activities Control Board itself.

The Subversive Activities Control Board, under the mandate of the Internal Security Act of 1950, issued its order on April 6, 1953. That order, issued after exhaustive hearings and documented in a scholarly manner on a legal basis, found that the Communist Party, United States of America, was a Communist action organization and directed that it must comply with the act. This order remains to be enforced. We reassert the views stated in the brief which the American Bar Association filed in the U.S. Supreme Court in support of the Internal Security Act of 1950. If any part of the said act violates the Constitution, the courts should so hold. Congress should then enact new legislation or amend the present act to conform to any constitutional requirements as determined by the courts. If the act is constitutional, the Communist Party should not continue to enjoy immunity from its security provisions during many years of protracted litigation.

Mr. President, when the board of governors of the American Bar Association transmitted to the house of delegates the report of the American Bar Association special committee on Communist tactics, strategy, and objectives, and when the house of delegates overwhelmingly adopted the recommendations in that report, a landmark was reached in the fight to stop progressive weakening of the internal security laws, which are the major bulwark of this country against the world Communist conspiracy.

The influence of the American Bar Association is very substantial; and until the action taken in Chicago there was a good deal of misunderstanding about the American Bar Association position on antisubversive legislation, especially legislation to correct, insofar as possible, the results of a number of decisions of the U.S. Supreme Court which have weakened internal security laws.

I venture the opinion that the misconception that the American Bar Association as a body was opposed to such legislation accounted for more than the one vote by which the Jenner-Butler bill was defeated in the Senate last year.

In transmitting the report of the special committee on Communist tactics, strategy, and objectives to the house of delegates, the American Bar Association board of governors used careful language, specifically disavowing any censure of the Supreme Court or any intent to attack the independence of the judiciary, and reiterating the obligation of the bar to defend the Supreme Court as an institution. The board also used careful language in characterizing the recommendations of the special committee as being designed "to correct legislative defects in the field of internal security revealed by particular decisions cited in the report."

Technically, this language was justified, since a law passed by Congress is only what the Supreme Court says it is, unless and until Congress speaks again to correct any misinterpretations or misconceptions which the Court may have embodied in its opinions. The fact is, of course, that the defects which need correcting were not inherent in the legislation passed by the Congress, but were grafted into it by the Supreme Court through interpretation and, in some cases, outright judicial legislation.

The most important thing about the action of the American Bar Association house of delegates is the clear indication it gives that the heart of the Nation's lawyers is sound, and that the great majority of these men who are the officers of our courts recognize the inroads upon internal security legislation which have been made by a long series of Supreme Court decisions in recent years, and want something done about it.

The American Bar Association report adopted by the house of delegates contains the clear statement that "recent decisions of the U.S. Supreme Court, in cases involving National and State security, and with particular reference to Communist activities, have been severely criticized and deemed unsound by many responsible authorities."

I do not know whether I am one of the "responsible authorities" to which the American Bar Association report refers, but I have been voicing such criticism for several years. At first it seemed almost as though I were a voice crying in the wilderness, but many other voices have since been raised to cry the same theme.

An earlier report of this same committee of the American Bar Association—unfortunately not presented to the house of delegates—documented this criticism from the record.

The chief justices of the States, by an overwhelming majority, voiced similar criticism in a report which was at once a masterly and scholarly marshaling of the facts, and a scathing indictment of the recent line of majority decisions of the U.S. Supreme Court in the field of

communism, subversion, and internal security.

The 1957–58 National Convention of the American Legion adopted resolutions similar to those of the American Bar Association. National Commander Preston J. Moore sent a congratulatory telegram to Ross Malone, president of the American Bar Association, following the adoption of the report, wherein he said:

The committee on Communist tactics, strategy, and objectives of the American Bar Association performed a monumental work in its documented study. The committee has earned the gratitude of the American people.

The facts can no longer be hidden. They can no longer be glossed over. They can no longer be successfully misinterpreted. They must be faced. Congress must live up to its responsibility, under the check-and-balance system provided by our Constitution, to take effective action to curb the disastrous trend which has been implemented by this series of Supreme Court decisions.

The report of the American Bar Association committee contains a section which is captioned with the single word "unless." This is so important, and so extremely well phrased, that I wish to read from it at some length:

International communism will enslave the peoples of every nation of the free world—including the United States—unless they:

Awaken from their apathy and their indifference to the dangers that exist and threaten.

Learn and appreciate the freedom and the human rights they enjoy—and are determined and prepared to fight to preserve them for themselves and for their children.

Learn and appreciate the meaning of enslavement of the individual as it exists under communism.

Learn and appreciate the difference between the idealistic pretensions of communism and its inhuman reality.

Learn that the Communist ultimate goal of dominating and controlling every nation and every human being, never changes—though its tactics vary from day to day.

Understand that wishes and prayers alone will not suffice to overcome communism or to avoid its menace.

Know that only by unity, determination, strength—moral, scientific and military—and a willingness to state their position in advance, and to be ready to fight for it, can they best safeguard the free world and its institutions.

Remember that Communists respect only those with equal or greater strength.

Know that the plea for peaceful coexistence is a fraudulent tactic of international communism seeking to blind the American people to the Soviet record of broken promises and aggression and intended to paralyze and disarm the free world in advance of the coming Soviet onslaught.

Never forget that international communism—particularly the Soviet—has the worst record for broken treaties in all history.

Remember that communism has never sold itself on its merits nor has it ever been adopted by a free vote of a free people.

Realize that free industry and free labor unions in any country are free only so long as communism does not dominate there—and that both industry and labor carry grave responsibilities in the defense of their nations against communism.

Realize and warn that partisan politics by those occupying or seeking public office may be a great aid to international communism and a serious handicap to one's own country.

Remember that subversion—aided by treason and treachery of domestic citizens—has been the most successful tool and tactic of international communism in gaining control of now-enslaved nations or in weakening or dulling the resistance by those nations which remain free.

Never forget that international communism still maintains as one of its fundamental tenets—where and when necessary—the overthrow by force and violence of any free nation when such overthrow can be successfully accomplished.

Know that one of the Communists' chief tactics is to keep the free world on the defensive by prodding and creating problem spots in every area of the globe.

Know that without sacrifice free nations cannot be protected or prepare themselves for defense from communism's constant assaults or against outright war.

Realize that the process of weakening the free nations is constantly carried out in many ways through subtle and persistent propaganda, and that the weapon of counter-propaganda by truth has not as yet been adequately or affirmatively used against the Communists.

Never forget that while from time to time we may have to confer and negotiate with Communist Russia or other Communist-enslaved nations, their agreements have no sacred or serious meaning to them, will be breached when it is expedient for them to do so, and that such negotiations should be carried on by duly constituted officials of Government and not by self-appointed apologists.

Remember that international Communists continue to talk peace but relentlessly wage war in its many forms at the same time.

Never confuse Communists with the freedom-loving peoples of the nations they dominate and control, or fail to appreciate that these peoples crave freedom and a better way of life, peace, and understanding with other nations.

But if the peoples of the free world are alert to what communism is and how it operates and what it costs in determination, dedication, toil, and sacrifice to protect our freedoms and our way of life, then the free world will survive and communism will ultimately dissipate or destroy itself and its devoted followers.

It is important to note, Mr. President, that in its very first recommendation, this American Bar Association report, now adopted as the policy of the American Bar Association, recognizes that "there are reasonable grounds to believe that as a result of court decisions weaknesses in internal security have been disclosed."

An earlier version of the report, which was given to the press before the house of delegates acted, contained the phrase "grounds to believe that as a result of court decisions internal security is weakened." The language finally used is perhaps more diplomatic, and more careful of the sensibilities of the Court; but the original language, as first printed in the newspapers, was a more precise statement of the fact. Internal security has been weakened as a result of court decisions, and every lawyer who has studied the cases knows it. Remedial legislation by the Congress is urgently required, and I propose to do everything I can to see that such legislation is considered and enacted at the present session. In this effort I am confident I shall have the support of a great many of my colleagues.

The American Bar Association report has specifically recommended that because "problems of safeguarding national and State security have been exposed or created" by this line of Supreme Court decisions, the Congress should give "prompt and careful consideration and study" to these decisions and should prepare and enact amendments to the laws involved "so as to remove any doubt as to the intent of the Congress, and to remedy any defect in the existing laws revealed by the decisions." This is precisely what the Congress must do. The study of these decisions and their impact upon our internal security has been long under way, and the bills which I am presenting to the Senate today are designed to provide some of the remedies which so clearly are needed.

The report of the American Bar Association special committee begins with the statement that it is the duty of the members of the bar "to defend the institutions of the judiciary from unfair and unjust attacks."

Mr. LANGER. Mr. President, will the Senator yield?

Mr. EASTLAND. I yield to the Senator from North Dakota.

Mr. LANGER. As I understand, the bills which were recommended by the American Bar Association were unanimously reported by the Committee on the Judiciary, were they not?

Mr. EASTLAND. The bills which were recommended by the American Bar Association have been introduced today.

Mr. LANGER. The Senator is introducing them today?

Mr. EASTLAND. Yes. Last year the Committee on the Judiciary reported a number of bills in the same field.

Mr. LANGER. They were reported unanimously, were they not?

Mr. EASTLAND. From the Committee on the Judiciary?

Mr. LANGER. Yes.

Mr. EASTLAND. Frankly, I do not remember whether they were unanimously reported.

Mr. LANGER. My recollection is that they were unanimously reported.

Mr. EASTLAND. They were reported by an overwhelming favorable vote, I know.

The board of governors of the American Bar Association, and its house of delegates, naturally concurred in the statement of the special committee I have just quoted. Notwithstanding this statement, the transmission of the report was approved by the board of governors, and the recommendations of the report were adopted by the house of delegates of the American Bar Association. It is necessarily implicit that these bodies recognized that the criticisms of court decisions contained in the report, and its recommendations for legislative action to correct some of the results of these decisions, are neither unfair nor unjust.

The American Bar Association committee has put its finger squarely on one of the greatest problems raised by the line of recent Supreme Court decisions when it stated that—

Much dicta has appeared in recent decisions of the Supreme Court to the effect that the Communist Party is a political organi-

zation of a lawful nature similar to the Republican, Democratic, or Socialist Parties, hinting that disclosure of membership therein or association therewith is entitled to the protection of the first amendment. While this view has not been actually held in any known case, language contained in many of the decisions has invited confusion.

Mr. President, this is a careful understatement. When the lawyers of this American Bar Association committee state that this false view has not been "actually held in any known case," they are speaking from the lawyers' viewpoint that a "holding" in a judicial decision can only include statements necessary to a determination of the case. There is no doubt, and the bar association committee, I am sure, had none, about the fact that this unrealistic view has been expressed in Supreme Court decisions. It has been expressed repeatedly and it has been expressed clearly, in spite of previous direct holdings by earlier court majorities to the contrary.

When everyone with even an elementary knowledge of communism knows that the Communist Party, U.S.A., is a part of the worldwide Communist conspiracy, an integral and functioning part of that conspiracy, it is hard to understand how a Justice of the Supreme Court of the United States can write that membership in the Communist Party, U.S.A., is merely "a matter of belief and association." But it has been done. I agree with the apparent conclusion of the bar association committee that these statements have been mere dictum. But the adverse effect of these decisions has been widespread.

As the American Bar Association put it:

> Many cases have been decided in such a manner as to encourage an increase in Communist activity in the United States through invalidation of State sedition statutes, and limitation of State and Federal investigating powers in the field of subversion, although these cases might readily have been disposed of without so broadly limiting national and State security efforts.

I do not think, Mr. President, that the fact these statements were dictum and not doctrine in any way lessens the offense. In a sense, it aggravates it. As the American Bar Association committee so well points out:

> The paralysis of our internal security grows largely from construction and interpretation centering around technicalities emanating from our judicial process which the Communists seek to destroy, yet use as a refuge to masquerade their diabolical objectives.

Some segments of the press have devoted a good deal of space to the statement in the first recommendation of the American Bar Association special committee that "while members of this association view some of the decisions"—of the Supreme Court—"to be unsound and incorrect," they deem "broad omnibus proposals" as "unwise and likely to create more problems than they will solve." This recommendation has not, I think, been presented to the public in its true light by these newspaper stories. The American Bar Association committee did not condemn omnibus proposals as such; it referred specifically to omnibus for limiting its—the Supreme Court's—appellate jurisdiction.

I wish to say that I personally favor limitation of the Court's jurisdiction.

The committee report then proceeded to say, in the next paragraph, that members of the American Bar Association "deem such broad omnibus proposals at this time unwise and likely to create more problems than they will solve." It is clear that this American Bar Association report has not intended to lay any stricture against comprehensive legislation for meeting the problem created by this line of Supreme Court decisions which has weakened our internal security. The bar report has only inveighed against broad omnibus proposals which would "limit any jurisdiction vested in the United States Supreme Court by the Constitution."

It may be that there is an overtone here of disapproval of inclusion of provisions limiting the appellate jurisdiction of the Supreme Court in a bill dealing at the same time with other and less controversial aspects of the problem. But I am confident that the American Bar Association is quite willing to leave to the Congress, as a matter of legislative policy, the determination of whether, in amending several different statutes in order to correct the adverse effect of Supreme Court decisions, without limiting the Court's jurisdiction, the matter should be dealt with in many bills, or in few bills, or in a single bill.

The bar association committee has put its recommendations for various statutory revisions in a single report; the American Bar Association House of Delegates has approved these recommendations; and if the Congress chooses to deal with these recommendations in one bill or in several, that is for the Congress to decide.

It should be made clear that the bills which I am presenting to the Senate today do not embrace by any means all of the legislative proposals which appear desirable as a result of a study of the line of Supreme Court decisions affecting our internal security. These bills cover only the specific recommendations made by the American Bar Association committee for particular legislation. It is immaterial to me whether these bills are considered separately or as part of a broader overall study. What I am primarily concerned with is that they shall be considered promptly and that they shall be brought, within a reasonable time, before this body for its action.

It is significant, Mr. President, that the first recommendation of the American Bar Association committee disapproves proposals "to limit any jurisdiction vested in the United States Supreme Court" or, as it was stated in the first version reported in the press, "any jurisdiction vested in the United States Supreme Court by the Constitution." It is not the exercise by the Supreme Court of its jurisdiction vested in it by the Constitution which gives the gravest concern; it is the exercise or attempted exercise by the Court of legislative powers and other powers not only not granted to the Court by the Constitution, but in some cases specifically denied to the Court by the Constitution.

The report adopted by the American Bar Association contains a precise recommendation for "a specific pronouncement of congressional intention that State statutes proscribing sedition against the United States shall have concurrent enforceability." This stems, of course, from the fact that the Supreme Court decision in the Nelson case at one stroke wiped out all antisubversive statutes at the State level. By this opinion, the States were rendered powerless to act against subversion, whether directed against State governments themselves or against the National Government, in the preservation of which every State has a valid and substantial interest. In order to arrive at its decision in the Nelson case, the Supreme Court found it necessary to attribute to the Congress an intent to preempt this entire field of legislation, in the face of a very strong legislative history to the contrary, including an explicit statutory statement that the enforcement of State laws in this field should not be interfered with.

The American Bar Association report has summarized Supreme Court decisions in 24 cases "as illustrative of how our security has been weakened." The committee's summaries of these cases are restrained, objective, and conservative. I will not repeat these summaries, which are already in the RECORD. But I do want to look at these 24 cases for a moment from the angle of the various rights which have been invaded by these Supreme Court decisions. I shall refer to them in the order in which they are listed in the American Bar Association committee's report.

In the Nelson case, the Supreme Court took away the right of the people to combat subversion through the machinery of their State governments.

In the Communist Party U.S.A. case, the Supreme Court frustrated the right of the people to deal with subversion through laws enacted by their duly elected Representatives to Congress. By ducking its constitutional responsibility to pass on the constitutionality of the Internal Security Act when that question was squarely presented, and instead making it possible to keep the act in litigation until more than 8 years after its passage, the Supreme Court has not only deprived the people and the country of the benefits which would have resulted from effective enforcement of this law, but has also effectively deprived Congress of the opportunity to deal with this situation.

If the Supreme Court had declared the law unconstitutional in 1953, Congress long since would have enacted new legislation to deal with this situation.

My own opinion is that if the Supreme Court could have found a basis for declaring this law unconstitutional when the question was presented to the Court, that would have been its decision. Lacking a basis for invalidating the law, the Court preferred to prolong litigation rather than to adopt the forthright course of holding the law constitutional.

This question will come before the Court again, I hope, at its session this

fall. I do not see how the Court can this time avoid or escape its responsibility of passing upon the constitutionality of this statute. The people are demanding action. Nor do I see how the Court can possibly hold the act unconstitutional, though the Communists and others seeking to invalidate it have had 8 years to work on the problem.

But even if a decision shall be rendered next fall or the following spring upholding the law, that decision will be very, very late. Better late than never, of course, even in this instance; yet the delay, this unnecessary delay of more than 5 years, will have gravely hampered the efforts of the Nation to combat the Communist conspiracy within its borders, and thereby gravely weakened the internal security of the Nation.

If the Internal Security Act could be enforced effectively, either the Communist Party would have to register with the Subversive Activities Control Board or individual Communists would have to register; Communists would be barred from Federal office and employment; Communists would be barred from employment in defense facilities and defense areas; the Communist propaganda which is flooding the country would be required to be labeled as to its source; and other sanctions would be applied against the Communist Party and individual Communists. All of these sanctions, which Congress deemed necessary for the protection of the internal security of this Nation, have been held in abeyance because this act has been kept in litigation all these years.

In the Watkins case, the Supreme Court abrogated the right to judge a man by the company he keeps. The Supreme Court has in effect created a new "first amendment right," which it has designated the "right of freedom of association," and has held in effect that a man's associations with Communists are his own personal business, and that he cannot even be asked about such associations without invading his right of privacy. If the same principles should be applied to associations with known criminals, law enforcement in this country would be as much of a shambles as the Smith Act is today.

In the Watkins case, the Supreme Court has also invaded the right of congressional committees to decide what questions are pertinent to their investigations.

From the beginning of our Republic, the rule was that a legislative body, in the conduct of an investigation, was the sole judge of the pertinency of the question it asked. The courts repeatedly said it was their duty to a coordinate branch of the Government to presume that Congress or one of its committees had a legislative purpose in any investigation it conducted, and might decide for itself what information it needed, and that any question reasonably designed to produce such information was pertinent. But in Watkins against U.S., the Supreme Court laid down the new rule that Congress or a congressional committee not only had to justify its legislative purpose and explain the pertinency of each question, but had to do it to the satisfaction of the witness.

In the Watkins case, the Supreme Court has also invaded the right of each House of the Congress to determine for itself whether its committees are satisfactorily performing the duties assigned to them. The Court arbitrarily stepped in between the Houses of Congress and their respective committees, and arrogated to itself the right to decide whether a committee has properly carried out the wishes of its parent body. A more flagrant invasion of the legislative process by the judiciary could hardly be imagined. Under this decision, the Senate itself may be perfectly satisfied with what the Internal Security Subcommittee is doing, but if the Supreme Court does not like it, the Court will say the committee is exceeding its authority or is improperly discharging its duties, and on that basis will try to put the committee out of business. The Court did this with the House Un-American Activities Committee in the Watkins case.

In Cole against Young, the Supreme Court limited the right of a head of a Federal agency to get rid of subversives in that agency. In doing this, the Court in effect rewrote an act of Congress specifically granting this right, writing into that law, by Court interpretation, a limitation making it applicable only to so-called sensitive positions.

Mr. President, two principles are involved here, and the Court is wrong on both of them.

Considered from the standpoint of the opportunity to do harm, it is hard to say that any position does not offer a Communist such opportunity. It is well known that Communist espionage agents frequently operate in low echelon positions, using them as cover for their real purposes. Who can say that even a janitor emptying wastebaskets, or a cleaning woman dusting desks, or a file clerk, or a typist, could not have opportunities for espionage or sabotage or both?

The other point involved—and it is at least as important as the point of opportunity to do harm—is the point whether a Communist, dedicated to the overthrow of this Government by force and violence, should receive any remuneration or sustenance or benefit from that Government. My own position is that he should not, and I think most Americans will agree with me. But the Supreme Court of the United States does not agree.

In the case of Leedom against International Union of Mine, Mill & Smelter Workers, the Supreme Court took away from the National Labor Relations Board the right to require that a union divest itself of Communist leadership in order to have benefits under the National Labor Relations Act. This was a right which I am firmly convinced Congress intended to grant, and did grant, by law; but the Supreme Court has abrogated this right.

In the Amalgamated Meatcutters case, the Supreme Court went further in its denial of the right of the National Labor Relations Board to take action against unions under Communist leadership; and in the Gold case, the Supreme Court freed a labor official who had been convicted of filing a false non-Communist affidavit, on the specious ground that when an FBI agent investigating another similar case telephoned or visited three members of the jury to inquire whether they had received any propaganda literature, this was an improper interference with the privacy of the jury and so prejudicial to the defendant's case as to require reversal.

In the Witkovich case, the Supreme Court abrogated the right of immigration authorities, specifically granted by Congress, to keep aliens awaiting deportation from engaging in Communist activities, and to question such aliens about such activities. The Court held that the Government of the United States cannot prevent aliens who are awaiting deportation from engaging in Communist activities, even where such activities formed the basis for the original deportation order. The Supreme Court has even held that the Immigration and Naturalization Service cannot question such aliens about their Communist activities. The Court took this position in spite of the fact that there is a law on the books, passed by Congress, explicitly giving the Immigration and Naturalization Service the right to keep such deportable aliens under reasonable supervision, and to require them to answer reasonable questions. The Court said that even under this statute, all that the Immigration and Naturalization Service can ask about is the availability of the alien for deportation, not what he is doing while he is still here.

In the Schware and Konigsberg cases, the Court invaded a field which it had previously said was outside its jurisdiction, and took away from the supreme courts of the individual States and the boards of bar examiners of those States the right to pass upon admissions to the State bar. As the American Bar Association committee's report has pointed out in the Schware case the Court substituted its standard of fitness for the bar of New Mexico in place of the standard established by the bar and the courts of New Mexico; and in the Konigsberg case, the Supreme Court of the United States actually held that membership in the Communist Party over a period of years, and refusal to answer questions as to present and past membership in the Communist Party, put to the applicant by the California State Bar Examiners, did not rationally support the finding of the California Supreme Court that the applicant had failed to prove that he was of good moral character and that he did not advocate the overthrow of the Federal or State Government by force and violence.

In the Jencks case, the Supreme Court invaded the right of the Government to protect its confidential records, even the records of its security agencies, from prying by Communists and their lawyers. Congress acted promptly to overcome some of the worst effects of this decision; but even before Congress could act, numerous convicted criminals, both Communists and others, were given their freedom under this new doctrine, and a number of prosecutions were discontinued because of inability to comply with the new requirements set by the

Court without seriously damaging security.

In Service against Dulles, the Supreme Court invalidated the right of the Secretary of State to fire subversives, holding on purely technical grounds that a man who had had clandestine meetings with a Soviet espionage agent and who furnished classified State Department documents to persons outside the Department must be reinstated as a State Department employee.

As a result of this decision and the decision in the Cole case, the New York Times reported on July 11, 1958, that more than 300 Government employees who had been fired for being security risks would have to be reinstated with backpay. The Internal Security Subcommittee is trying right now to find out exactly how many such employees have been reinstated, and where they are now and what they are doing; and we are having some trouble getting the information.

In the Yates and Schneiderman case, the Supreme Court destroyed the right of the Government to stop the work of Communist organizers. By construing the word "organize" as used in the Smith Act so narrowly as to include only the original organization or complete reorganization of the Communist Party, the Court in this decision made this section of the Smith Act inapplicable to any present Communist activity, and therefore useless. Unless and until new legislation is passed by the Congress, Communist organizers are free to go on with their work unhampered by any restrictive Government action.

This same decision also abrogated the right of the Government to prevent Communists from teaching that communism is right, and from advocating the overthrow of the Government of the United States by force and violence. The Court held that the Smith Act provision against advocating the overthrow of the Government of the United States by force and violence, and teaching that it is right, proper, or a duty to work for the overthrow of the Government, could not be enforced without showing that it had produced the result of some overt move toward such overthrow. The effect of this decision was to make the Smith Act, in the words of Judge Richard Chambers of the U.S. Circuit Court of Appeals in California "a virtual shambles" as to any further prosecutions under it.

In the Sweezy case, the Supreme Court took away from a State legislature the right to determine the distribution of powers on the State level, and also took away the right of a State legislative investigating committee to ask a witness about Communist or pro-Communist activity.

In the Raley case, the Supreme Court extended its attack on the right of States to investigate communism, by reversing the conviction of three witnesses who had refused to answer questions about Communist activities put to them by the Ohio Un-American Activities Commission. The Court based its decision in this case on its own judge-made law as enunciated in the Sweezy case.

In the Slochower case, the Court invalidated the right of a State or a community or a board of education to fire Communist teachers, holding that a teacher in the New York public schools could not be fired for taking the fifth amendment when asked about Communist activities, even though an existing State law declared that failure to answer such questions when posed by a duly constituted authority should be grounds for dismissal.

In the case of United Mine Workers against Arkansas Oak Flooring Co., the Supreme Court took away the right of a State to prevent picketing by a Communist union. The union in this case had failed to file non-Communist affidavits and other data required by the National Labor Relations Act, and the State courts of Louisiana had enjoined it from picketing; but the U.S. Supreme Court held that despite its failure to comply with the filing requirements, the union could go ahead and picket anyway, and the Louisiana State court injunction was invalid.

The importance of the question here, Mr. President, goes far beyond the matter of whether the United Mine Workers was Communist dominated or only in technical noncompliance with the law. This is so because the doctrine of this case is just as applicable to the most strongly Communist-dominated union in the country as it is to the United Mine Workers or any other union. Under the doctrine in this case, a Communist union can take steps to enforce its will upon an employer, even though Congress in the National Labor Relations Act enacted into law provisions designed to force Communist leadership out of labor unions and to deny to Communist-led unions the rights which are preserved to non-Communist unions.

In the Sacher case, the Supreme Court, in effect, denied the right of a congressional committee to inquire about more than one subject in the course of a single hearing, even though both subjects inquired about were clearly within the jurisdiction of the committee.

In its handling of this case, the Supreme Court also denied the right of Government attorneys to be heard in oral argument before having a decision against them.

In the Kent and Briehl case, the Court denied the right of the Secretary of State to deny passports to Communists or to persons whom evidence showed were going abroad to further Communist causes. In this case the Court also denied the right of the Secretary of State to ask citizens applying for passports to make a statement respecting their Communist affiliations, if any. The Court denied these rights, in spite of the fact that up until the time of the Court's decision, the issuance of passports had always been considered an adjunct of the foreign relations of the United States, the conduct of which is by the Constitution committed to the President, and, in the case of passports, is delegated by him to the Secretary of State.

In the Kent and Briehl case, the Court took occasion once more to refer to communism as a matter of belief and association, ignoring its own prior finding, and prior legislative and executive findings, that the Communist Party U.S.A. is a part of the world Communist conspiracy. The Court said that Kent and Briehl "are being denied their freedom of movement solely because of their refusal to be subjected to inquiry into their beliefs and associations."

In the Dayton case, the Court in terms denied the right of the Secretary of State to withhold a passport on the basis of a finding that to grant it would be contrary to the national security of the country. The Supreme Court declared—listen to this, Mr. President—that to deny a passport because its issuance would be contrary to the national security of the country is to deny for "an impermissible reason." That is the Court's own language.

Although the Secretary of State found that Dayton associated with members of the Rosenberg spy ring, and had actually been present several times in the room where secret Government documents were microfilmed for transfer to the Soviet Union, and that Dayton was going abroad to work with a Communist who recently had renounced his American citizenship, and although on this basis the Secretary of State formally found, and stated, that to grant a passport to Dayton would be contrary to the national interests of the United States, the Supreme Court said this was "an impermissible reason" for refusing to grant the passport.

In the second Yates case, the Supreme Court denied the right of a Federal judge to sentence a Communist witness for repeated contempts committed before him in open court. The defendant had been held in contempt for refusing to answer 11 questions relating to whether other persons were members of the Communist Party; but the Supreme Court said that while she might be held in contempt for refusing to answer the first question, she could not be forced to answer any of the others. The Court then went on to vacate the sentence even with respect to the first contempt, and sent the case back for resentencing "in the cool reflection of subsequent events."

In the Bonetti case, the Supreme Court revoked the right of the Government to deport an alien who became a Communist after coming to this country. The Court accomplished this by judicial legislation amending the Immigration and Nationality Act in a manner which three dissenting Justices declared "cripples the effectiveness of the act." What the Court said, in effect, was that if an alien becomes a Communist after entering the United States, that subjects him to deportation; but if he can get out of the country and can come back in again before being deported, the past offense is wiped out, and he may stay here.

In the Flaxer case, the Court denied the right of Congress to secure the records of a Communist-dominated union composed of employees of Federal, State, and local governments. Flaxer flagrantly defied the committee, in refusing to produce the documents which had been subpenaed. He was asked whether it would make any difference if he were given 10 days in which to produce them; and he said that it would not, that he

would not produce them in any event. But after he had been convicted for contempt, on the basis of this refusal, the Supreme Court said that what had really happened was that the committee had granted him an additional 10 days in which to produce the documents; and that although the Court knew that the documents had not in fact been produced, and that Flaxer had made no move to produce them, and had given no indication that he would produce them if the committee had asked him again, he might have produced them, and so his contempt conviction should be reversed.

In the Uphaus case, the Supreme Court completed the destruction of every right of the people of a State to combat subversion within the boundaries of that State, by holding that a State legislative committee could not even investigate subversive activities in the State.

I have not discussed by any means all of the instances in which the Supreme Court has denied or abrogated or curtailed established rights. I have been confining myself to the 24 cases listed by the American Bar Association special committee. Numerous other cases, both inside and outside the field of subversion and security, could be mentioned.

For instance, in the Girard College case, the Supreme Court abrogated the right of a testator to say in his will how his money shall be used. In the Brown case, the Supreme Court took from State and local authorities the right to control their own schools. States rights have been invaded by numerous other Supreme Court decisions, in various areas, including the fields of labor law and taxation.

Perhaps the greatest right which the Supreme Court has abrogated is the right of the people to know what their Constitution means.

The Constitution of the United States is the basic charter of our liberties. Unless its meaning can be known by all, is the same for all, is the same this year as last year, and is the same next year as this year, its worth is destroyed. If there is no certainty in the basic law of the land, then there is no certainty in the law. The Constitution itself provides that it can be amended only in a certain way, and with ratification by three-fourths of the States. Jefferson warned against the danger of amendment by usurpation. But the Supreme Court of the United States has repeatedly amended the Constitution to mean something different from what it meant originally, something different from what the Court itself had previously declared the Constitution to mean. This has been true in many instances. To name some of them: In the case of Brown against The Board of Education, the Court completely changed the meaning of the 14th amendment, as it had stood and been sustained by Court interpretations for many decades. In the Watkins and Sweezy cases, the Court created a new constitutional right of freedom of association. In a long series of decisions dealing with fifth amendment Communists, the Court changed the provisions of the fifth amendment so as, in effect, to strike out the words "in any criminal case," and to grant to witnesses before congressional committees the privilege of refusing to answer questions. In the many and various cases which encroach upon States' rights, the Supreme Court has narrowed, and narrowed again, the provision of the 10th amendment that the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people.

The constitutional provision that "all legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives"—although this is article I, section 1 of the Constitution—has been evaded time after time by the Supreme Court, which has proceeded to make law by judicial legislation.

Under the Constitution, the Supreme Court has the function of interpreting and enforcing the laws of the United States; but this is not the same thing as for the Court to make law. If law in the United States is to be what the Supreme Court thinks it ought to be and says it is, at any given time, rather than what the Constitution provides and intended, and what the laws passed by Congress provide and intend, then there is no certainty in the law; there can be no final justice; and the so-called basic charter of our liberties is not a charter at all, but is simply a chessboard on which the Court may maneuver, to bring about the results it desires.

The common denominator of this line of Supreme Court decisions is usurpation—the same usurpation against which George Washington warned. The Court is taking to itself powers, and is exercising those powers, without any justification in statute or Constitution, without any reliance on recognized principles of law, without any basis whatever except its own naked thirst for power. The Court appears determined in all fields to make the law what it, the Court, thinks the law should be.

Mr. President, there cannot be freedom under law unless there is law—law which can be ascertained in advance by the average citizen, and can be relied upon by him. When the Supreme Court is making the law in each individual instance to suit its own judgment as to what the law of the case should be, we have a situation in which justice under law is impossible.

We have that situation today, Mr. President; and thereby the most basic rights of the citizens of this Republic have been violated.

We cannot in conscience permit this situation to continue. Some of my colleagues may differ with me, or with each other, respecting the exact form our action should take. But all of us will agree, I think, that we must take action designed to preserve the balance of powers in our Government, under the Constitution, and to restore certainty to the law, so that the rule of law and freedom under law shall once more be incidents of the American way of life.

As the State chief justices said in their report on the Supreme Court's derelictions:

> We are not alone in our view that the Court, in many cases arising under the 14th amendment, has assumed what seems to us primarily legislative powers. * * * We do not believe that either the framers of the original Constitution or the possibly somewhat less gifted draftsmen of the 14th amendment contemplated that the Supreme Court would, or should, have the almost unlimited policymaking powers which it now exercises.
>
> It is strange, indeed, to reflect that under a Constitution which provides for a system of checks and balances and of distribution of power between National and State Governments, one branch of one Government—the Supreme Court—should attain the immense, and in many respects dominant, power which it now wields.

It is not only strange, Mr. President, it is frightening. I say to my colleagues that the great newspaper, the Nashville Banner, was 100 percent correct when it declared editorially on August 22, 1958:

> Unless the Congress resists the continued encroachment upon its legislative functions by the Supreme Court, the United States may soon find itself dominated by a tyrannical Federal judiciary which has taken unto itself, beyond the limits of the Constitution, the role of policymaker for 170 million people.
>
> When that happens, God save these United States.

EXHIBIT A

RÉSUMÉ OF BILLS TO IMPLEMENT RECOMMENDATIONS OF THE AMERICAN BAR ASSOCIATION TO ELIMINATE OBSTACLES TO THE PRESERVATION OF INTERNAL SECURITY

1. To define the term "organize" as used in the Smith Act.

Bar association recommendation: "Amend the Smith Act to define the word 'organize' to include the recruitment of new party members, the formation of new party units, and the regrouping, expansion, or other activities of an organizational nature performed by members of existing clubs, cells, classes, and other units so as to insure the applicability of this section of the act to Communist actionists, agents, organizers, colonists, or members currently performing organizational work."

This proposed bill would accomplish the precise purpose of the bar association recommendation. The Supreme Court decision in the Yates case rendered the organizing section of the Smith act unenforceable against current Communist activity. Enactment of this bill would restore the effectiveness and applicability of this section of the law.

2. To protect the effectiveness of State antisubversive laws against unintended Federal preemption.

Bar association recommendation: "That wherever there are reasonable grounds to believe that as a result of court decisions weaknesses in internal security have been disclosed, remedial legislation be enacted by the Congress of the United States, including a specific pronouncement of congressional intention that State statutes proscribing sedition against the United States shall have concurrent enforceability."

The bill as drafted is confined to the specific recommendations of the bar association.

3. To make full disclosure respecting loyalty to the United States a condition of Government employment.

Bar association recommendation: "Establish the right of each branch of Government to require as a condition of employment that each employee thereof shall not refuse to answer a query before a duly constituted

committee of the Congress or before duly authorized officers of either the executive or judicial branches of the Government with respect to Communist, Communist-front, or other subversive activities or any other matter bearing upon his loyalty to the United States, as the Government has a right to know his record."

This proposed bill comports exactly with the recommendation of the bar association. It would cover refusals based upon a claim of fifth-amendment privilege, or upon any other claim of constitutional privilege, or for any other reason. Under this bill, if enacted, it would be the refusal by an employee to answer a question bearing upon his loyalty to the United States which would constitute a breach of a condition of his employment, not the reason, if any, claimed by the employee as justification for his refusal.

4. To amend sections 241 and 242 of the Immigration and Nationality Act.

Bar association recommendation: "Invest in the executive branch of the Government the right to protect our internal security against the activities of aliens who were or became Communists at any time subsequent to their entry into the United States by providing for their deportation without any deprivation of due process; and the right to make and enforce reasonable restrictions on aliens awaiting deportation to prohibit them from engaging in any activities identical or similar to those upon which the aliens' deportation order was based, with further right fully to interrogate aliens awaiting deportation concerning their subversive associates or activities."

This bill will fully carry out the recommendation of the bar association. Since existing law already provides for deportation, the bill concerns itself with the right to make and enforce reasonable regulations on aliens awaiting deportation, consonant with due process.

The first section of the bill would overcome the effect of the Supreme Court decision in *Bonetti* v. *Rogers*, and would restore the applicability of the deportation provisions of the Immigration and Nationality Act to any alien who has been a member of the Communist Party at any time after any entry into the United States.

5. To amend the Immigration and Nationality Act with respect to travel in time of war or national emergency and passport procedures.

Bar association recommendation: "Restore to the executive branch of Government the right to deny passports to persons knowingly engaged in subversive activities, or activities designed or intended to further international communism by the establishment of criteria and standards to be applied in the issuance or denial of passports. These criteria and standards should be clear and unequivocal, and in addition contain a specific authorization to the Secretary of State empowering him or the Acting Secretary to withhold a passport in the national interest based upon confidential information and upon which he shall certify that it is contrary to the interests of this Nation that a passport be issued to the applicant; and further, to prevent foreign espionage agents from departing this country for the purpose of carrying out their espionage pursuits or to escape disclosure or prosecution; and that such legislation establish adequate appeal procedures which would insure due process of law so as to provide recourse to the individuals concerned in the event of any arbitrary and capricious exercise of discretion not properly founded."

This bill embraces all the recommendations of the bar association with respect to passport legislation.

6. To broaden the application of the Summary Suspension Act of 1950.

Bar association recommendation: "Restore to the executive branch of our Government the right to determine and to dismiss, if required, those who are security risks in both sensitive and nonsensitive positions in the Government service."

This bill accomplishes the objective of the bar association recommendation in the manner suggested by the Supreme Court itself in the case of *Cole* v. *Young*, that is, by making the summary suspension authority applicable to all departments and agencies of the Government.

7. To amend section 2385 of title 18 of the United States Code.

Bar association recommendation: "Amend the Smith Act to make it a crime intentionally to advocate the violent overthrow of the Government of the United States or to teach the necessity, desirability, or duty of seeking to bring about such overthrow; in order that (1) this Nation might take protective steps to prevent acts which, if not prevented, could result in bloodshed and treachery; and (2) this Nation need not be forced to delay the invoking of the judicial process until such time as the resulting damage has already been wrought."

This bill would implement the recommendation of the bar association report. At the same time, the bill does not attempt to proscribe the mere abstract teaching of Marxist doctrine; rather, the bill is directed against the teaching or advocacy of an alleged duty or necessity or desirability or propriety of overthrowing the Government by force or violence.

The second section of this bill focuses on the intent back of teaching or advocacy. No question is involved here of the results of such an attempt; it is the attempt itself, by the performance of an overt act intended to cause the violent overthrow of the Government, which is made a crime.

Mr. KUCHEL. Mr. President, the frightening thing is, I believe, that today some intemperate persons in this country pour their spleen upon our venerated highest tribunal. Some in this Chamber just a year ago asked the Members of the Senate to join with them in voting for legislative proposals designed to undermine, to weaken, and to traduce the Court's jurisdiction. Those legislative proposals went down to their well-deserved defeat on rollcall votes here in the Senate. I think that is a rather telling and decisive answer to the comments made by the distinguished Senator from Mississippi. In saying that, I desire vigorously to object to the opinions which the distinguished Senator from Mississippi has just expressed. In my judgment, the great majority of the people of the Nation, and the great majority of the Members of the Senate hold vigorously to contrary opinions. The Supreme Court will live in history as a bulwark of our constitutional system.

Mr. CLARK. Mr. President, if the Senator will yield to me, I desire to state that I find myself in accord with the views expressed by my good friend, the senior Senator from California [Mr. KUCHEL].

I recognize the distinguished service which the chairman of the Judiciary Committee [Mr. EASTLAND] has rendered, and the keen interest in this whole subject which confronts the country. But, reluctantly, I find myself unable to agree with the Senator from Mississippi. That is perhaps all the more natural because the Philadelphia Bar Association, which represents the city where American liberty found its birth, has taken a position adverse to the one taken by the American Bar Association.

Although I know it is somewhat out of order under the rules, I wonder whether my friend will permit me to request unanimous consent that an article stating the position of the Philadelphia Bar Association, and published in the Philadelphia Bulletin, and a letter by the dean of the University of Pennsylvania Law School, the Honorable Jefferson B. Fordham, which was published in the New York Times, be printed at this point in the RECORD.

There being no objection, the article and letter were ordered to be printed in the RECORD, as follows:

[From the Philadelphia Bulletin, Mar. 3, 1959]

PHILADELPHIA BAR DISOWNS CRITICISM OF HIGH COURT BY U.S. BODY

The Philadelphia Bar Association this afternoon repudiated recent implied criticism of the U.S. Supreme Court by the American Bar Association.

More than 450 local lawyers, attending the local bar's quarterly meeting in the Bellevue-Stratford, engaged in a free-for-all discussion of criticisms of Supreme Court decisions on individual liberties and civil rights.

After a stormy session, the lawyers voted 288–183 to adopt a resolution presented by the bar's Civil Rights Committee. The resolution, offered by committee chairman Morris L. Forer, said:

"This association affirms its faith in the Supreme Court in its traditional role as interpreter of the Constitution and as a protector of our cherished freedom and of the rights of the individual against invasion of his constitutional rights and liberties."

The American Bar Association's House of Delegates last week questioned whether some of the high court's rulings weakened the internal security of the country.

Under fire from the ABA were rulings on accused Communists.

Today, before the local lawyers could resolve their differences, there were four voice votes, one standing vote and a paper-ballot vote (the final 288–183 decision).

Forer told the lawyers that his committee deplores implications in the recent criticisms that the Nation's security has been weakened by the decisions.

He said they were not founded on fact and he added, "Such criticisms should be repudiated."

[From the New York Times, Mar. 5, 1959]

LAWYERS GROUP CRITICIZED—BAR ASSOCIATION SAID TO ALINE ITSELF WITH LAY CRITICS OF COURT

(The writer of the following letter is dean of the Law School of the University of Pennsylvania.)

To the EDITOR OF THE NEW YORK TIMES:

By action of its house of delegates taken on February 24 the American Bar Association failed the American public in interpreting for the citizens the work of the Supreme Court in our constitutional and legal system. What the bar association did, in short, was to aline itself with lay critics of the Court. I am grieved that this is so.

On that date the house of delegates adopted recommendations put forth by the association's Special Committee on Communist Tactics, Strategy and Objectives. These recommendations began by declaring that it was the duty of members of the bar to defend the institutions of the judiciary

from unfair and unjust attacks and expressed disapproval of proposals to limit Supreme Court jurisdiction.

They went on, however, to laud the Internal Security Subcommittee of the Senate Committee on the Judiciary and the House Un-American Activities Committee for their "records and accomplishments and great service to the nation" and to recommend a number of changes in Federal legislation.

In calling for changes in Federal legislation the house of delegates was left a very strong impression that the reason it is considered to be needful is the bad job the Supreme Court is thought to have done in interpreting the Constitution and Federal statutes, the latter in particular. To suggest statutory change is one thing, to imply that it is needed due to bad work by the highest court is another.

EFFECT ON SECURITY

I simply do not believe that any weakening effect on internal security has been shown or that the association's attack on the court can be effectively sustained on a lawyer-like basis. The decisions that the Court has made in cases involving security problems have been supported by legal reasoning and methods of interpretation which are familiar to members of the legal profession and generally respected.

It is, for example, a well-understood and well-accepted doctrine in constitutional interpretation that a constitutional question is to be avoided in the interpretation of a statute if this can be done without violence to the measure examined in its totality. Yet when the Court followed this doctrine in the Yates case and thereby made it unnecessary to pass upon a serious question as to the constitutionality of the Smith Act, the critics of the Court seemed to be able to see nothing but the fact that the result in the case was not to their liking. The American Bar Association would so change the Smith Act as to present squarely the substantive constitutional question which, under the present language, the Court was able to avoid in the Yates case.

The action of the house of delegates discloses strong preoccupation with matters of internal security rather than with the protection of civil liberty. I do not suggest that lawyers have no proper concern with internal security. But I must say that I find a serious imbalance reflected in the action of the house of delegates. In my system of values the pre-eminent concern of lawyers, as individuals and as a group, is with human liberty. Security does not mean much to me except as a means to preserve the conditions under which there will exist maximum freedom for individual human expression and fulfillment.

APPLAUSE FOR COURT

The bar association action has a Maginot line psychology. For my part, I am glad to record the opinion that instead of being charged by the organized bar with reaching decisions inimical to our internal security, the Supreme Court should be warmly applauded by the profession for its fidelity to the substantive and procedural safeguards of the Bill of Rights and for its interpretation of statutes in keeping with the spirit of the Bill of Rights.

When it comes to recommendations for substantive legislation I think the American Bar Association should assert leadership in the realm of civil rights and civil liberties. For years the committee on Communist tactics, strategy, and objectives has been very active and strongly supported, while the committee on the Bill of Rights has languished.

Considered as recommendations for legislative change the bar association proposals are vulnerable. I invite particular attention to the proposal that Congress specifically provide that State statutes forbidding sedition against the United States be enforcible concurrently with the Smith Act.

The Smith Act was interpreted in the Nelson case to supersede a Pennsylvania State sedition law so far as sedition against the United States was concerned. The State supreme court had held that, as to sedition against the United States, the Smith Act superseded the State law. The Supreme Court of the United States agreed with this.

Is not national security a national responsibility? How would it aid to leave each State free to have its own law and enforcement machinery on this subject? I can see in such a system ample grist for the mill of politically ambitious local prosecutors, with the attendant hazards to fair play and civil liberty, but I do not delude myself with the notion that the cause of national security would be served.

JEFFERSON B. FORDHAM.

PHILADELPHIA, *February 26, 1959.*

Mr. EASTLAND. Mr. President, I desire to say there is no doubt in the mind of any reasonable man that the internal security law, which was intended to save this country from acts of subversion, has been weakened by the Supreme Court of the United States. The Senate Committee on the Judiciary is going to work on that problem. It will make recommendations this year. I am not afraid of public sentiment in this country. God bless the American people. They are sound and want to protect their heritage and liberties against an international conspiracy which would enslave them.

GOING TO BUY A CAR? YOU MAY RUN INTO AN AUTOMOBILE LOAN SHARK

Mr. LANGER. Mr. President, for the past 5 years I have been urging the U.S. Senate to appropriate $1 million for the operation of the Senate Antitrust and Monopoly Subcommittee so that it may fully protect the people from all types of monopolistic processes.

Mr. President, you cannot shoot down a giant tank with popguns. Nor can you properly investigate big business practices that hoodwink the consumer with peanut appropriations. In a previous statement to the Senate, I outlined the subcommittee's diffculties in fully investigating oil, steel, automobile manufacturers, private power industry, farm machinery, meatpackers, large grocery chains, because industry spends more to prepare for a 1-day hearing than the subcommittee spends for a full year of investigation.

Now, we are investigating automobile financing. This investigation boils down to the big three auto manufacturers versus the multimillion dollar financing companies and their insurance company subsidiaries.

At first glance, it would appear that all the sympathy must be with the so-called independent auto financing companies who may be injured by General Motors Acceptance Corp.—GMAC—or by General Motors or the proposed finance companies of Ford Motor Co. and Chrysler Motor Co.

Before we get to the meat of this discussion, I should review for the RECORD that I have been conducting investigations and hearings into the small loan rackets in many States that not only charge exorbitant, usurious, and outrageous interest rates, but demand credit, life and health and accident insurance, with unbelievable high rates, as a tie-in to get to the receiving of a small loan. We have brought these facts to the public.

For example, at the hearings in Montgomery, Ala., the record showed that a credit life policy cost the borrower $40 per year per $100 borrowed, whereas that insurance policy could be purchased through group insurance at a rate of 49 cents for $100 borrowed per year. The record which shortly will be submitted as an Antitrust Subcommittee report reveals the high rate of profit of those small loan companies that demand tie-in insurance through companies they own directly or indirectly.

How does this relate to auto financing? On Monday, March 2, 1959, the Washington Daily News, under the byline of Jack Steele, Scripps-Howard staff writer, carried a story headlined, "High Insurance Profits Bared—Tax Free for Credit Life." The article follows:

A group of insurance companies which deal chiefly in so-called "credit life insurance" have been rolling up huge tax-free profits in recent years, a survey by Scripps-Howard newspapers revealed today.

That's the type of insurance that pays the loan on your auto, or other small loan, if you die while payments still are due.

The huge profits of these credit life insurance companies—ranging from 100 to 2,800 percent a year on paid-in capital have virtually escaped Federal income taxes because of a loophole in the Internal Revenue Code.

This loophole would be closed by a bill revising the tax laws for life insurance companies. The bill was passed by the House 10 days ago.

The Senate Finance Committee will open hearings on it tomorrow in an effort to get it enacted before the life insurance industry's 1958 tax returns fall due on March 15.

Spokesmen for the credit life companies contend the House bill, which would subject them to the full 52-percent tax rate paid by other corporations, would drive them out of business.

They also insist that old line life insurance companies—which write the bulk of credit insurance and also reap substantial profits from it—would gain a competitive advantage by paying lower taxes under the bill.

Representatives of the old line companies, on the other hand, say the bill would boost the taxes paid by the life insurance industry 70 percent, largely because of the big profits made by the credit life companies.

The credit life insurance business has mushroomed since World War II with the boom in installment buying. In 1946 only $729 million of such insurance was in force. By 1957 it had jumped to nearly $20 billion.

Most companies which specialize in credit life insurance have been set up in the last decade as captives of big finance and credit companies. Typically, the finance company owns all or most of the insurance company's stock and the officers and directors interlock.

Here is a rundown on the profits made and income taxes paid in 1957—the last year on which figures are available—by three big captive credit life companies:

The Patriot Life Insurance Co. was formed in New York in 1953 as a wholly owned subsidiary of the City Financial Corp., one of the Nation's largest auto finance firms.

In 1957 Patriot had total premium income—most of it from credit life policies—

of $21.8 million. The company paid out death benefits of $4.9 million and added $2.2 million to its reserves.

Its net operating gain (or profit) was $13.9 million—a profit of 926 percent on its paid-in capital of $1.5 million.

Yet it paid estimated Federal income taxes of only $52,000 on net investment income of $381,768.

The Alinco Life Insurance Co., South Bend, Ind., was formed in 1954. It is owned and controlled by Associates Investment Co., which through other affiliates also does a big auto finance business.

Alinco in 1957 had premium income of $11.1 million. It paid out $4.5 million in death benefits.

Its net gain from operations was $5.6 million—a profit of 2,800 percent on its $200,000 capital.

Yet its Federal income tax was only an estimated $20,000 on its net investment income of $258,437.

The General Fidelity Life Insurance Co., of Richmond, Va., is wholly owned by the State Loan & Finance Corp., a small-loan company which has headquarters in Washington, D.C., but operates mostly in Maryland and Virginia.

In 1957 General Fidelity, which was formed in 1953, had $3.8 million of premium income. It had operating gains of $2.2 million—a 725 percent profit on its paid-in capital of $305,000.

General Fidelity's estimated Federal income tax was only $3,100 on investment income of $41,833.

The issue of income taxes on insurance companies is now pending before the Senate Finance Committee, and we should have the printed hearings and an extensive report in the near future. Therefore, I shall not delve into that subject here except to note its relation to the issue of high profits and generally low taxes of credit insurance. However, when the Finance Committee reports to the Senate, I shall have more to say on the issue of income taxes on insurance companies.

It is indisputable that the subsidiary tie-in credit life insurance, an insurance that pays the loan on one's auto and small loan if one dies, is an extraordinary profitable business. In many instances it is more profitable than the parent loan company's operation.

Let us look at the record. From the statement filed with the Securities Exchange Commission in 1957, the State Loan & Finance Corp., mentioned in the Washington News article above, showed net income of $1,505,800 from operations other than the life insurance company it owns and net income of $2,009,206 from its wholly owned subsidiary company. Most witnesses representing auto finance companies who appeared before the Senate Antitrust and Monopoly Subcommittee testified that they owned a subsidiary insurance company to insure their loans. They further testified that their insurance company insures about 50 percent of the loans that they processed. At the direction of the acting chairman, Senator PHILIP HART, the auto finance companies are to submit to the subcommittee profit and loss statements for the record.

Mr. President, let us examine the testimony taken at the recent antimonopoly subcommittee hearings on auto financing.

First. Most independent financing companies testified that their business has been growing in the past 10 years in the face of steeper competition from banks which deal in auto loans and the loss of business from dealers of General Motors production. I should point out further these witnesses stated that if Ford Motor Co. and Chrysler Motor Co. should go into the auto financing business, it would be ruinous to the independent auto financing companies.

Second. Mr. Theodore Yntema, vice president of Ford Motor Co., read into the record that an average independent auto financing company has been earning about 20 percent return on its investment after taxes, which he stated means about 40 percent return before taxes. He quoted the percentage of profit of each company that appeared before the subcommittee from published reports submitted by these individual auto finance companies.

Third. Mr. Yntema also testified:

In general but not universally, banks offer the most favorable financing rates to dealers and car buyers. * * * Finance companies promote the sale of automobile, physical, damage insurance and various forms of credit life and disability insurance frequently provided by affiliated insurance companies, the variety and complexity of finance insurance arrangements and the charges for them are such as almost to defy comprehension. * * *

We estimate GMAC provides new car financing and insurance services to GM dealers at a cost to the dealer averaging about $65 per car less than the cost of financing and insurance service typically offered by other finance companies. In some areas typical finance-company charges may exceed GMAC charges by as much as $100 to $150. * * *

Competition among finance companies has failed in two respects to provide the kind of service our dealers and customers should have:

1. The rates charged have generally been considerably above those charged by GMAC—about $65 and in some areas as much as $100 to $150 higher.

2. The package of financing and insurance services has typically included high-cost, high-profit extras that have added unnecessarily to the cost of the automobile to the consumers.

Hearings before congressional committees have revealed that during the time when new automobiles were scarce, dealers would be reluctant to sell cars for cash because of the loss of commissions and/or profits from the finance charges and insurance rates required for the purchase of the car.

Mr. Yntema continues:

From time to time we have let it be known that we wished finance companies would make available to our dealers financing and insurance services and rates competitive with those provided by GMAC. The largest independent finance company told us bluntly, it would not meet GMAC rates. * * * Our decision to enter the business of finance and insuring the sales of automobiles to dealers and to consumers was a last resort. We could not find any other practicable means by which all our dealers and consumers could have available to them a streamlined financing and insurance service and a low level of rates such as provided by GMAC. We came to this decision reluctantly.

In order to be fair, I must state that the independent finance companies testified that they are competitive with GMAC with rates charged. On cross-examination they analyzed what they meant as competitive.

Mr. President, I have been contacted by independent finance companies and several banks which deal in auto financing in North Dakota, stating that the big three manufacturers would pose a threat to their auto-financing business if they were allowed to finance automobiles. Naturally, I would want to help the smaller companies against the giant three automobile manufacturers, but if the testimony of Mr. Yntema is accurate and the auto finance companies refuse to be competitive with GMAC and further include high-cost, high-profit extras that have unnecessarily added to the costs of autos to the consumer, then I would be compelled to take the same position that I have taken against the small loan companies—"sharks"—that force tie-in sales of insurance at high rates to the detriment of the small borrowers who desperately need the $25, $50, $100, or $300 that they must borrow to pay their most necessary and pressing bills.

In concluding my remarks, Mr. President, it appears from Mr. Yntema's testimony that an ordinary purchase of an automobile, for example, a North Dakota farmer, would have to pay from $65 to $150 more for finance charges and insurance coverage if financed through an independent finance company as against the rates charged through GMAC.

There appears to be a diametrically opposed view in the testimony between Mr. Yntema and the testimony from the officers of several of the independent auto financing companies in this respect. Since the automobile purchaser is the one who may suffer by paying a higher price for his car through the finance and insurance charges, I believe it would be appropriate if the Federal Trade Commission would make a full investigation into this matter and report what the true facts are as to financing and insurance rates charged by the various auto financing companies in comparison with GMAC.

Mr. President, as everyone knows, inflation is the No. 1 domestic problem facing us today. It is imperative that Congress exercise every possible precaution to assure the people that they would be able to purchase goods and products of all types at the lowest possible price. Savings of finance and insurance charges from purchases of approximately 6 million automobiles a year can have a material impact on cutting down the inflationary spiral.

DECISION OF FEDERAL COMMUNICATIONS COMMISSION RELATING TO "BOOSTERS"

Mr. CLARK. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CLARK. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CLARK. Mr. President, during the past several weeks the Federal Communications Commission has been under considerable public pressure to authorize a so-called television booster service for fringe television reception areas.

Under attack here is the Commission's 6 to 1 decision of December 30, 1958, requiring unlicensed, and therefore illegal television transmitters called boosters, operating on VHF or very high frequency television channels 2 to 13 to be converted prior to March 30, 1959, to so-called translator stations, a legal service operating on UHF—ultrahigh frequency—channels 70 to 83. The deadline has been extended to June 30, 1959.

It has been suggested that this action by the Commission was "precipitate and ill-considered," that it was taken without sufficient exploration of how best to provide rural area television. As a result, there now are 25 bills or joint resolutions before the House, and at least 2 before the Senate, which, if adopted, would call for reversal of this recent Commission decision.

Far from being "precipitate and ill-considered," I find the Commission's December 30 order to have been based upon several years' study and upon two formal records of investigation, in which all interested parties had full opportunity to participate. It is as a result of these thorough investigations that the Commission found these illegal reflectors to be an immediate source of interference to communications, services designed for protection of life and property, and a cause of destructive interference in television reception on home television receivers.

The record also shows that the Commission has developed the UHF translator service as a substitute for the boosters. The studies of the Commission's expert staff conclude that these translators provide "an excellent means" for obtaining rural area television service. This seems to be borne out by the successful operation of more than 150 translators, with an additional 50 translators under construction at the very time the Commission issued its recent decision.

The Commission and its staff have grappled with this problem for at least 4 years, during which it has issued three separate rulings—one based on law, and two based on engineering considerations, seeking to force the boosters to cease operation. At the same time the Commission, cognizant of its obligation to provide television reception service to fringe area communities and to rural residents, developed the above-mentioned UHF translator service.

I hope that the Commission will be permitted to administer the Communications Act in the public interest in this case, and all others, free of interference, and without cognizance of political considerations.

TRAFFIC SAFETY

Mr. LANGER. Mr. President, the traffic problem in the District of Columbia is one of great concern to all of us.

I ask unanimous consent to have printed in the RECORD a letter to the editor from the GAPA, a civic organization, that was printed in the Washington Evening Star recently dealing with the subject of traffic safety. Also an editorial from the first publication of the Traffic Safety Reporter, issued late in February 1959, the official publication of the Department of Motor Vehicle, with one of its articles dealing with selected action items from their master plan for traffic safety.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Evening Star]

JANUARY 28, 1959.

To the EDITOR:

I noticed recently in your newspaper, an article that the Metropolitan Area Traffic Council plans to step up efforts to meet Washington area traffic problems. In the article, it mentioned that among groups to be organized will be a new public support subcommittee.

The Greek American Progressive Association (GAPA) in conjunction with the Council of Orthodox and Greek Societies participated in a Metropolitan Area Traffic Council conference in order to see how civic, fraternal, religious and service organizations could best help improve the area traffic problem.

Fully realizing that correcting traffic problems can best be handled through experts in that particular field and through greater efforts in law enforcement, the GAPA feels that a more forceful activity in public relations and public information could do very much in correcting many of the traffic problems in the Washington area. In this respect, not only do the newspapers, radio, television stations play a very important role, but also the civic, fraternal, religious, and service organizations can do very much in educating their respective members in the advantages of exercising courtesy, consideration, and common sense in everyday driving.

As was pointed out by the representative of the Council of Orthodox and Greek Societies at the Metropolitan Area Traffic Council conference, many drivers, who do not necessarily violate traffic laws, do drive in such a manner as to add to the traffic problems of many large cities. This includes taking up two lanes rather than one, weaving from one lane to the other indiscriminately; driving much slower than speed limit and thereby creating a congestion, driving in the so-called speed lane rather than keeping to the right as much as possible, entering an already clogged intersection and thereby tying up traffic when lights change prohibiting movement of traffic in either direction, lingering in no-parking or no-standing zones, and such other practices which are more conducive to traffic jams than actual violation to traffic laws as people understand them to be.

It is hoped that the Metropolitan Area Traffic Council will vigorously pursue its new subcommittee so that it may encourage every civic, fraternal, and religious organization in the city of Washington to actively participate in such a program.

The benefits of such a program will be reflected in less traffic deaths, personal injuries and property damage. Also, it will revitalize the downtown Washington section that has been strangled by "traffic congestionitis."

Very truly yours,

JOHN BROUMAS,
President, GAPA.

[From Traffic Safety Reporter, Feb. 21, 1959]

The official traffic safety program of the District of Columbia calls for the publication of a periodical to disseminate the program for the information and support of our citizens. As a result, the District of Columbia Traffic Safety Reporter now makes its bow.

Traffic safety, it is commonly said, is everybody's business. So this newsletter is aimed at "everybody". It will be published monthly in the interests of traffic accident prevention for the use of all who want to take a hand in promoting greater safety on our streets and highways.

We will attempt to keep you informed about the District's traffic accident situation and what your Government is doing to improve it. We hope that our words and pictures will encourage a greater sense of individual responsibility for safe driving and walking at all times.

At the same time, we want you to let us know about any traffic safety activities in which you have engaged or plan to undertake. We will be glad to lend you a hand in any such undertaking.

What we are trying to do, in short, is to combat the concept of public apathy to the shocking traffic toll—the idea that the man-in-the-street has no concern for his fellow man. To quote the National Safety Council's publication Traffic Safety:

"The public has a heart, let us find a way to engage that heart in the war on traffic accidents."

[From Traffic Safety Reporter, Feb. 21, 1959]

SELECTED ACTION ITEMS FROM THE PROGRAM

ENFORCEMENT

Obtain following additional equipment:

(a) Modern radios for motorcycles and other tariffic vehicles.

(b) Camera equipment for accident investigation vehicles.

(c) An additional investigation vehicle.

(d) Breath-testing equipment.

Obtain 21 additional police for the Traffic Division, within existing Department ceiling of 2,500 men.

Obtain two additional prosecutors thoroughly trained in law enforcement and particularly familiar with the handling of traffic cases.

Review all traffic laws and regulations in light of present conditions to meet the needs of safety and uniformity.

TRAFFIC COURT

Designate in advance two judges to be assigned to the traffic branch for the ensuing year. The judges will divide the duties as agreed upon between them, so that each will serve the equivalent of a 6-month tour of duty.

Insure attendance of judges assigned to traffic branch at traffic conference prior to said assignment, and recognize serious nature of traffic laws and regulations.

DRIVER LICENSING

Revise the written portion of our permit examination to indicate a more thorough knowledge of the rules of the road on the part of the applicant.

Explore ways and means of increasing attendance at the personal conference held under the point system driver improvement program.

TRAFFIC ENGINEERING

Increase traffic engineering staff by at least five engineers and technicians, and by five draftsmen.

Resume the program of installing "supplemental" traffic signals so that within 5 years there will be two signal indications facing each lane of traffic approaching a signal-controlled intersection.

Study existing working hours and physical locations of Government employees from data available in the Bureau of the Budget to determine if further changes in staggered working hours are feasible.

SCHOOL TRAFFIC SAFETY EDUCATION

Conduct periodic school-by-school surveys of the traffic problem as to safety.

Explore the feasibility of creating a full-time supervisor of traffic safety education.

Explore the feasibility of offering the Police Department's traffic school course in the senior high schools.

PUBLIC TRAFFIC SAFETY EDUCATION

Initiate the publication and distribution of an official traffic safety periodical to disseminate the District's official traffic safety program for the information and support of business, professional, civic, service, women, labor and other community leaders and organizations.

Administer an official traffic safety speaker's bureau composed of District officials, public support group members, safety chairmen of District organizations and other interested citizens.

VEHICLE IMPROVEMENT

Assist the Police Department in its continuing campaign to rid the streets of unsafe vehicles, regardless of place of registration.

UNIFORM VEHICLE CODE

Seek the assistance of a nonofficial agency in conducting a comparative study to determine wherein District regulations vary from those recommended in the Uniform Vehicle Code.

DRIVER AND VEHICLE RECORDS

Explore the feasibility of further mechanization of recordkeeping, relating it to the requirement for office space.

ACCIDENT RECORDS

Explore the feasibility of employing additional electromechanical equipment to expedite compilation and distribution of accident data.

PUBLIC SUPPORT

Expand the charter of the present Commissioners' Traffic Advisory Board to include leadership in public support.

Broaden the base of the public relations support for the traffic safety program.

A PROGRAM FOR THE 86TH CONGRESS

Mr. CLARK. Mr. President, earlier today the distinguished junior Senator from Oregon [Mr. NEUBERGER] made an extremely trenchant speech on the subject of the need for a review by Congress of tax revenues and tax sources in the light of our continuing United States domestic and foreign obligations.

I regret that I was not able to be on the floor when he delivered his address. I should like to commend him for it now, and to indicate my concurrence with the philosophy which he has outlined, and to proceed to make an effort on my own behalf to lay down a suggested program for the 86th Congress.

Mr. President, it is rather a coincidence that in the Washington Post and Times Herald today the commentator, Mr. Walter Lippmann, in an article entitled "The Stultifying Dogma," arrived at practically the same conclusions which the junior Senator from Oregon [Mr. NEUBERGER] and I have reached on the same matter. Since the distinguished junior Senator from Oregon has placed that column in the RECORD, I shall not ask to have it printed again.

Mr. President, it is now 6 weeks since the program of the President was presented to the Congress and the American people in the form of messages from the White House on the State of the Union, the Budget, and the Economic Report.

The President's program has been criticized, and it has been stoutly defended. It is time for those of us who disagree with the President's concept of America, for today and tomorrow, to say why we think the President's program is deficient, and to provide a bill of particulars setting forth a positive program of our own.

No one Senator can be presumptuous enough to lay down the program for the 86th Congress. But, in our tradition of free debate, I want to suggest to my colleagues the broad outlines of a program to lead us out of the difficulties in which the President's proposals have placed us.

WHY THE PRESIDENT'S PROGRAM IS DEFICIENT

A few days ago, at the ceremony commemorating the anniversary of the birth of Lincoln, Carl Sandburg quoted these words of the Great Emancipator:

> The dogmas of the quiet past are inadequate for the stormy present. We must think anew, we must act anew, we must disenthrall ourselves.

The three messages which present the program of the President are replete with "the dogmas of the quiet past." That program is not good enough for "the stormy present." It is a complacent program, self-satisfied with the status quo in both foreign and domestic policy.

If we follow the program of the President—and follow it long enough—the result will surely be a steady decline toward a second-class America, incapable leading the defense of freedom in the world and indifferent to social, political, and economic injustices at home. We will be risking the loss of our precious liberties by default.

The safety of Americans and the growth and progress of our country depend upon the Congress substituting for the program of the President a program of its own which will protect our national security and our position of world leadership and meet the great national needs which confront us at every turn.

The fatal deficiencies in the President's program arise from the way in which it was put together. The administration has not drawn a picture of the kind of America we want to have 10 years or 5 years, or even 1 year hence, then computed what national action has to be taken to get us there, including a financial program.

Instead, it has done the reverse. It begins with a financial program formulated within arbitrary and predetermined limits, controlled largely by the level of present revenues. Our national goals then become whatever the present revenues can pay for if the budget is balanced. Our national needs are thus ignored.

In short, the President's budget is not a means to an end; it is the end.

Mr. President, there is nothing sacrosanct about a budget put together in this fashion. The responsible course for the Congress is to discard it and start all over again. We should make our own assessment of national needs and formulate our own national program to meet them. And in doing so, we should weigh our needs against our resources without blind pre-conceptions as to what we can and cannot afford.

When the Executive falls short in the performance of its duty, it falls upon the Legislature to fill the breach.

A BILL OF PARTICULARS

If we look at our national needs open-mindedly, what do we find? I do not presume, of course, to prejudge what any committee will recommend when it examines our requirements in particular areas of national need. But it may be useful to outline in broad strokes our present position insofar as a policy of unjustifiable Executive secrecy has permitted the elected representatives of the people to become aware of it.

FIRST: NATIONAL SECURITY

The President boasts of America's military, naval, air and missile strength. But he boasts of that strength in a vacuum. Nowhere in his program is there even an attempt to compare our strength with that of our Communist opponents. Yet, surely that is the only relevant test of our national security. Can it be seriously doubted that, in the last 6 years, our comparative power has been declining while that of our adversaries has been steadily growing?

There can be no doubt that we are losing the race for atomic missile equality: the Secretary of Defense himself has testified that he will not even try to match the Russians. With their present missile thrust, the Russians could strike devastating, if not fatal, blows to our country. Our retaliatory power is still great but the gap is widening every day. All the evidence suggests that our Strategic Air Force, crowded on inadequate bases, is not keeping pace with obsolescence. Our intermediate range missiles based abroad are vulnerable to surprise attack.

All the evidence suggests that if war were to come—as it might in May over Berlin—Russian submarines would not only control the sealanes but could, at their leisure, lob nuclear bombs on the great cities of our coasts.

And as for limited war, we just do not have in being adequate mobile forces capable of dealing with localized attacks on our allies, particularly if crises should occur simultaneously in far-removed locations.

To those who question such gloomy conclusions I refer for authority to the published summary of the Gaither report and the Rockefeller report of a year ago, to the report of the Johnson subcommittee on preparedness whose critical findings were published last February, and to the testimony of our leading scientists and militarymen this winter, much of it readily available although some of it still unjustifiably classified from most Senators and the general public.

It is true that we have heard soothing statements from some of the civilian and military leaders of the Defense Department. But the Congress cannot accept

without the fullest examination the assurances given by men who have limitations imposed on their freedom of expression, their voices gagged by an administrative ukase expressly forbidding disagreement with the military program in order to keep the ugly truth from the American people.

Money alone will not remedy the critical deficiencies in our defense posture. It will take much more than that. It will require the elimination of that smug and complacent self-satisfaction which is the hallmark of the Eisenhower administration. It will take a lot of hard work by a lot of dedicated men—men who will stay on the job and not quit and go home to make more money after a get-acquainted sojourn in Washington. It will take a reawakening of the spirit which made America a proud and compassionate Nation.

But it will take money, too—a lot more money than the President and his friends want to spend.

It will require a vast national effort which will terminate when, but only when, we are able to negotiate a meaningful and enforceable disarmament agreement with the Russians and the Chinese.

As the report of the Rockefeller Committee, chaired by the man who is now the distinguished Republican Governor of New York put it last year:

> Programs of great importance to U.S. security now suffer from insufficient funds. * * * Recent military expenditures are therefore insufficient to maintain even our current force levels. And events have made clear the inadequacy of these levels. * * *
>
> The price of survival, then, is not low. * * * But we can afford to survive.

No individual Senator can say with confidence how much should be added to the defense budget to overcome our alarming weaknesses. The report of the Gaither Committee, which is still secret, according to published reports, suggested stepups of $6 billion a year. The Rockefeller report suggested successive additions of $3 billion during each of the next several years. The distinguished chairman of the Defense Subcommittee of the House Appropriations Committee (Mr. MAHON) has suggested that next year's defense budget should be raised by $2 billion.

In any case, we can perhaps agree that the answer clearly does not lie in the kind of action reported in the Washington Post and Times Herald on February 22 by Mr. John G. Norris, whose lead paragraph I quote:

> A Defense Department report just made public reveals that the Pentagon plans to invest * * * in missile-weapon systems next year * * * about $400 million less than this year.

SECOND: FOREIGN RELATIONS

The conduct of foreign affairs is of such momentous importance to this Nation, and to every person in it, that it should be the subject of political discussion and debate as much as any other aspect of our public life. Under our Constitution, the President does not have the exclusive responsibility and authority for our foreign policy. While day-to-day conduct of foreign affairs is necessarily in the hands of the Executive, our Founding Fathers wisely placed on the Congress a heavy responsibility and authority in this field, and throughout our history the Congress has played its proper part in exercising that responsibility and authority—most recently in the Formosa and Middle East resolutions. Perhaps the time has come when we should do so with respect to Berlin. We should be ready to support the President when imminent danger threatens, but we would be derelict in our duties if we failed to participate in the formulation of foreign policy and in following closely the moves of the Executive in carrying it out.

In the cold war the battle for the allegiance of the uncommitted nations of the world, particularly in Asia and Africa, is critical. The Soviet Union and Red China have demonstrated that underdeveloped lands can make great material advances by following the path of communism. If free Asia and free Africa are to remain outside the Iron Curtain, their peoples must be convinced through experience that comparable progress can be attained in freedom.

So far, these struggling countries have not achieved that rate of progress. It has been estimated that in the last 7 years India's industrial output has increased by 33 percent, compared to an increase in Communist China of 144 percent. The increase in China's grain production has been even more spectacular, and Peiping is now exporting grain to other Asian countries.

The challenge to American policy is today of a magnitude comparable to that presented by the threatened collapse of Europe in 1947. The underdeveloped nations will not attain economic growth in freedom without the intelligent help of the wealthier nations of the free world. We must help them as we helped Europe.

We need not do it alone. Other States in the Western World have well-established and sizable foreign aid programs. We should pursue with vigor the suggestion made by the Senator from Tennessee [Mr. KEFAUVER] and others to combine our efforts, experience and resources with the British, French, West Germans, Japanese, and others.

Meanwhile, we must press forward with our own mutual security and economic assistance programs.

It may well be that the sums recommended by the President to increase the capitalization of the World Bank and its subsidiaries, to create a bank for Latin American investment, and to increase the capital structure of the Development Loan Fund are inadequate. In the case of the Fund, it is hard to believe that the request for $700 million for fiscal 1960 is sufficient, in view of the present rate of applications and the recommendations by Under Secretary of State Dillon and others made before the folklore of budget balancing became paramount over even programs bearing upon national survival. I suggest that the minimum rate of appropriation should be at least $1 billion per year and therefore support the proposal made by the junior Senator from Massachusetts [Mr. KENNEDY] and the senior Senator from Kentucky [Mr. COOPER] to increase the Development Loan Fund appropriation for 1960 by $300 million.

There should be no decrease, in my view, in the sums requested for the Foreign Service, the ICA, the USIA, and the CIA. Indeed, with respect to the first three, it is important that representation allowances should be increased. It is also of the greatest importance that we provide our ambassadors in the more expensive posts with the allowances necessary to permit the appointment of men of moderate means, including Foreign Service career officers.

Finally, we must remember that the success of our foreign relations efforts will hinge on the spirit in which they are carried out. With this, the Congress has much to do. Walter Lippmann recently stated the ideal eloquently:

> The whole operation of foreign aid would wear a different face if it were founded on the principle * * * that we make a contribution because it is the simple duty of the rich to help the poor. It would be a noble act, which would pay big dividends in self-respect at home and good will abroad, if the Government would declare the principle that to fight against poverty is a duty, not an instrument of our military strategy.

THIRD: DOMESTIC PROGRAMS

Let us look at those critical domestic programs which require appropriations and loan authorizations higher than those recommended by the President.

EDUCATION

Hearings before committees of both Houses held over a period of years have documented the clear need for more than doubling our national expenditure for education—roughly from $20 to $40 billion over the next few years. The best use that can be made of the increased expenditures is to increase salaries across the board.

Our teaching profession is in drastic need of rehabilitation, and even the administration admits the existence of a serious shortage of classrooms. Too large a percentage of bright young people are not going to college because of financial stringency. The aid given in that connection under the National Education Act of last year is pitifully small, that our local school districts and States, hard pressed as they are to balance their budgets and forced to rely in the main on property and sales taxes, are in no position to provide all of the needed $20 billion is clear to all who have seriously studied the problem.

The time for Federal action is now. We should have acted years ago.

If our object is, as it should be, to provide substantial aid without Federal control, then we should enact a measure along the lines of the Murray-Metcalf bill presently under consideration in the Labor and Public Welfare Committee of the Senate. This bill would make grants to the States without Federal control, beginning at about $1.1 billion in the first year, for the purpose of increasing teachers' salaries and constructing schools. Surely, the expenditure of $25 per pupil for these purposes, as provided in the bill, is a modest beginning to a program that should continue and be accelerated over the next several years.

In addition, the National Defense Education Act should be amended to supply a limited number of scholarships as well as loans.

HOUSING AND URBAN RENEWAL

The housing bill already passed by the Senate will enable the Nation to move forward in an area vital to economic growth. Its provisions for further FHA guarantees, veterans' loans, college housing, urban renewal, and public housing are modest enough when we consider the clearly demonstrated national need to raise home building from last year's level of 1,200,000 units to 2 million units a year.

There can be no turning back in meeting the objectives of the Housing Act of 1949—a decent home for every American family. Nor is there need to turn back. The budgetary implications of this legislation for the immediate future are minimal. The cost of the program for fiscal 1960 in excess of the recommendations of the President is estimated at $135 million. The cost in 1961 is hardly more.

AIRPORTS

Similarly, it would be both economic folly and bad business judgment to permit our airports and airlanes to become obsolete at the very beginning of the jet age. It is abundantly clear that neither the States nor the localities nor the commercial airlines can afford the cost of proper airport development; and the country just cannot afford to get along without such development. Indeed, the provisions of the Senate bill are, in all likelihood, too modest. Again, the excess over the President's budget is slight in amount, totaling $35 million for 1960.

WATER RESOURCES

Again we are told, this year, that the country cannot afford to begin any new projects to develop and conserve our water resources and bring disastrous floods under control, and that we must stretch out existing projects. The false economy of this course is shown again and again, year after year. Only a few weeks ago, damage of over $75 million occurred in my State alone as the result of preventable floods.

This is no time to retrench. With technological unemployment increasing daily as automation progresses, this is the time to take up the slack in employment by the construction of wealth-producing or wealth-conserving capital projects. Since most water resource projects would be some months in getting under way, the effect on next year's budget would not be great. Perhaps $100 million would suffice.

ATOMIC ENERGY

In the development of atomic energy for peaceful purposes, Government activity should be stepped up to the level necessary to insure that this country does not fall behind its competitors in both the Communist and free worlds. It is futile to expect the leaders of industry to invest vast sums of their stockholders' money in atomic development projects which hold no early prospect of profit. Nor can we, on the other hand, afford to drift until we awake one day to find that we have been left behind in the development of this amazing new asset to civilization. I am much impressed with the proposals made recently by the able and farsighted chairman of the Joint Committee on Atomic Energy, Mr. ANDERSON. It is my understanding that, if adopted, they would have no appreciable effect on expenditures in the fiscal year 1960.

AREA REDEVELOPMENT

A meaningful area redevelopment bill should be promptly passed, providing for a program of loans to new industries which create employment in depressed rural and industrial areas, together with loans and grants to local communities to enable them to provide the necessary public facilities. The sum proposed in the Douglas-Cooper-Clark-Beall bill is $389 million, but only $100 million of this, at the outside, would be spent in fiscal 1960. These expenditures will pay for themselves by utilizing resources of wasted manpower—which now represent a drain on the economy—to expand the economy instead.

HEALTH AND WELFARE

Unless the economy snaps out of the recession faster than it is now doing, there will be almost as much need for temporary unemployment compensation benefits this year as last. There were still 4.7 million unemployed at the last count—only 700,000 less than at the unemployment peak last June. By the end of the month, the temporary benefits will have cost $412 million, according to the budget estimate. We should allow perhaps half that much for extension of this program into next year.

Reductions proposed in aid to hospitals under the Hill-Burton Act and for stream pollution control should not be accepted. Here again, the need has not declined; I am sure that in every other State, as in mine, there are large backlogs of projects that should be undertaken. Altogether, for these programs and for expansion of research and teaching, another $100 million would appear to be amply justified in terms of the Nation's needs to improve our standards of health and control diseases.

Finally, there is every reason to extend the GI bill of rights to post-Korean veterans, as to veterans of earlier periods. Estimated cost is about $100 million for 1960.

ECONOMIES

I have no doubt that the Congress will be able to find some economies in the budget. Again, I do not want to prejudge where savings might be found, because the members of the Appropriations Committee are far more experienced and skilled than I in ferreting out waste in the budget. I am inclined to believe, however, that some of the bills proposed for agriculture by Democratic Senators from farm States, whose devotion to the welfare of the family farmer is thoroughly tested and proven, would result in considerable economies below the more than $3 billion in this year's price support operations. I am also sure that through further unification of the armed services, better management of procurement and other means, the Defense Department could save considerable sums.

However, I want to be conservative in this presentation and I therefore will not attempt to place any dollar figure on these economies to offset them against the additional expenditures I have outlined. As they develop during the session, we can take account of them, but there are undoubtedly further expenditure needs also, beyond those I have mentioned earlier. So let us regard these potential economies instead as providing us with a reserve for contingencies over and beyond the $100 million set out as a reserve in the President's budget.

If we were fortunate enough to end the fiscal year 1960 with a substantial surplus—and I, for one, would be prepared to take the action necessary to achieve that result—what better use could we put the surplus to than to reduce the national debt, and thus strike another blow in support of the soundness of the dollar?

RECAPITULATION

What I have tried to suggest is not a series of specific expenditure figures but an approach. The specific figures will depend upon the work of the committees of this and the other body. But it may be useful to add the estimates made earlier as to the increases in the President's budget that a budget related to national needs would require. The total comes to a little over $4 billion in the fiscal year 1960, as follows:

	Billion
National security (using the smallest of the estimates discussed earlier)	$2.0
Development Loan Fund	.3
Education	1.1
Housing and urban renewal	.135
Airports	.035
Water resources	.1
Atomic energy	-----
Area redevelopment	.1
Public health and welfare	.4
Total	4.170

While this would increase Federal expenditures from $77 billion to $81.17 billion in fiscal 1960, suggestions for increasing revenue which I will make shortly would more than cover the increases and permit the budget to be balanced at slightly more than $81 billion.

Mr. President, this would be a realistic budget. It would be a budget geared to our national requirements in our struggle of survival with the Communist world. It would be a budget for national growth and progress. It would be a budget that would lead to higher revenues in the years immediately ahead. It would be a budget for a higher level of domestic economic well-being.

ECONOMIC WELL-BEING

Not long ago, the learned senior Senator from Illinois [Mr. DOUGLAS] reminded us of the three economic goals we seek to attain: substantially full employment, an adequate rate of economic growth, and a stable price level. Not all of us are against inflation. But the hue and cry on this subject has been so deafening that we have lost sight of the other two economic goals. Achieving stable prices is not enough in itself. We must have maximum employment and steady economic growth, too.

1. SUBSTANTIALLY FULL EMPLOYMENT

The President says in his budget message:

We are now entering a period of national prosperity and high employment.

What are the facts? Unemployment is close to its highest point since the great depression, with 4,700,000 men and women seeking work, and perhaps another 2 million on part-time employment at wages inadequate to maintain decent standards of living. Seven million American families are existing on incomes of $2,000 a year or less. In my own State of Pennsylvania, 11 percent of the labor force is without work, and in one county, Fayette, the figure is 23 percent. Five hundred and eight thousand Pennsylvanians are walking the streets right now seeking employment which they cannot find; 926,800 Pennsylvanians are receiving surplus food. It may look like high employment from the first tee of the Augusta National Golf Club, but the cupboard is bare in Detroit and Wilkes-Barre and Lawrence, Mass.

The Employment Act of 1946 states that maximum employment and maximum production shall be objectives of national policy. Yet one can search the program of the President in vain for any serious discussion of ways and means of attaining these ends.

2. ECONOMIC GROWTH

Let us look next at economic growth.

For the first half of the 20th century, our gross national product per capita in terms of constant dollars increased at the rate of about 3 percent a year. In the same terms, from 1953 through 1958, during the first 6 years of the Eisenhower administration, the rate of real economic growth was about one-fortieth of 1 percent a year. Our economy under this administration is growing about as fast as a glacier moves or a snail walks.

I recently asked the staff of the Federal Reserve Board to compute for me the gross national product per capita, in constant dollars, for the years 1946 through 1958. I ask unanimous consent that a table containing the information furnished me be included in the RECORD at this point in my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Gross national product per capita, in 1958 dollars, 1946 through 1958

1946	$2,208
1947	2,163
1948	2,208
1949	2,172
1950	2,318
1951	2,459
1952	2,505
1953	2,575
1954	2,482
1955	2,634
1956	2,653
1957	2,635
1958	2,509

Mr. GRUENING. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield to the Senator from Alaska.

Mr. GRUENING. Has it occurred to the able Senator from Pennsylvania that in the part of the United States where most of our glaciers are located, which is Alaska, the majority of them are now receding?

Therefore, when the Senator speaks of the slow movement of a glacier, we must bear in mind that in the majority of cases glaciers do not advance, but recede. I believe that is the explanation of what is going on under the present administration in terms of national movement.

Mr. CLARK. The Senator from Alaska has made an excellent point. I accept his amendment with pleasure. I am quite convinced that he is correct, and that it will not be long before the national growth is stopped entirely and a recession begins, unless we change the disastrous policies which the present administration is following.

Mr. GRUENING. That is inevitable, and will be so until we change the policies or change the administration.

Mr. CLARK. I thank my friend for his pertinent comment.

What this table shows, Mr. President, is that from 1952 to 1958, during the Eisenhower years, production per capita rose from $2,505 to $2,509. This is less than $1 a year, or one-fortieth of 1 percent.

There will perhaps be objection that we should not use 1958, a recession year, as a basis for comparison. But even if we use the relative boom year of 1957, the increase is only 5 percent in 5 years—from $2,505 to $2,635—or 1 percent a year.

By comparison, the growth rate on a per capita basis in the 6 years from 1946 through 1952 was $297, or 2.2 percent a year.

There we have the picture: In the first half of this century, 3 percent; in the first 6 postwar years, well over 2 percent; the first 5 Eisenhower years, 1 percent; the first 6 Eisenhower years, nothing at all.

The glacier had stopped moving.

Returning to the aggregate gross national product, in constant dollars but ignoring population growth, we find our growth rate of less than 2 percent compares to a rate in the Soviet Union estimated to be about 3 percent per annum. The growth rate of Communist China is said to be even higher.

The Rockefeller Brothers Fund has suggested that the United States can achieve an average of 5 percent expansion, year after year; the Committee for Economic Development has said 4 percent. Compared to targets like this—which are well within the range of possibility—and in the light of the Communist threat, the record of recent years should really frighten us all.

It is often overlooked—and in this budget it is quite forgotten—that in many respects the private economy of the United States floats upon a substructure of public expenditure. Obviously, without public highways the automobile industry could not have developed; without public airports and airways the aviation industry could not have grown; without public river-development projects, ports would languish and industries which depend upon navigation or cheap hydroelectric power could not have prospered. Our native private economic growth, which had been the most spectacular in the world, has rested on a foundation of public education. Governmental research has contributed immensely and directly to private production—perhaps most notably in the field of agriculture. And public health activities of all kinds have contributed to the productivity of our people.

More recently, the relation of public programs to the expansion of the housing industry and the economic development of our cities and their suburbs has been recognized. In our hearings on urban renewal, for example, it was brought out that each $1 million of Federal investment has made possible $10 million of private investment. Each $10 million added to the gross national product returns about $2 million to the Federal Treasury in taxes. So the Federal expenditures are returned twice over by the private economic expansion which they stimulate. FHA, VA, and FNMA programs have added hundreds of thousands of units each year to the number of homes built, and the profits from the building of these homes have swelled substantially Federal income tax receipts.

Yet, despite the demonstrable relationship between the Federal budget and economic growth, the administration seems this year to have signaled out for repressive action those very areas most directly related to economic expansion.

The President's program is almost wholly negative in its proposals for education, for housing, for urban renewal, for river development, for airports, for hospital construction. In many of these areas, the President proposes a rate of activity less than the current rate—in other words, he calls for cutbacks at a time when we should and could be moving rapidly forward.

In the words of the distinguished Senator from Alaska, the Presiding Officer at this time [Mr. GRUENING], the President is prepared to have the glacier recede through the medium of his 1960 budget.

Are these cutbacks justified by the threat of a runaway inflation, as the President contends? Let us deal briefly with both the shadow and the substance of this controversial subject.

3. A STABLE PRICE LEVEL

A certain segment of public opinion has been convinced by the President and that section of the press which can be best described as the journals of plutocratic opinion that any cash deficit in next year's budget would mean runaway inflation. Personally, I find this somewhat unconvincing. To a large degree, I suspect, the constant talk of inflation is merely an alibi concocted by those who are trying by any means at their disposal to kill off governmental programs.

If deficits inevitably meant inflation, the proof should be confronting us right now. For this year—right now, as we talk here on the floor of the Senate—the Federal Government is running the heaviest cash deficit since World War II—officially estimated at $13 billion this year. Yet, our general price level is stable and has been for almost a year. Indeed, an analysis of the past few years shows that our inflationary periods have

usually been years of budget surplus and our stable periods years of budget deficits. If we were to adopt the fallacious doctrines which the President and his advisers are trying to foist on us, that Federal budgets are the determinants of the price level, then we should logically be seeking a deficit for fiscal 1960 as the means of controlling inflation.

But let us not go that far. Let us simply agree that the doctrine of budgetary causation is not sustained by the evidence and look elsewhere for the causes of inflation.

If we examine the components of the price indexes, as Mr. Gardiner Means has done for us, we find that the inflationary movement for the last decade has been centered in a few concentrated industries where prices are not subject to the normal workings of the law of supply and demand, and that higher prices have been the rule in these industries in good times and in bad, unaffected either by budget surpluses or budget deficits. The way to curb inflation, then, is to take a long, hard look at which prices are going up, and why. And here the President's program is sadly deficient.

Nowhere are concrete measures to curb inflation suggested.

This matter was brought to the floor of the Senate by the distinguished senior Senator from Tennessee [Mr. KEFAUVER], when he pointed out the critical effect which an increase in steel prices would have, and the importance of our applying governmental pressures to prevent additional increases in the price of steel.

It is not enough to be given little lectures on the dangers of inflation, supplemented with admonitions to organize labor to stop trying to improve the lot of the worker and to management to stop looking out for stockholders. Some stronger medicine is obviously required.

In the hope of encouraging some more serious steps than "jawbone control," I have joined with several of my colleagues—and Representative REUSS has introduced a similar bill in the House—in introducing a measure which would first, amend the Employment Act of 1946 to make clear that a stable price level is an objective of the act of equal importance with maximum employment and maximum production; and second, require publicity for price increases in the administered price industries and authorize the Council of Economic Advisors to investigate their causes.

These steps would be a good start. If they do not work, we will have to face up to enacting some form of limited and perhaps indirect controls, while utilizing the antitrust laws more forcefully to break up monopoly.

What, then, should we do about balancing the budget for fiscal 1960?

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield to my friend from Wisconsin.

Mr. PROXMIRE. Is it not true that what the study of Gardiner Means showed was that we have a different kind of pressure on prices now—that is, between 1953 and the present time—than we had during the period of the Second World War and afterward?

Mr. CLARK. The Senator is correct. I wish someone would tell that to the Council of Economic Advisers, so that they could tell it to the President.

Mr. PROXMIRE. The point that Gardiner Means makes, as I understand it—and it seems to me that this is the principal point—is that during the earlier period, during the Second World War and afterward, there was a genuine, traditional monetary inflation situation; that is, a shortage of goods and a shortage of labor.

Mr. CLARK. Too much money chasing too few goods, in the words of the cliche.

Mr. PROXMIRE. It seems to me this point should be driven home right here. We have not had that kind of economy. There has been an excess of labor and an excess of plant capacity.

Mr. CLARK. There has been deficient production.

Mr. PROXMIRE. Deficient production and a kind of classic economic situation which should drive prices down. It is perfectly obvious that under these circumstances a relatively modest increase in the deficit or in Government spending would not have any real effect on prices.

Mr. CLARK. I think the Senator from Wisconsin is correct. Nevertheless, for other reasons I think the budget should be balanced.

Mr. PROXMIRE. I think so, too.

Mr. CLARK. I am happy to have the Senator's views on the subject.

Mr. PROXMIRE. I agree 100 percent with the Senator from Pennsylvania. I agree wholeheartedly that the budget should be balanced. But I think it is extremely important that speeches like that of the Senator from Pennsylvania be made in the Senate, because the American people are being told, over and over again, by the strongest voice in American political life, that of the President of the United States, that there is only one cause of inflation: an unbalanced budget.

I think this is most unfortunate. I will not say it is a deception, because I am sure it is not deliberate on the part of the President, but is a most unfortunate understanding. It can have grievous consequences because, as the Senator from Pennsylvania is pointing out so well, it means that Congress is likely to have great pressure placed on it, pressure which will attempt to persuade Senators and Representatives not to do the job which they should do to promote the kind of economic growth which is essential if this Nation is to survive.

Mr. CLARK. I thank the Senator from Wisconsin for his pertinent comments. I find myself in complete agreement with him. I have stated earlier in my remarks that I think we have become the victims of economic folklore, of the obsolete economics of a day which has gone.

There is always a certain amount of lag between what politicians are prepared to do and what the brains of the country know ought to be done. I think it is the function of the Executive to minimize that lag. When he does not do it, Congress ought to move in and do it for him.

I think the Senator from Wisconsin has made as great a contribution to this subject as any other Member of this body. I thank him for his comments.

WE SHOULD BALANCE THE BUDGET AT AROUND $81 BILLION

Mr. President, I say we should balance the budget for 1960 at around $81 billion.

Even if it were agreed that the measures just discussed are the essential means of controlling inflation, and a balanced budget is not a necessary consideration at this time, there are other strong reasons that lead me to conclude that the budget should be balanced in fiscal 1960, although at a higher level than that recommended by the President.

The ill-advised and repeated public statements of the President that failure to balance the 1960 budget will result in runaway inflation, economic disaster, and national catastrophe have themselves had their insidious and unfortunate effect not only at home but abroad. If the cost of living, due to other factors, were by mere coincidence to begin to rise again, many well-meaning but ill-informed people might conclude that the Congress was fiscally irresponsible and that the soundness of the dollar was imperiled because the elected representatives of the American people did not have the political guts to balance the budget at a time of relative prosperity for most people.

I think the senior Senator from Michigan [Mr. MCNAMARA], whom I see sitting in the Chamber, and I, from Pennsylvania, know full well that that prosperity seems to have managed to skip most of our respective States, except certain areas near Grosse Pointe, in his State, and out in the general vicinity of Sewickley, near Pittsburgh, in mine.

The psychological effect of such a widespread feeling would be, in itself, an evil we should strive to prevent.

Moreover, there is no real need for continuous deficit financing. All that is needed is the political guts required to get rid of the inequities which constitute a concealed raid on the U.S. Treasury by certain favored taxpayers who have contrived tax loopholes by which they benefit.

LET'S CLOSE THE TAX LOOPHOLES

An objective analysis of these loopholes produces convincing evidence that the more than $4 billion referred to earlier can be found without the imposition of new taxes or any general increases in rates.

Leadership in identifying and closing these loopholes is what we need from the other end of Pennsylvania Avenue, instead of a passive acquiescence in the present inequitable distribution of the tax burden, instead of the demagogic suggestion that a tax cut may be in prospect for the presidential election year of 1960.

I suggest a program for raising the additional revenue needed to balance the budget at around $81 billion:

First. Increase the staff of the Internal Revenue Service charged with enforcing

tax laws and direct them to concentrate on the larger returns.

In its early years, the Eisenhower administration reduced the personnel of the enforcement section of the Internal Revenue Service by 3,000 employees and the results have been costly to the Treasury. During the first six years of this administration, an average of 25 million more income tax returns were filed annually than during the last six years of the Truman administration. This larger number of returns averaged $27 billion more per year than in the previous period. Nevertheless, the average annual amount of tax deficiencies assessed has been $320 million less during the 6 Eisenhower years than during the 6 Truman years.

Better administration alone might well raise more money than closing any single loophole. In fact, a special audit of 36,000 representative business and professional returns, recently published by the Internal Revenue Service, indicates that if auditing could have been extended to 6,700,000 such returns for the same year, the taxable income of the taxpayers involved would have been increased by 20 percent and yielded $2.7 billion additional public revenue. This is a matter which might well be investigated by the Senate Finance Committee. If even half this amount could be obtained, the increased revenues would be $1.3 billion.

Second. Require withholding and reporting of income taxes on dividend and interest payments at source, as in the case of wage payments—$600 to $800 million.

Third. Tighten the rules regarding deduction of business expenses. Expenditures by businessmen for which they receive a large element of personal return should not be recognized as deductions from taxable income. Such abuses appear to be prevalent in claimed deductions for expenses of wives on so-called business trips, transportation to conventions held abroad, company cars, yachts, airplanes, lodges, lavish entertainment at night clubs and theaters, and many related items. The cost of gifts exchanged between businessmen should not be deductible. Consideration should be given to limiting deductions for advertising expenses not related to the sale of products—$1 billion.

Fourth. Limit the transferability of operating loss carryovers in purchases of corporations with heavy losses. Tax windfalls should not be given to those persons who make a profession out of "milking" losing businesses—$100 million.

Fifth. Limit the amount and type of foreign tax credits permitted. At present, many large domestic corporations with sizable income from foreign sources escape all or part of U.S. income taxes by this device—$200 million.

Sixth. Repeal the special tax credit and exclusion for dividend income established in the 1954 Tax Code. As a result of this advantage given to unearned income, a wage earner netting $5,000 must pay $60 more in taxes than a person living on unearned income of the same amount—$400 million.

Seventh. Reduce the depletion allowance on oil and gas income from 27½ to 15 percent and limit the total of such allowances to the adjusted basis of the property—$400 to $600 million.

Eighth. Revise the rules regarding gains and losses to eliminate capital gains treatment of net gains from sale or exchange of depreciable property used in trade or in business and peripheral items—$800 million.

Ninth. Treat the termination of an interest in a life estate as a taxable transfer—$500 million.

Tenth. Combine estate and gift taxes in an integrated transfer tax structure—$500 million.

Eleventh. Reduce the tax advantage given to upper-income married couples and heads of households by the income-splitting provisions of the Internal Revenue Code—$1,000 million.

The suggested changes in the tax laws and in their administration would increase the public revenues by an estimated $7 billion per year, or almost twice the amount necessary to cover the increased expenditures suggested earlier. They would impose no unfair burdens; on the contrary, they would equalize tax burdens which are now inequitably distributed. While mildly progressive, rather than regressive in nature, they would not deter initiative which would otherwise be devoted to expanding the economy. In a word, they would redress injustices while at the same time yielding needed Federal revenue.

A LESSON FROM THE FALL OF ATHENS

I claim to have no final answers to the critical problems which confront us in the 86th Congress. I can only say that the foregoing proposals are the earnest effort of one Senator to come to grips with the central issue which confronts all of us under the dome of the Capitol this year.

In the end we will resolve that issue on the basis of the spirit in which we approach it.

Some years ago, a great American, indeed, George Catlett Marshall, said that it was difficult to understand the stresses and strains of the present unless one had read the history of the Peloponnesian wars. Surely the analogy is too pertinent for comfort. America is Athens, and Russia, Sparta. Across the water to our west lies China, the Persia of today, preparing to move in for the kill. Despite Pericles, Sparta finally triumphed, and freedom died in ancient Greece. Let us not make the mistake of underestimating our danger as the Athenians did after Pericles died. Surely, Carl Sandburg was right when he told us on Lincoln's birthday, less than a month ago:

> Whenever there is freedom there have been those who have fought, toiled, and sacrificed for it.

Mr. President, there are few, if any, Members of this body who would quarrel with these words of our great American poet.

The present question which confronts us is: Who shall make the financial sacrifices necessary to defend freedom?

I am against having further sacrifices made by the unemployed, the ill-housed, the ill fed, the elderly, and the infirm.

I am against having further sacrifices made by American boys and girls who receive an inadequate education.

I am against placing the safety of the whole body of Americans in jeopardy through failures to spend enough money on national security.

It may well be that in the end the sacrifices for freedom will have to be made by each and every one of us alike.

These are perilous and dangerous times, and I know there is no sacrifice the American people would not make to preserve themselves in freedom.

But for the immediate future I suggest that the sacrifices should be made by those—individuals, and corporations alike—who, far from making sacrifices, are unjustly avoiding payment of their fair share of that national tax burden which may well be in the immediate future the price of life, liberty, and the pursuit of happiness.

Let us approach the task of meeting our national needs with the knowledge that there is no easy way out; that we cannot retreat, like the lotus-eaters, into a never-never land; that we cannot put our heads into the sand and hope the dangers will go away. No; we must toil and sacrifice. In that way we can be worthy of the great American tradition which we have inherited and which we must hand over, unblemished, to the generations who will follow us.

Mr. McNAMARA. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield to the Senator from Michigan.

Mr. McNAMARA. I wish to compliment the Senator from Pennsylvania upon the excellent speech he has made in the Senate today. The presentation which has been made by the Senator from Pennsylvania, including the many citations he has made as to the immediate and pressing needs of the country, and his spelling out of the programs which particularly need attention in these trying times, is one with which I heartily agree.

Let me ask him whether he mentioned, in the earlier part of his remarks—I regret that I did not hear all of them—the programs enacted by the 85th Congress which already are proving helpful, insofar as our economy is concerned, in these trying times. I have in mind programs such as the one for stepped-up highway construction, which today is providing increased employment, and this year will provide employment to approximately 700,000 persons. That is something the Congress had to do. But in that connection, Congress had to fight the administration to some degree.

Mr. CLARK. The Senator from Michigan is correct.

The emergency housing bill is another example. It put $1 billion into the economy, and put people back to work, and resulted in the construction of tens of thousands of houses which otherwise would not have been built.

Mr. McNAMARA. That is correct. And the 85th Congress also, in passing the educational bill for national defense,

likewise made a great contribution in this area.

Mr. CLARK. That is correct. My colleague and I will agree that the Congress would have done better if it had adopted the Senator's amendment which dealt with school construction.

Mr. McNAMARA. We certainly do agree as to that, and we certainly hope the 86th Congress will see the light and will go along with us on that amendment.

Mr. CLARK. Yes; I share the hope for a broad education bill this year.

Mr. McNAMARA. Let me also refer to the payments under the social security system, which are very much needed because of the increase in prices and the increase in the cost of living. Certainly that legislation should not be overlooked.

Mr. CLARK. Certainly it should not be.

Mr. McNAMARA. And also the unemployment insurance which has kept so many persons off the welfare rolls—a subject with which all of us are very much concerned.

Mr. CLARK. Yes; even though that extension was made on an inequitable basis, as the Senator from Michigan well knows. Let us hope we can do better in the near future. In that connection, let me point out that the Senator from Michigan has done me the honor of inviting me to join him in sponsoring a bill which will do just that.

Mr. McNAMARA. These are things which I believe should be mentioned in connection with the remarks of the Senator from Pennsylvania in regard to the Employment Act of 1946, in order to show that the Congress has not been entirely derelict in the performance of its duty, but has met opposition from many quarters on this program which is so necessary in these days which are so difficult both at home and in the rest of the world.

Mr. CLARK. I thank my friend for his addition to my speech. I believe what he has said makes an important contribution to the debate on this matter.

Mr. McNAMARA. The Senator from Pennsylvania is very kind.

He referred to citizens of Grosse Pointe, Sewickley, and similar areas.

Mr. CLARK. In self-defense, I should have added "the Main Line of Philadelphia."

Mr. McNAMARA. But even those citizens are more and more recognizing the fact that they cannot be prosperous if the rest of the country is not also prosperous. Gone are the days when, under our economy, one section of our society could prosper at the expense of the rest of our society. I think those who live in the areas to which the Senator from Pennsylvania has referred are apparently waking up to the realization that they cannot long prosper if hardship and want exist in the other areas of our economy. As our economy goes, so goes all of our economy, not just parts of it; and I believe that these people now are belatedly waking up to realize that fact.

Mr. CLARK. I think the Senator from Michigan is correct.

I think I should say with respect to my constituents, and perhaps also with respect to his, that certainly they, too, are good Americans; and if these additional tax burdens are imposed on them—as the Senator from Michigan and I think should be done—they will meet those burdens in good spirit, as good Americans, and all of us will proceed together along a road which will lead to a better and more prosperous America for all our people.

Mr. McNAMARA. Again, I wish to congratulate the Senator from Pennsylvania on the fine presentation he has made; and I desire to assure him that in his attempts to implement the things he has stated here, I shall be glad to be his partner.

Mr. CLARK. I thank the Senator from Michigan.

Mr. PROXMIRE. Mr. President, will the Senator from Pennsylvania yield to me?

The PRESIDING OFFICER (Mr. GRUENING in the chair). Does the Senator from Pennsylvania yield to the Senator from Wisconsin?

Mr. CLARK. I yield.

Mr. PROXMIRE. I, too, wish to compliment the Senator from Pennsylvania on the excellent, eloquent, and extremely necessary speech he has made. I believe that it is about time that a Democratic Senator rose on the floor and offered an alternative to the Eisenhower budget. The fact is, I believe, that the President and the Republican Party are scoring some points. I do not think it is enough for Democrats to condemn the budget, without offering an alternative; I do not think it is completely responsible to condemn, without offering an alternative.

So I believe it is a great thing that the Senator from Pennsylvania has had the courage and the sense of responsibility to offer an alternative.

For example, when we attempt to defend the housing bill, which now is under fire, but when we make no reference to the source of the funds which will be required to pay for it—although the people are conscious of the desirability of having a balanced budget, as both the Senator from Pennsylvania and I agree we should have—I believe we are put in a position which is weakened and a position which should not be weakened as it has been.

I should like to add these additional words: I was very happy to have a chance to examine the provisions proposed by the Senator from Pennsylvania for raising additional tax revenues. I have worked on this matter; and I believe that the proposals of the Senator from Pennsylvania are sound and, as a matter of fact, are conservative. He says his proposals would raise an additional $7 billion of tax revenue.

I notice that the very first proposal he makes is to have more careful and thorough and comprehensive auditing of income-tax returns.

Mr. CLARK. This matter was called to my attention by the distinguished junior Senator from Wisconsin himself, who offered it on the floor a few days ago.

That was the first time I had heard of it.

I think the Senator from Wisconsin is correct—namely, that the estimate is conservative. I have tried to make the estimates conservative throughout. I believe we should do so, because undoubtedly there will be those who will say that our figures are those of wild-eyed spenders. Therefore, we should be sure we know what we are talking about when we say that certain amounts of additional revenue can be raised by these means.

However, I believe I am substantially conservative when I state that approximately $1 billion of additional tax revenue can be raised by this means.

Mr. PROXMIRE. Of course, the Government has to pay the salaries and expenses of those it employs to do tax auditing. But let me point out that on the basis of the experience we have had in Wisconsin, for every dollar that is paid to those who do such tax auditing, $20 is returned to the Government, by way of the collection of additional income taxes. In the case of the Federal Government, I believe the proportion would be much greater; I believe that in the case of the Federal Government the actual additional revenue collected would be nearer $50, and perhaps a great deal more, for every dollar spent for such auditing.

Mr. CLARK. I believe the Senator from Wisconsin is correct—namely, that if the tax officials do what they should—in other words, see how much additional revenue they can obtain by means of such auditing, rather than attempt to make a record in regard to the number of returns they audit, without regard to the amount of additional tax revenue they obtain, which I understand is the policy the tax officials have been following——

Mr. PROXMIRE. Of course, it is never popular to provide for increased taxes.

Mr. CLARK. Perhaps it is fortunate that the Senator from Wisconsin has 6 years before he must again present himself before the electorate. In my case, I have 3½ years.

Mr. PROXMIRE. However, as I look over the proposals which the Senator from Pennsylvania has made, I observe that they would not increase the tax rates.

Mr. CLARK. That is correct.

Mr. PROXMIRE. Generally speaking, they would not increase the burdens on conscientious taxpayers who now pay their taxes in full, and who are on a salaried basis.

Mr. CLARK. That is correct, although my proposal to do away with the dividend credit would raise the taxes on those who obtain a major part of their income from dividends.

Mr. PROXMIRE. Yes. But my point is that people who earn their living from salaries and wages would not have their taxes increased by these proposals of the Senator from Pennsylvania.

Mr. President, I thank the Senator from Pennsylvania for his contribution.

Mr. CLARK. I thank the Senator from Wisconsin.

Mr. President, I have here a note which indicates that in the case of the cost of obtaining the Federal government's tax revenues, for every 32 cents of additional expenditure, $100 of additional revenue will be raised. These are quite striking figures.

Mr. NEUBERGER. Mr. President, will the Senator from Pennsylvania yield to me?

Mr. CLARK. I am very happy to yield to the Senator from Oregon, whose most courageous speech on this subject, earlier today, I had occasion to comment on before he returned to the Chamber.

Mr. NEUBERGER. I do not like to engage in a trading of compliments on the Senate floor, but inasmuch as the speech of the able Senator from Pennsylvania was available to my office late yesterday afternoon, I took it home with me and read it through in full last evening.

Mr. CLARK. That is the greatest compliment one Senator can pay to another, and may I say it is a very unusual one, and I am most grateful to the distinguished Senator.

Mr. NEUBERGER. I have heard it said that the only greater tribute one Senator can pay to another than to listen to a Senator's speech is to read it.

Mr. CLARK. The Senator is correct.

Mr. NEUBERGER. So I wished to give the ultimate accolade to the Senator from Pennsylvania, whom I admire very much.

The senior Senator from Pennsylvania has just delivered this outstanding address on the floor of the Senate, and I should like to ask him several questions.

Is it not a fact that even the very shaky budget presented by the administration—the $77 billion budget—is not a balanced budget unless the Congress adopts higher postage rates and increases taxes on motor fuels?

Mr. CLARK. The Senator is correct. In addition to which I suspect the estimated revenue is at least $1 billion too high. Of course, we shall not know until later, but certainly it is a rosy estimate of the revenues to be received. The Senator from Oregon is quite correct with respect to his statement about special taxes.

Mr. NEUBERGER. The administration is making an issue of a balanced budget. As the Senator from Wisconsin stated earlier, it is a pretty good issue. It has widespread appeal in the country. There is genuine validity to it. However, very few of the American people realize that it is not now a balanced budget unless very extensive and comprehensive tax increases are voted by this Congress.

Mr. CLARK. The Senator is entirely right.

Mr. NEUBERGER. Unless I am mistaken, Congress will have to enact legislation which will increase the motor-fuel tax by about $724 million a year, and will have to increase postage rates by about $350 million.

Mr. CLARK. In other words, about an additional billion dollars.

Mr. NEUBERGER. That is correct. So I think it is well that this point be emphasized on the Senate floor by the able Senator from Pennsylvania and myself, so that the news can perhaps get out to the country that the present balanced budget is only mythically or hypothetically balanced.

Mr. CLARK. The Senator is correct.

Mr. NEUBERGER. And that unless the Congress accepts the recommendations of the President on motor fuels, an issue before the roads and highways subcommittee, which is so ably headed by the senior Senator from Michigan [Mr. McNAMARA], and unless Congress enacts higher postage rates, which are before the Senate Committee on Post Office and Civil Service, where the Senator from Pennsylvania and I serve, we have no balanced budget at all today. I think its is very important to stress this point, so that the people will recognize that we are talking about a budget which is balanced as of now only in legend and in theory, and not in fact.

Mr. CLARK. The Senator is correct.

Mr. NEUBERGER. I do think it is an occasion of much value to the country when a Senator makes a speech such as the Senator from Pennsylvania is making, for one cardinal reason: I doubt if any nation such as ours can face a colossus such as the Soviet Union unless our people are willing to make sacrifices. The Russian people are disciplined. The Russian people are led by tough-minded men who do not have to respond to public opinion. Russia has no real elections. The Russian people have enormous natural resources. They have a great deal of dedication to their country. They have a great deal of patriotism. Unless we are willing to sacrifice, I think that perhaps the gloomy prophecy contained at the end of the address by the Senator from Pennsylvania could unfortunately prove to be true. I doubt if at any period in American history our Nation has risen to great heights, unless the people have been willing to make sacrifices.

Mr. CLARK. The Senator had occasion to refer to the words of Winston Churchill in Great Britain's dark days at the beginning of World War II, when Churchill stated he had nothing to offer except blood, sweat, toil and tears. I have a strong feeling it is that kind of talk that should be coming from the President at this time, instead of what we hear coming out of the press conference, that everything is well and will come out all right.

Mr. NEUBERGER. I agree. The place this warning must originate, if all the people are to heed it, is the White House, because only the President has the ears of all the people. It was President Woodrow Wilson, I believe, who said that the Presidency is preeminently a position of moral leadership. In a crisis such as we face today, this moral leadership must come from the President of the United States.

In fairness to the President, I want to say he has laid down a challenge to the Congress, because he has asked Congress to raise motor-fuel taxes and to raise postage rates. There are other proposals, such as the closing of tax loopholes, which the Senator from Pennsylvania has enumerated. I offered several other suggestions, including reduction of oil and gas percentage depletion allowances, which was also mentioned in the Senator's address, and restoration of the excess profit taxes on armaments and weapons production, which I think is long overdue.

Mr. CLARK. I think the Senator has rendered a service to the country in making this proposal. We could well look back to the tax structure as it existed before the 1954 tax reduction. If it was found we needed more revenues, they might be obtained in that manner, and the loopholes could be closed. I do not think that we shall need to do it, but if we needed them, we ought to tax to get those revenues.

Mr. NEUBERGER. That is correct. When we think of the fact that the armed services have asked for $10 to $20 billion more than is contained in the President's budget, we face a frightening prospect. I wonder if the size of the defense budget was a political or military decision. Suppose the military services are right and we need an additional $10 billion to $20 billion, and we do not have it, and the Berlin crisis, which we were warned about by the senior Senator from New York, should—God forbid—boil over into world war III.

Mr. CLARK. I think the Senator is quite correct in that statement. I think we can have the normal discounting of military requests that they always need more money. The Senator and I know, having been in the military forces, that the military is bound to exaggerate its needs. But I cannot believe they have exaggerated to the tune of $20 billion in any one year, particularly in view of the Gaither and Rockefeller reports.

Mr. NEUBERGER. If our Joint Chiefs of Staff are right about these additional sums being needed, and they are not included in the budget, that could have grave consequences for the United States and the future of the free world. Is that not right?

Mr. CLARK. The Senator is correct. The only reason why I indicate a somewhat pessimistic tone is that when $1 is authorized for the military, we do not receive the benefit of it for 1, 2, or 3 years. For example, Congress cannot appropriate money now to take care of the Berlin crisis in the immediate future.

Mr. NEUBERGER. It takes years to tool up military equipment and weapons in the military field.

I want to conclude by saying it seems to me the leaders of this Nation have to face up to the issue. When I say leaders, I do not mean only in the Senate, but throughout the country. As a member of the Public Works Committee, I have been disturbed by the fact that 29 Governors have petitioned Congress not to increase the motor-fuel taxes. The Governor of my own State is on the list, even though he is a Republican and our President is a Republican. The President favors the increase. Yet these Governors are telling us, by all means, to keep the interstate highway program on schedule. They are telling us not to let the program go by the boards. Yet they want the Federal Government to pay 90 percent of the program and put up 90

percent of the funds and not increase the motor-fuel taxes. How is the Federal Government going to pay out that money? Are we going to do it with wampum? Are we going to do it with beads? Are we going to set up printing presses in the basement of the Senate Office Building? Where do they expect us to get the funds in order to construct these vast four-lane highways on schedule and at the same time not increase the motor-fuels tax?

Mr. CLARK. I am in general accord with my good friend, the Senator from Oregon. I thought the tax bills which the Senator from Oregon introduced today demonstrated a great deal of political courage.

I can understand why the Governors do not want a Federal gasoline tax superimposed over the State gasoline taxes, which the States in turn are going to have to increase in order to take care of the State highway needs. It occurs to me that possibly one way out of the dilemma would be to have a Federal excise tax.

Mr. McNAMARA. Mr. President, will the Senator yield?

Mr. NEUBERGER. If the Senator from Pennsylvania will permit, I will ask the distinguished Senator from Michigan if there is not, at the present time, a Federal excise tax on the automobiles which are manufactured in his State?

Mr. McNAMARA. There is a Federal excise tax, but unfortunately the funds collected do not go into the roadbuilding program and do not go toward helping the program.

Mr. NEUBERGER. The taxes are paid into the general fund?

Mr. McNAMARA. The taxes are paid into the general fund. There is a great deal of confusion on this item, because some 50 percent of the revenues from the excise taxes on the trucks, trailers, and buses go into the highway fund. However, this is a very small part of the excise taxes paid by the motor industry. It is only a very small part of the total which goes into the highway fund. This is what is generaly misunderstood.

Senators have been talking about the proposed increase of 1½ cents in the Federal gasoline and fuels tax. We have held preliminary hearings in the Subcommittee on Public Roads of the Committee on Public Works. I find that not only are the Governors opposed to the increase in the tax, but there is an indication that the majority of the members of the Subcommittee on Public Roads are opposed to the increase, also. It seems to me we have little chance, because of the opposition of some 32 Governors, to increase the tax.

The Governors say that the proposed increase in the tax on fuels should be an item for consideration at the State level rather than for further preemption by the Federal Government since this is almost the last item left to the States on which to levy taxes in order to raise the State share of the road program. The State share of the cost of the program is not 10 percent over all, for in general on the secondary roads and the so-called ABC roads the State share of the cost is 50 percent. There is a tremendous problem for the States in this regard. We are going to hear more and more about this problem.

It seems to me we are going to have a very hard time in getting approval of the 1½-cent-a-gallon increase in the tax. I think we have to start looking around for other programs, such as those the Senator from Pennsylvania has suggested, in order to get the job done. It seems to me, judging from the preliminary inquiries which we have made, that there is very little chance of getting approval of an increase of 1½ cents in the tax.

Mr. NEUBERGER. I will say to the able Senator from Michigan, who has given us a very careful analysis of the problem, that I sympathize with the Governors in their desire to have the gasoline tax left under the jurisdiction of the States. But so long as those same Governors say that the Federal Government should pay for 90 percent of the most expensive part of the road program in those States I think they are on the shakiest of ground.

Mr. McNAMARA. In fairness to the Governors, it should be said that we said we would pay the 90 percent from the Federal Government's funds. We were not particularly requested by the States to do that. However, we recognized the problems of the States in regard to the road building, and we came to the conclusion that we would never get the program accomplished unless the Federal Government collected the revenue, which was largely on a "pay as you go" basis.

Mr. NEUBERGER. Have the States not asked us to keep the program on schedule?

Mr. McNAMARA. The States have asked us to keep the program on schedule. The asking to keep the program on schedule is a realistic approach, because when we undertook the program in 1956 we indicated what the schedule would be. The States are asking us to live up to our commitment, which is a very normal request.

Some of the States have had to borrow money at very high interest rates to meet the State share of the program. It is on this basis that the States are asking us to keep the program on schedule.

There is a further concern regarding the saving of lives, which has already been demonstrated to be true, by the interstate highway program. This is the basis for the request. I think the request to keep the program on schedule is a reasonable and logical one.

Mr. NEUBERGER. That is definitely true, but at the same time the States cannot deny us the source from which to put up 90 percent of this vast sum of money.

Mr. McNAMARA. The Senator is correct. The States have not said that there are not other ways to raise the money. I think if we asked the Governors about that, they would have 32 different plans for raising the money.

Mr. NEUBERGER. I want to tell the Senator from Michigan why I am opposed to expand the road building program from the general tax revenues of the United States. I think that would be too much of a bonanza for the big truckers who operate on these highways. If we paid for the program from the general income taxes and used the general revenues to expand the highway program, it would mean that the big truckers who operate over the roads with these huge behemoths would escape paying their share of the additional cost of the road program. That would be unfair.

I received a table from the Post Office Department during the discussion of the postage rates last year, and the table showed that with regard to the general income taxes a little over 60 percent, if my memory is correct, is paid by families with incomes of $4,000 a year or less.

Mr. CLARK. The figure referred to a net taxable income.

Mr. NEUBERGER. The Senator is correct. Therefore, a large part of the tax money comes from families with comparatively low incomes. I do not want to take tax funds from those families to build these roads, because I think it would be fairer that the funds should be paid by the road users.

To that extent I think the 1½-cent increase on the motor fuels tax is fair to the average motorists, to the truck operators, to the bus operators, and to the general taxpayers. The reason I cite this is I think we in the Congress are going to have to show enough courage to face up to the problem. We are going to have to tax the little fellow for his motor fuel and we are going to have to tax the big fellow who manufactures armaments and weapons and who is having a field day today with regard to profits. I think we will have to do the taxing on an across-the-board basis, through many segments of society, to live up to our responsibility in this world of crisis.

Mr. McNAMARA and Mr. JAVITS addressed the Chair.

Mr. CLARK. I thank my friend from Oregon for his valuable contribution, and I yield now to my friend the distinguished Senator from Michigan.

Mr. McNAMARA. Mr. President, the interstate program is largely a pay-as-you-go program and it is largely paid for by the motorists, including the big truckers. There is some justification for putting the general funds of the Treasury into the program, because many people in addition to the users of the highways, whether they use passenger cars or trucks, benefit from the roadbuilding program. To the degree the general public benefits from the program, perhaps we should give consideration to the fact that the general public should make a contribution to the cost.

I do not think we have gone too far in that direction. I do not think we should lose sight of the fact that the big truckers and the drivers of the passenger cars generally will pay, over the life of this program, the total cost of the program.

We are now in a little bit of a financial box, because we have a wide spread—we can call it a recession or call it whatever we want, but there is a nationwide recession which has caused the highway fund to be temporarily short. I am sure

that over the life of the program it will be a self-sustaining fund. I think any money which is taken out of the general funds of the Treasury, in excess of the proportion which the general public should pay for, will ultimately be returned.

I think in fairness to the whole program this statement should be made.

Mr. NEUBERGER. I agree with the Senator from Michigan that the whole public benefits from the road program, but if funds are taken out of the Treasury to reimburse the highway trust fund, exactly the same amount of money must come from somewhere else to supply the Treasury. Additional funds must go to the Treasury to make up that amount. That is obvious and logical.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield to my friend, the Senator from New York.

Mr. JAVITS. Mr. President, when I heard what the Senator was speaking about today I came to the Chamber. I hope the lesson which the Senator is teaching will not be lost in all the dust about—and I say this with all due respect—the highway trust fund, which is very important, for the Senator is speaking in terms of a very basic thing. The highway trust fund is not as important as the basic thing to which the Senator is addressing himself. With all due respect, the particular tax loopholes the Senator points out are not as important, either.

My only reason for asking the Senator to yield is to try to emphasize, fundamentally, what the Senator is talking about, which is very serious for our country. Fundamentally the Senator is telling us we are in grave trouble.

Mr. CLARK. The Senator is correct.

Mr. JAVITS. We must do monumental things about it. Men may argue about whether we must have this or that tax, or whether we can raise the money from the big operators, or whether it is wise to do it exclusively in that way, and so forth. But certainly one should not lose sight of what may become a partisan discussion, regardless of party, between Members on different sides of the economic fence. The basic fact is that we are in grave trouble, and we shall not be able to get out of the trouble unless we are willing to pay the bill. The bill is big, and it will last for a long time.

Mr. CLARK. The Senator is correct.

Mr. JAVITS. I like the Senator's analogy with respect to Athens and Sparta. This question has been worrying me very deeply. More and more we see indications of the seriousness of the situation. Even those who might be irritated by whatever tax program we might develop, must realize that the choice is a very grim one, and that the choice may be between slavery or extinction, and the kind of society which we know and which we love so much.

Individual Senators are not subject to as much pressure, in political terms, as Members of the other body. They do not run quite so frequently. It seems to me that if a man serves his country here for 6 years superbly well, he should not be worried about whether he is to be reelected or not. Six years is ample time in which to spell out a basic contribution to our country and our time.

I hope very much that more and more Senators will encourage a realization on the part of the people of the country of the peril in which we stand, and the fact that the bill is not going to be paid by "him and her" but by "you and me." I think this is the body in which that can be done.

Mr. CLARK. The Senator is correct. I thank him for his pertinent comments.

Mr. JAVITS. I do not have to agree with all the details, and I do not wish to become lost in details. Let as many of us as possible—and I hope before long it will be a majority—focus the attention of the country upon the fact that we are in a very grim situation, and that we shall have to pay out a great deal, over a long time, in order to be around here to see another day.

I thank my colleague.

Mr. CLARK. I thank the Senator again for his very pertinent comments.

Mr. GRUENING. Mr. President, will the Senator yield?

Mr. CLARK. I am very happy to yield to my good friend from Alaska.

Mr. GRUENING. The Senator from Pennsylvania has made a most important, most constructive speech. He has called his speech a program for this Congress; and it is—properly—not limited to a mere discussion of the budget, although that is essentially what it is.

Inherent in the discussion is the basic idea that the paramount issue depends on the fallacious and timid concept of the budget which has been advanced by the administration, and that it goes to the heart of all that ails this country and that is needed to move it forward.

Mr. CLARK. The Senator is correct.

Mr. GRUENING. The administration appears to think that the prime issue is the alleged balancing of the budget. As my good friend the Senator from Oregon [Mr. NEUBERGER] pointed out, that is a legend, a myth. The terms which he applied are very polite terms. Somewhat harsher terms could be used, in view of the fact that the administration is going before the country and charging those who will not accept the proposal for raising taxes and allegedly balancing the budget with being spenders. We are nothing of the sort. The Senator has pointed out that we have a far higher duty than that which is pointed out by the President in his budget message.

There is one field upon which I hesitate to enter, in view of the fact that I have come to the Senate so recently. I note that in the Senator's discussion of foreign relations he says, quite properly, that under the Constitution the President does not have exclusive responsibility and authority in connection with foreign policy. He pointed out that the Founding Fathers wisely placed upon the Congress a heavy responsibility. The Senator referred to some recent resolutions.

Does the able Senator from Pennsylvania not agree that, in addition to the function of the Congress in connection with foreign relations, having to do with resolutions and treaties, there should be the function of watching the tremendous expenditure for foreign aid which is asked for every year, currently to the extent of some $4 billion, and totaling to date some $70 billions in an effort to eliminate waste?

Mr. CLARK. I agree with the Senator.

Mr. GRUENING. I venture to raise the question with a great deal of humility as one so recently a Senator. Why is it that when Congress is faced with a request for a small appropriation of a few thousand dollars within the 49 States, it must go through the entire routine of the Bureau of the Budget and the Appropriations Committees, and be passed by both Houses of Congress, whereas unseen men in bureaus can dispose of $100 million or more without any check or balance in foreign countries? Would it not restore some of the authority of Congress if appropriations for expenditures abroad were subjected to the same routine and procedure as appropriations for domestic expenditures? If the State Department were required to come to Congress and justify requests for such proposals as an expenditure of $250 million for a dam in such-and-such country, whereas the administration is not willing to spend any amount of money for a high dam in the West, where such dams have proved to be so beneficial, and if the State Department had to demonstrate to the Congress that the expenditure was necessary, might it not be possible to have a far more realistic and effective and less wasteful foreign aid program?

Mr. CLARK. The Senator has touched upon a very important point, and one with which I dealt only briefly, namely, the insidious policy of secrecy, which involves keeping from not only the American people, but Members of Congress, the details of our foreign policy and of the expenditure of the taxpayers' money. I believe it is high time that a great deal of the so-called classified information should be spread upon the record. I realize that there may be reasons why the State Department does not wish Turkey to know how much we are spending in Afghanistan. But in my judgment, Turkey knows a great deal more about what we are spending in Afghanistan than does the Senator from Alaska or the Senator from Pennsylvania; yet we are the ones who are asked to appropriate the money.

I could continue in considerable detail with respect to information which has come to me under the ban of secrecy, information which I am not permitted to reveal to my constituents or my colleagues, and which, if it were revealed, would make a great many members of the administration look very silly indeed.

When we are given such information, we are told that we must not disclose it. Our lips are sealed. I believe perhaps the distinguished junior Senator from Missouri [Mr. SYMINGTON] has suffered more restively under such inhibition than have any of the rest of us. I have had occasion to discuss the subject with him from time to time.

Let me cut this colloquy short by saying to my friend from Alaska that I think he is on the right track.

Mr. GRUENING. I hope this subject will be very seriously considered by the Congress. I see no reason why $4 billion should be handled in the form of a blank check by unseen men in Government Bureaus. I think it is distinctly the function of the Congress to exercise greater control and greater scrutiny over the manner in which these mammoth expenditures are arranged and ladled out.

Mr. CLARK. I thank my friend for his contribution.

Mr. President, I yield the floor.

Mr. ALLOTT. Mr. President, the colloquy which has just taken place raises in my mind several questions which I should like to discuss at greater length at some future time. At this time I rise for another purpose.

I am very much interested to see my colleagues on the other side of the aisle take a little interest in the balancing of the budget and the financial condition of the country. I find it very heartening indeed; and I, for one, will join them in this interest.

I am not one of those who believe that the credit of the United States is a bottomless well; and the sooner we realize that it is not a bottomless well, the better off we shall be. We might have what appears to be even a fairly healthy financial situation in this country. I do not believe that such a situation exists now; and in the event of emergency we would find ourselves in a very stringent situation.

If I may be pardoned a personal reference, when I was a boy I had a big brown geography book. In that geography book, in the discussion relative to China, it was stated that one of the chief handicaps and drawbacks to the advancement of China was ancestor worship. I merely wish to say that in this day and age those of us here today will never have to worry about this country suffering from ancestor worship, when our children and grandchildren see what we have handed them.

Mr. HUMPHREY subsequently said: Mr. President, I join with other Senators today in commending the distinguished senior Senator from Pennsylvania [Mr. CLARK] on a remarkable address entitled "A Program for the 86th Congress." I truly believe the Senator from Pennsylvania has demonstrated a quality of legislative leadership that is of the highest standard and of the finest quality.

The Senator has stated that he does not set forth the program for the 86th Congress; but, as he said, in the tradition of free debate he outlines or sets forth the broad outlines of a program to lead us out of the difficulties in which the President's proposals have placed us. That is a quotation from his address.

The program is both in the field of domestic policy and foreign policy. Also, it relates to the very practical problem of how to pay for the cost of these programs.

The senior Senator from Pennsylvania has concentrated his attention in the field of taxation upon the so-called tax loopholes. These loopholes represent the inequities in the tax structure. It goes without saying that a tax structure is no better than the justice and the fairness of its provisions. I regret to say that in recent years—in fact, over the years—our tax laws have been riddled by special adjustments here and there, and special provisions which lend themselves to special privileges for selected groups and individuals. In other words, the tax structure has been filled with tax loopholes which permit the escape of needed revenue, and also make the tax structure unfair and inequitable in many of its applications.

The Senator from Pennsylvania is to be commended for his courageous and thoughtful treatment of the tax laws. I would only say to him that some years ago I outlined, here in the Senate, during one of the debates on the tax bills, a program of very much the same type—one of closing loopholes. From time to time I have heard that the Treasury Department is giving thought to this important subject. Not only do I hope that it will give thought to it; I also hope that it will lend itself to a program of action and accomplishment. Surely these loopholes should be closed. At the least, the areas in the tax laws which are open to the most serious criticism for their inequities should be remedied.

Mr. President, I feel that the proposals of the Senator from Pennsylvania [Mr. CLARK] are in the main very constructive. In fact, I can find no fault with any of his legislative proposals. They seem to me to present a program that is worthy of the 86th Congress and of any Congress in the foreseeable future.

STATEHOOD FOR HAWAII

Mr. ALLOTT. Mr. President, the indications that our colleagues in the other body will shortly take up the Hawaii statehood bill has given me the greatest pleasure I have known in some time. Now that the Senate Committee on Interior and Insular Affairs has again reported this bill, I am hopeful that we can immediately get to consideration of the measure so that it will not again become mired in the confusion generally associated with the closing days of a session. We have already waited far too long to recognize the appropriateness of Hawaiian statehood.

On July 8 of last year I requested the majority of this body to permit a vote on statehood for Hawaii. Only the week before we had granted statehood to Alaska. But we were never given that opportunity to provide equal treatment for the Territory of Hawaii.

By every criterion except geographical size, which is hardly an important factor, Hawaii is equally, if not more deserving of statehood than was Alaska. Hawaii became an organized Territory 13 years before Alaska. Hawaii's population of over 600,000 is more than three times that of Alaska. By every economic standard, the case for Hawaii is as sound as was that for Alaska.

No Territory has ever served as long an apprenticeship awaiting statehood as has Hawaii. Hawaii became an integral part of the United States in 1898, through a Treaty of Annexation. The Hawaiian Organic Act, providing for civil government, was enacted in 1900. The debate on that measure in the House led to defeat of an amendment the purpose of which was to declare the intent of Congress that Hawaii was not necessarily going to achieve statehood ultimately. Ever since that moment, 59 years ago, the people of Hawaii have been entitled to expect statehood. They have waited long enough.

Mr. President, the House has now approved statehood for Hawaii four times; during the 80th Congress, the 81st Congress, the 83d Congress. The only time the Senate has approved statehood for Hawaii was in the 83d Congress. However, on that occasion this body voted to tack Alaska statehood on to the Hawaii bill. That turned out to be a crippling amendment when the minority leader, and present Speaker of the House, objected to the unanimous consent request to send the joint Alaska-Hawaii bill to conference.

But now we are given another chance, a chance, if you will, to redeem ourselves by granting the people of Hawaii the right for their own cause to be heard on its own merits, without the issue being cluttered up with other arguments for another cause. Let us seize that opportunity with all haste.

Mr. President, I think all of us must remember the great, spontaneous wave of enthusiasm with which our action last year in granting statehood to Alaska was greeted by the American people. I cannot recall any other action of Congress which has brought such widespread approval.

One of the most thrilling moments I have ever witnessed in the U.S. Senate occurred on the night when the Senate voted approval of statehood for Alaska. The great Governor of Alaska, along with his associates, left the gallery of the Senate and walked down to the Prayer Room of the Capitol, to return thanks for the act of the Senate which had, in effect, made Alaska a State of the Union.

The action of Congress in granting statehood to Alaska meant to me, that the American people had been alert all along, to the justice of the Alaska statehood cause. There can be no doubt that this same great majority of the people feel similarly about Hawaii.

If there were no other arguments—and there are, of course, many—in support of statehood for Hawaii, the people's approval of what we did for Alaska ought to awake us to our responsibility to Hawaii. To put it conversely, this widespread and virtually unanimous approval of Alaska statehood should serve to signal us that the American people will not look kindly upon any further delay in the granting of statehood to Hawaii.

From the standpoint of our world prestige, of maintaining our position of leadership of the free world, it has now become more important than ever that we give to Hawaii this thoroughly deserved status. If we were to fail to do so, having granted that status to Alaska, we would become subject to charges of

discrimination by those who are constantly on the lookout for anti-American propaganda material. And not only by them but some of those who are disposed toward us in a more friendly manner would have their doubts about the sincerity of our doctrines.

Mr. President, by giving statehood to Hawaii we will at one and the same time refute two of the favorite charges of the Communists; one, that the islands are a colony, and the other that the United States is a nation of racists dedicated to the theory of white supremacy.

On this subject, Mr. President, I want to refer to some remarks which were made last September in San Francisco by our distinguished and very able Governor of Hawaii, William F. Quinn. Governor Quinn was speaking at a luncheon of west coast State Governors and the ambassadors of some 30 Pacific area nations which climaxed a week-long Pacific festival sponsored by the city of San Francisco.

What could be a more dramatic and effective act to counter (Soviet Communist) charges than to make Hawaii a State?—

Governor Quinn said.

How better could we woo the sympathies of aur Asian neighbors? And what a fine, splendid, and completely American act it would be.

Governor Quinn then quoted a remark which recently had been made by Dag Hammarskjold, United Nations Secretary General, who said that lack of understanding between the Western World and the nonwhite world is the greatest threat to the future peace of the world.

The greatest thing we can do toward creating better understanding is to make Hawaii a State—

Governor Quinn told his audience.

The people of Hawaii overwhelmingly want statehood. We were bitterly disappointed that we could not get congressional action in the last session.

We were overjoyed when our big sister Territory, Alaska, was voted in. I will say that we felt somewhat like the man who has plied a slot machine with coins and while he turns away to get more change someone else drops one coin in and hits the jackpot. He deserves the jackpot all right, but the first fellow was certainly working long and hard to get it.

There is only one more candidate for Governor Quinn's statehood jackpot. Hawaii is the last remaining incorporated Territory which, as such, is inherently entitled to statehood.

Mr. President, Hawaii needs and deserves statehood. And we need Hawaii as a State.

It is my fervent hope that we can demonstrate in this body that, regardless of political considerations, we are united in the support of the principles which made our country what it is today—the most basic of which is the right of a mature, organized segment of our population to equal representation in these Halls. Hawaii can provide us with a point of view sharpened by proximity to our Asian neighbors. Hawaiians know and understand, and many are even descendants of, that portion of our world which is fathomless to many of us. The sooner Hawaiians can be with us, as duly elected, voting representatives of a great State, the better off we all will be.

Mr. President, I request unanimous consent to have printed at this point in the RECORD the definitive remarks of Secretary of Interior Fred Seaton on Hawaiian statehood before our committee on February 25.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT ON HAWAIIAN STATEHOOD BY SECRETARY OF THE INTERIOR FRED A. SEATON, BEFORE THE SUBCOMMITTEE ON TERRITORIES AND INSULAR POSSESSIONS OF THE SENATE INTERIOR AND INSULAR AFFAIRS COMMITTEE, FEBRUARY 25, 1959

Mr. Chairman, members of the committee, permit me to begin my testimony by expressing my thanks to this committee for permitting me to appear before you. Your chairman has asked that these hearings be limited to the presentation of new information pertaining to the admission of Hawaii into the Union as a State and I am so limiting myself this morning.

As you know, my statement in support of immediate statehood for Hawaii was presented to the 85th Congress on April 2, 1957, when former Under Secretary Hatfield Chilson appeared before you in my behalf while I was a hospital patient.

There can be no possible question concerning the position of the administration on Hawaii statehood. Since this Congress convened, the President has on several occasions urged the Congress to admit Hawaii into the Union as a State. You are dealing this year not with an enabling act but with an admission act. We of the executive branch wholeheartedly concur in this approach and recommend that the bill before you be dealt with as expeditiously as possible.

Mr. Chairman, my 1957 statement discussed briefly some of the history of Hawaii—particularly as it applied to the various efforts of Hawaiians to become more closely identified with the United States. It is, I believe, particularly important that these aspects of the Hawaiian cause be kept closely in mind when deliberating upon the current petition of Hawaii for full and equal membership in our Union of States.

The record is clear. For over 100 years peoples of Hawaii have been dedicated to the goal of complete union with our mainland. The accomplishment of their goal became inevitable with the annexation of Hawaii in 1898 as an integral part of the United States. To me, there can be no question properly raised as to whether Hawaii should become a State. The question is simply when shall Hawaii become a State?

As a personal observation, I believe that the language we all use in referring to the admission of Hawaii into the Union is not technically correct. Hawaii is as much a part of this Union today as any State. As an incorporated Territory, and the only one we have left, Hawaiians are subject to all of the obligations imposed upon any citizen in any State by the Federal Government. The problem arises because they are denied some of the most precious prerogatives of free men, among them equal representation and the right to vote in national elections.

The record is also clear on another aspect of the subject before you. Since the incorporation of Hawaii into the Union, Hawaiians have developed their islands at a rapid pace. Any part of the Hawaiian economy, culture, philosophy, or political institutions that is examined today will be found to be a duplicate of or modeled after the way of life in vogue in the continental United States. Hawaii is the picture window of the Pacific through which the peoples of the East look into our American front room.

This will be particularly important in our future dealings with the peoples of Asia, because a large percentage of the population of Hawaii is of Oriental or Polynesian racial extraction. The participation of the people of Hawaii in the full measure of the benefits of American citizenship will bring a fresh, new, informed outlook to our councils. More significantly, the peoples of those eastern lands washed by the waters of the Pacific will look through that front window of ours and take renewed notice that we do, indeed, practice what we preach. There can be no finer way to demonstrate the dynamic nature of our Union and the everlasting validity of the principles upon which our Republic was founded than by the admission of Hawaii as a State in this session of Congress.

While I have mentioned the racial background of some Hawaiians, let me hasten to point out that it would be both unfair and inaccurate to conclude that the objectives of Hawaiian people are in any way foreign to those of any other American group. No conclusion could be further from the truth. The overwhelming majority of Hawaiians are native-born Americans—they know no other loyalty and acclaim their American citizenship as proudly as you and I.

Their economy is self-sustaining—Hawaii is adequately prepared, financially, for the burdens of statehood. More than a million tons of sugar, worth nearly $150 million are produced annually, from over 200,000 acres of cane. Capital investment in this industry amounts to nearly $200 million, of which about $50 million is in irrigation facilities alone. In sugar production techniques and per-acre production, Hawaii leads the world, and its hourly rated employees receive the world's highest year-round agricultural wages.

Hawaii also produces 85 percent of the total U.S. supply of canned pineapple products; which is to say 65 percent of the world's production. Pineapple production utilizes about 75,000 acres of intensely cultivated land, and provides employment for over 22,000 people annually. The annual value of the output, estimated at about $115 million, gives pineapples second rank to sugar.

Although other specialty crops for export may be considered as minor in comparison to those already named, they add annually about $10 million to Hawaii's gross income.

Aside from agriculture and the processing of farm products, a second major source of income for the people of Hawaii is the tourist trade. In 1922, the total number of visitors was less than 10,000. As late as 1941, the peak prewar year, it was only 32,000. In my statement presented to you in 1957, we pointed out that 133,000 tourists visited Hawaii in 1956. We now can tell you that in 1957 it had reached a total of 169,000, more than five times the number of 16 years before. That 169,000, incidentally, represents the number of persons staying 2 days or more. They spent nearly $80 million in Hawaii in that year, and thus put tourism next to sugar and pineapples as a source of income from private industry.

Most of Hawaii's economic possibilities are already well-developed, and the Territory is already a tax-paying partner, carrying a full share of the burden of supporting the Federal Government. Federal internal revenue collections in Hawaii last year amounted to $166,306,000, a figure higher than in 10 of the present States: New Hampshire, Vermont, North Dakota, South Dakota, Montana, Idaho, Wyoming, New Mexico, Nevada, and Alaska.

The geographical area of Hawaii is comparatively small (6,423 square miles), although not so small as three of our present States—Rhode Island, Delaware, and Connecticut. The Territory is thickly settled, comparatively, with a population estimated in June 1958, at about 635,000—larger than

that of six of the present States: New Hampshire, with 584,000; Delaware, 454,000; Vermont, 372,000; Wyoming, 320,000; Nevada, 267,000; and Alaska, approximately 214,000.

In fact, Hawaii today has a greater population than that enjoyed at the time of admittance by any of the States—other than the original 13—with the single exception of Oklahoma.

It is with some difficulty that I proceed with the balance of my statement. When testimony is limited to new material, it is extremely difficult to approach the subject of what can, today, be stated as an argument against statehood for Hawaii. So far as I am aware, there are no new arguments against Hawaii. There are none which were not thoroughly discussed in this committee in 1957, and thoroughly considered by the full Senate when the Hawaii bill was passed in 1954. With the exception of one subject, I would venture to state that every argument that is currently raised against Hawaii was in fact raised during the debates which lead to the incorporation of Hawaii into our Union as an organized Territory in 1900. Many of these same arguments were made in opposition to the admission of Louisiana in 1812, which, as the members of this committee well recall, was the first State to be admitted from territory outside of that embraced by the Original Thirteen States.

One argument against Hawaiian statehood, that of Communist infiltration, seems to demand explanation here today. Historically, even this is not a completely new subject in debate and consideration of statehood, because the question of loyalty to the United States has, indeed, been raised in regard to other States prior to their admission. Debate in the Congress as to the extent of French influence in Louisiana and that of the Spanish-speaking people of New Mexico are significant examples. The Communist question, of course, presents a new ramification of the subject of loyalty not presented in the past, and that is whether any substantial segment of Hawaii actually is committed to a doctrine which advocates the violent overthrow of the very Government in which the overwhelming majority of Hawaiians seek to permanently become a full partner.

For myself, I believe that this committee and all advocates of Hawaiian statehood will squarely face the Communist issue.

The people of Hawaii have time and time again rejected completely the Communist philosophy and have thwarted every attempt of the Communists to influence their government.

The proposed constitution of the State of Hawaii contains a far-reaching prohibition against any Communist holding public office or public employment of any kind.

A perennial target of alleged Communists in Hawaii has been the law enacted by the 1949 territorial legislature following a prolonged dock strike, which empowered the Territorial government to seize Hawaiian docks in the event of a strike. Notwithstanding four general territorialwide elections for the legislature, those laws are still on the books in Hawaii today. In each election the laws were an issue, and in each legislative session attempts have been made to repeal them. This is a prime example of the dogged determination of Hawaiians to stand firm on what they consider to be a matter of principle.

This committee needs no exposition of the rebuttals to the argument based on noncontiguity, upon the loyalty of Hawaiians, or upon the subject of whether approximately 635,000 people deserve equal representation. Normally, this last argument is directed at whether 635,000 people deserve to have two Senators when New York's almost 16 million, California's 13 million, and Pennsylvania's 11 million people have but two Senators. A succinct answer to the last argument can be presented by any student aware of the wise compromises agreed to in the Constitutional Convention by our Founding Fathers.

It helps, I believe, to keep the Hawaiian statehood movement in the proper perspective. In my opinion, statehood for Hawaii will bring as much good to the other 49 States as it will to Hawaii itself. The admission of any fully qualified partner does strengthen the whole Union. As every one of the 36 States, which have been admitted since the Original Thirteen, entered, the Union has become more vibrant and has enjoyed at the very least a great moral uplifting.

We teach our children in our homes, churches and schools to think in terms of fair dealing, and in terms of devotion to the principles of our Declaration of Independence and our Constitution. Hawaiians are teaching their children the same thing, but what will all this come to mean to these Hawaiian children if they witness again and again the denial of their petition for equal rights and privileges?

Gentlemen, in my opinion the major question before you is a question of when to take action. It is a moral question and one which raises serious implications throughout the world. It is my firm hope that the Hawaiian cause, which really involves a plea for simple justice, will be answered forthwith with the only remedy available—that which is granted by the Constitution to the Congress exclusively: the power to admit new States into the Union.

We have no other Territory which is incorporated and ready for statehood, and Congress itself must first grant to any other Territory the basic status of incorporation into the Union before any new apprenticeship can begin.

As you continue your deliberations, please feel free to call upon me or the personnel of the Department of the Interior for any information or assistance you may desire. We stand ready to assist in any way to bring about the immediate admission of Hawaii as a State.

Mr. ALLOTT. Mr. President, I also ask to have printed in the RECORD a joint memorial of the Legislature of Colorado relating to the proposed admission of Hawaii as a State.

There being no objection, the memorial was ordered to be printed in the RECORD, as follows:

SENATE JOINT MEMORIAL 2

Joint memorial memorializing the Congress of the United States to grant statehood to the Territory of Hawaii

Whereas the people of the Territory of Hawaii have shown through the processes of democracy that they wish to join the Union, sharing both the responsibilities and the privileges of being one of the United States of America; and

Whereas Hawaii has served the United States as an extended frontier for the development of peaceful pursuits, as well as wartime bulwarks; and

Whereas it is in the best interest of our national defense to bring the people and resources of this outlying territory under the American flag in full partnership; and

Whereas the people of Hawaii, many of whom migrated there from 1 of the 49 States, have demonstrated their fundamental belief in peace, democracy and good citizenship under God: Now, therefore, be it

Resolved by the Senate of the 42d General Assembly of the State of Colorado (the House of Representatives concurring herein), That we, the members of the General Assembly of the State of Colorado, which was the 38th State to be admitted to the Union after serving her country, ably as a territory for many years, do hereby memorialize the Congress of the United States to enact legislation necessary to admit Hawaii into the Union as a sister State; and be it further

Resolved, That copies of this memorial be transmitted to the President of the United States, to each Member in the Congress from Colorado, and to the Governor of the Territory of Hawaii.

ROBERT L. KNOUS,
President of the senate.
LUCILE L. SHUSTER,
Secretary of the senate,
CHARLES R. CONKLIN,
Speaker of the house of representatives.
ROBERT S. EBERHARDT,
Chief clerk of the house of representatives.

DISTRIBUTION OF ELECTRIC POWER IN THE MISSOURI BASIN

Mr. CURTIS. Mr. President, I desire to address myself for a few moments to a matter in which I have long been interested and which is of vital concern to the future economic development of Nebraska. I refer to the distribution of the electric power generated by the great dams constructed by the Corps of Engineers on the Missouri River. The problem is referred to locally as the distribution of Missouri Basin power.

My interest in the development of the Missouri River Basin goes back a long way. I authored the resolution in the House of Representatives that brought forth the Pick plan of the Army Engineers for the Missouri River Basin. I served on the flood control committee that wrote the authorizing legislation. The bill went to the Senate, and by that time the plan of the Bureau of Reclamation known as the Sloan plan was presented to Congress. The Senate added the Sloan plan to the Pick plan. The bill went to conference and I served as a conferee on the part of the House. In the conference, the Senate version, combining the two plans, was approved. The power preference clause was approved in the conference. Later, the conference report was approved by both the Senate and the House, and the Missouri River Basin plan, sometimes known as the Pick-Sloan plan, came into being as part of the Flood Control Act of 1944.

The Missouri Drainage Basin includes parts of the States of Montana, Wyoming, Colorado, North Dakota, South Dakota, Minnesota, Iowa, Kansas, Missouri, and Nebraska. Nebraska is the only one of these States which lies wholly within the basin. All of the other States lie partially, and some of them almost wholly, outside the basin.

From these facts it would seem that Nebraska, as the heart of the basin, was entitled to the utmost consideration in the distribution of any benefits which arise from these great projects.

Nebraska is unique in another particular. It is the only all-public power State in the Union. Many years ago all of the private utilities in Nebraska were sold to public agencies of the State of Nebraska, which are denominated as public power districts and political subdivisions of the State, and which for many years have produced, transmitted, and distributed all of the electric power in Nebraska.

It is obvious, therefore, that Nebraska and all of its electric loads are preference customers within the conception of the distribution of federally generated power to preference customers. One would assume, therefore, that Nebraska was entitled to an equal pro rata share of all of the power generated in the basin, along with and in equal proportions to the preference customers within the other States in the basin.

I am, therefore, Mr. President, much disturbed by a revised tabulation of the Department of the Interior's proposal for the distribution of this power, which was issued by the Department on February 20, 1959, because that tabulation shows that, whereas, most of the other preference customers within the basin are receiving somewhere from 60 percent to 83 percent of their total power requirements from these Federal facilities, Nebraska, the only State wholly within the basin, the only completely public power State in the Union, is only receiving 22 percent of its requirements.

This tabulation shows that the total estimated load of the preference customers within the basin is 2,122,695 kilowatts, and that of that amount Nebraska's estimated load is 920,715 kilowatts, or nearly 50 percent of the total electrical requirements of the basin States. I am completely at a loss, therefore, to understand why Nebraska's share of this allocation is only 22 percent of its requirements.

I understand that in the first instance in the allocation of this power the Interior Department gave weight to the theory that it would deduct from the equal pro rata share of each of these preference customers whatever generating capacity the customer had which was usable. This, obviously, would work a very serious injury to Nebraska, and I think is unfair.

For many years, Nebraska has provided its own generating equipment. It has issued, through its various public agencies, nearly $210 million of revenue bonds to provide great generating stations, hundreds of miles of high-voltage transmission lines, and still other hundreds of miles of secondary distribution, to serve more than 300 cities and towns within the State.

There is some misunderstanding in certain quarters as to the nature of Nebraska's public power system. It is not Federal power. The cost of acquiring these power systems has been borne by Nebraskans. The money secured for this purpose was almost totally private money. Revenue bonds, totaling $210 million, were issued by Nebraskans to obtain this private money. Bonds were issued to the Federal Government for PWA loans totaling $43 million and those bonds are now held by the GSA, but they constitute but a small portion of the total. These figures that I have cited do not include the municipal power systems and distribution systems owned by hundreds of our cities and towns. I have also excluded REA from this tabulation because that is a nationwide program that serves all of the States alike.

Should Nebraska be penalized because its people have assumed their own burdens, carried their own loads and made these tremendous investments? And is it fair that other areas which have not invested any of their own money, which have not made any attempt to carry their own responsibilities, are now to be favored by a greater allocation of power than a State which has endeavored to care for its own needs? It seems to me such a plan is obviously unfair; that, if anything, the State or community which has provided its own capacity and invested its own money should be actually favored as against those who have done nothing.

I understand that plan has now been abandoned by the Interior Department, but that the present allocation is based upon a percentage of requests for power that was made to the Bureau of Reclamation. Mr. President, this plan is equally unfair.

Because Nebraska has been an all-public power State, there have been constant misgivings by some of its neighboring States that, due to its highly preferential position, Nebraska would receive more than its fair share of this power. For that reason, our Governors through the last several years and the managers of our public power agencies have repeatedly assured their sister States that Nebraska would never ask for more than it actually needed and would make no attempt to take advantage of its highly preferential position. The result is that, although Nebraska had an estimated electric load of 920,715 kilowatts, the State only asked for an allocation of 267,019 kilowatts. This was based upon the utilization of much of the equipment which the State has bought and paid for and was done in an attempt to be more than fair with the other States in the basin.

On the contrary, we now find that many other preferred customers within the basin have made application for their total power supply and in some cases have actually applied for more power than their own estimates show will be usable in 1963. It is obvious, therefore, that when the Department undertakes to apportion power on the requests for allocations which it has, that it is still doing a very grave injustice to Nebraska. According to the theory now adopted, if Nebraska had asked for three times as much as it did ask for, it would receive an allocation somewhere in proportion to that received by other States. We are paying, therefore, a very high penalty for our integrity and fairness in not asking for our total requirements.

Again, let me point out that Nebraska, through the Rural Electrification Administration and through financing of its own, has constructed, or is in the process of constructing, two major transmission lines to its nearest source of power at Fort Randall; whereas, other States have invested no money whatever in transmission lines. On the contrary, the Department has built hundreds of miles of basic transmission system for the distribution of power to neighboring States, so that here again, Nebraska is being penalized for having the prudence and foresight to make its own investments with its own money to meet its own needs.

It is said that Nebraska is receiving more power than I have herein indicated because it is getting approximately 100,000 kilowatts of so-called summer firm power. This is power which would otherwise go to waste during the flood seasons of the summer, and even that power is to be withdrawable from Nebraska in 1966 for the purpose of providing pumping energy to pump water onto irrigated areas in the States to the north of Nebraska.

For all these reasons, therefore, Mr. President, I deem the present allocations to be completely unfair and inequitable to the only State in the basin which has stood on its own feet, financed its own needs, and, therefore, contributed millions of dollars to a firm supply of energy in its area in the basin. I can see no reason why municipal plants in Minnesota, which already have firm contracts for power supplies from other sources, should now receive 83 percent of their total requirements from the Federal Government, with no expense for transmission lines or anything else, when Nebraska, which has provided itself with adequate generation and transmission facilities, should be given only this relatively insignificant portion of its needs.

I shall insist that the Bureau of Reclamation, charged with the responsibility of making these allocations, consider the equities I have pointed out herein, and give to Nebraska its fair pro rata share, based on its total needs, of the power generated by Federal dams in the Missouri Basin.

INCREASED RADIOACTIVITY IN FOODSTUFFS

Mr. CHURCH. Mr. President, last Monday I outlined to the Senate a proposal which I made in letter form on February 25 to the Acting Secretary of State, concerning the negotiations being conducted at Geneva.

In order to keep the RECORD complete, I wish to lay before the Senate the reply which I yesterday received from the Acting Secretary to my letter of February 25.

In this letter to me, Secretary Herter said that the Department of State now has my suggestion under study.

This is a critical matter. Today the Atomic Energy Commission's quarterly strontium report details the results of a new study of radioactivity in foodstuffs, showing that levels have reached new highs in a variety of edibles collected from different parts of the world. Today there was a disclosure that the strontium 90 level in Minnesota wheat has risen as high as the maximum permissible concentration, and North Dakota milk has a strontium 90 contamination level as high as 40 percent of the recommended maximum.

This contamination comes from radioactive fallout originating from atmospheric nuclear explosions.

These things, Mr. President, emphasize the critical importance of this matter. I am glad that my proposal is being studied at the State Department, for, as I have said, the cessation of nuclear test-

ing under a trustworthy inspection and control system is the urgent hope of a distraught world. It is imperative that we have such a system functioning under international authority, not only to prevent further pollution of the atmosphere by the present nuclear powers, but by other nations whose developing technologies already have brought them to the edge of testing which will multiply this poisoning manyfold.

Mr. President, I ask unanimous consent to have printed in the body of the RECORD the text of Secretary Herter's letter of March 4 and also an article entitled "Fallout Sets New Highs in Foodstuffs," published in the Washington Post and Times Herald, of today, March 5, 1959.

There being no objection, the letter and article were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, March 4, 1959.

The Honorable FRANK CHURCH,
U.S. Senate.

DEAR SENATOR CHURCH: Thank you for your thoughtful letter of February 25, 1959, about the Geneva nuclear test negotiations. The support you express for the U.S. position in Geneva is gratifying. We continue to feel, as you do, that we must press the Soviet Union on the control issues you outlined so that we may if at all possible achieve a suspension of all types of nuclear tests under a trustworthy system of international control and inspection.

The Department of State has been giving active consideration to what might be done should it prove, despite all of our efforts, that the Soviet Union will not accept the controls necessary to monitor a complete suspension of nuclear tests. The suggestion you have made, among others, is under study; you will appreciate that many technical factors must be assessed before a final decision can be reached.

In view of your interest in this problem I have asked Mr. Philip J. Farley and members of the Department's disarmament staff to keep you advised of the progress of our consideration of the matter you have raised.

With warmest regards.

Most sincerely,

CHRISTIAN A. HERTER,
Acting Secretary.

[From the Washington Post and Times Herald, Mar. 5, 1959]

FALLOUT SETS NEW HIGHS IN FOODSTUFFS—WEST GERMAN DATA REPORTS BIG RISE FOR STRONTIUM 90

A new study of radioactivity in foodstuffs shows that levels have reached new highs in a variety of edibles collected from different parts of the world. In some cases, the levels of strontium 90 have exceeded the maximum permissible concentration recommended by the U.S. and International Committees on Radiation Protection.

The study, made by the West German Institute for Milk Research, was published in the quarterly strontium report of the U.S. Atomic Energy Commission. This report also showed that strontium 90 has been accumulating in the soil at an increasingly rapid rate.

It came on the heels of the recent disclosure that the strontium 90 in Minnesota wheat has risen as high as the maximum permissible concentration and has gone 50 percent higher in one sample. There also have been reports that the milk in North Dakota has reached levels as high as 40 percent of the recommended maximum.

The maximum permissible concentration of strontium 90 in foodstuffs has been set at 80 micromicrocuries per kilogram. A kilogram is equal to 2.2 pounds. A micromicrocurie of radioactive material is the amount which undergoes 2.2 disintegrations per minute.

ECONOMIC STAGNATION

Mr. MORSE. Mr. President, I was attending a meeting of the Subcommittee on Latin American Affairs of the Committee on Foreign Relations this afternoon when the present Presiding Officer of the Senate, the Senator from Pennsylvania [Mr. CLARK], delivered his brilliant speech entitled "A Program for the 86th Congress." I should have liked to have been here to participate in the discussion which took place on the floor following the speech. I wish to associate myself with the underlying thesis of the speech, and to make a comment or two about it.

Next week I intend to make a speech in the Senate on the failure of the leadership of the Eisenhower administration in respect to the economic welfare of our country. In the course of that speech, I shall present data which will support my allegation that the United States is confronted with economic stagnation; that since 1953 the United States has the dubious distinction of being a nation in which the real economic output per person has remained practically at a standstill; that the United States has the distinction of being the only modern nation in which per capita real income has not kept up with population since 1953. I mention these items because I think they show the need for the kind of foresight and statesmanship which the Senator from Pennsylvania demonstrated in his very able speech this afternoon.

The PRESIDING OFFICER (Mr. CLARK in the chair). The Chair thanks the Senator from Oregon.

Mr. MORSE. But I desire to make a comment concerning that part of the Senator's speech on page 5 which deals with foreign relations. I say this in the presence of the Senator from Minnesota [Mr. HUMPHREY], who is chairman of the Subcommittee on Disarmament of the Committee on Foreign Relations.

In his speech, the Senator from Pennsylvania emphasized a point which time and time again in recent years I have tried to drive home to the Senate and to the country. The Senator from Pennsylvania said:

> The conduct of foreign affairs is of such momentous importance to this Nation, and to every person in it, that it should be the subject of political discussion and debate as much as any other aspect of our public life.

Time and again, I have spoken out against the hush-hush policy in regard to the problem of foreign policy which has prevailed too long in the Senate. It has almost become a subject of political taboo on both sides of the aisle. It happens to be the one subject which, in the long run, will determine the destiny and the very survival of the Nation.

The Senator from Pennsylvania continues:

> Under our Constitution, the President does not have the exclusive responsibility and authority for our foreign policy.

How important it is that we get that point of view across to the American people. There will be a meeting of editors in Washington within a few days. I hope someone will get that idea across to the editors, because for years in this country the editors have demonstrated that they are laboring under the misapprehension that the Executive operates a kind of police state control in the field of foreign policy; that there is some kind of dictatorship in the field of foreign policy; that under the Constitution of the United States the authority to formulate foreign policy is given exclusively to the President of the United States. Time and time again, I have tried to point out that that is not so.

What has happened, to be brutally frank about it, is that Congress has not fulfilled its responsibilities, under the Constitution, in the field of foreign policy.

The Senator from Pennsylvania went on to say:

> While day to day conduct of foreign affairs is necessarily in the hands of the Executive, our Founding Fathers wisely placed on the Congress a heavy responsibility and authority in this field, and throughout our history the Congress has played its proper part in exercising that responsibility and authority most recently in the Formosa and Middle East resolutions.

Of course I disagree with the emphasis of the Senator from Pennsylvania. In my judgment, we should not have delegated congressional authority as we did in the Formosa and the Middle East resolutions. But at least the Senator from Pennsylvania is correct—that in the debate on those two resolutions, we recognized the responsibility of the Congress. I happen to be of the opinion that we came to the wrong action; but at least the Congress acted under its constitutional responsibility.

The Senator from Pennsylvania also said:

> We should be ready to support the President when imminent danger threatens, but we would be derelict in our duties if we failed to participate in the formulation of foreign policy and in following closely the moves of the Executive in carrying it out.

In my opinion, we cannot emphasize that too much.

I wish to say to the Senate and to the country that it is of the utmost importance that in this period of crisis, the Congress stop the trend in America of letting the President and the Secretary of State act in secrecy in regard to American foreign policy. It does not matter whether the President concerned is this President or any other President; if ever there was a time when we should have full public disclosure of the problems involved in American foreign policy, it is now; and I do not intend to be silenced by any of the editorial and newspaper publicity or propaganda from any source to the effect that one must not speak about foreign policy matters but must leave them to the President and the Secretary of State. I speak respectfully when I say that I can think of nothing more dangerous to the future of our democratic procedure.

As the Senator from Minnesota [Mr. HUMPHREY] knows, the other day I attended a meeting of his Subcommittee on Disarmament; at that meeting a presentation was made in regard to some of our disarmament problems. Some of the top officials of the Military Establishment participated in that presentation.

The meeting disturbed me very much; and I believe it is within the bounds of propriety to say that after listening to those military officials, I expressed my concern about the survival of my country in the decades ahead if the attitude and the philosophy which I heard expressed by the American military leaders present at that meeting were to prevail.

Certainly those at the Pentagon Building should be compelled to attend a quick refresher course on the economic history of the world; attendance at that course should be compulsory in the case of the Joint Chiefs of Staff and the other top military officials of this Government, because at that meeting of the Disarmament Subcommittee, headed by the Senator from Minnesota, at which those military witnesses testified, I failed to see any evidence to give me any confidence that they understood the serious plight in which all mankind finds itself.

Of course, it is very easy to wave the flag and it is very easy for one to wrap the flag about himself and to talk about what our country will do in terms of military action. Certainly I will vote for what is necessary for the defense of my country, so as to make perfectly clear to Khrushchev and the entire Russian Communist gang that they have everything to lose and nothing to gain by an aggressive course of action.

But there is no hope for peace in the world, in terms of the long pull, if we follow the philosophy of the American military, as I heard it expressed at the meeting of the subcommittee headed by the Senator from Minnesota, because I think those officials are blind to the lessons of history. As they spoke, they showed no evidence that they appreciate the fact that we cannot continue in this mad nuclear armaments race and have America survive.

As the Senator from Minnesota will recall, I asked them what they had to say to the committee about the danger to the health of both the people of our country and mankind generally from the fallout presently coming from nuclear tests.

One of them replied, "the scientists are in disagreement about the effect."

My reply was, "Does that mean that I am to conclude that because the scientists are in disagreement as to the danger of the fallout, there is no danger?"

As the Senator from Minnesota knows, I said I thought his subcommittee has a great responsibility—and he agreed—in the course of its disarmament studies, to analyze the latest data available in regard to the threat of the nuclear fallout to the health not only of the American people but of people everywhere in the world.

Mr. President, when one goes to Asia and Africa, one of the arguments he meets is in regard to the course of action the United States of America is following, along with Russia, in threatening the health of millions of people in the areas where the nuclear tests are taking place. That is why I said that, in my judgment, when we consider this matter from the standpoint of moral principles, we as a nation do not today meet the tests of morality.

The American people do not like to hear that said; but someone must say it. Neither does Russia meet the tests of morality. It is the old story that two wrongs do not make a right. We cannot justify the following of an immoral course of action just because someone else is following one.

Mr. President, I say that today my country is acting immorally in regard to the matter of nuclear tests, because I think there is enough evidence to demonstrate clearly that the tests we are now making are endangering the health of people in some parts of our own country; and, furthermore, the Japanese people will tell us—as they told me when I was in Japan—that they deeply resent what they consider to be the increasing danger to the health of the Japanese people as a result of the Pacific nuclear tests conducted by the United States and as a result of the Siberian tests conducted by Russia.

Mr. President, let no one mistake my meaning: I am putting blame on both Russia and the United States, in this field of nuclear tests; and I am charging both of them with violating standards of international morality in connection with nuclear tests.

In that connection, we had only to listen to the speech made the other day by the Senator from Idaho, who referred to the matter again today, in the course of a speech he made in support of an attempt to work out some stopgap program which will bring these tests to an end.

Mr. President, today I am pleading for a recognition on the part of the officials of my Government—before it is too late—that we are going to be judged adversely in the pages of history for the course of action we are following in our time as we continue these nuclear tests.

And we are going to be condemned, in the pages of history, for continuing the tests when the evidence was clear that a continuation of them endangered the health of many, many people.

But, Mr. President, I move beyond that, because it seems to me, if both the Soviet Union and the United States continue their present nuclear weapons policies, the inevitable result will be, sooner or later, someone will pull the trigger.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. MORSE. Let me finish this thought. As Nehru said in the debate, in which I participated, in New Delhi, India, in December 1957, one of these nuclear weapons may go off, either by accident or in disobedience of orders; but, once one goes off, there will be no time to determine why it went off. The holocaust will be on. And it is about the awful consequences of that holocaust that I want to speak for a moment, after I yield to the Senator from Minnesota.

Mr. HUMPHREY. I thank the Senator for his courtesy. My only purpose in rising is to note, since the Senator from Oregon has referred to the Subcommittee on Disarmament and the meetings we recently held, that, first of all, as much of the testimony as we could possibly get cleared has been released to the public—the testimony of military officers, as well as of scientists.

I am sure the Senator knows I had a rather difficult time getting some of this material released. It was only after direct insistence again and again that some of the material was cleared. I should like to point out that some of the original censorship of material was so ludicrous that, when we insisted that the material be released, since it in no way affected any matter of confidence or security, reexamination revealed that the original censorship made no sense whatsoever.

Furthermore, the Senate should be informed that the staff of the Subcommittee on Disarmament—a very limited staff, as the Senator knows, in terms of numbers, but competent in its ability—is attempting to make as much of a survey as possible of radioactive fallout.

This responsibility has been in the past more or less shouldered by the Joint Committee on Atomic Energy, which has technicians attached to it who have a very good understanding of the technical matters involved.

Also, I think it ought to be noted that in the past 3 or 4 weeks very, very disturbing evidence has come from scientists as to an increase in the amount of strontium 90 that is to be found in the soil in my own State of Minnesota. Out of a number of samples of wheat in that area, one of the samples revealed a dosage or degree of strontium 90 that was far above the normal or far above the safe levels.

There is information yet to come. Some of our most respected doctors and scientists in the area, a group headed by Dr. Maurice Visscher, had made a report to our Government, which report has been made available to the U.S. Atomic Energy Commission and to the U.S. Public Health Service, that is anything but comforting, and, in fact, I would say is rather disturbing.

What disturbs this Senator far more than anything else is the fact that the Atomic Energy Commission has been unwilling to recognize the potential dangers involved in this matter. Some of the scientists or some of those who are responsible in the area of atomic energy have not given proper credence to some of the assertions which have been made by those who are deeply concerned by the degree of radioactive fallout.

I make one other prediction. There will be more of radioactive fallout, because there is a great deal of difference in atomic explosions or thermonuclear explosions in the area of the equator, which explosions result in radioactive fallout coming over a long period of time, in very small amounts, as compared with explosions in what we call the northern areas, or in the sub-Arctic areas, in which radioactive fallout results very rapidly, in very large amounts.

What we are getting right now, this month, is a considerable amount of radioactive debris of the tests of last

spring and last fall. There is yet more to come.

The Senator from Oregon is correct in his statement as to the dangers involved in this matter. I am not a scientist, and I do not say the dangers are beyond human endurance or that the dangers will adversely affect personal health; but I know there is deep concern on the part of some. As such, it appears to me that a government which is based on Judaic-Christian principles ought to express a concern that goes far beyond what we have heard or seen.

I thank the Senator from Oregon for what he has said. I assure him that no effort will be spared by the chairman of the Subcommittee on Disarmament to see that this matter is looked into meticulously and objectively—and I repeat "objectively."

Mr. MORSE. Mr. President, I am making this statement today, among other reasons, for the reason that I see the Senator from Minnesota present on the floor, and I wanted to give him the backing to which I think he is entitled, because his has been one of the few voices in the last 2 or 3 years raised in a courageous cry of warning to the American people about the matter of nuclear testing.

I have stood with him before. The work he is doing impressed me greatly the other day, when I attended his committee meeting. I supported him there, and I am making these statements today in support of the moral principle the Senator from Minnesota has been defending for some time.

Before going to the next point in the observations which I desire to make, let me repeat, from a little different angle, what I consider to be the right of the populations of other nations, not involved in the manufacture of nuclear weapons, to say to Russia and the United States and our allies, "We are going to judge you, so far as your intentions of peace are concerned, to the extent that you proceed to conform to moral principles in the field of international relations." We are not conforming to obvious principles of morality when we continue a course of atomic weapon manufacturing and testing, any one of which weapons, as Nehru pointed out in the historic debate to which I referred, once discharged, will start a holocaust which will produce the inevitable result I now want to mention.

It was interesting the other day to listen to the military officials of our Government say before the Humphrey committee, "But the scientists are in disagreement as to what the present danger of fallout is." To which I said, as I have stated, "Does that mean, General, that because the scientists are in disagreement, there is no danger?"

It was at that point I said to the Senator from Minnesota, referring to what he has said the committee is going to do. "I think you owe it to the Senate to see to it that an exhaustive study is made by the Disarmament Subcommittee in regard to the dangers of this fallout."

Mr. President, I know of no disagreement among the scientists, as to the possibility of danger and this is the important point to keep in mind. I would have the American people keep it in mind, as we hear more and more open advocacy in this country of a preventive war philosophy. I never thought I would live so long as to read, openly stated in the American press and periodicals, suggestions which almost reach the point of proposals and recommendations that we notify the world we may involve ourselves in a preventive war and that perhaps we should serve notice that we may make a strike before an act of aggression in fact is committed against us.

We cannot reconcile that with our historic record. We cannot reconcile it, if we want to talk with Asians and Africans, with our professions that we seek peace. I think the talk in this country about a preventive war, or proposals about a strike or giving warning that we may make a strike, is going to cost us dearly in world prestige if we do not stop.

The President in his last press conference the other day scotched the idea, and I commend him for it, but we have to go beyond that, because it is recognized that if a nuclear war starts and Russia and the United States let loose on this world the nuclear weapons ready for discharge, it not only will do irreparable damage to life, human, and animal, in all those parts of the world where the radiation will reach life, and it not only will do irreparable damage in the immediate present, but it will continue to damage life for several thousand years.

It will not end life, of course. There will be life remaining. However, in those areas of the world—and they will be large parts of the world—the radiation, I understand, will continue to damage life for several thousand years.

Senators can see why I am talking about a matter of morality. Senators can see why I am suggesting that we had better take a look at the future, for centuries to come. We must stop a course of warlike action, and so must Russia, since that course of action threatens such damage to the sanctity of life.

It is easy to say that, but a fair question is, Then what should we do about implementation? Of course, if there is no hope for reason, then all is lost, anyway. But I am not ready, Mr. President, to take the position that reason cannot prevail, even with Communists. That is why I think we should keep ourselves strong and make it clear to Khrushchev that we do not intend to be intimidated by him in respect to Berlin or in respect to any other place in which he wants to try to threaten us.

U.S. SHOULD REMAIN WILLING TO TALK AT ANY LEVEL

We should make clear, however, that we are willing to sit down and let reason operate, on any level—on the top level, on the intermediate level, or on the lower echelon.

We should make perfectly clear to Russia that we are willing to submit any of these issues to the judicial processes of the United Nations for determination. For example, Mr. President, as a Nation we have yet to propose requesting the first advisory opinion of the World Court on an international issue.

That is unbelievable but true. Instead, we have been following the Dulles course of massive retaliation, of threatening the world with atomic bombers encircling large segments of the world carrying nuclear warheads. Do we think that has made any friends for us in Asia or Africa?

Mr. President, no one prays any harder for the recovery of the Secretary of State than I, because I wish personal misfortune to no man, but let the RECORD be perfectly clear I am as much opposed to his foreign policies over all now as I ever was, because in my judgment the mistaken foreign policies of John Foster Dulles have put us in the precarious position in which we find ourselves in the world today, so far as Asia and Africa are concerned.

The Senator from Pennsylvania in his speech this afternoon calling for congressional consideration of American foreign policies was absolutely correct. We must make perfectly clear that we have no executive dictatorship in this country in any phase of government, including foreign policy.

Mr. President, I think there must be a great change in American foreign policy from that which has prevailed under John Foster Dulles. I think we must make very clear that we are not going to yield to the intimidation of Russia in Berlin, but that we are ready to submit to the judicial processes of the United Nations the international law issues which are raised by Russian policy on Berlin.

WE SHOULD ALSO TAKE OUR TREATY RIGHTS TO COURT

We say—and rightly so—that our rights in Berlin rest upon international treaties. So they do. Certainly we are not afraid to have them reviewed by an international judicial tribunal, are we? We are not worried, I hope, about the application of the rule of law to any issue involving the United States. I think Russia is, because on issue after issue she would lose if the rule of law were applied.

What we must do in the field of foreign policy is to try to get the facts before the world through media and tribunals recognized as impartial, so as to demonstrate to the people of the world that it is not true that we seek a preventive war.

That is why I think we should change our policy in regard to nuclear testing. That is why I think we should change our course of action in regard to threatened use of nuclear warfare. That is why I think we should start submitting these issues, by way of offer on our part, to judicial processes for determination.

I am not afraid of a summit meeting. What a great case, and what a great forum would be afforded if the President of the United States were to go to a summit meeting and "lay it on the line" to Khrushchev—"This is our proposal for a German settlement. What is yours? As for our rights under existing agreements, we are ready to submit them to the rule of law through judicial processes."

We cannot long continue, nor can Russia, the mad buildup of a nuclear armament race, without placing mankind in the jeopardy of having all life, animal and human, for several thousand years greatly damaged in those areas of the globe where radiation from nuclear war would reach.

I say these things tonight, with the Senator from Minnesota [Mr. HUMPHREY] in the Chamber, and with the Senator from Pennsylvania [Mr. CLARK] in the chair, not for the sake of agreement, but because if we are to follow the course of action which the Senator from Pennsylvania has suggested in his speech, we must be willing, as a Congress, to come to grips with the facts. We must come to grips with the fact that, although we do not like it, in many parts of the world we are already condemned as an immoral nation. So is Russia. However, it does not make me any happier to take a look at my cellmate.

Mr. President, I turn now to another subject briefly.

The PRESIDING OFFICER. The Senator from Oregon has the floor.

THE SITUATION IN BOLIVIA

Mr. MORSE. Mr. President, as chairman of the Subcommittee on Latin American Affairs of the Committee on Foreign Relations, I wish to make a very brief comment on the very serious situation which exists in Bolivia.

Our committee has been informed that the demonstrations in Bolivia were the immediate result of a story which appeared in the Latin American edition of Time magazine, in which the magazine made the following statement:

> The only solution to the Bolivian problem is to abolish Bolivia and let the neighbors divide the country and solve the problem.

It is alleged that some member of the American Embassy in La Paz made this unfortunate remark in the form of a wisecrack or facetious statement. The American Embassy denies that the remark was made. As yet I have read no denial from Time magazine.

Whether it was made or not, the important thing is that the situation in Bolivia was so delicate that the belief that it was made set off the demonstration. That is the important thing for us to keep in mind.

The demonstrations apparently were participated in by extremists. I am inclined to believe, on the basis of such information received so far, that it is probably true that both the extreme leftists and the extreme rightists were involved. It is interesting to note that in a moment of hysteria the extreme totalitarians, representing extreme points of view, namely, Communists and Fascists, seem to come together.

But be that as it may, I am also satisfied that these demonstrations do not represent the basic good feeling of the overwhelming majority of the Bolivian people toward the American people. I think they recognize that the Americans are their friends. Officials of the Bolivian Government have made it very clear to us that they are friendly toward us. It was unfortunate that Time magazine published this statement, but Time magazine will have to answer for its own journalistic irresponsibility.

ECONOMIC PROGRESS IN BOLIVIA

Something needs to be said this afternoon about the progress which is being made in Bolivia. Bolivia is not subject to all the adverse evaluations of its economic progress that we have been hearing about.

I hold in my hand a report dated February 13, 1959, in Business International, which is a business information publication service maintained by a very distinguished businessman in this country, a man who has the confidence of the American business community. I refer to Mr. Eldridge Haynes.

I ask unanimous consent that there be printed in the RECORD at this point as a part of my remarks the material beginning on page 2 of the February 13, 1959, issue of Business International, under the heading "Bolivian Stabilization Progress May Open Up Lush New Markets."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BOLIVIAN STABILIZATION PROGRESS MAY OPEN UP LUSH NEW MARKET

The progress made thus far by Bolivia's rigorous stabilization program gives promise that the "beggar on a throne of gold" is on the verge of enjoying his inheritance. For U.S. manufacturers this could mean greater consumer goods sales as food imports decline, freeing foreign exchange, and purchasing power increases; new sales opportunities in the machinery and equipment field, as a start on the long-planned Bolivian development program becomes feasible; the prospect of a second Venezuela, as oil hopes brighten; and eventually, interesting investment possibilities in an economically and politically stable country offering tangible investment concessions and inducements.

In the period from December 1956, when the stabilization program began (Business International, Jan. 4, 1957, p. 8), to the present:

The boliviano, which rose immediately to 7,500 per dollar, has slumped back slowly to its starting point (12,000 per dollar) but not gone over it.

Similarly, the cost-of-living index, which fell 18 percent, has climbed back to but not exceeded the December 1956 level.

Bolivia has paid off $25 million of its foreign obligations ($15 million during 1957; $10 million during 1958).

Agricultural production has ballooned more than 80 percent (over the past 4 years). During 1954, Bolivia imported wheat to the amount of $14 million, last year only $1 million. Increased production in rice, sugar, vegetables, citrus and other food commodities have reduced even further Bolivia's foreign exchange spending.

The country has opened its doors to foreign private investment, with millions of dollars pouring into the nation's oilfields.

The communications system has been improved to such an extent that for the first time in the country's history its roads were kept open the year round in 1958.

A democratic government has withstood the temptation to use totalitarian methods in overcoming opposition to the austerity program.

The record would have been even better had the country's foreign exchange earnings during the period not dropped to their lowest point in recent history. Export earnings from 1952 through 1956 averaged $110 million yearly but for 1957 dropped to $90 million and during 1958 fell to $65 million, owing to tightened tin quotas and lower tin prices. Even U.S. aid, vital to the country's stability, fell off from an average $25 million yearly to $19 million in 1958.

But the biggest problem has been labor. During 1958 Bolivia suffered from no less than 500 strikes, and 9 more have taken place since the first of the year. In all of them, private industry or the Bolivian Government was obliged to grant wage increases and other benefits detrimental to the stabilization program. Principal agitator behind most of the strikes: labor boss Juan Lechin.

The solution to these deterrents appears to be in sight, however. The government was vastly encouraged by the outcome of a recent 10-day Lechin-inspired bank strike, which threatened to undermine the entire austerity effort. The strike was finally brought to end when other union members (mostly miners, who were hardest hit by the stabilization program) marched through the streets of La Paz carrying placards with the legend "Beware Lechin" (an ex-miner himself). The government feels that at last it can look forward to a period of relative labor calm, since Lechin's influence has vastly waned as a result of this upset.

Higher tin prices, more liberal quotas from the International Tin Council, a revival of U.S. aid (to $23 million this year), and the possibility of the United States purchasing tin for its own stockpile should all help Bolivia's cause.

PLAN TO ATTRACT INVESTMENT

As one immediate result of the progress already made, International Monetary Fund officials say that Bolivia may soon be in a position to carry out its long-planned Bs200 billion (more than $16.5 million) investment development program. Funds would be used to purchase machinery and other materials for the Bolivian state oil agency, the state mining corporation, communications and irrigation projects, and other development plans such as power and agriculture.

At the same time, the U.S. Development Loan Fund has agreed to a $2.5 million loan to Gasser y Cia., Industrias La Belgica SA, for expanding its sugar mill near Santa Cruz. Aside from saving Bolivia $1.1 million annually in sugar imports, this project will increase employment and stimulate agricultural production in the area.

As a result of the country's liberal petroleum code, 11 U.S. firms hold large concessions in the heart of the Bolivian oil lands. Active exploration activities are being carried out, while the Gulf Oil Co. expects to begin drilling its third, fourth, and fifth wells this summer. It says indications of a strike are good. The Bolivian American Oil Co. feels that Bolivia could become a second Venezuela, offering another lush import market.

Taking heart at the excellent results of the petroleum code, the Bolivian Minister of Economy, Jorge Tamayo, is preparing a new general investments code soon to be presented to the Bolivian Congress. Under the new code, private investment capital would enjoy new benefits and guarantees, including tax exemptions of up to 10 years; 50 percent income tax reduction on reinvested profits; exemption from import duties and fees on all machinery, equipment, tools, and other materials; exemption from all export taxes and of up to 5 years from any new direct taxes instituted subsequent to the investment.

Mr. MORSE. The report states that the Government of Bolivia is doing a very much better job than some of the adverse reports would seem to indicate.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks, with the editing I have done in order to con-

form to the rules of the Senate, a very fine editorial entitled "The Bolivian Explosion," published in the New York Times of today.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE BOLIVIAN EXPLOSION

There are many reasons for feeling disturbed over the anti-American riots in La Paz, Bolivia, but two sources of anxiety are obviously overruling. There is, first, the new evidence that hostility to the United States is always close to the surface in many Latin American countries. The other problem lies in Bolivia itself—whether this disturbance will not worsen the already precarious political and economic state of the nation.

As always, one must in fairness try to understand why the people of the country involved felt and reacted the way they did. It so happens that geopolitical theoreticians in Latin America have for years speculated in their irresponsible and impractical way on the supposed desirability of Bolivia, which is desperately poor and landlocked, being divided up among her neighbors. When, therefore, Time magazine in its Latin American edition quoted an American official at the Embassy in La Paz as favoring such a solution, even in jest, a raw, sensitive nerve was touched.

Add to this fact the economic distress, the opportunity offered to the political opposition, the agitation of labor union extremists, some of them Trotskyite, and the always latent anti-Yankee feelings and the result seems natural. The government of President Hernan Siles Zuazo was slow to realize the danger, but when the President reacted he did so firmly and intelligently.

What happened was deplorable, but it should not be allowed to destroy or even lessen the good and useful relationship between our two countries. Bolivians should recognize the great efforts that the United States has made in recent years to help them. * * * Fortunately, Bolivia's Foreign Minister, Victor Andrade, was for years Ambassador in Washington. He and President Siles know the extent of American good will and how much it means to Bolivia.

Mr. MORSE. Also, with some editing in order to conform to the rules of the Senate, I ask to have printed in the RECORD at this point as a part of my remarks an editorial entitled "The Bolivian Tempest," published in the March 4, 1959, edition of the Washington Post.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE BOLIVIAN TEMPEST

Words as well as deeds can be an incitement to violence, as the mob disorder in Bolivia demonstrates in a distressingly vivid way. What immediately precipitated the riots in La Paz was some injudicious language in Time magazine, and some even more injudicious words from Capitol Hill could worsen matters further. Political passions are quickly stirred in the impoverished and mountainous republic, and there can be no minimizing of the grave peril in which some 1,800 U.S. citizens in Bolivia have been placed. The State Department has protested the attacks on the Embassy, and has taken steps to move U.S. citizens to the suburbs where armed protection can be more effectively provided.

The circumstances fully justify this action. * * * What earthly purpose is served by threatening to send troops and cut off U.S. aid unless the disorder is immediately halted. Words like these are especially inflammatory in a country where it is not fully understood. * * *

Doubtless Time was ill advised to quote an anonymous U.S. Embassy source as saying with misplaced jocularity that the solution to Bolivia's problems is to "abolish" the country. But it should also be noted that the riots are providing an outlet for anti-government passions in a country governed by a badly divided party with a volatile tradition.

Mr. MORSE. These newspapers are performing a great service in making the American people appreciate the fact that when some unfortunate incident such as that which occurred in Bolivia takes place, we must try to understand.

We must study what happened before we condemn. We must ask ourselves the questions, "Why should an incident that seems so minor to us cause such an uproar? What can we do, what should we do, what is it reasonable to expect us to do, in order to alleviate the situation which gives rise to such an anti-American demonstration?"

Of course we must get across to the Bolivian people the facts about our record. I wish to put some of those facts into the RECORD this evening.

From 1952 through June 30, 1958, our grant aid to Bolivia has been $91,300,000. In 1959 there will be a technical aid program of an additional $5.5 million. A surprising amount of this aid has gone for foodstuffs. Following the briefing of my subcommittee the other day by the Assistant Secretary of State in Charge on Latin American Affairs, I commented upon the large amount of foodstuffs which had been shipped to Bolivia. In commenting upon it, I used an American colloquialism, well understood in this country. Although I have no reason to believe that it was misunderstood in Bolivia, I got to thinking about it today, and decided that in talking about Bolivia on the floor of the Senate, I would make perfectly clear what I had in mind in using a perfectly good American colloquialism in talking about these millions of dollars in foodstuffs that we have sent to Bolivia. In making my comments I expressed satisfaction that the Bolivian people appreciate our action, that we have a great reservoir of friendship there because of it, and I did not think the Bolivian people were people who would bite the hand that feeds them.

A Latin American may not understand that colloquialism, or might give it an interpretation not intended. Therefore I wish to say this evening, in discussing these figures on foodstuffs, that what I meant was that I believe the Bolivian people appreciate that we came to them in a period of great economic emergency which has existed in their country from 1950 to today, and that out of the great characteristic of generosity of the American people, expressed through our Government, we have provided them with a good many millions of dollars worth of foodstuffs.

That act on our part, that act of friendship, speaks louder than any words of friendship we can utter. What I meant by my colloquialism was that I am satisfied that the Bolivian people understand that demonstration of a good neighbor policy on the part of the American people to the Bolivian people.

I ask unanimous consent that there be inserted in the RECORD at this point a table showing our mutual aid program which we have conducted in Bolivia since 1952, along with the footnotes in explanation of the table, to be found at page 1711 of our committee report on the Mutual Security Act of 1958.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Bolivia

Population: 3.3 million.
Per capita GNP: $73.
Program started: Fiscal year 1952 (mutua security program).

[Obligations in millions]

	Fiscal year 1956	Fiscal year 1957	Fiscal year 1958 (estimated)	Cumulative through June 30, 1958
Economic aid by category:				
Total	$25.4	$23.3	$20.1	$91.3
Defense support	-------	20.0	-------	20.0
Development assistance	22.9	-------	-------	31.4
Technical cooperation	2.5	3.3	3.1	17.0
Special assistance	-------	-------	17.0	17.0
Other	-------	-------	-------	5.9
Economic aid by type:				
Project aid	$4.4	$3.3	$4.2	$20.3
Nonproject aid	21.0	20.0	15.9	71.0
(Surplus commodities)	(17.1)	(7.7)	(------)	(------)

U.S. interests: In 1952, a social revolution, led by an armed populace, overthrew a regime which had a vested interest in large mineral holdings. Large-scale social and economic changes were effected including mine expropriation and agrarian reform. Inflation became critical and the new government requested assistance in monetary stabilization from the United States. Within the framework of a monetary stabilization program, U.S. objectives are to provide and support measures designed to increase production, diversify and stabilize the economy, maintain political stability, and provide productive employment opportunities for the 70 percent Indian population which lies outside the commercial framework of the country. In spite of the progress achieved so far by the Government's economic stabilization program the Bolivian economy remains somewhat precarious.

Military program: None.

Economic program: Special assistance aid provides project and nonproject aid primarily designed for short-term objectives. Technical cooperation primarily provides project assistance designed for long-term objectives.

Project aid: Directed at expanding and improving agriculture, education, public health, highway maintenance, credit facilities, atmosphere for foreign investment, and resettlement for surplus labor. Local currency from counterpart and section 402 is used for budgetary support and in general support of project aid.

Nonproject aid: Consists of sugar, aviation gas, agricultural and earth-moving equipment, and section 402 wheat and flour.

Loans: No loans made to Bolivia under the mutual security program.

Public Law 480: A title I sales agreement for $6.8 million was signed during fiscal year 1957 but has not yet been consummated. Bolivia also had received $17.9 million in emergency food supplies by the end of fiscal year 1957, under title II.

Mr. MORSE. Mr. President, I ask unanimous consent that there be printed in the RECORD that part of a table found at page S–19 of the foreign grants and credits by the U.S. Government for the total postwar period, the fiscal year 1957, and the fiscal year 1958, which deals with the country of Bolivia. It shows that since July 1, 1945, the U.S. Government has made available to Bolivia in grants and credits a total of $139 million, and that means in grants and loans from the Export-Import Bank, for example, and other lending sources.

There being no objection, the excerpt from the table was ordered to be printed in the RECORD.

Summary of foreign grants and credits

[In millions of dollars]

	Total postwar period	Fiscal year 1957	Total	Fiscal year 1958			
				July-September 1957	October-December 1957	January-March 1958	April-June 1958
Bolivia:							
Net grants and credits	139	23	31	4	13	7	8
Net grants	105	23	32	4	13	7	9
Gross grants	105	23	32	4	13	7	9
Less Reverse grants and returns	(1)	(1)	(1)	(1)		(1)	
Net credits	34	—*	—*	—*	—*	—*	—*
New credits	43	1	(1)			(1)	
Less principal collections	9	1	(1)	(1)	(1)	(1)	(1)

1 Less than $500,000.

Mr. MORSE. Mr. President, from the floor of the Senate today I wish to say to the Bolivian Ambassador in Washington and to the people of Bolivia that these are the facts which show our friendship for the people of Bolivia.

These facts are our rebuttal to the unfortunate news item printed in Time magazine that seemed to reflect a contemptuous attitude on the part of the United States which, in fact, is not the true attitude of either the Government of the United States or the people of the United States.

To Bolivia I would say that there is no doubt about the fact that the Government of the United States and the people of the United States seek only to strengthen our bonds of friendship. We know that whatever the domestic situation may be which exists at the present time in Bolivia, it will be resolved and that at a very early time the friendly ties which existed prior to these unfortunate demonstrations in Bolivia will be reestablished.

AN ANSWER TO THE WHEAT PROBLEM

Mr. MORSE. Mr. President, on February 19 I was pleased to join with the Senator from Kansas [Mr. CARLSON] in cosponsoring the bill, S. 1140, to stabilize the Nation's wheat program.

The new wheat proposal is discussed briefly, but in excellent fashion in an article written by Mr. Clancy Jean, of Pendleton, Oreg., executive vice president of the Oregon Wheat Growers League, published in the February 5, 1959, issue of the Oregon Farmer.

I ask unanimous consent that the full text of this article be included in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GROWERS SEEK AN ANSWER TO THE WHEAT PROBLEM—SUGGESTED BY THE NATIONAL ASSOCIATION OF WHEATGROWERS: A MODIFICATION OF THE TWO-PRICE PLAN AND BUSHEL ALLOTMENTS

(By Clancy Jean, executive vice president, Oregon Wheat League)

Only a person completely sheltered from newspapers, magazines, radio and television doesn't know that "wheat is the No. 1 farm problem in the United States today."

It might be of some interest to take a look at what the wheat growers have to say about the problem, since it is they who, in the final analysis, will have to make the necessary adjustments if a path is to be blazed out of the present maze.

When the National Association of Wheat Growers met for its ninth annual convention in Denver just before Christmas, growers took a long, hard look at their own situation and at the national picture.

Essentially, they gave cognizance to two basic factors: (1) There's lots of wheat. Further, in any evaluation of the present program, which resulted in the 1958 wheat crop of 1,450,000,000 bushels, it is evident that present production control laws are inadequate. It would apear that, with respect to this point, they would be in agreement with Secretary Benson. So, the growers say a new approach is needed to stabilize production.

(2) From the grower's standpoint, the most pressing problem is that of maintaining sufficient income to purchase the products of industry and labor, which he needs for his operation as well as to retain a satisfactory standard of living in face of reduced acreage and rising costs of production. Thus, a new approach is definitely needed to stabilize income.

In developing their plan the Nation's wheat growers kept four basic concepts in mind:

Wheat growers' net income must be maintained if they are to reduce production below the current level;

The build-up of CCC stocks must be stopped and gradually reduced to a normal level;

Further reduction in acreage of wheat must not be shifted to other crops;

Increased yields per acre must not be reflected in increased Government holdings of wheat.

What is needed, the growers say, is to stop the buildup of Commodity Credit's stocks, and even reduce them, while also reducing production through a program that takes increased yields into consideration and prevents diverted wheat acres from creating problems with other crops—do these things and maintain growers' incomes.

To accomplish this the Nation's wheat producers are proposing a production and income stabilization plan.

First off, they say, do away with acreage allotments and checking of compliance along with current marketing quotas—and substitute for these marketing allotments expressed in bushels.

They want marketing allotments based on the wheat base acreage for the average of the 1952–53 planted acreage. Each farm would receive a bushel allotment. This would be arrived at by multiplying the base acreage by the normal yield per acre, factored to the county allotment. Normal yields, they say, should be based on the period that provides the most equitable relationship between counties and States.

For example, it would have worked out this way for 1958:

(1) Estimated amount used for food in the United States, 485 million bushels.

(2) Estimated amount of U.S. exports, 430 million bushels.

(3) Total estimated demand, 915 million bushels.

(4) Less amount of wheat to be moved out of CCC stocks each year, 75 million bushels.

National marketing allotment, 840 million bushels.

The plan also calls for price supports of $1.60 per bushel for the national marketing allotment. This allotment, as shown above, would be spelled out for each farm in bushels and there would be a price support on this amount of $1.60 per bushel.

In addition, certificates would be issued on each grower's share of the 485 million bushels used for food in the United States. These certificates would be redeemable in an amount to return to the grower full parity on that portion of his production. Using 1958 as an example, food uses of wheat were equal to about 60 percent of the national marketing allotment suggested by the plan.

But, in order to be eligible to receive these certificates, the grower would have to put at least 20 percent—but not more than 30 percent—of his wheat base in the conservation reserve. Moreover, wheatgrowers insist that neither the $5,000 limitation nor the depletion of the soil bank base requirements should apply under this plan. They recognize, moreover, that a suitable cover must be maintained on the acreage placed in the conservation reserve.

Nor is this all the plan includes. The growers further believe that redemption of the certificates should be provided through the sale of the certificates to processors. This provision is taken from the domestic parity plan, long advocated by wheatgrowers. This would relieve the taxpayer of a major part of the costs of the stabilization plan, it is pointed out.

Wheat growers have long held that they are entitled to full parity for at least that portion of their crop that is used for food consumption in the United States.

The proposal, officers of the National Association of Wheat Growers maintain, would save the Federal Government an estimated $500 million per year, based on current costs. A condensed list of the possible savings shows the program would save the Federal Government $100 million from reduced export subsidies; $75 million for the annual storage costs of the proposed defense stockpile and remaining CCC stocks; $10 million for administrative costs due to elimination of acreage allotments and market quotas; $310 million, brought about by not only arresting the annual increase in CCC stocks, but also by moving 75 million bushels from CCC stocks each year.

Additionally, the growers' plan calls for no restrictions on the use of wheat on farms where produced or when sold to other farmers or to bonded feed processors.

As outlined, the plan would provide a wheatgrower with income from four sources: (1) He would receive $1.60 (approximately 65 percent of parity) for his share of the national allotment, which is computed to be 840 million bushels for 1958; (2) about 60 percent of his bushel quota would be eligible to receive certificates, which when redeemed would provide him full parity on this part of his production; (3) he would receive soil-bank payments from placing 20 to 30 percent of his wheat base acreage in the conservation reserve, which is a requisite of the plan in order to obtain certificates; and (4) should his production exceed his bushel allotment, this wheat could be marketed only to bonded feed processors, other farmers, or fed on his own farm—at no support level at all.

To implement the program, the growers believe that at least 500 million bushels of the present CCC stocks should be set aside in a defense stockpile. The wheatgrowers point out that stockpiles of food are equal in importance to munitions and strategic materials and this stockpile, like others, should be maintained as part of our national defense program. This is generally recognized as the minimum level of carryover advisable under current world tensions. The growers also note that costs of storage could be greatly reduced if bids for this defense stockpile were asked on a 5-year contract with a schedule of premiums and discounts that would permit turning of stocks by warehousemen.

The National Association of Wheat Growers insist the proposal will work only if adopted in its entirety. The association proposes that the plan be offered to farmers in a national referendum. Eligibility to vote would be based on those eligible to vote in the last wheat marketing quota referendum, and a simple majority of those voting should be sufficient to make it effective.

THE DISPLACED FAMILY PROBLEM

Mr. MORSE. Mr. President, the Washington Post on March 2, 1959, in an editorial entitled "Displaced Family Problem" has, once again, performed a public service to the Washington community by directing attention to the need for adequate public housing in the Capital.

Two years ago, in company with my distinguished friend and colleague from Pennsylvania, Senator CLARK, I had occasion to visit and compare living conditions in the slums against those prevailing in public housng. He will remember, as I do, the shocking conditions, the human degradation, the squalor, and the filth which we found in the slum area. The contrast with public housing was complete. In the latter, the families were decently housed, the children were clean and although in the case of one family, the mother had a serious physical disability, there was a feeling and an atmosphere which bespoke assurance that the children's values as they matured would be those we like to think of as typically American. By exposure to health and decency, those children, in my judgment, will be better prepared when the time comes for them to fill the role of parents.

The important point which I wish to stress today, Mr. President, is that unless wise and careful planning is done now, and unless provision is made for decent housing for families displaced by urban renewal and by our highway programs, we run the grave risk of perpetuating and extending our slums.

The proposals for solutions to the problem suggested by the editorial, those for example which seek the rehabilitation of existing family housing, and the writing down of the cost of reclaimed and cleared slum properties, are worthy of careful consideration. I would also suggest that the Federal Government itself can do much to meet the problem by turning over to the public housing authorities at nominal cost, properties which are surplus to the needs of the executive branch.

In view of the direct and hidden costs of slum housing to the Capital, the use for decent low-income housing of such areas as the National Training School for Boys site, the Bolling Field Airbase site, and others, would seem proper and justified. I sincerely hope that this suggestion and those made in the report of the Commissioners' Committee on Public Housing Sites be given thoughtful consideration followed by swift action on the part of those charged with responsibility in these areas.

Mr. President, I ask unanimous consent that the editorial to which I have alluded be printed at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

DISPLACED FAMILY PROBLEM

The community needs to ponder carefully the report of the Commissioners' Committee on Public Housing Sites. It says, in effect, that new thinking about public housing is essential if the city is to continue its fight against slums and blight. Indeed, new means of housing displaced families will have to be found if the city is to cope with its traffic congestion by building the Inner Loop and to go forward with construction urgently needed by governmental agencies. The basic fact is that there is almost no vacant land left in the District. Thus projects of any substanstial size involve displacement of people, and housing for at least some of them must be found.

More than 4,000 public housing units will be needed in the District in the next few years, the Committee found, to permit vital urban renewal propects to go forward. It is hoped that the National Capital Housing Authority may be able to meet some of this need by building in slum areas taken over by the Redevelopment Land Agency. But this will necessitate a write-down in the cost of reclaimed and cleared slum properties, for the addition of full acquisition and clearing costs to building costs would push the total outlay per unit above the maximum fixed by the Public Housing Administration for projects eligible for rental subsidies. Some relief may thus be forthcoming, but it certainly will not go far enough.

The Committee suggests that the NCHA also be authorized to acquire existing houses in specified areas with the object of rehabilitating them for public housing use. The acquisition of some large older dwellings would greatly ease the problem of housing large families. It is virtually impossible to build new units for these families within the PHA's cost limitations. Purchase of individual houses or relatively small groups of houses would also tend to overcome the mounting objections to large institutionalized projects for low-income families.

Some communities have tried to meet the problem of excessive site costs by building multistory apartments, but these are particularly unsuitable to the large families with small children that the District needs especially to house. The two feasible alternatives appear to be write-downs for cleared land and greater flexibility in the acquisition of low-cost housing already in use. There is no really valid distinction between building new public housing projects for low-income families and purchasing on the open market of existing structures for this purpose, except that the latter course is easier on the public purse. Certainly the Capital City cannot permit its progress in clearing slums and rebuilding blighted areas to be cut off for want of feasible means of relocating displaced families.

PRICE SUPPORT PAYMENTS

Mr. MORSE. Mr. President, recently the distinguished senior Senator from Delaware [Mr. WILLIAMS] had occasion to address the Senate upon the subject of price support payments. In the course of his address he cited an Oregonian, Mrs. Amanda Duvall, of Heppner, Oreg., as receiving a payment of $104,944. The speech was carried upon the press wires.

Mr. Al Lamb, manager of the Morrow County Grain Growers, Inc., has brought to my attention certain facts which suggest that the whole story was not made clear in the presentation to the Senate. I feel sure that the facts were not available to the Senator from Delaware, for if they had been, I am confident that he would have made reference to them.

In order that the complete picture may be presented, Mr. President, I ask unanimous consent that Mr. Lamb's letter, dated February 27, which shows that Mrs. Duvall redeemed 26,195 bushels of her wheat at a cost to her of $47,736.96 in principal, interest, and loan charges, be printed in the RECORD at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MORROW COUNTY GRAIN GROWERS, INC.,
Lexington, Oreg., February 27, 1959.

Hon. WAYNE MORSE,
U.S. Senator, Washington, D.C.

DEAR SENATOR MORSE: I feel the recent Associated Press report quoting Senator JOHN J. WILLIAMS in reference to the 1957 price-support payments to Mrs. Amanda Duvall, of Heppner, does an injustice by way of not giving the full story.

Actually Mrs. Duvall took CCC loans amounting to $104,944 on her 1957 crop of wheat and barley. What isn't reported is that Mrs. Duvall redeemed 26,195 bushels of her wheat which was under loan prior to the Government takeover date at a cost to her of $47,736.96. This sum was paid CCC as payment of principal and interest plus loan charges by Mrs. Duvall who then marketed the 26,195 bushels through this cooperative.

The above-mentioned payment of almost $50,000 reduces the tota cash benefits by this figure. In addition the CCC took full title to the balance of her 1957 crop of wheat, amounting to 10,912 bushels, stored in our elevators, plus her full harvested crop of barley. The wheat she redeemed and sold was in her own farm storage and carried a later loan date hence lower interest charges.

The market value of the commodities taken over by the Government amounted to

very nearly the loan price plus interest and charges. Reducing the total cash received by the amount paid back by Mrs. Duvall plus the value of the grain surrendered certainly pares the net benefits received to a very low figure.

While admitedly there are defects in the present farm law, it hardly seems fair to this writer that Mrs. Duvall, a widow whose only daughter was killed not long ago, should be held up as a horrible example by a Member of the U.S. Senate. Mrs. Duvall is a successful farmer whose farming operations are an example to her neighbors, and she is one that has always complied with the letter and spirit of the law. It seems to the writer that those who wish to make political hay out of the results of the present administration of the Farm Price-Supports Act, might do well to turn their guns against those largely responsible for results rather than on hard-working farmers who are also taxpayers.

Sincerely,

AL LAMB, *Manager.*

INTERNATIONAL MEDICAL RESEARCH

Mr. HUMPHREY. Mr. President, one of the most gratifying developments in these early months of the 86th Congress has been the commencement of early hearings on a bill which I am convinced will become one of the great landmarks of this or any other Congress.

I refer to the important Senate Joint Resolution 41, authored by the dean of the Senate's health legislation, the esteemed senior Senator from Alabama [Mr. HILL] to create a National Institute for International Medical Research.

I have been pleased to note the unanimity with which the bill has been greeted not only by the medical profession and other professions in the healing arts, but by the American people generally.

It is my pleasure and privilege to be one of the cosponsors of this bill, along with well over half the Members of the Senate, including the majority leader, the distinguished Senator from Texas [Mr. JOHNSON], who shares the deepest of interest in advancing human health everywhere.

BUREAU OF THE BUDGET POSITION OVERLY RESTRICTIVE

It is my understanding that next week, the administration's leading experts in the health field will testify on the bill. It is my further understanding that they will endorse the principle of the bill. I am delighted that S.J. Res. 41 will have their general support.

The only question which remains—and it is a very big question—is the level of specific financial authorization for the bill.

Here the controlling factor which persists in the administration's mind is apparently the restrictive position of the Bureau of the Budget.

I should like to point out, however, that $50 million as proposed by the Senator from Alabama amounts to one-fourteenth of 1 percent of the overall budget expenditures which will be incurred this year.

Fifty million dollars amounts to less than 33 cents per person in the United States per year.

It is my hope that whether the administration specifically approves the Hill bill's authorization level or not, the bill in its final form will, indeed, contain the $50 million figure.

We are all aware of the fact that the appropriation process is entirely separate from the present authorization process. We know that the Senate and House Committees on Appropriations can independently judge later on as to the exact amount which should actually be allocated in any given fiscal year.

MY EUROPEAN TRIP CONFIRMED RESEARCH NEED

So far as I am concerned, I do not have any doubt that there is needed right now for a great many deserving international research projects, a very considerable sum of money—in the millions of dollars.

I do not base this estimate on conjecture; I base it upon the findings of my tour of Western European countries in November and December of 1958.

In instance after instance, I heard from French, British, Norwegian, Swedish, Finnish, and other scientists of specific under-nourished projects where speedy American assistance might prove virtually indispensable toward unlocking the answers to major diseases.

So, LISTER HILL's great bill is needed now—today. I earnestly hope that money under it will actually start moving through the pipeline not next year, but in this calendar year, itself.

SUBCOMMITTEE PRINT CONFIRMS LEGAL GAPS IN AUTHORITY

There are two other points: It is essential, as the Senator from Alabama contends, that there be adequate statutory authority for the support of international medical research.

Tomorrow, there will be released the second committee print, prepared by the Subcommittee on Reorganization and International Organizations, of which I am privileged to be chairman, in the Committee on Government Operations. This print is entitled "Statutory Authority for Medical and Other Health-Related Research in the U.S. Government—the Basis for International Cooperation."

The print documents the fact that although there is broad general authority now for the conduct of overseas medical research, there are certain omissions so far as specific authority is concerned.

On page X of the introduction, I point out that a specific mandate would indeed appear to be in order. A mandate for what purpose? A legal mandate for greatly expanded medical research.

I point out further that Congress has indicated, time and time again, its virtually unanimous support for the superb work which is being done by the medical research arms of the United States Government, notably the great National Institutes of Health under Dr. James Shannon. Now, at last, under the Hill bill, the NIH will be given the full and specific statutory authority which it needs and should have.

MY LETTER TO PRESIDENT EISENHOWER

The second point which I should like to make is that the President of the United States has likewise often signified his deep interest in this subject.

When, in December 1958, I returned from my visit with Premier Khrushchev, one of my very first acts was to visit the White House, at the invitation of President Eisenhower, in order to report to him in full as to my visit.

I discussed with him my comments in the field of health, as in other fields, with Premier Khrushchev. I am glad to say that President Eisenhower responded with warmth and interest, particularly on the subject of expanded health cooperation.

It is my earnest hope that the President will now follow through, not only by giving the Hill bill the administration's full support, but by a host of other actions.

I do not have any doubt in my mind that the officials of the executive branch who are responsible for health are fervent supporters of expanded world health cooperation. Here, I include the Secretary of Health, Education, and Welfare, Dr. Arthur S. Flemming; the Surgeon General of the U.S. Public Health Service, Dr. LeRoy Burney; the Director of the Office of Vocational Rehabilitation, Miss Mary Switzer; ICA's Director of Health, Dr. Eugene Campbell; and many others down the line.

A great deal more remains to be done in the world health field.

ERADICATION ACTION, NOT JUST RESEARCH NEEDED

In the weeks and months ahead, I shall be submitting specific comments as to what should be done as our International Health Study proceeds. But I can say now that future action should include a bold program for the conquest of infectious diseases throughout the world, especially in the developing areas.

Here I do not refer simply to research against these diseases—for, in many instances we already know the answers to the diseases. I refer instead to the need under World Health Organization auspices to apply presently available remedies to conquer widely rampant scourges.

What are the actual methods of conquest? They range from mass immunization or vaccination to clinical treatment of the diseases; control or eradication of disease-carrying insects; and, in particular, control of human waste disposal through public health service sanitation programs in areas like Asia, Africa, the Middle East and Latin America.

Returning now to the research front, on the very day I visited the President, I confirmed some of my comments in a memorandum to the White House, which was thereafter promptly acknowledged. I have never publicly referred to this memorandum. But I believe it is so pertinent now to the consideration of the Hill bill that I ask unanimous consent to have it printed at this point in the RECORD, together with my letter to the President.

There being no objection, the letter and memorandum were ordered to be printed in the RECORD, as follows:

DECEMBER 9, 1958.

Hon. DWIGHT D. EISENHOWER,
The President,
The White House, Washington, D.C.

MY DEAR MR. PRESIDENT: Confirming our conversation this morning, I am enclosing in outline form, material bearing upon in-

ternational health and medical research efforts.

I want you to know how greatly I appreciated the opportunity to report to you.

With all good wishes, I am,

Sincerely,

HUBERT H. HUMPHREY.

MEMORANDUM

DECEMBER 9, 1958.

To: The President of the United States.
From: Hubert H. Humphrey.
Re data on world and medical research.

BASIC FINDING

One of the international phases of the President's message to the Congress on the state of the Union in January of 1958, has stimulated particular interest among many world leaders. This was the proposal under the theme of "Works for Peace," for expanded health cooperation to help banish disease. At that time, the President specifically invited the Soviet Union to join with the United States in combating heart disease and cancer, among other scourges.

Commencing November 17, I began a series of meetings with political, diplomatic and medical leaders in European countries for the purpose of exploring ways and means of assisting in carrying out this concept.

In every single country which I visited, including the Soviet Union, I found that this suggestion in the President's message had met with a unanimity, warmth and fervor of the very type that the United States would most desire.

BACKGROUND OF STUDY

I have been reviewing this subject in my capacity as chairman of a Subcommittee on Reorganization and International Organizations of the Senate Committee on Government Operations. Under Senate Resolution 347 of the 85th Congress, $30,000 was approved unanimously by the Senate for a study of international health research, assistance and rehabilitation activities.

This study resolution came as a part of a series of actions by the Senate in the 85th Congress among which were the following:

(1) The incorporation, at my suggestion, in the Mutual Security Act of 1958, Public Law 85-477, of two health amendments—

(a) Declaring "it to be the policy of the United States to continue and strengthen mutual efforts among the nations for research against diseases such as heart disease and cancer."

(b) Approving an amendment to the Agricultural Trade Development Act, Public Law 480, 83d Congress empowering the use of counterpart currencies for supporting scientific, including medical, research.

(2) A Senate resolution, Senate Resolution 361, inviting the President to consider the possibility of inviting the World Health Organization to approve an international health and medical research year.

Other actions, outside the Congress, have likewise advanced this general goal:

(a) The action of the United States, as announced by Dr. Milton Eisenhower at the WHO meeting in Minneapolis, making available $300,000 for the purpose of planning for an enlarged role of research by the World Health Organization.

(b) The action last Friday by the United Nations General Assembly in unanimously deciding to invite the World Health Organization to carry out its plans for an international health year. This proposal now is scheduled to come up before the WHO executive board in January and before the next meeting of the world health assembly in May.

SUBCOMMITTEE TRIP

My study tour of Western Europe included the following research centers, among others:

Geneva, the World Health Organization, including consultation with its Director General, Dr. N. G. Candau and the Chiefs of WHO specialized sections.

Paris, the Radium Institute and Hospital, the Pasteur Institute, the Maternity Hospital, and the Hospital for Sick Children.

Stockholm, the Carolinska Institute's Centers of Bacteriology and Immunology, Children's Hospital, and Institute of Cell Research.

Helsinki, the Brain-Damage Institute, the Institute for Occupational Diseases, Tumor Center, the Children's Hospital, and others.

My discussions were not limited to leading medical researchers, including Nobel Award winners, but rather extended to executive officials such as the President of Finland, diplomats, such as the Acting Foreign Minister of Norway, Departmental heads, such as the Minister of Health of France, and many others.

APPROVAL BY PREMIER KHRUSHCHEV

The most significant of my conversations during the trip was my 8-hour discussion with Soviet Premier N. S. Khrushchev. More than one-fourth of the period of our meeting was devoted to health and medical research.

I submitted to him, point by point, a series of specific suggestions. His response was uniformly favorable and, indeed, enthusiastic. The specific proposals included—

(1) The further prompt implementation and broadening of the medical exchange provisions of the Lacy-Zarubin Exchange Agreement. (This agreement, albeit limited, has in my judgment, been working out very well indeed to date.)

(2) An expanded program to speed two-way flow of medical data, including fuller and prompter exchange of medical articles, monographs, books and abstracts.

(3) Increased personal contact between Soviet and American scientists, through both correspondence and visits, as well as by greater participation in international symposia and in panels of experts of the World Health Organization.

(4) Speedy progress toward the proposed international public health and medical research year.

(5) Soviet-United States collaboration in one particular new field of universal interest, perinatal research. This would consist of a campaign of intensified research into maternal-child health, commencing prior to the birth of babies and extending through the crucial weeks following entry of the new life into the world.

I spelled out certain additional detail in my conversations with Dr. V. M. Zdhanov, Soviet Deputy Minister of Health, including a recommendation for a joint Soviet-United States rehabilitation program. This would be particularly geared to serve the needs of disabled veterans, but would include handicapped civilians as well.

ADVANTAGES TO THE UNITED STATES

Some of the advantages of further Soviet-United States cooperation in health are, in my judgment as follows:

(1) From a humanitarian interest, cooperation fulfills the creed expressed in all the religions of mankind to "heal the sick." Cooperation likewise carries out the concept of medicine, itself, in its dedication to making available knowledge, irrespective of ideology or boundary.

(2) From a diplomatic standpoint, it may help to thaw at least one phase of the cold war.

It will help to lower the wall of suspicion between the Soviet Union and the United States, because here is a field in which even the barriers of distrust tend to lessen before the common desire to serve human beings.

(3) From a practical standpoint, it will bring more and more Russian citizens into contact with Americans and other foreign nationals.

AMERICAN IMPLEMENTATION

Several specific opportunities, as I see them, await the United States:

(1) Favorable consideration by the executive and legislative branches next year of legislation which will be offered by Senator LISTER HILL of Alabama and which I will be pleased to cosponsor. Its purpose would be creation of a new National Institute for International Medical Research. Such an institute would become the channel for American oversea research aid.

(2) Consideration of the research recommendations which will come from the WHO meeting in May. While it would be premature at the moment to say what WHO's recommendations will be, it seems clear that what will be needed most of all is a United States contribution to a special WHO research account. This would be an open-end multilateral fund to be used for carrying out research, principally into heart disease and cancer.

It is to be hoped that the Soviet Union and many other nations would contribute to such a special account. Already as a precedent the United States has made substantial contributions to the WHO special malaria account.

(3) Much broader and prompter use of Public Law 480 and other counterpart funds, for example, for the purpose of furthering medical education and medical research abroad.

None of the sums of money contemplated in any of the references above are substantial in relation to the overall budget commitments of the United States. If, however, they are authorized, they would help not only directly but indirectly in generating enlarged health budgets in countries throughout the world. Thus, we would be serving as a catalyst toward research breakthroughs not simply in our own land but in other lands; and all mankind would ultimately benefit.

SALUTE TO MINNESOTA MEDICINE AND ITS CONTRIBUTIONS TO WORLD HEALTH

Mr. HUMPHREY. Mr. President, Minnesota, the North Star State, has made outstanding contributions in countless fields. But in one particular field, I am sure, Minnesota, by universal agreement, stands among the very first rank in the 49 States. I refer to the contributions which the State of Minnesota has made and is making in advancing and protecting human health.

Minnesota medical discoveries have literally circled the earth. And so have Minnesota-born and Minnesota-trained doctors. Over a period of many years, it has been my privilege—first, as a private citizen, later as mayor of Minneapolis, and now as U.S. Senator—to see at first hand the pioneering by Minnesota health leaders.

I have had the pleasure of visiting in person, time and time again, not only the University of Minnesota and the great Mayo Foundation, but I have met with a great many physicians across the length and breadth of my State; with general practitioners, with specialists, with public health officers; with leaders in medical schools, hospitals, sanitariums, nursing homes, and other health facilities. I can say that my contact with these dedicated members of the healing arts has been one of the most rewarding experiences of my life.

STUDY BY REORGANIZATION SUBCOMMITTEE

These facts were confirmed anew to me in the course of my work as chairman of the Senate's International Health Study. Twice the Senate has authorized this vital work—the first time in August 1958, when Senate Resolution 347, 85th Congress, was approved, and then, again, in January, when a 1-year extension was authorized under Senate Resolution 42 of the 86th Congress.

To attain the goals of this International Health Study, my colleagues and I on this Senate Government Operations subcommittee have set what might be called a dragnet for ideas. We have sent letters of invitation for comments to every medical leader, at home and abroad, whom we might possibly contact with limited time and staff.

The outpouring of response has been tremendously gratifying. But I can say, in all truth, that the State of Minnesota yields to none in the quality and quantity of the constructive replies which it has sent.

I have prepared a brief report on the subjects and names of a few of the distinguished leaders who have sent in their comments. To make any such selection is difficult, in that so broad and detailed have been many of the responses that it would be virtually impossible to do anything more than touch upon a few highlights.

MEDICAL LEADERSHIP FROM THE NORTH STAR STATE: COMMENTS TO INTERNATIONAL HEALTH STUDY SUBCOMMITTEE

It would take many pages to include references to all of the Minnesota medical groups, voluntary health agencies, doctors of medicine, biologists, chemists, and civic-minded laymen who have kindly written to our subcommittee.

Not only have they documented what they are now doing in international medical research and international medical assistance programs but, most important, they have sent valuable suggestions for improving the health program of U.S. Government agencies.

Here, without attempting to be all-inclusive, are a few highlights:

COMMENTS FROM UNIVERSITY OF MINNESOTA

First. In his response, Dean Robert B. Howard, of the University of Minnesota Medical School, pointed out with promptness and thoroughness, many helpful facts. He cited, for example, that there are more than 60 young men and women from all over the world taking graduate training in the various clinical and basic science departments of our medical school. He documented Minnesota's pioneering achievements of the past including great research contributions, ranging from Dr. Wesley Spink's work on brucellosis and Dr. J. T. Syverton's work in the department of bacteriology and immunology—which has been of such importance in the development of an oral vaccine against polio—to the studies of Dr. Cecil W. Watson on metabolism of bile and blood pigments.

Second. Dr. Stewart C. Thompson, associate director of the School of Public Health, pointed out that in the last 4 years students in that school have come from no less than 36 countries.

On the research phase, he pointed to the esteemed work of Dr. Ancel Keys on the problem of atherosclerosis, including Dr. Key's recent work in Yugoslavia, where he headed a team of 20 from 6 countries.

Dr. Thompson has pointed out, too, the very considerable number of faculty members of the school who have become consultants to a great many foreign countries.

Third. Dr. Keys, incidentally, in a letter to me, pointed to the important recommendations which have been filed by the Research Committee of the International Society of Cardiology, of which Dr. Paul Dudley White and Dr. Keys are cochairmen. This research program contemplates what I, too, regard as a "must"—a vast epidemiological program involving examination, follow-up, and reexamination 5 years later of men age 40 to 59 in 15 to 20 areas, in order to get a graphic picture and understanding of the incidence of heart disease.

PREVENTING MOUTH CANCER

Fourth. Dr. Robert J. Gorlin, chairman of the division of oral pathology, school of dentistry, who has done very fine work in the field of mouth cancer, has pointed up the great international possibilities for further constructive work along this line. In many areas of the world—India, China, and even within our own Western Hemisphere—Cuba, for example—oral cancer, for unexplained reasons, amounts to 40 percent or more of all body cancer.

I point out that Minnesota has taken the lead in the drive to detect oral cancer, first with a pilot detection project at Willmar, followed by a second project at Winona.

Fifth. Dr. John A. Anderson, head of the department of pediatrics, wrote on a subject of special interest to me: expanding world collaboration in prenatal research. This was one of the points of five point health program which I took upon with Premier Khrushchev in Moscow and on which the Soviet Premier indicated warm accord.

Sixth. Director Katherine J. Densford, of the school of nursing, pointed out the great international challenges in the nursing field. Miss Densford is recognized as one of the foremost authorities in this important area of health services.

MINNESOTA REHABILITATION LEADERS

Seventh. Dr. William Kubicek, leader in innumerable health capacities and famed particularly in the department of physical medicine and rehabilitation, has been of tremendous aid to us in pointing up the great opportunities and needs in his specialty for additional work throughout the world.

Let me mention, too, that Dr. Frederick J. Kottke, director of the University of Minnesota Rehabilitation Center, has cited the diverse challenges in physical medicine and rehabilitation. I may say that one of the most inspiring pieces of literature which one might read is the second biennial report for 1956–58 on the work of the center. Here are described not only the impressive research programs, but also the educational activities and the medical and rehabilitation services for patients.

I could not turn from the rehabilitation subject without citing, as well, the universally admired name of Dr. Frank Kruzen, senior consultant at the Mayo Clinic.

Not long ago, Dr. Kruzen wrote to me:

> Wise development of international programs for the improvement of the health of the peoples of the world will, in my opinion, tend to break down prejudices. Furthermore, I think that such programs will teach the people of other countries the true character of the American people.

Let me mention, too, excellent suggestions from Dr. Paul M. Ellwood, Jr., director of in-patient service at the Elizabeth Kenny Institute in Minneapolis.

Eighth. Dr. Harry R. Meyering, director of special education at Mankota State College has given the subcommittee the benefit of his experiences as the first assistant director of Tarsus American College in Turkey as well as the information he was able to gather during his survey of private educational institutions in Syria, Lebanon, Turkey, and Greece.

MAYO FOUNDATION COOPERATION

Ninth. Dr. Edward C. Clark, of the Mayo Clinic, has given us counsel on medical research opportunities and has suggested a number of ways in which international medical cooperation might be strengthened.

Tenth. Dr. Charles W. Mayo is personally giving us his full cooperation and has encouraged the staff to be of all possible assistance.

Eleventh. At the request of Dr. Mayo, Dr. Charles F. Code sent us an excellent outline of the wonderful research work that world-recognized Mayo staff members are doing all over the world.

Of course, each of these distinguished leaders has given all due credit to colleagues for indispensable collaborative work.

These, then, are but a few of the honored individuals who have interrupted their busy days in order to share observations with our international health study.

Right now, my colleagues on the subcommittee and I, together with our subcommittee staff, are exploring a great many "leads" which have been suggested to us by Minnesotans and others on ways and means of advancing world medical science.

NEED FOR MORE HILL-BURTON FUNDS

It is my hope that the medical facilities of my own and other States will be still further enabled to meet their growing responsibilities.

Very recently, I heard from Dr. Robert N. Barr, secretary and executive officer of our State department of health, with regard to the increasing needs under the Minnesota State plan for hospitals, public health centers and related medical facilities. He pointed out that in Minnesota, despite our splendid programs, there are 43 community hospitals outside of Minneapolis and St. Paul which need complete replacement, or major remodeling, and additions in order to meet present hospital standards. Adequate Hill-Burton funds are, there-

fore, not a luxury for the United States; they are an absolute necessity in order to fulfill the desires and needs of our growing American population.

AMERICA'S HEALTH NEEDS

America needs more doctors. It needs more nurses. It needs more modern health facilities and health specialists. It needs more researchers. It needs higher pay and higher esteem for its researchers.

The world has needs as well. Without in any way detracting from or limiting our responsibilities to the American people, we must seek to fulfill our international health responsibilities, especially among the developing areas of the globe.

Doing so will pay back dividends of satisfaction and peace of mind, in addition to dividends of new medical discoveries.

Cancer, heart disease, mental disorders, neurological ailments, allergies, dental troubles, arthritis, diabetes, eye, speech and hearing problems, congenital malformations—these are the burden of many Minnesotans and of the people of all 49 States of the Union.

These are universal burdens as well, weighing heavily on men and women everywhere.

As medical research anywhere unlocks the mysteries of disease, men are helped everywhere.

Tomorrow, as today and yesterday, medical light from the North Star State will continue to illuminate the major unsolved medical problems of our times.

ADJOURNMENT TO MONDAY

Mr. HUMPHREY. Mr. President, I move that the Senate adjourn until Monday next, at 12 o'clock noon.

The motion was agreed to; and (at 7 o'clock and 1 minute p.m.) the Senate adjourned until Monday, March 9, 1959, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 5, 1959.

DEPARTMENT OF STATE

Thomas C. Mann, of Texas, Assistant Secretary of State for Economic Affairs, to be the representative of the United States of America on the Commission on International Commodity Trade of the Economic and Social Council of the United Nations.

ATOMIC ENERGY COMMISSION

Paul F. Foster, of Maryland, to be representative of the United States of America to the International Atomic Energy Agency, vice Robert M. McKinney.

FEDERAL RESERVE SYSTEM

George Harold King, Jr., of Mississippi, to be a member of the Board of Governors of the Federal Reserve System for the unexpired term of 14 years from February 1, 1946, vice James Kimble Vardaman, Jr., resigned.

U.S. ATTORNEY

S. Hazard Gillespie, Jr., of New York, to be U.S. attorney for the southern district of New York for the term of 4 years, vice Paul W. Williams, resigned.

POSTMASTERS

The following-named persons to be postmasters:

ALABAMA

George N. Chastang, Citronelle, Ala., in place of S. B. Thomas, retired.

John F. Segrest, Jr., Tuskegee, Ala., in place of J. H. Meadors, retired.

ALASKA

Ola M. Cosgrove, Delta Junction, Alaska. Office established July 13, 1957.

Martha R. Prater, Glenallen, Alaska, in place of A. G. Simmons, resigned.

Corinne M. Thompson, Hoonah, Alaska, in place of Frank Shotter, retired.

Harold B. Lie, Kotzebue, Alaska, in place of A. G. Francis, resigned.

ARKANSAS

Travis G. Carroll, Waldo, Ark., in place of F. E. Fincher, deceased.

CALIFORNIA

Allan Muilenburg, Artesia, Calif., in place of H. S. Summers, retired.

Irene K. Chilcote, Clearlake Oaks, Calif., in place of F. H. Meyer, removed.

Edna M. Bequealth, Kenwood, Calif., in place of H. G. Hoe, removed.

Earl J. Copenhaver, Norco, Calif., in place of A. E. Pries, retired.

Hazel R. Jacobson, Tecopa, Calif., in place of G. K. Monike, retired.

Henry A. Davis, Walnut, Calif., in place of M. A. Broadbere, resigned.

Walter E. Lang, Jr., Wilton, Calif., in place of G. B. Stout, deceased.

COLORADO

Hubert E. May, Alamosa, Colo., in place of R. D. Saunders, retired.

Evelyn L. Henion, Winter Park, Colo., in place of G. H. Allison, resigned.

FLORIDA

Robert L. Burgust, Apopka, Fla., in place of F. L. Burgust, retired.

William H. Hicks, Brooker, Fla., in place of T. B. Pinholster, retired.

Robert K. Tillman, Bushnell, Fla., in place of W. T. Eddins, retired.

Blanche E. Williams, Cassadaga, Fla., in place of R. A. Williams, retired.

Lula M. Barnes, Coleman, Fla., in place of Clara Wicker, retired.

Charles W. Curtis, Daytona Beach, Fla., in place of C. H. Talton, retired.

Ora E. Terry, Fort White, Fla., in place of T. M. Crouch, deceased.

Charles L. English, Greenville, Fla., in place of E. A. Laird, retired.

Gaynelle H. Mutter, Intercession City, Fla., in place of Ethel Cox, removed.

Sara Bryan Rogers, Live Oak, Fla., in place of F. M. Greene, Jr., deceased.

Audrey S. Duff, Mims, Fla., in place of C. K. Duff, retired.

Edmund G. Krigline, Opa-locka, Fla., in place of W. S. Griffiths, resigned.

Ray H. Schmidt, Panama City, Fla., in place of Bernard O'Brien, resigned.

John R. Douglass, Port Tampa City, Fla., in place of Mildred Hanks, deceased.

Joseph William Penrod, Stuart, Fla., in place of R. W. Hartman, retired.

GEORGIA

George E. Towns, Alamo, Ga., in place of V. W. Hartley, Sr., transferred.

Susie D. Bryant, Calvary, Ga., in place of C. C. Allen, retired.

Jean H. DeLoach, Claxton, Ga., in place of T. V. Nevil, retired.

Joseph H. Summerour, Duluth, Ga., in place of J. H. Summerour, deceased.

William R. Cook, Fairburn, Ga., in place of S. B. Green, retired.

Evangeline D. Burgamy, Irwinton, Ga., in place of R. L. Lindsey, retired.

Oneita H. Barrett, McRae, Ga., in place of M. C. Barineau, retired.

Edgar P. Faulkner, Tucker, Ga., in place of C. A. Randolph, retired.

IDAHO

Paul L. Byrd, Palisades, Idaho, in place of Vera Miskin, resigned.

ILLINOIS

Clarence P. Siebert, Aledo, Ill., in place of C. D. Lawson, retired.

Maurice J. Wiersema, Fulton, Ill., in place of J. P. Hook, retired.

Thomas W. Harney, Itasca, Ill., in place of I. E. Hanson, removed.

Leonard A. Graham, Shobonier, Ill., in place of O. W. Morell, transferred.

INDIANA

Philip E. Buecher, Jasper, Ind., in place of Albert Rumbach, deceased.

Jack V. Porter, Roachdale, Ind., in place of W. E. Etcheson, retired.

Glenn H. Newby, Russiaville, Ind., in place of I. D. Watson, deceased.

IOWA

John R. Cuvelier, Aplington, Iowa, in place of Celia Boom, retired.

Dale A. Early, Bristow, Iowa, in place of L. M. Frisby, deceased.

Nels M. Nelson, Crystal Lake, Iowa, in place of P. S. Juhl, retired.

Cleon D. Sires, New Albin, Iowa, in place of S. E. Hartley, retired.

Calvin O. Levorson, Riceville, Iowa, in place of F. M. White, retired.

KANSAS

George E. Cox, Buffalo, Kans., in place of J. K. States, retired.

Lee M. Fraker, Winchester, Kans., in place of J. G. Hunsucker, deceased.

KENTUCKY

James C. Davis, Gray, Ky., in place of R. D. Higgins, transferred.

James H. Easterling, Grayson, Ky., in place of W. L. Horton, removed.

Jean C. Hall, Viper, Ky., in place of M. H. Brashear, retired.

LOUISIANA

Viola H. Smith, Bonita, La., in place of E. E. Sisson, transferred.

Ruel Gene Roberson, Dubach, La., in place of C. H. Avery, transferred.

MASSACHUSETTS

Paul H. Smith, Monument Beach, Mass., in place of H. A. Dainty, resigned.

MICHIGAN

Philip R. Norman, Bark River, Mich., in place of H. W. Boyle, retired.

E. George Moser, Richville, Mich., in place of E. R. Moser, deceased.

MINNESOTA

Lester W. Graner, Kellogg, Minn., in place of C. G. T. Lydon, retired.

Herbert F. Zelmer, Kilkenny, Minn., in place of Alice Gillespie, retired.

Seth G. Withers, Red Wing, Minn., in place of A. F. Hernlem, retired.

Robert L. Penne, Saint James, Minn., in place of C. J. Strom, resigned.

MISSISSIPPI

Eugene H. Webb., Beaumont, Miss., in place of L. B. Dietz, retired.

William R. Moore, Duck Hill, Miss., in place of J. E. Patridge, retired.

James W. Bingham, Guntown, Miss., in place of S. M. Davis, retired.

MISSOURI

Warren C. Moser, Auxvasse, Mo., in place of S. S. Harrison, retired.

Truman R. Nickerson, Bethany, Mo., in place of W. W. Wilson, transferred.

Orpha Mae Bolin, Bois D'Arc, Mo., in place of Lottie Mason, retired.

Kenneth V. Hollocher, Eolia, Mo., in place of W. T. Jensen, retired.

Oren Dee Moor, Lincoln, Mo., in place of W. L. White, Jr., transferred.

George E. Wolfe, Linn, Mo., in place of J. F. Suellentrop, retired.
Oliver M. Judd, Mapaville, Mo., in place of W. J. Onder, resigned.
John R. Allison, Marceline, Mo., in place of Anna Watson, retired.
Jesse F. Kilpatrick, Rolla, Mo., in place of C. E. Jones, retired.
Clifton E. Schuenemeyer, Union, Mo., in place of C. F. Halligan, deceased.

MONTANA

Lee M. Enochson, Medicine Lake, Mont., in place of N. P. Miller, retired.

NEBRASKA

Ruben G. Werner, Battle Creek, Nebr., in place of A. H. Stuckwisch, resigned.
Ben D. Fussell, Geneva, Nebr., in place of C. E. Rock, deceased.
Carl J. Mann, Hoskins, Nebr., in place of G. E. Fletcher, deceased.
Roy H. Clements, Riverton, Nebr., in place of M. I. Onstot, retired.
Milo T. Jelinek, Wilber, Nebr., in place of Fred Shimerda, retired.

NEW HAMPSHIRE

Halton R. Hayes, Milton Mills, N.H., in place of F. E. Carswell, deceased.
William J. Driscoll, Plymouth, N.H., in place of G. L. Rand, retired.

NEW JERSEY

Walter F. Haddock, Midland Park, N.J., in place of Frank Martin, retired.
Byron B. Holmes, Ocean Grove, N.J., in place of W. E. Austin, retired.
Regina J. Todd, Port Monmouth, N.J., in place of R. G. Young, removed.

NEW YORK

Alfred A. Zottola, Bedford Hills, N.Y., in place of J. P. Bruen, retired.
Helen M. Hlavac, Bohemia, N.Y., in place of G. E. Hlavac, deceased.
David A. Wait, Burnt Hills, N.Y., in place of Valentine Bubb, retired.
James D. Sproull, Cayuga, N.Y., in place of E. T. McDonald, retired.
Walter M. Paul, Clark Mills, N.Y., in place of H. M. Nolan, retired.
Harry C. Young, East Amherst, N.Y., in place of Louis Witnauer, retired.
Charles P. Buonora, Far Rockaway, N.Y., in place of Abraham Finkle, deceased.
Ellen M. Newman, Greenhurst, N.Y., in place of J. A. Johnson, retired.
Penelope M. Bolton, Hague, N.Y., in place of C. F. Fitzgerald, resigned.
Elizabeth M. Jones, Hurley, N.Y., in place of G. C. Kent, retired.
Edward O. Wood, Ilion, N.Y., in place of T. R. Morris, retired.
Edward H. Essig, Jamaica, N.Y., in place of G. W. Rosenquest, retired.
Earl F. Wheeler, Lindley, N.Y., in place of J. K. Holmes, resigned.
Martin J. O'Carroll, Monticello, N.Y., in place of R. S. Washington, retired.
Chester H. Whitcher, Mount Morris, N.Y., in place of A. M. Cipriano, removed.
Jane M. Snide, Newcomb, N.Y., in place of M. E. Owen, retired.
Sherwin A. Radka, Oakfield, N.Y., in place of W. E. Farnsworth, retired.
Glen H. Alberding, Oriskany Falls, N.Y., in place of Gertrude Russell, retired.
Horace F. Davies, Plattsburgh, N.Y., in place of Arthur Sharron, deceased.
Betty P. Kanar, Porter Corners, N.Y., in place of E. M. Menshausen, retired.
Allen B. Cranston, Portland, N.Y., in place of B. F. Skinner, retired.
John S. Hobbs, Red Hook, N.Y., in place of Roland A'Brial, resigned.
Gladys Behr, Rocky Point, N.Y., in place of M. T. Mushler, retired.
Charles N. Manuel, Sea Cliff, N.Y., in place of R. T. Stevenson, resigned.
Kirk E. McKee, Smyrna, N.Y., in place of B. A. Sweet, retired.
Robert B. Scott, Jr., Warwick, N.Y., in place of W. R. Carr, retired.
John P. Potter, Wells, N.Y., in place of T. E. Brown, retired.
Oswald D. Kirkby, Westport, N.Y., in place of Lorrin Eggleston, retired.
Ethelyn M. Cox, Williamstown, N.Y., in place of Harry Burns, deceased.

NORTH CAROLINA

Howard G. Crissman, Aberdeen, N.C., in place of E. E. Maurer, removed.
Walter W. Monroe, Eagle Springs, N.C., in place of M. C. Lewis, retired.
Willard W. Reavis, Hamptonville, N.C., in place of B. F. Gough, retired.
Wayne Jefferson Edwards, Marble, N.C., in place of B. H. Mintz, retired.
Erlean S. Stevens, Mayodan, N.C., in place of J. V. Highfill, retired.
Lucile R. Eagle, Misenheimer, N.C., in place of C. A. Dry, resigned.
William R. Stanley, New Bern, N.C., in place of R. R. Eagle, retired.
Virginia E. Sears, Seaboard, N.C., in place of J. B. Stephenson, resigned.
Edward V. Gore, Jr., Shallotte, N.C., in place of I. B. Parker, retired.
Maxwell G. Rush, Southern Pines, N.C., in place of A. G. Pierce, resigned.
Joseph Howard Revis, Whittier, N.C., in place of M. P. Williams, retired.

NORTH DAKOTA

Simon H. Gimbel, Hazelton, N. Dak., in place of E. M. Shea, transferred.
John Boyko, Stanton, N. Dak., in place of B. P. Pulles, resigned.

OHIO

Harriett R.Vasbinder, Brinkhaven, Ohio, in place of M. A. Power, retired.
Donald R. Kempton, Laurelville, Ohio, in place of F. M. Lappen, retired.
Wayne E. Laibe, Lima, Ohio, in place of E. R. Leach, retired.
Frederick B. Gatch, Milford, Ohio, in place of F. W. White, retired.
Melvin R. Fuller, Oakharbor, Ohio, in place of O. E. Herring, retired.
Harold H. Haggard, Urbana, Ohio, in place of P. H. Gifford, deceased.

OKLAHOMA

Eugene J. Krivanek, Mustang, Okla., in place of R. H. Stevens, transferred.
John F. McDaniels, Owasso, Okla., in place of G. B. Combs, removed.
Hiram H. Wright, Paden, Okla., in place of Kinley Case, deceased.
Boyd A. Troop, Tuttle, Okla., in place of T. D. Jones, transferred.

OREGON

Leroy F. Fernlund, Bonanza, Oreg., in place of D. D. Horn, resigned.
Dean S. Reimers, Delake, Oreg., in place of S. E. Wadsworth, retired.
Reese D. Jenkins, Ontario, Oreg., in place of C. F. Trow, retired.
James F. Egan, Tangent, Oreg., in place of J. E. Jenks, Jr., retired.
Veeda A. Goodell, Valsetz, Oreg., in place of D. H. Weaver, resigned.
Edwin H. Condit, Westport, Oreg., in place of R. C. Neitzel, deceased.

PENNSLYVANIA

Norman H. Fulton, Glenolden, Pa., in place of A. T. Connor, retired.
Marie J. Schoppy, Locust Gap, Pa., in place of J. J. McDonnell, removed.
Henry L. Haines, Maytown, Pa., in place of M. E. Culp, retired.
Harold S. Derr, Jr., Montoursville, Pa., in place of Jewett Shirm, retired.
W. Ned Beckley, New Paris, Pa., in place of H. C. Mickle, retired.
Gaynelle A. Stewart, Penn Run, Pa., in place of A. F. Stewart, deceased.
Gerald Rufus Gearhart, Shadygrove, Pa., in place of W. R. Kline, resigned.

PUERTO RICO

Gabriel A. Cabrera, Camuy, P.R., in place of L. M. Lopez, retired.
Anardi Agosto Baquero, Canovanas, P.R., in place of Carmen Villalobos, retired.
Enrique Pardo, Ensenada, P.R., in place of Julia Chacon de Vidal, retired.
Regina L. de Lluch, Lajas, P.R., in place of Monserrate Figueroa, retired.

SOUTH CAROLINA

Henry G. Rutland, Sr., Fairfax, S.C., in place of J. B. O'Neal, retired.
Charles R. Orr, Great Falls, S.C., in place of M. C. Stroud, Jr., transferred.
William P. Scarborough, Lamar, S.C., in place of M. C. Spears, retired.
Fred G. Best, McClellanville, S.C., in place of J. D. Mackintosh, retired.
Charles C. Morgan, Jr., McCormick, S.C., in place of J. E. Bell, retired.
Thomas T. Adkins, Marietta, S.C., in place of J. N. Cleveland, retired.
William H. Masche, Jr., Mount Pleasant, S.C., in place of J. E. Sanders, retired.
William A. Linder, Smoaks, S.C., in place of A. L. Smoak, deceased.

SOUTH DAKOTA

Melvin R. Bollinger, Bowdle, S. Dak., in place of Emma Erbe, deceased.
Dale A. Wiltfang, Mansfield, S. Dak., in place of E. A. Berndt, retired.

TENNESSEE

Carlin T. Brooks, Bolivar, Tenn., in place of J. J. Parran, retired.
Elisha T. Morris, Jr., Carthage, Tenn., in place of Jere Gardenhire, retired.

TEXAS

Bonnie J. Summers, Channelview, Tex., in place of L. L. Bradley, Sr., deceased.
Thurmon O. Storey, Deport, Tex., in place of C. H. Nobles, retired.
Eugene Mallory, Mineola, Tex., in place of D. S. Lankford, retired.
Johnnie L. Richardson, Sanger, Tex., in place of J. A. Nicholson, retired.
Edgar Harris, Timpson, Tex., in place of J. J. Compton, retired.

VERMONT

Ernest A. Pike, Craftsbury, Vt., in place of F. L. Kemp, retired.
Deane K. Page, Groton, Vt., in place of R. F. Brown, removed.

VIRGINIA

Franklin T. Payne, Aldie, Va., in place of S. T. Ish, retired.
Elizabeth K. Harman, Bishop, Va., in place of M. G. Arnold, resigned.
Beulah J. Skeens, Dante, Va., in place of R. S. Griffith, Jr., resigned.
Noble Conley Bishop, Duffield, Va., in place of E. P. Tompkins, retired.
James K. Sullivan, Grottoes, Va., in place of P. R. Cosby, retired.
Charles H. Arrington, Haysi, Va., in place of I. M. Baker, retired.
Joel F. Coleman, Jr., Prospect, Va., in place of J. V. Lewis, retired.
Albert F. Bennett, Saltville, Va., in place of T. B. Slate, transferred.
Carl A. Parsons, Jr., Sugar Grove, Va., in place of E. M. Calhoun, deceased.
Richard W. Rock, Troutville, Va., in place of E. L. Boone, deceased.

WISCONSIN

Milton L. Dickinsen, Augusta, Wis., in place of T. F. Boehrer, retired.
Irving P. Aamodt, Emerald, Wis., in place of P. W. Fleming, resigned.
Gilbert D. Stannard, Greenbush, Wis., in place of H. R. Stannard, transferred.
William W. Lambert, Onalaska, Wis., in place of L. L. Shove, retired.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 5, 1959:

DEPARTMENT OF COMMERCE

Robert J. Dodds, Jr., of Pennsylvania, to be General Counsel of the Department of Commerce.

FEDERAL AVIATION AGENCY

James Tolman Pyle, of Maryland, to be Deputy Administrator of the Federal Aviation Agency.

INTERSTATE COMMERCE COMMISSION

Charles A. Webb, of Virginia, to be an Interstate Commerce Commissioner for a term of 7 years expiring December 31, 1965.

CIVIL SERVICE COMMISSION

Roger W. Jones, of Connecticut, to be a Civil Service Commissioner for a term of 6 years from March 1, 1959.

COLLECTOR OF CUSTOMS

George N. Sundquist, of Wisconsin, to be collector of customs for customs collection district No. 36, with headquarters at Duluth, Minn., to fill an existing vacancy.

U.S. COAST GUARD

Capt. Chester L. Harding, U.S. Coast Guard, for promotion to the permanent rank of rear admiral in the U.S. Coast Guard.

The following-named persons for appointment to the grades indicated in the U.S. Coast Guard:

To be chief warrant officers, W–4

Cecil M. Thomas	Peter S. Fredriksen, Jr.
John Needham	George W. Tanghe
Arva S. Alexander	Roy L. Daisey
Robert J. Mohr	Cecil L. James
Frank P. Coffin	Charles E. Mueller
Wesley R. Hansberry	Thomas E. Harwell
Gerard A. Hearn	Joseph M. McGahee
Peter Majkut	Arthur N. Colona
Raymond E. Holley	John E. Rowe
William M. Parker	
Oscar D. Diel

HOUSE OF REPRESENTATIVES

THURSDAY, MARCH 5, 1959

The House met at 12 o'clock noon.

Rabbi Isadore Gruen, Haym Salomon Synagogue and Center, Brooklyn, N.Y., offered the following prayer:

Our Father, Sovereign of the universe, as we gather here this day to perform the sacred tasks of government, we humbly invoke Thy blessing. Grant Thy guidance and inspiration unto those who are charged with the great responsibility of directing the affairs of our Nation. May Thy Holy Spirit dwell richly within them, as they work for freedom, justice, and peace. Continue to imbue them with wisdom, courage, and strength, so that their deliberations, when translated into action, reflect well upon our country and help achieve the noble principles upon which this Nation is founded.

Almighty God, bless all the inhabitants of our land. Unite them for goodness and peace, so that by virtue of their working together in brotherhood, the United States of America will remain a great citadel of freedom from which light and hope shall be sent forth to those living in darkness and despair.

Gracious God, may the Biblical ideals of liberty, justice, and equality, enshrined in the American Constitution, become the heritage of all the peoples of the earth.

May this be Thy will. Amen.

The Journal of the proceedings of yesterday was read and approved.

COMMITTEE ON RULES

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain privileged resolutions.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

JOINT MEETING TO RECEIVE THE PRESIDENT OF THE REPUBLIC OF EL SALVADOR

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that it may be in order at any time on Wednesday, March 11, 1959, for the Speaker to declare a recess for the purpose of receiving in joint meeting the President of the Republic of El Salvador.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

ADJOURNMENT UNTIL MONDAY NEXT

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the call of the Calendar on Wednesday next be dispensed with.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

VACATING SPECIAL ORDER

Mr. DAVIS of Georgia. Mr. Speaker, I ask unanimous consent that the special order granted me for today be vacated.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

UNWARRANTED ATTACK

Mr. DAVIS of Georgia. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. DAVIS of Georgia. Mr. Speaker, I noticed an attack upon me in today's Washington Post.

Mr. Speaker, it is almost as great a compliment to be attacked by the notoriously radical Washington Post as it is to be attacked by the Daily Worker.

THE NEED FOR A FOREIGN SERVICE ACADEMY

Mr. RODINO. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. RODINO. Mr. Speaker, I recently have introduced a bill (H.R. 417) to provide for the establishment of a United States Foreign Service Academy similar to the academies operated by the Army, the Navy, and the Air Force. I believe that this bill incorporates a built-in solution to a twofold current problem. The establishment of a Foreign Service Academy would both provide the Foreign Service with an especially excellent source of qualified candidates and also insure the effective training and education of the prospective officers in the languages and cultures of the areas of assignment as well as in the necessary functional skills.

My bill provides for the establishment of a Foreign Service Academy in or near the District of Columbia under the supervision of the Department of State. The Secretary of State would prescribe a course of instruction and training for diplomatic cadets equivalent to the curriculum prescribed by accredited colleges and universities as a prerequisite to the granting of the degree of bachelor of arts. Special emphasis would, of course, be placed on the study of the history, culture, customs, folklore, and language or languages of the nations in

which diplomatic cadets may elect to serve. H.R. 417 would also provide for field studies in such nations.

Competitive entrance examinations would determine the selection and admission of cadets to the Academy, and those in attendance would be entitled to quarters and subsistence. There also would be appointed each year a Board of Visitors consisting of five members from the Senate Committee on Foreign Relations and five members from the House Committee on Foreign Affairs. And, perhaps most important of all, preference would be given to the Foreign Service Academy graduates in the appointment of permanent officers to the Foreign Service Corps.

Mr. Speaker, I have introduced this bill because, in my opinion, the increasingly crucial role and growing training needs of this career professional Foreign Service Officer Corps require immediate attention and legislative action. There are about 3,400 of these officers, both men and women, currently serving the interests of their country in some 200 posts in approximately 80 foreign countries. America's expanding interests and responsibilities in world affairs since World War II have necessitated increasing demands on the Foreign Service Officer Corps, and the response in most cases has been commendable. The dedication of our diplomatic corps, even under the most difficult circumstances, has been essentially unquestioned.

There are, nevertheless, a large number of Foreign Service personnel who are being called upon to assume responsibilities for which they are not fully prepared. Through the press and perhaps most recently through the discussions prompted by the growing popularity of "The Ugly American," the American public is becoming more aware of the deficiency of qualified overseas personnel in many critical areas.

We need more specialists, for example, in the cultures and languages of Asia, Africa, and the Middle East as well as of Europe and Latin America. We need, in short, a better trained and more highly skilled diplomatic corps to translate the foreign policy of our Nation into action in the many day-to-day diplomatic relations with the peoples and officials of other governments. Indeed, the very preservation of the free world hinges on the effective activity of such a corps.

I am convinced that the establishment of a Foreign Service Academy would mark an important step forward in the development and improvement of the caliber and effectiveness of our diplomatic corps. Such an academy would help to provide the service with the number of qualified area specialists which our increasing overseas commitments require. Because of its specially designed curriculum, the Academy would be able to provide the prospective officers with the combined advantages of, first, the highest level of formal academic instruction in the study of international relations and other closely allied fields; second, an extensive and intensive foreign language training program; third, the knowledge and understanding which can be acquired best through the field work program; and fourth, the benefit of the instruction of and discussions with experienced Foreign Service officers.

Also the provision of quarters and subsistence might well encourage many of our capable young men and women, who might otherwise be unable to afford such specialized education, to obtain a high level of education beyond the high school and to use this background in representing their country abroad. Finally, the establishment of a Foreign Service Academy would contribute to a greater recognition of the diplomat as an individual performing services of vital importance to his fellow citizens and as one well qualified in all respects to represent the interests of his Nation abroad.

It has been said that "at the root of the work of the Foreign Service is diplomacy, which is the art and practice of conducting negotiations between nations." In addition to his role as negotiator, of course, the Foreign Service officer also serves as an on-the-spot observer and reporter for our Government. He is also called upon, in many instances, to perform various consular functions for American businessmen and other American residents of the area. Favorable interpretation and representation of the democratic way of life and the building of good will with the people of the other nation are also among an officer's most vital and demanding responsibilities.

It is clear that such tasks require not only many people with many skills operating at various levels of generalization and specialization but also that often they may depend on a single person who combines the abilities of both the generalist and the specialist. The demands of an increasingly complex international scene, in other words, call for persons who not only know a little bit about many things but who also know a good deal about a particular geographic area, language, or people. This broad knowledge also should encompass an understanding of the political, military, scientific, and economic interests of the host nation as well as of its cultural affairs and certain other policies. Such knowledge and understanding are necessary for the kind of on-the-spot reports which often are designed to assist the Secretary of State in the preparation of recommendations to the President.

One current deficiency in the Foreign Service which has received considerable attention recently is that of foreign language ability. According to one study, that is, of ambassadorial appointments, both noncareer and career Foreign Service, deficiency in foreign languages is "the major flaw in the U.S. Embassies and Legations overseas." A survey made in 1957, moreover, showed that less than half of the then approximately 4,000 Regular and Reserve Officers and Staff Corps had a "useful knowledge" of French, German, or Spanish. The number of those trained in eastern European, Asiatic, or African languages did not even meet at that time the "minimum basic requirements of the Department." It has also been estimated that about 70 percent of the new officers admitted to the corps do not have a practical knowledge of any modern foreign language.

A more recent survey—completed in October 1958—of the language skills of Foreign Service officers also indicates that about 40 percent of all Foreign Service officers do not have what the Department considers "the necessary foreign language proficiency in both speaking and reading one or more foreign languages to meet representation and professional work requirements." More than 15 percent of all Foreign Service officers were estimated in this survey as not having even the basic knowledge of one or more foreign languages sufficient for routine social and office requirements.

In recognition of the need for more and better language training, the Department of State has progressively been improving and expanding its training facilities. This is typical, I might add, of the Foreign Service's continuous history of progress and development in step with America's expanding role in international affairs. Language needs are being given considerable attention and a long-range program of expanded training is currently in operation. All Foreign Service officers are also required to have a language check-up approximately every 2 years as part of the Department's mandatory language testing program. This periodic inventory of language proficiency is considered an additional incentive for language training.

The fact still remains, however, that many attempts at Foreign Service training improvement are still in the experimental stages or, even where in actual operation, include only a relatively small number of officers. The Foreign Service Institute simply does not provide an in-service training program comparable to those offered by the armed services.

The fine area study programs in American colleges and universities, of course, offer a wide variety of high level academic training. Such programs, however, are not always adequate in number, in geographic accessibility, and in curricular content to provide the level and extent of formal instruction and field work desirable and even necessary to fill our Foreign Service needs.

Lack of knowledge about the peoples and cultures of other countries is another unfortunate area of deficiency among Americans abroad. It was reported, for example, that in 1957 Prime Minister Jawaharlal Nehru, of India, made a few eye-opening observations before a group of several hundred U.S. point 4 technicians which may well be applicable to many such situations.

After thanking the U.S. representatives for the help they had given to India, he reportedly told the American Ambassador, who was also present, that the United States did not have to send so many technicians, but that it might send fewer but better ones. The Prime Minister mentioned condescension in dealing with nationals and an apparent lack of respect for the older way of doing things as possible areas of improvement.

Not long ago Dean Harlan Cleveland, of Syracuse University, who has been conducting a study for the Carnegie Foundation on the training of Ameri-

cans for working abroad, said he hoped that before long a 1- or 2-year immersion in a foreign culture abroad, perhaps during the college years, would be a requirement for all persons planning to work overseas. Such an experience, it is believed, would increase greatly the number of Americans building good will with foreign nationals. Effective American activity abroad clearly depends upon this so-called cultural entity, or, as one Brazilian is reported to have expressed it:

To teach American baseball to Brazilians you first have to learn how Brazilians play soccer.

This skill for cultural entity was rated by Dean Cleveland even above language skills. There are already too many Americans abroad who are considered "fluently arrogant," he observed.

In December 1958 the State Department announced the reestablishment of its overseas science officer program. Seven distinguished scientists were appointed to serve in this capacity. It is significant to note that these men were selected not only for their experience and reputation as educators, research scientists, and administrators but also for their knowledge of the status of science and their acquaintance with scientists in the country of assignment. And last, but not least, each also had a facility in the language of the country of assignment.

Mr. Speaker, I am certain that the Members of this House are well aware of the importance of a qualified and effective diplomatic corps to serve and represent this Nation abroad. A Communist strategy of frightening proportions is threatening the free peoples of the world. A well-fought battle on the diplomatic field could easily be the decisive factor in determining whether the strategic forces of democracy or communism will ultimately succeed.

For this reason, I call on the Members of the House to support the program outlined in H.R. 417. There are, surprisingly enough, no specific formal education or job experience requirements for Foreign Service officers. Successful candidates, of course, usually have at least the equivalent of the bachelor's degree, and many also hold advanced degrees.

The fact remains, however, that we are sending too many of our representatives abroad without the specialized preparation necessary for the unique demands that will be made on them.

Broad general knowledge is no longer enough to "wage the peace," nor do short training and indoctrination periods at the Foreign Service Institute always provide an adequate background for the men and women who play such a strategic role in the work of the Service. A program combining a uniformly high level of academic instruction with the distinct advantages of on-the-job training is urgently needed.

My bill provides for such a program through the establishment of a Foreign Service Academy. I call the immediate attention of the Congress to this matter and urge the early consideration of H.R. 417.

WIDOWS' BENEFITS, SOCIAL SECURITY ACT

Mr. SANTANGELO. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SANTANGELO. Mr. Speaker, I have introduced today a bill to amend title II of the Social Security Act to reduce the eligibility age for widows' benefits from 62 to 50. I stress the word "widow."

This bill would carry out the original purpose of the social security law and eliminate a hardship which has developed in its application. The cost would not be great, and the benefits would be many.

In the years since the passage of the Social Security Act, Congress has consistently and determinedly made efforts to improve and expand the social security program. In this process, however, we have learned that these efforts must continue to be made if we are to maintain the program on an equitable basis. Our social security problems are far from being solved.

We made a start in alleviating the problems of the widow in 1956, when Congress abandoned the arbitrary age 65 requirement for widows by lowering it to 62. It is already apparent, however, that this action was not sufficient.

One of the most pressing problems which faces us today, and one which I believe this Congress must solve, is the unjust and difficult position of the widow under present provisions of the law. While a wife enjoys the income which a retired husband receives at age 65, she loses it upon his death if she has not reached the age of 62. Under my bill, if she has reached the age of 50 years, she will still receive social security benefits notwithstanding the death of her husband.

The arguments in favor of my amendment are sound ones, and ones which I believe far outweigh in importance any consideration of the limited amount which this liberalization would cost. Primarily, however, I believe we must view the amendment in the light of the terrible hardship which a widow in this country often faces.

More than a dozen widows in my district between the ages of 50 and 62 have asked my assistance because they found themselves suddenly cut off from social security benefits upon the death of their husband. It is simple enough to close our minds to the entire question, and urge our older women to leave their homes to find employment. This is, indeed, the solution that some widows have necessarily found for themselves. But, for too many of them, this is frequently impossible.

Studies have clearly shown that once a woman passes her 35th or 40th birthday, her job opportunities are severely diminished. At an older age, it may well be impossible for her to find employment, especially when there are so many younger people unemployed and willing and qualified to work. This inability to find employment is especially true for the woman who has spent most of her life in the vital and creative task of caring for her home and family. It is also true for women who have had professional or technical training and experience.

Unable to depend on employment wages for sustenance, these widows generally lack an adequate income from any other outside sources. Difficult though their situation may be, they must wait until they reach age 62 before they are eligible for any payments through the social security program. For many, this may mean long years of virtual impoverishment and hardship.

Considerable injustice in the present age requirement also exists in that a woman who has qualified for social security benefits as a widowed mother with small children may suddenly have all benefits stopped when the youngest child reaches 18. No longer able to qualify for a mother's benefit, she still may not have reached that vital 62d birthday when she would begin to draw benefits as an aged widow. She is, thus, denied benefits at a time when she most needs them and frequently when her children are attending school. As a consequence, children are compelled to withdraw from their educational process to work to support a mother who is too young to receive benefits and too old to obtain employment.

I sincerely believe that the hardship and injustice which exist under our present legislation must be corrected. The amendment which I propose today, I believe, goes far in furthering this end, and I urge favorable consideration of this legislation.

MEMBER BANK RESERVE REQUIREMENTS

Mr. BROWN of Georgia. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. BROWN of Georgia. Mr. Speaker, I introduced yesterday a bill (H.R. 5237) to eliminate a long-standing inequity in the law relating to reserve requirements for banks that are members of the Federal Reserve System. Under the Federal Reserve Act, member banks are required to maintain reserves amounting to certain percentages of their net demand deposits; currently, the requirements are 18 percent for central reserve city banks, 16½ percent for reserve city banks, and 11 percent for all other banks—commonly referred to as "country banks." Today, each member bank must maintain its required reserve balance on deposit with its Federal Reserve Bank; it cannot count cash in its vaults toward meeting its reserve requirement. This is inequitable because operating conditions force some banks, particularly country banks, to keep larger amounts of cash on hand than other banks do. All banks should be permitted to count their vault cash toward meeting

their reserve requirements because, as the Federal Reserve Board has stated:

> Vault cash holdings and reserve balances at the Reserve Banks are interchangeable and both serve the same purpose in influencing the volume of bank credit.

Accordingly, my bill would allow the Federal Reserve Board to permit member banks to count all or part of their currency and coin as reserves. It is necessary to give the Board some flexibility in putting this change into effect, because if it were immediately put into effect in full for all banks it would inflate the money supply too drastically.

The Federal Reserve Act does not specify the exact reserve requirements for member banks, but rather authorizes the Federal Reserve Board to establish reserve requirements from time to time with maximum and minimum limits prescribed in the act. Today the act fixes a floor of 13 percent and a ceiling of 26 percent for central reserve city banks; my bill would change these limits to 10 percent and 20 percent, the same as apply for reserve city banks. Finally, the bill would give the Board wider discretion in allowing banks in central reserve cities or reserve cities to maintain the lower reserves in effect for reserve city banks or country banks, where the character of the bank's business warrants such an adjustment.

I am convinced that the bill's provisions as to vault cash are sound and necessary to give fair treatment to all banks. While I realize that there may be differences of opinion as to whether the other provisions of the bill go too far or not far enough in permitting the Federal Reserve Board to eliminate distinctions in reserve requirements as between banks, I feel that this compromise proposal worked out by the Board deserves serious consideration by the Banking and Currency Committee. I have been assured by the chairman of the committee, the Honorable BRENT SPENCE, that he will refer the bill to the subcommittee of which I am chairman, so that early hearings may be scheduled. Persons interested in testifying on the bill should write to me, in care of the House Banking and Currency Committee, room 1301 House Office Building, by March 20, so that I may arrange a schedule of witnesses on the bill.

NATIONAL PEANUT WEEK

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FLOOD. Mr. Speaker, for many years I have been appealing to you in behalf of anthracite coal, with some degree of success but not, of course, sufficient to take care of what I wanted you to do.

Today I am sure I will have better luck, because I can appeal to the great agriculturists on both sides of the aisle.

I speak in behalf of peanuts. I want you to know this is National Peanut Week. We are going to have a big shindig all over the town today, from all over the country, on peanuts. My home town of Wilkes-Barre, Pa., is the headquarters of Mr. Peanut, the great Planters Peanut Co., although we have to go down to Virginia and some other places to grow the peanuts. However, I am sure you will be excited to know that this is National Peanut Week. It therefore seems appropriate that we pause for a moment to pay tribute to this nutritious food product that has become so important in the diet of people over the entire world.

The peanut was introduced in New York about 1870, and soon became known the country over at the circus, baseball parks, stadiums, carnivals, and amusement parks the length and breadth of this land. But as we enjoy crunching the peanuts and savoring their flavor, we tend to forget how important the lowly peanut is, not only for thousands of farmers in the South, but as an ingredient in many industrial products, and as an important source of energy for our citizens. We fail to realize the progress that has transformed the peanut from a rare delicacy to a widely consumed nutritious food.

The peanut ranks high in food energy with abundant vitamins and all the basic elements of good food. It is nourishing and fully digestible. One pound of peanut butter contains more calories, protein, minerals, and vitamins than a pound of beefsteak. A pound of peanuts contains 2,700 calories, which is the daily requirement for a man, and 118 grams of protein, which is 1½ times the daily requirement of an adult. Peanuts are a good source of phosphorus and also contain a considerable amount of both calcium and iron. Based on a recommended daily allowance for adults, a pound of peanuts contains 1⅗ times the daily need for calcium, and four-fifths of the daily need for iron. Peanuts and the products that are made from the oil, and the meal which remains after the oil has been taken out, and the way these foods can be combined with other foods should be of universal interest.

Nowadays the housewife relies more and more on numerous peanut products to add a party touch to innumerable household occasions. She uses peanut oil in the preparation of fried foods and in baking the most delicate pastries.

Thanks to companies such as the Planters Nut & Chocolate Co., Wilkes-Barre, Luzerne County, Pa., a wide variety of peanut products are always available to us in nearly every store at reasonable prices. Let us hope that the peanut industry in this country and the world over will remain strong and that we will always be assured of an adequate supply of this most important food product.

HAWAIIAN STATEHOOD

Mrs. GREEN of Oregon. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include a memorial from the Oregon Legislature.

The SPEAKER. Is there objection to the request of the gentlewoman from Oregon?

There was no objection.

Mrs. GREEN of Oregon. Mr. Speaker, I have the honor to lay before the House an enrolled memorial of the Legislative Assembly of the State of Oregon, praying for the early enactment of the bill for Hawaiian statehood. I ask that the text of this memorial, and the letter of transmittal, signed by the Honorable Walter J. Pearson, president of the Oregon Senate, be printed at the end of my remarks. Mr. Speaker, I am proud of the fact that one of the numerous bills for Hawaiian statehood which has been before the Committee on Interior and Insular Affairs, is H.R. 1917, which I introduced early in the session. We in Oregon, as this memorial indicates, have long enjoyed a close relationship with the people of Hawaii, and we are convinced of the mutual benefit which has arisen from that relationship. In a sense, Oregon's ties with Hawaii are particularly close, since our great State system of higher education has had the privilege of enrolling many young men and women from the Territory.

In this hundredth year of Oregon statehood, the people of Oregon and their Legislative Assembly are united in the hope that this 86th Congress will emulate the example of its immediate predecessor and bring to an end the long period of tutelage in which the American citizens of this Pacific Territory have been held, long after demonstrating their ability to use the tools of self-government, their willingness to assume the burdens of statehood, and their complete understanding of and devotion to, the American way of life.

STATE OF OREGON,
OREGON STATE SENATE,
Salem, March 3, 1959.

HON. EDITH GREEN,
Member of Congress,
Old House Office Building,
Washington, D.C.

DEAR MRS. GREEN: Enclosed is Senate Joint Memorial 1 relative to statehood for Hawaii signed by the president of the senate and the speaker of the house on February 25. We are hopeful that Hawaii will this year become the 50th State of the Union. I know that you, personally, have been active in this endeavor for a long time.

WALTER J. PEARSON,
President of the Senate.

SENATE JOINT MEMORIAL 1

To the Honorable Senate and House of Representatives of the United States of America, in Congress assembled:

We, your memorialists, the 50th Legislative Assembly of the State of Oregon, in legislative session assembled, most respectfully represent as follows:

Whereas there have been, from the earliest hours of our history as a State, the closest ties and relationship between the people of the Sandwich Islands, now the Territory of Hawaii, and the people of Oregon; and

Whereas these fine Americans have long ago fully demonstrated their capacity to govern themselves as a free commonwealth within the American Union; and

Whereas we know and respect the people of Hawaii as a result of close association through commercial, cultural, recreational, and social exchanges; and

Whereas the State of Oregon, alone among the States, has enriched our association and strengthened our bonds with the people of Hawaii through the free interchange of territorial students in our State system of higher education; and

Whereas this February 14 is the 100th anniversary of the admission of Oregon to the Union; and

Whereas the admission of Oregon's respected friend Hawaii to the sisterhood of States of the Union would further strengthen these bonds and would give added cause for jubilation on the commemoration of our own statehood: Now, therefore, be it

Resolved by the Senate of the State of Oregon (the House of Representatives jointly concurring therein), That the Congress of the United States be memorialized to grant immediate statehood, under legislation now pending, to our sister Hawaii, as the 50th State of the United States; and be it further

Resolved, That copies of this memorial be sent to the President of the United States, to the President of the Senate and the Speaker of the House of Representatives of the United States, to the Delegate in Congress from Hawaii, and to all members of the Oregon congressional delegation.

MONTANA LEGISLATURE URGES ACTION ON YELLOWTAIL DAM

Mr. ANDERSON of Montana. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include a memorial from the State Legislature of Montana.

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

Mr. ANDERSON of Montana. Mr. Speaker, the 36th Legislative Assembly of the State of Montana today sent to Congress its Joint Memorial 2, requesting the introduction and enactment into law of legislation calling for the resumption of work on the Yellowtail Dam project on the Big Horn River in Montana and the provision of funds necessary for the resumption of this vitally needed multipurpose project.

The memorial follows:

HOUSE JOINT MEMORIAL 2

Joint memorial of the Senate and House of Representatives of the State of Montana to the President of the United States, Dwight D. Eisenhower; Senator James E. Murray, of Montana; Senator Mike Mansfield, of Montana; Congressman Lee Metcalf, of Montana; Congressman Leroy Anderson, of Montana; the Committee on Appropriations of the U.S. Senate; the Committee on Appropriations of the U.S. House of Representatives; the Committee on Interior and Insular Affairs of the U.S. Senate; the Committee on Interior and Insular Affairs of the U.S. House of Representatives; the Committee on Public Works of the U. S. House of Representatives; the Secretary of the Interior, Fredrick B. Seaton; the Commissioner of the Bureau of Reclamation, Wilbur A. Dexheimer; the Secretary of the Army, Wilber M. Brucker; the Director of the Budget, Maurice H. Stans; requesting the introduction and enactment into law of the necessary and proper legislation to authorize and provide funds to start the construction on Yellowtail Dam on the Big Horn River in the State of Montana for 1959

Whereas since the turn of the century, men of good will and great vision have labored long and wisely to bring Yellowtail Dam into being; and

Whereas many and high were the hurdles and obstacles that had to be overcome before construction of the Yellowtail Dam could be started; and

Whereas one by one, these many obstacles preventing the construction of Yellowtail Dam were overcome, until one alone remained, and that one was the acquiring of the damsite, upon which the proposed Yellowtail Dam would in time be built, from the Crow Indian Tribe; and

Whereas that one remaining obstacle, the acquiring of the Yellowtail damsite, has, due to the wise action of the last Congress, been overcome with the paying of $2½ million to the Crow people for this valuable piece of property; and

Whereas the American people have a large investment in the proposed Yellowtail Dam; and

Whereas no returns can be had from the moneys already invested in Yellowtail Dam until said Yellowtail Dam is constructed: Now, therefore, be it

Resolved by the 36th Legislative Assembly of the State of Montana now in session (the Senate and House of Representatives concurring), That the Congress of the United States be requested and urged to appropriate the sum of $10 million, so that the construction of the sorely needed Yellowtail Dam project may begin at once; be it further

Resolved, That the amendment include reservation of a block of power for Montana; be it further

Resolved, That copies of this memorial be submitted by the Secretary of the State of Montana to each of the individuals, and to the chairman of each of the committees mentioned in this memorial, as well as to the Presiding Officers of both Houses of the U.S. Congress, RICHARD M. NIXON and SAM E. RAYBURN.

JOHN J. MACDONALD,
Speaker of the House.
PAUL CANNON,
President of the Senate.

AMBASSADOR ABBA EBAN'S RESIGNATION

Mr. PELLY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. PELLY. Mr. Speaker, the Embassy of Israel has announced that Ambassador Abba Eban has resigned and will return to Israel the end of May.

Those of us who know of his fine service in the United States as well as his work in the United Nations, will all join in wishing him well in any future career.

Speculation has it that the Ambassador is going home to enter politics, and if so there is every reason why he should achieve success.

As his country's representative in Washington, D.C., he has demonstrated remarkable talents and a brilliant mind and knowledge of world affairs.

Ambassador Eban's place will not be easily filled, but to compensate for our loss we can be confident that wherever he is entrusted with an opportunity to serve, the United States and freedom-loving people everywhere can expect from him continued and greater accomplishments in a common cause and friendship.

A NATIONAL LOTTERY

Mr. FINO. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. FINO. Mr. Speaker, while we in this Congress continue to ignore the tremendous revenue-producing features of my national lottery bill, many States and cities, hard pressed for additional funds, have been wrestling with proposals to take full advantage of the natural betting urge of the American people.

The city of New York, which finds itself in financial straits, has asked the State legislature for legalization of off-track betting. Trial balloons have been sent up in Louisiana, Pennsylvania, California, Arizona, and other States and municipalities all across the country in an effort to tap the benefits of gambling.

The other day the New York State Legislature at the recommendation of the Governor approved a bill calling for an additional 10 racing days to the State's flat track racing season. This recent legislative action was not only to further satisfy the gambling instincts of man but, more importantly, it was designed to increase the State's revenue from parimutuel betting to the tune of $4½ million annually.

All of these legislative movements represent a complete recognition of the fact that the urge to gamble is deeply ingrained in humans and that its regulation by law will provide the Government with tremendous funds which could and would help to relieve the unconscionable burden borne by the taxpayers.

Why not capitalize on this natural gambling spirit of the American people?

My national lottery bill is a voluntary and painless revenue-raising measure which would bring into the coffers of our Treasury $10 billion a year. It is about time that we wiped out hypocrisy and seriously considered the merits of this legislation. I doubt very much whether the American taxpayers would rather continue to pay higher and higher taxes than resort to the tremendous revenues that can be realized from a national lottery in the United States.

GEN. JOHN J. PERSHING

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, today I am introducing a joint resolution to establish a commission for the celebration of the 100th anniversary of the birth of Gen. John J. Pershing. Surely, Mr. Speaker, we in this country, and in other countries too, ought to pay tribute to the great general who led us to victory in World War I. I believe the people of the United States will thoroughly endorse this measure.

Mr. Speaker, I am introducing also today a bill to incorporate the Army and Navy Union of the United States.

THE READING OF GEORGE WASHINGTON'S FAREWELL ADDRESS

Mr. MUMMA. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. MUMMA. Mr. Speaker, George Washington's Farewell Address to the Congress has always stood out in my mind as a stirring one and one of the greatest messages he has given us in his writings.

Symbolical of his stature and the greatness of this speech, here each year in the House of Representatives and in the Senate also, we devote a session of Congress to a reading of that address. This year was no exception when once again we paid homage to the Father of our Country and selected his Farewell Address to be read again into the RECORD of the proceedings of the House and Senate.

I just wanted to say that I would like to commend it as a wonderful reading experience so to that end I am having George Washington's Farewell Address printed up at my own expense and plan to give it circulation among my constituents. These brief introductory remarks will serve as a short preface to that great literary work.

ELECTION TO COMMITTEE

Mr. HALLECK. Mr. Speaker, I send to the desk a resolution (H. Res. 199) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That CHARLES E. CHAMBERLAIN, of Michigan, be, and he is hereby, elected a member of the standing Committee of the House of Representatives on House Administration.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SPECIAL ORDER GRANTED

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the special order to address the House for 2 hours tomorrow, which was granted to the gentleman from New York [Mr. POWELL] may be transferred to today.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

ROBERT AUFDERHEIDE, SUPERVISOR OF THE WILLAMETTE NATIONAL FOREST

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Oregon [Mr. PORTER] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. PORTER. Mr. Speaker, the Fourth District of Oregon contains more national forests than any other district in the Nation. One national forest alone, the Willamette, which contains 1,615,000 acres, contributes over 10 percent of the total revenues received from all the national forests in the United States. The other national forests in my district, the Siuslaw, the Siskiyou, the Rogue River, and the Umpqua, are also tremendously productive.

But productivity in terms of timber is not the sole criterion by which we can judge the great contribution these forests make to our national well-being. These forests are watershed forests and recreation forests. They are not grazing forests. There are great expanses of solid Douglas fir, hemlock, cedar and pine, mile after mile of it. The towering trees, 200 feet and even taller, stretch for miles like an unbroken sea.

But these forests do not exist by the grace of God alone. They exist because of the foresightedness of men like Gifford Pinchot, who saw that if we were going to have forests in perpetuity, man was going to have to manage his natural resources for the benefit of posterity. The United States Forest Service has had this job and discharged it well since 1905. The people in the Forest Service have the responsibility for doing the job and in carrying out this responsibility they have had the cooperation of the citizens of the Nation. But I think it is true that those who have the job are really the responsible ones, for by their day-to-day action, by their devotion to duty the job is done. While the general public has an interest, it does not have the responsibility.

LEADERSHIP FROM THE FOREST SUPERVISOR

In my district we have been exceedingly fortunate in the leadership that we have had from our forest supervisors. One of these men stands out above the others. His name is Robert Aufderheide. He started with the Forest Service in 1933 on what is now the Gifford Pinchot National Forest in the State of Washington. Aufderheide's first job was planting trees. He then came down to Oregon working first in eastern Oregon on the Ochoco National Forest, then in western Oregon in the Rogue River National Forest. He then returned to the State of Washington—to the great rain forest, the Olympic. After that he worked in research, and in 1950 he returned to my district as supervisor of the Umpqua National Forest at Roseburg. There his record was outstanding, and although a relatively young man, his ability brought him to Eugene in 1954 as supervisor of the Willamette National Forest, the greatest of all the national forests in the entire system.

One of the real problems facing us in Government—and we see it more every day in top positions—is the tendency of people to come in for a few years and when they have just about learned their jobs to go back where they came from to earn more money.

VALUE OF EXPERIENCE AND UNDERSTANDING

The art of government requires not only dedicated and aggressive leadership but constant effort. I think that the work Bob Aufderheide has done as supervisor of the Willamette National Forest is an outstanding example of the benefit that the people get from experienced leadership. He has brought to the job a great deal more than experience. He has an understanding of forest problems, of silviculture and tree growth, and of the economics of the logging industry. He has successfully practiced multiple-use management in such a way that all these benefits have flowed in great measure.

And he has had problems in meeting the challenge before him. Funds have not always been available to do the job that he knew should be done. Last year the Senate Interior and Insular Affairs Committee made a review of the national forest timber sales program. It was a genuine pleasure to me to see that while some of the other forests had not overcome problems which they faced due to fund shortages, the Willamette National Forest under Bob Aufderheide's superior leadership had done an outstanding job and in fact was an example for the rest of the region.

Under his leadership a tree nursery has been activated at Fall Creek, not far from Eugene, and a second tree nursery is being established at Westfir. In 1958 alone the Willamette National Forest planted 2.6 million trees. In addition, fire protection and fire prevention have received more than adequate consideration. The log and slash which develops from timber sales are carefully disposed of so that the cutover lands can be returned to early productivity.

PRACTICAL APPLICATION OF RESEARCH

On the Willamette National Forest we also have the H. J. Andrews experimental forest. Bob Aufderheide, understanding the value of forest research and its practical application, has done an outstanding job of applying the results of research so that this forest is doing an above average job of land management.

In my district, which contains the headwaters of the Willamette River, there are a number of dam projects under the Corps of Engineers—Detroit, Hills Creek, Cougar, and Lookout Point. These dams are within the Willamette National Forest. These have a far-reaching impact on recreation use, on timber cutting, on transportation routes and power transmission.

Huge quantities of timber had to be cleared from reservoir basins while these dams were under construction. There were great accumulations of log slash which had to be disposed of carefully. Ranger stations and other facilities had to be moved. Bob Aufderheide dealt with these difficult problems with great skill and foresighted planning so that the Willamette National Forest increased its contributions to community development while solving each of these problems in stride.

All of the people in our part of the country are aware of the tremendous recreation use that is made of our national forests. In 1958 alone 400,000 recreationists visited the campgrounds and

other areas in the Willamette National Forest. Almost 2 million people enjoyed the scenic routes along the Oregon Skyline Trail. Bob Aufderheide, by careful management of the meager Operation Outdoor funds available, has stretched the recreational facilities of the Willamette National Forest to try to accommodate this growing use.

HE KNOWS HIS FOREST

I think the outstanding contribution that Bob Aufderheide has made in his long and successful career has been the understanding that he has developed among all who use and enjoy our national forests of the role these forests play in our Nation's development. Every community within or dependent upon the Willamette National Forest knows Bob Aufderheide. He has visited with every small logger, millowner, Izaak Walton League chapter, wilderness group, chamber of commerce, and the many others who have an interest in how our forests are used. He has been tremendously successful in acquainting them with what conservation really is.

Equally important is the enthusiasm he has instilled in the people who work with him in the Forest Service. His record would not be possible without their cooperation. Their cooperation would not have been obtained without his leadership.

Too often we take for granted the great ability of many of our Federal employees. We take for granted their dedication to duty. I am sure that Bob Aufderheide has never felt that he was sacrificing any material gain in his job. He is too big a man to think of money first and the welfare of his Nation and his community second. There are many more like him in the Forest Service and in other Federal agencies, but I know of none whose capabilities are greater or whose contributions have been more constant.

LEGISLATIVE PROGRAM

Mr. HALLECK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HALLECK. Mr. Speaker, I have asked for this time in order to inquire of the majority leader, if he can at this time, to advise us as to the program for next week.

Mr. McCORMACK. Monday is District Day. I am informed that the Committee on the District of Columbia will have one bill up, H.R. 4282, a bill relating to the amendment of the charter of the Sisters of the Visitation in Washington, which charter was originally obtained by them in the year 1828. The charter is quite a historical one and is signed by John Quincy Adams and it was my great privilege to introduce this bill relating to the amendment of that chapter. If a rule is reported out on Hawaiian statehood, then we will take up that bill on Monday for general debate. That will be general debate only if it is capable of being considered on Monday. In any event, if a rule is not reported out so that we can bring it up on Monday, and a rule is reported out so that it can be brought up next week, I shall bring it up as quickly as possible after the rule is reported out.

If a rule is reported out on the Federal airport bill, H.R. 1011, that will follow the Hawaiian statehood bill. In any event, if a rule is reported out so that it can be considered next week, it will be considered in the House.

If rules are reported out on H.R. 1, that is the Lake Michigan water diversion bill, we will bring that up next week; also H.R. 2575, a bill relating to the pan-American games in Chicago.

The usual reservation, that any further program will be announced later.

Mr. HALLECK. I thank the gentleman.

COMMITTEE ON RULES

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the consent request heretofore granted that the Committee on Rules may have until midnight tonight to file reports be rescinded, and I ask unanimous consent that the Committee on Rules may have until midnight tomorrow night to file privileged rules.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

NATIONAL DEFENSE EDUCATION ACT

The SPEAKER. Under previous order of the House, the gentleman from New York [Mr. LINDSAY] is recognized for 10 minutes.

Mr. LINDSAY. Mr. Speaker, I have today introduced an amendment to the National Defense Education Act designed to eliminate section 1001(f)(1) of title X of the act. This provision reads as follows:

No * * * funds * * * shall be used to make payments or loans to any individual unless such individual (1) has executed and filed with the Commissioner an affidavit that he does not believe in, and is not a member of and does not support any organization that believes in or teaches the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional methods.

I believe that this amendment has been introduced by and has the support of several other Members of the Congress from both sides of the aisle.

It will be noted that I do not propose any change to section 1001(f)(2) of title X, which calls for an affirmative oath of allegiance to the United States.

The American Association of University Professors has pointed out, I believe correctly, that the disclaimer requirement contained in section 1001(f)(1) is subject to the objections of vagueness, possible unconstitutionality, and invidiousness. The association sums up its case as follows:

This disclaimer requirement, which will apply to large numbers of young people seeking loans, fellowships, and grants to carry on their education, and to many teachers and to consulting experts, seems thoroughly harmful. It singles out persons in education as objects of suspicion; it imposes a test oath repugnant to our traditions; and it exposes those signing the affidavit to the possibility of perjury prosecutions resting on vague allegations or improper and intimidating inquiries about their conduct and their beliefs.

The association makes out a good case. An equally strong case against the disclaimer requirement has been made by the Secretary of Health, Education, and Welfare, Dr. Arthur S. Flemming. Dr. Flemming has pointed out that the requirement is, first, unnecessary; second, ineffectual, and third, expensive to administer. Here is what he says in this regard:

All persons involved in the administration of this act would have been able to deny funds to persons who themselves seek, or who belong to organizations that believe in or teach, the overthrow of the Government by force or violence, even though this provision had never been inserted. It is clear that such persons are not entitled to and should not receive funds from the U.S. Government.

Requiring persons who receive funds under this act to sign an affidavit and an oath of allegiance will not uncover any persons who themselves seek or who belong to organizations that believe in or teach the overthrow of the Government by force or violence. Such persons have no scruples about signing such an affidavit and taking such an oath.

The inclusion of this requirement in the National Defense Education Act will make it necessary for educators and students to go through a procedure that results in unnecessary expenditures on the part of the Government without making a contribution to national security.

There is no question but that this requirement has caused great concern among educators. Most educators, I believe, accept the oath of allegiance in this legislation. We require an oath of allegiance in many areas of governmental endeavor. But the disclaimer provision, in the form of a negative affidavit, they regard as a potential threat to their profession. Recently Dr. A. Whitney Griswold, president of Yale University, wrote a letter to Dr. Flemming, Secretary of Health, Education, and Welfare, commending Dr. Flemming for his statement to which I have just referred. In his letter President Griswold refers to the instinctive dislike that educators have for a requirement of this sort. He points out that symbolically such a measure is offensive and that it is not efficacious as a public safeguard, tending to alienate the good will of the loyal citizen without gaining corresponding advantage in protecting the Government against the actions or intentions of the disloyal. He points out further that the requirement also has the weakness of giving the public a false sense of security which, if it became too literal and too strong might lead to our undoing.

Loyalty—

States Dr. Griswold—

can only be won by the powerful attraction of unarmed truth implicit in the educational process. It cannot be induced or assured by oaths exacted in advance as conditions to participation in this process.

Finally, Dr. Griswold warns us that a negative affidavit of this sort is especially

distasteful when it is required of young people just entering the most important phase of their educational experience, as it seems to represent lack of confidence in those young people and in their future as well as in the educational process itself. Dr. Griswold's letter merits wide attention and with his permission and the permission of Dr. Flemming, I ask unanimous consent, Mr. Speaker, that it be included in the body of the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

(The letter referred to follows:)

YALE UNIVERSITY,
New Haven, Conn., December 19, 1958.

Hon. ARTHUR S. FLEMMING,
Secretary, Department of Health, Education, and Welfare,
Washington, D.C.

DEAR MR. SECRETARY: May I commend your statement as reported by the Associated Press on December 15 concerning the affidavit and oath required by the National Defense Education Act of 1958?

It seems to me that there are four main reasons why those of us who participate in the educational process, whether as students or teachers, dislike such measures; and that if these reasons could be more generally understood it might help matters. The first reason is that we recall many instances in the long history of the educational process in which it has been distorted and disrupted by forces operating under the shelter of test oaths. This knowledge has imbued us with an instinctive dislike of such oaths that is not unnatural in the circumstances and should be understandable to persons familiar with history. Moreover, our instinctive dislike is fortified by reasoned objections such as that of the Supreme Court in *Ex Parte Garland* in 1867 when the Court declared "All enactments of this kind partake of the nature of bills of pains and penalties, and are subject to the constitutional inhibitions against the passage of bills of attainder, under which general designation they are included." In our eyes such measures are at best odious symbols, at worst a potential threat to our profession.

In the second place, as you yourself have pointed out, it is hard to understand why anyone should believe such oaths to be efficacious as public safeguards. Far from deterring real transgressors, they offer them a convenient cloak for their intentions and transgressions. In this respect they are worse than futile. They tend to alienate the good will of the loyal citizen without gaining a corresponding advantage in protecting the public against the actions or intentions of the disloyal. They give the public a false sense of security which, if it became too literal and too strong, might lead to our undoing.

Thirdly, it is our conviction that belief cannot be coerced or compelled. On this principle the Russian novelist, Boris Pasternak, whose treatment by his own government with respect to the Nobel Prize has been the object of indignant protest in the United States, has recently spoken eloquently in his novel "Dr. Zhivago":

"I think that if the beast who sleeps in man could be held down by threats—any kind of threat, whether of jail or of retribution after death—then the highest emblem of humanity would be the lion tamer in the circus with his whip, not the prophet who sacrificed himself. But don't you see, this is just the point—what has for centuries raised man above the beast is not the cudgel but an inward music; the irresistible power of unarmed truth, the powerful attraction of its example."

Thus we feel—and we think the overwhelming majority of those who have ever had any experience in teaching students of any age will agree with us—that belief in the rightness of our cause which assumes the positive form of loyalty to the United States, its Constitution and its laws, "can only be won by the powerful attraction of unarmed truth implicit in the educational process. It cannot be induced or assured by oaths exacted in advance as conditions to participation in this process."

Finally, oaths and affidavits of this sort are especially distasteful when they are required of young people who are just entering upon the most important phase of their educational experience. They seem to represent a lack of confidence in those young people and in their future, as well as in the educational process itself. Since they were first embodied in early colonial laws and later made explicit in the teachings and writings of Adams and Jefferson, the right of all Americans to be educated up to the limit of their native ability according to the principle of equal opportunity, and the necessity of providing for such education, have been fundamental articles of our national democratic faith. To attach such conditions to this faith as now appear, particularly in the negative affidavit under section 1001(f)(1), seems like a loss of faith in the faith itself. It seems to say to these young people upon whose education our very survival as a Nation depends that we do not trust them and are not even sure that their education will contribute to our security.

In the normal course of events it would be natural to expect that, as the National Defense Education Act becomes operative, it will undergo revision and improvement through the process of amendment. I hope very much that in this process the requirement of the affidavit and oath may receive further consideration, and I again commend you for calling this matter to the attention of the public.

Believe me,
Respectfully yours,
A. WHITNEY GRISWOLD.

I should point out that Dr. Griswold's objection appears to go to the oath of allegiance as well as the disclaimer provision. I don't think that our consideration of these two provisions should be lumped together and my bill therefore singles out only the disclaimer requirement. I point out also that the Association of University Professors has interposed no objection to the affirmative oath.

I hope that this proposed amendment to the Education Act will receive the widespread support of the Members of this body.

Mr. GRIFFIN. Mr. Speaker, will the gentleman yield?

Mr. LINDSAY. I yield to the gentleman from Michigan.

Mr. GRIFFIN. I want to say that while I think the gentleman has made an important contribution on the subject which he is discussing, perhaps it should be made clear for the RECORD that the defense education bill as it was reported from the House Committee on Education and Labor in the last session did not include the oath provision; it was added by the Senate and was agreed upon in conference.

I do not agree with everything the gentleman has said. For example, I cannot understand the logic of pointing to the cost of administration and then proposing an amendment which eliminates only the disclaimer oath and retains the affirmative oath requirement. If cost is a concern that approach would not seem to be a solution.

Mr. LINDSAY. I appreciate the gentleman's remarks and am glad that he pointed out that the disclaimer provision was not part of the original bill as reported out of the House Committee on Education and Labor and considered by the whole House of Representatives.

I should add on the point of expense that the administration of this bill is in the hands of the Secretary of Health, Education, and Welfare, Dr. Flemming, and it is Dr. Flemming who voices the opinion that in his considered and professional judgment the administration of the disclaimer provision, quite apart from the administration of the oath of allegiance, is both expensive and unnecessary.

I am happy to adopt his conclusion in that regard, as I believe he is highly qualified to speak on this subject.

RESOLUTION TO INVESTIGATE THE NATION'S MONEY AND CREDIT SYSTEMS, HOUSE RESOLUTION 50

The SPEAKER. Under previous order of the House, the gentleman from Texas [Mr. PATMAN] is recognized for 30 minutes.

Mr. PATMAN. Mr. Speaker, I desire to call attention of the Members of the House to a resolution now pending which would authorize a committee of the House to make a complete and thorough investigation of the Nation's monetary and debt-management systems.

This is House Resolution 50 which was introduced by me.

It has now been 50 years since there was an investigation of the Nation's money and debt systems. And a great many changes have come about in these 50 years. Many changes have come about in the credit system. Many changes have come about in Government, even in the ideas about the responsibility of Government. And many changes and improvements have been developed in the ideas and techniques for proper money and debt management. More than that, there have been recent changes in the policies and operations of the Federal agencies involved which have a critical bearing on our whole economic system. Such an investigation is long overdue.

I proposed such an investigation as this in 1955. The House considered my resolution that year and voted it down. Our Republican colleagues made a party issue of the matter and defeated the resolution with the help, I might add, of a few Democrats.

Then, again, early in the 85th Congress I proposed such an investigation. The House considered my resolution in 1957 with the same result. The Republican Party again made a partisan issue of the investigation and succeeded in defeating it again.

Certainly it is no secret why all previous efforts in this body have failed to produce an inquiry into the handling of the Nation's debt and monetary affairs

under this administration. These efforts have failed simply because this administration has mobilized all of its forces to prevent an investigation.

I might add that since the last resolution was defeated there has been a great change in the House. If there had been a switch of 25 votes on the last resolution we would have won. Since that time 48 Members on the other side who voted against the resolution have been defeated. That means if those who defeated the ones who had voted against the investigation are now in favor of it, then we will win by approximately 25 votes.

In the weeks and months preceding the votes on my two previous resolutions, powerful financial groups were busy pulling strings and passing down orders to defeat these resolutions. National associations, such as the American Bankers Association, sprang into action and mobilized their membership to manufacture "grassroots" opposition. Republican leaders in the House went to work and—not once, but twice—organized their Members with a party solidarity seldom reached in the history of the House. And they did not stop at merely lining up passive opposition in their own ranks. They held party caucuses to do what the Wall Street Journal called "generate steam" against these resolutions.

When we voted in 1955, only 1 out of the 203 Republican Members of the House broke away from the organized opposition and voted to investigate. And when we put the question to a vote again in 1957, only 2 out of the 200 Republican Members voted to investigate.

In reminding the Members of the history of the two previous resolutions, my purpose is not to embarrass our colleagues on the other side of the aisle. By bringing up the facts which now show how misled they were or how wrong they were in listening to the word passed down from the Nation's money manipulators, I only wish to make the point that the House has not considered this proposal on its merits.

When we voted on this proposal in 1955, business was prosperous. Business was still prosperous, on the whole, when we voted again in early 1957. At least big business was booming; and our economy had been making a modest year-to-year growth. Almost all of the people who needed and wanted to work had jobs.

These rather favorable conditions were associated with a widespread belief that our Government had a new-found magic in its money and interest policies. There had been many official utterances and much propaganda which would have us believe that this magic could confidently be relied upon, not only to prevent inflationary booms and preserve the value of the dollar, but to lift the economy out of a recession, should so unlikely an event ever occur again. The brief recession of late 1953 and early 1954 was not, we were then told, a result of a first and overhasty attempt to raise interest rates throughout the business system. On the contrary, we were told the rapid recovery from that recession was positive proof that our Government's monetary magic holds all the curative powers needed to deal with unforeseen economic ills. To many of us, no doubt, continuing prosperity seemed assured.

Under these conditions, it is perhaps understandable why our Republican colleagues could profess a blind and unquestioning faith in the mysteries of our Government's bag of monetary tricks. It is perhaps understandable how, acting on blind faith, they would mobilize to prevent an investigation which seemed to be a probing into the administration's most sacred innerworkings. After all, the official wisemen had solemnly assured the country that the high-interest, tight-money policies then in vogue were for a good purpose. They assured us the purpose was to check an inflation which the money managers thought was about to happen, and which did happen after their high-interest cures had been swallowed.

TIME TO STOP GUESSING

What is needed for an understanding of our money and credit systems is an investigation and study of both the public and the private agencies of banking and finance. Such an investigation must develop a complete understanding of the functions and policies of the Federal Reserve System, since this agency more than any other determines how much money and credit are available for business, farmers, and consumers—through the privately owned agencies of banking and finance.

Such an investigation must develop a full understanding of the functions and policies of the Treasury Department, since the operations of this agency also have an important bearing on both interest rates and the amount of credit which is available in the private agencies of banking and finance. As the Nation's biggest user of credit, the Treasury greatly influences these things by the kinds, amounts, and prices at which it issues Federal securities; and as the Nation's biggest bank depositor, it greatly affects these things by the amounts of funds which it deposits with the private banks, and by the conditions under which it leaves these funds on deposit. Such an investigation must develop an understanding of the functions and policies of the private commercial banks, because these banks also operate on a delegated power of the Government to create money, and to destroy money and thus lessen the money supply.

Such an investigation must also make a critical review of the functions and policies of the Federal agencies which regulate, supervise, and examine the commercial banks, such as the Comptroller of the Currency and the Federal Deposit Insurance Corporation.

Finally, such an investigation must develop an understanding of the part played in the Nation's money and credit systems by those kinds of financial companies—such as the insurance companies, the investment trusts and others—which have come into being or come to be important sources of credit since the last monetary investigation was made almost 50 years ago.

As to the Federal Reserve System, there is certainly one thing that should be cleared up in the public's mind. Some Federal Reserve publications state that the Federal Reserve banks are owned by the commercial banks through the ownership of stock in which the commercial banks have invested in the 12 Federal Reserve banks. Yet that is absolutely untrue. The truth is that the commercial banks have invested—it is an involuntary investment—only about $350 million in what is called "stock." And the word "stock" in this instance is a misnomer. It is not stock. The private banks have no proprietary interest whatever in the Federal Reserve System. Upon the investment in that stock the banks receive 6 percent interest, or they have been since 1913; and that is all they get out of it. That is all they are supposed to get out of it.

Mr. OLIVER. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I am glad to yield to the gentleman.

Mr. OLIVER. Mr. Speaker, I want to commend the gentleman for the fight which he has carried on over these many years on this very subject. To me it is the very essence of our problem today in meeting up to the needs of this economy of ours.

I should like to ask the gentleman this question. Is it not true that there is considerable testimony in the various records of the Government, committees and whatnot, that substantiates the very point which the gentleman has made, that there is no proprietary interest in this so-called stock?

Mr. PATMAN. That is very true. It took me 20 years of interrogating different members of the Board of Governors of the Federal Reserve System and others in authority to get that admission. But in the last 3 or 4 years we have gotten that admission repeatedly, because that conclusion is inescapable. The banks do not own the Federal Reserve System. The Federal Reserve System is owned by the United States Government.

Mr. OLIVER. Mr. Speaker, will the gentleman yield further?

Mr. PATMAN. I yield further.

Mr. OLIVER. Am I correct in my understanding that the American Bankers Association itself have so admitted on various occasions?

Mr. PATMAN. Yes, they have admitted it.

I want to say to the gentleman that the Federal Reserve System comes nearer to being a cooperative than any other form of organization. The commercial banks that own this so-called stock, cannot vote that stock according to the amount of the stock they hold. It has no such relationship to voting. This is just like a cooperative. Each bank has one vote, whether it is a big bank or a little bank.

Mr. OLIVER. Mr. Speaker, will the gentleman yield further?

Mr. PATMAN. I yield further.

Mr. OLIVER. I want to say to the gentleman that I thank him for this

opportunity to listen to this discussion, and I want him to know that I join him in his fight and shall lend him such support as I am capable of lending.

Mr. PATMAN. I thank the gentleman. His support is most welcome.

May I state that in a very short time, the next day or two, I expect to be presumptuous enough to send a letter around to the Members of the House asking them if they would like to be notified of a meeting in the Caucus Room, at which time we expect to organize a bloc for the purpose of sponsoring this resolution and similar resolutions having to do with correcting this high-interest hard-money policy. I should like to get as many Members as I can, and ask each one of them to be cosponsors and have just as much credit as I would have for anything that may be accomplished. In other words, we would all go into this together, working shoulder to shoulder, and receive equal credit for any achievements that might come our way.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield.

Mr. JOHNSON of Colorado. I appreciate the opportunity of hearing what the gentleman has to say. May I ask him if I am correct in my understanding that the President feels that the Federal Reserve System is independent of the Chief Executive?

Mr. PATMAN. Mr. Speaker, the President has stated that it is independent—which is a great disappointment to me and I think many other people, because section 3, article II, of the Constitution states—in outlining the duties and responsibilities of the President—"that he shall take care that the laws be faithfully executed." That is the Constitution. The Federal Reserve Act is a law just like any other law. It was passed by the Congress and signed by the President of the United States. When the President says he has no responsibility, that this agency of the Government is separate and independent, I think he is wrong. I am afraid he has accepted the wrong advice.

I concede that in 1951 the Federal Reserve attempted to secede from the Government, and I use that phrase "secede" advisedly. It attempted to secede from the Government and go out on its own, to be a fourth branch, if you please. The Federal Reserve people had been looking for an opportunity to do that for a long time. The opportunity came in 1951 when the popularity curve of the then President of the United States was at a low level, and they took advantage of that opportunity to declare themselves independent.

They are using the Government's money which they obtain from the Bureau of Engraving and Printing free of charge. They have the use of this money to trade for U.S. Government securities that are interest-bearing. They keep the interest-bearing securities in their vaults, and the taxpayers must pay interest on those securities, the amount aggregating around $600 million a year. That gives the Federal Reserve ample funds to spend for any purpose in the world, and they are spending it for almost every purpose. Then 90 percent of what is left over goes back to the Treasury of the United States. All of it should go back to the Treasury, because the money belongs to the Government, but they keep about 10 percent of it each year and put it in a "surplus reserve."

Mr. JOHNSON of Colorado. If I understand the situation correctly, last year the gentleman from Wisconsin [Mr. REUSS] suggested that the monetary and fiscal policies of this Government be brought into line with the other policies under the Employment Act of 1946 in order that we could promote and maintain maximum employment, production, and purchasing power. We were given to understand from reading that record in the hearings of the Committee on Government Operations that the President refused to submit any recommendations with respect to monetary and credit policies to this body, because that was not in the executive branch. It seems to me the gentleman's suggestion that there be a congressional resolution would certainly be in order so long as this administration is in power. If the administration is not going to review the policies of the Federal Reserve System, then it has to be the responsibility of somebody, and perhaps the Congress should assume some responsibility. Is that the gentleman's understanding?

Mr. PATMAN. Yes; that is exactly right. The last economic report of the President does not even mention money and credit policies, outlook, problems, and so on. Yet this report is supposed to present a complete economic picture of the Nation, to carry out the Employment Act of 1946. I do not know what solution the gentleman from Wisconsin [Mr. REUSS] proposes. I have not studied it.

But this much I would say. I believe in the present banking system. I would make no fundamental change in it. I do not object to the Federal Reserve System.

I do not object to the fractional reserve system nor to the private banks using the Government's power to create money, which they are exercising and enjoying today, to the extent that they use this money-creating power to provide business and consumer credit—particularly to people in the area where the bank is located. But I do not think the private banks should use the Government's money-creating power which is delegated to them to buy securities of foreign governments or to buy securities of the U.S. Government. And for that matter, I don't think the country banks should use their power to buy securities of New York City, Chicago, San Francisco, and so on. In other words, the local banks should serve the local areas that they are supposed to serve. The Federal Reserve System is a great system. There is nothing wrong with it that could not be cured by putting public officials in all the positions of power and trust. At present, many of the top policymakers are not public officials—they are representatives of the private banks. They should all be public officials so that they will carry out the will of the Congress that created the System. The System operates on a delegation of Congress' power to create money and regulate the value thereof.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield for just one more statement?

Mr. PATMAN. I yield.

Mr. JOHNSON of Colorado. Mr. Speaker, it seems to me that the Congress in 1946 made it clear that it was their intent that all of the programs of the United States be used to promote and maintain maximum employment, production, and purchasing power and that the hard-money policy that had been followed by the Federal Reserve Board in recent years is definitely and fundamentally at variance with securing full employment. The fact that we still have nearly 5 million at present unemployed after more than a year of public discussion at this point, and the fact that we have interest rates still going up, it would seem to me to be ample evidence that something is fundamentally if not absolutely rotten in Denmark, and at least something is fundamentally weak in our monetary and credit policy and it is high time that this Congress called into examination the monetary and credit policies in an effort to try to get the Federal Reserve which is the duly authorized banking system to act responsibly in keeping with the announced policy of both the Republicans and the Democrats in the Employment Act of 1946, and I thank the gentleman for the statement that he is making because I think he is pointing in that direction.

Mr. PATMAN. The gentleman is entirely right. The Employment Act of 1946 imposes a duty on every agency of our Government to do certain things, and to coordinate, to achieve maximum employment, production, and purchasing power. The Federal Reserve officials have admitted, in answer to questions, that they recognize it as their duty to carry out the Employment Act of 1946. But they have a rather unusual way of attempting to carry out this duty.

We had Mr. Martin, Chairman of the Federal Reserve Board, before the Joint Economic Committee early last month. Senator DOUGLAS pointed out to him that prices had been stable for almost a year, but that we have 6 percent of the labor force unemployed. Mr. Martin seemed to feel he should not do anything about this. He said he believed that some employment would be provided by what he called further adjustments in the market. Senator DOUGLAS asked him what he would do if after 6 months these people are still not back at work, and Mr. Martin answered that he could not say. Actually, the Federal Reserve is now tightening the purse strings and it is choking off the business recovery, in my view. We are in one of those periods, in my judgment, when we have sufficient consumer and business demand to have full employment, but the Federal Reserve's tight-money policies are holding the country back from full employment.

Early last year, however, in the depths of the recession, the Federal Reserve announced that it was trying to do something about the recession by easing credit. What the Federal Reserve did was to put into the laps of the private banks $3½ billion of new reserves, free of charge, on which these banks could create money at the rate of seven to one to acquire earnings assets. This was supposed to be for the purpose of helping the banks help business and help consumers. But what the banks did was create $10 billion with which to buy U.S. Government securities. They invested in U.S. Government securities, but they did not use the money to expand business loans. They actually called in and canceled $1½ billion of business loans. This $10 billion free gift of Government securities to the private banks, which the Federal Reserve could have bought itself, will cost the taxpayers between $300 million and $400 million in interest charges each and every year.

Do you not think we ought to do something about this? Do you not think we ought to do something about the high interest policy? It is running wild. The Treasury is saying that we are facing inflation. Insurance companies and the Federal Reserve say we are facing inflation. That is scaring the investors away. They are saying, "If we are going to have inflation, why invest in long-term bonds? We will only invest in stocks and perhaps a little in short-term bonds." They say, "Why take life insurance that will be paid off in cheaper dollars?"

This is a terrible campaign that they are putting on. It is against the public interest.

After 50 years we certainly should take a look at what is going on. I imagine you will find some things that will cause you to wish you had gone into these matters many years before now.

STUDIES BY PRIVATE GROUPS ARE NO SUBSTITUTE FOR CONGRESS' DUTY

Clearly, it is a responsibility of Congress to learn the facts and gain for itself an understanding of our money and credit system. We cannot sit back and wait for private groups to tell us what they think we ought to know.

These things are of great importance, and it is clear that both the administration and important private groups think so.

Only recently the Committee for Economic Development set up a large committee of private individuals to make an investigation. But unfortunately—and I say this with all respect to the individuals involved—this group is topheavy with people who have an ax to grind and who have fixed ideas about the answers which their investigation should reveal. Furthermore, this group of private businessmen is handicapped. They do not have subpena powers and they can command only the testimony and the facts which the bankers want to give. Finally the group will probably have no report and no information for the public for 3 years.

IS THE RECESSION BY ACCIDENT OR DESIGN?

The investigation which I propose that a committee of the House make will have both short-term and long-term results. Obviously, much of the information and understanding we need, and should have developed long ago, cannot now be developed for many months and perhaps even several years. On the other hand, we should be able to obtain promptly the answers to some of the key questions facing us today. We should be able to learn rather quickly whether or not Congress is wasting time and giving the people false hope in considering any measures to help pull the country out of this recession. If this recession is a deliberate objective and plan of the money-managers, then we should be able to learn that rather quickly, in which case we can quit wasting time on the kind of antirecession measures we have been considering. Furthermore, if this recession is planned, as many people think, then we should be able to learn when the money-managers plan to bring us out of the recession, if ever.

Developing this information will not only help the people in making their plans for the future; it will also tend to give everybody a chance at the financial gains which can be made by having this information. On the other hand, if the money-managers are not capable of manipulating the country out of the recession, we should know that. If these monetary manipulations are not capable of doing the things we have been led to believe they can do, then we should know that the bankers and the moneylenders have been enriched for no good purpose and the people are paying, according to my estimate, $10 billion in interest charges they would not be paying if interest rates had been left at their 1952 levels. This $10 billion a year means $60 per capita or $300 annually for a family of 5. We should know these things so that we will free ourselves from a misplaced faith and put our minds to finding methods of government that will work, and work in the public interest.

Surely no Member of ths body can hold a blind faith in the money managers today. Heaven knows it is time, and past time, that we open our eyes and ears and learn for ourselves how our Nation's money and credit affairs are being managed. We should know who is managing these affairs and for what purpose. And we should try to learn to what extent guidance of this Nation's economic destiny does depend upon manipulations of the supply and price of money, and what the virtues and evils of these methods are.

The Nation is still in a serious recession. At least 6 percent of the labor force is unemployed. Furthermore, according to the Joint Economic Committee's study of the President's Economic Report, it appears that the administration is expecting unemployment to continue at about 6 to 7 percent through the end of this year. Thousands of efficient small businesses are going bankrupt monthly. The Nation's production has fallen, and its productive strength deteriorated, when our very hopes of winning the cold war rest on increasing production and economic growth.

WE SHOULD FIND OUT IF THE RECESSION WAS PLANNED

I do not hold any categorical belief that the recession was caused, deliberately or otherwise, by our Government's money and debt policies. We cannot ignore the fact, however, that some eminent authorities have said that these policies helped to bring on the recession. More than that, the policies did not stop the inflation, which was the sole excuse given for these policies; they added to the inflation. The head of the economics department of Harvard University appraised these policies in conservative terms, for a committee of the Senate, testifying as follows:

> Despite a vigorous policy, the Federal Reserve failed to stop inflation and yet helped to bring on a recession. * * * To stabilize prices with a large cost inflation could only be done by inducing unemployment through a restricted monetary policy. This the Federal Reserve has accomplished.

We cannot ignore the fact that there has been wide discussion of a deliberate, planned recession, even before the first signs of the recession appeared. As early as July of 1957 the New York Journal of Commerce reported, in a feature editorial, as follows:

> The evidence now points strongly to the conclusion that both the administration and the Federal Reserve authorities believe that "a moderate recession now" would be a small price to pay for the avoidance of another boom-and-bust later on.

This financial journal is generally read only by a small number of people and people who are in full sympathy with the administration's inner thoughts. In the same editorial it went on to discuss the public relations problem which bringing on this recession posed for the administration. It said:

> Such a policy leads compellingly to the all-important psychological—or public relations—problems of whether the administration should take the public into its confidence by trying to explain its goals and methods—or whether it is better just to follow the course it deems necessary without attempting to make it palatable to the public by official explanations.

ANTIRECESSION MEASURES MAY BE WASTED EFFORT

Is it the plan to keep the country in a recession of about 6-percent unemployment? Certainly, some very powerful financial and business leaders have said this country cannot have a stable dollar without unemployment; and they have made it clear that, as between the two, unemployment is a small evil in their view; if an evil at all.

Congress is spending a great deal of time and energy on measures which we hope will bring back full employment and economic growth. Many of us are struggling with proposals for putting the unemployed back to work. Some of us are even considering what we can do to stop the mounting toll of small business failures and the growing monopolization of business. And some of us are considering what we can do, if anything, to

help the farmers and the farm people who are being shoved off the land.

If our idea of trying to bring back full employment is contrary to the wishes of the money managers who run the Republican Party, then we may be wasting our time and giving the people false hopes. Whatever measures we finally pass may be futile. They may do nothing more than cause the money managers to take further steps to offset the effects we intend. Certainly, then we have reason for questioning whether this administration intends to restore full employment any time in the foreseeable future. It has proposed no measure which would accomplish this purpose, and it has plainly lacked enthusiasm for such measures that have been started in Congress.

In any case, why do we study, consider, and try to understand all of these various piecemeal economic measures, and yet avoid any study and understanding of the role which our money and debt system plays in the economic system? This is like trying to guess what kind of fruit the tree will bear, and whether it will bear well or poorly, when we have not yet bothered to learn what kind of tree it is, or what kind of fertilizer and care it needs.

THE BANKS AND WALL STREET STILL PROSPER

Certainly, no part of the financial community has suffered from the money or public debt manipulations. In the years when interest rates were being raised, profits of the banks and the moneylenders went up, up, and up. And since the recession started, profits of the banks and the moneylenders have still gone up. Every important step which our Government's moneymanagers have taken in the name of easing credit has been a step which has permitted the banks to create more money to buy more Government bonds and collect more interest.

According to my estimates, the American people paid out $10 billion more in interest charges last lear than they would have had to pay if interest rates had been left at the 1952 levels. This $10 billion which counts interest charges on installment debt, mortgages and everything else is the same amount as the gap in consumer purchasing power estimated by a number of economists, and it is the amount of increased spending and increased debt which these economists say the Government will have to assume to bring back full employment.

This $10 billion of increased interest payments means that the farmers and home buyers are paying more on their mortgages, that consumers are paying more to finance purchases of automobiles, furniture and appliances, that small businesses are paying more to carry inventories, that the State and local governments are paying more to finance schools and other community facilities, and that the people in every community of the country are paying more taxes. Yet this is only a drop in the bucket. It does not count how much more consumers are paying in higher prices, even when they buy for cash. The high-interest charges are added on to the cost of raw materials, added on again in the cost of manufacture, added on again in the cost of wholesalers and retailers, because business at all of these levels is done in large part on borrowed money. And finally it is the consumers who pay.

A DUTY OF CONGRESS LONG NEGLECTED

What is being neglected here is a duty of Congress, and this is a long-neglected duty of Congress. The Constitution reserves to Congress the power to create money and to regulate the value thereof. And the Constitution reserves to Congress the power to issue debt in the name of the United States. But Congress has delegated these powers and duties to the U.S. Treasury, to the Federal Reserve, and to the private banks, and it has not bothered to check on how these duties are being carried out.

As to issuing money and regulating its value, we have simply turned the job over to the Federal Reserve, the U.S. Treasury, and the private banks; then we have closed our eyes to what is being done.

As to issuing debt against the United States, we maintain only a ceiling on the total amount that may be outstanding—which ceiling we raise from time to time when requested. But we pay no attention to the methods by which the debt is issued, to whom it is issued, and how much unnecessary interest and other premiums are paid.

The last time there was a full investigation and study of our monetary system, the Federal Reserve System was set up. Nearly half a century has passed since that investigation was made. In this half-century new types of financial institutions have come into being. Other types which then handled only unimportant amounts of savings and investments now handle gigantic sums. Many of these, such as the insurance companies, the investment trusts, and the savings banks appear to have close working relationships in and among themselves, and with the commercial banks and the investment bankers. Just what are their interconnections? Are the vast sums of savings of millions of families being handled in the public interest? How do these new financial giants fit under our laws that are supposed to safeguard the public interest in financial institutions?

PRIVATE BANKERS GIVEN POWERS OVER MONEY AND INTEREST

In the emergency of depression, Congress amended the Federal Reserve Act in 1933 and again in 1935 without waiting to study what the effects would be. That study has still not been made, although these amendments made basic changes in the Federal Reserve. Before these changes were made, the Federal Reserve had been a system of regional banks, with each region having its own powers. But those changes of 1933 and 1935 created a central bank. They took away the powers of the regional banks; and centered those powers in the New York bank.

Woodrow Wilson was supposed to have settled, once and for all, the question whether the private bankers would have representation on the boards and committees of the Federal Reserve System. He settled, he thought, the question whether the private bankers would have representation on any public board which determines what the money supply shall be, determines what the interest rates shall be, or determines any other matters of bank regulation. The bankers went to him and proposed such representation when the Federal Reserve legislation was being drafted and he flatly turned them down. President Wilson said then that the private banks had no more right to be on the public boards to regulate money, interest rates, or other banking matters than the railroad owners had a right to be on the Interstate Commerce Commission, to help fix freight rates.

WORLD'S MOST POWERFUL MONEY GROUP TRADES IN SECRET

But the 1935 act—we now know—gave the bankers the representation which Woodrow Wilson had said no civilized country would permit. This act created the present-day Open Market Committee and gave that committee the Federal Reserve's powers to buy and to sell Government securities. This committee is today by all odds the most powerful financial body in the world. It has all the resources of the Federal Government—all of the gold in Fort Knox—at its disposal and discretion. In this committee of 12 men, 5 are selected by representatives of the private banks. Now this is something to think about: the buying and selling of Government securities is the most powerful weapon the Federal Reserve has for determining what the Nation's supply of money and credit shall be, and what interest rates the people will pay. And the committee of 12 that decides these things has on it 5 members who are chosen by representatives of the private banks.

The creation of the Open Market Committee has brought about some strange divisions of responsibility within the Federal Reserve System. The System now has two boards or committees with powers and duties for issuing money and regulating its value. The Federal Reserve Board has this power, which it can exercise by changing the percentage of deposits which the member banks are required to keep in reserve. And the Open Market Committee has an even greater power, which it can exercise by buying or selling Government securities or changing the price at which it offers to buy or sell these securities.

Certainly, then, this is a matter which should be looked into.

Here we have two bodies—neither of which is responsible to the other, and neither of which is responsible to anybody, except Congress—with separate powers to go in opposite directions.

For example, when credit needs loosening the Open Market Committee can buy Government securities. This helps, first, the Government and the taxpayers because the interest on those securities comes back into the Treasury. And this method of easing credit also helps the private banks, because it makes more

bank reserves available on which the banks can make loans at higher rates of interest than the Government securities pay. But the Federal Reserve Board can also loosen credit, when it wishes to do so, by lowering the percentage of deposits which the private banks are required, by the Board's regulation, to keep in reserve. This method of easing credit primarily helps the private banks, because it allows the banks to create more money for loans and keep the Government securities too. In this way, instead of the interest on the Government securities coming back to the Government, it goes to fatten bank profits.

Are these conflicting powers being used in the public's interest? Does one board or committee force the other to act, by itself refusing to act? Or is action deadlocked while the public interest suffers?

Today the Open Market Committee holds the greatest portfolio of securities in the world. It has bought with public money, and is holding, almost $25 billion of securities of the U.S. Government. It trades in these securities with private dealers to the tune of about $10 billion a year. Yet all of this trading is carried on in secret deals with a small group of about 15 private dealers and speculators. The prices at which these deals are made are secret; the amounts of securities traded with individual dealers are secret; and even the names of the dealers are secret. In addition, this Committee trades in U.S. Government securities with foreign central banks to the tune of about $5 billion a year; and all the details of this trading are also secret. Certainly this, too, is something that Congress ought to look into.

WHO MAKES THE NATION'S MONEY AND CREDIT POLICIES?

Actually, we do not know what real division of power and responsibility over monetary matters exists among the Federal Reserve System, the Treasury Department and the White House. At various times since this administration has been in power, the President has made public statements referring to the then current monetary policies as the administration's policies. But at alternate times the President has referred to these monetary policies as matters decided solely by the Federal Reserve System and at these times he has said that the administration could not and would never try to influence the Federal Reserve on the monetary policies it makes.

Who, then, actually determines these policies? We do not really know; but we ought to know.

Clearly, however, the manner in which the Treasury manages the public debt has a great influence on interest rates and on the amount of credit which is available to business, consumers, and farmers. And this we do know: Since the present administration has been in power, it has repeatedly issued new Federal securities at interest rates that were above the going market rates. Such rates were proved to be too high, over and over again, because the securities were quickly being resold in the market at prices much higher than the Treasury got for them. In fact, this administration had not been in office 2 months when it embarked on a program of issuing new Federal securities at artificially high interest rates. In February of 1953, it issued about $8 billion of Treasury certificates paying 2¼ percent interest, and exchanged these for securities paying 1⅞ percent. Shortly after that, it issued $1 billion in bonds at 3¼ percent, when the longest term negotiable bond then outstanding paid 2½ percent. And what is more, it issued these new high-interest bonds at a time when the Treasury did not need the money.

Now the President has warned that he may ask Congress to raise the legal ceiling on the interest rate at which the Treasury can issue long-term bonds. This ceiling of 4¼ percent has been in effect since the end of the First World War. So it looks as though the money-managers do not think interest rates have hit the ceiling yet, but that they will go through the ceiling and take off into outer space.

WHO MANAGES THE TREASURY "GIVEAWAYS"?

What then are the facts of the Treasury's influence? Do the arbitrarily fixed prices at which it issues securities force interest rates up or down throughout the banking system? Do these repeated Treasury "giveaways" force up interest rates with or without the consent of the Federal Reserve? Why should the Treasury arbitrarily fix interest rates on its securities in any case? Why should it consult with an advisory committee of big bankers and money lenders who are going to buy the securities about at what level the interest rate should be fixed? Why does the Treasury not sell its securities on the basis of open, competitive bids, just as the States and most of the private corporations sell their securities? This, too, is a matter which we should certainly look into.

I have indicated only a few of the questions which should be looked into. There are many others that are equally vital to the proper functioning of our economic system.

Let me call your attention to one of two other matters.

We have heard a great deal about giving the Federal Reserve standby authority to control consumer credit. Is that a good proposal?

What about controls over business credit? The need for such controls has been much more clearly demonstrated than the need for control over consumer credit. Let me illustrate.

OBJECT OF TIGHT MONEY

Chairman Martin and other Federal Reserve officials have repeatedly stated that the object of the tight-money squeeze of 1955–57 was, not consumer buying, but the boom in business investment—specifically investment in new plants and equipment. Yet to try to dampen the investment boom the Federal Reserve had to squeeze credit for everybody, including the State and local governments that were trying to build schools and other essentials.

It had no authority to restrain the borrowers that were engaged in the runaway expansion, namely, the big industrial corporations. It had no authority to restrain the lenders who were supplying most of the credit, namely, the insurance companies, the investment trusts, and other nonbank lenders. The Federal Reserve has authority only to squeeze or loosen credit in the commercial banks.

Certainly no one can argue now that the Federal Reserve has any good way of squeezing credit in nonbank sources to dampen a big-business investment boom. It can raise interest rates throughout the credit system, yes, and that it did in 1955–57. And the big corporations wanting to expand stayed away from the insurance companies and the bond markets for a while, because they did not want to pay the high rates. But they went to the commercial banks and got the money on a temporary basis—and took up the credit that would normally have been available to small firms.

Then, last year when we had this recession "shakeout", and the Federal Reserve brought the long-term rates down for a while, the big corporations then went to the insurance companies and to the bond market and arranged their long-term financing and paid off the bank loans. And now that this is all arranged, the Federal Reserve has tightened credit and raised long-term rates higher than ever.

In the meantime, however, small business was shaken out of the credit picture and pretty much out of existence. The industrial giants now have a bigger share of the market and a stronger control over markets than ever before.

Between October of 1955 and October of 1957 bank loans to corporations having more than $100 million of assets increased by 66 percent, while bank loans to firms with less than $50,000 of assets dropped 3 percent, which is only added evidence that the Fed was more successful in squeezing small firms out of the credit necessary for carrying on their previous levels of operation than it was in checking big-business expansion.

I will insert in the RECORD here three tables which the Federal Reserve System itself made on this subject. These cover a survey that I requested in December of 1956, although the survey was not actually made until the end of March 1958, after the big credit squeeze of 1955–57 was over and the damage had been done.

I might add that while the squeeze was on, some of us tried to point out that the big corporations were getting the credit and the small firms were being squeezed out. But at that time we were being assured by the monetary authorities that we were all wrong. We were told that the banks were rationing the credit to take care of small firms. And we were told that the reason why the big corporations seemed to be getting a disproportionate share of the credit was that it was the big-business industries that were expanding. But the Fed's

own figures now show that this was not just a matter of which industries were expanding.

There are separate figures for the individual industries. And these show that within each industry the big firms got the credit, and the bigger the firms, the bigger the slice of the credit they got. The tables are as follows:

TABLE 1.—*Business loans of member banks, 1955 and 1957, by size of borrower*

Size of borrower (total assets, in thousands)	Amount of loans					Number of loans					Average size of loan		
	Millions of dollars		Percentage change, 1955–57	Percentage distribution		Thousands		Percentage change, 1955–57	Percentage distribution		Thousands of dollars		Percentage change, 1955–57
	1955	1957		1955	1957	1955	1957		1955	1957	1955	1957	
All sizes	30,805	40,618	31.9	100.0	100.0	1,185.2	1,280.6	8.0	100.0	100.0	26.0	31.7	22.0
Less than $50	1,501	1,456	−3.0	4.9	3.6	503.1	504.7	.3	42.5	39.4	3.0	2.9	−3.3
$50 to $250	4,505	5,256	16.7	14.6	12.9	414.9	494.3	19.1	35.0	38.6	10.9	10.6	−2.1
$250 to $1,000	5,051	6,302	24.8	16.4	15.5	125.8	157.6	25.3	10.6	12.3	40.2	40.0	−.4

GOVERNMENT MONEY AGENCIES ARE NOT AUDITED

Now consider this: The Federal Reserve Banks have never been audited by an independent agency of the Government. All of their audits are internal audits, made by their own personnel. They have had a private auditing firm come in on a few occasions to observe a few of these audits being made. But there is still no audit by the General Accounting Office.

Here, then, is a government-owned agency which handles more money than any other Government agency, and it has never been audited.

Consider this also: The New York Federal Reserve Bank is the fiscal agent for the Treasury. It handles billions of dollars of the Treasury money each year. That has never been audited by the Government.

Then consider this: The Office of the Comptroller of the Currency, in the Treasury Department, has handled more than $157 billion of Government currency—$1 bills, $10 bills, and so on. This Office has the job of destroying all the wornout and damaged currency issued by the Federal Reserve—what are called Federal Reserve notes. Yet this Office has never had an official audit.

A FAIR INVESTIGATION BY DEMOCRATIC METHODS

What is wrong with having a committee of the House investigate, study, and report to the House on the answers to these questions? What objection can there be to making the facts known? Are there skeletons to hide?

The committee which I propose will be composed of both Democrats and Republicans. If this committee uncovers any facts which are embarrassing to the administration, or to any powerful financial group, the Republican Members will have every opportunity to express their views and to present whatever justification for these facts they care to present. If any member of the committee does not like what the majority reports, he will have the usual opportunity of making a minority report. He will have an equal opportunity of convincing the public that his facts are right and the others are wrong.

To refuse to investigate is to deny ourselves and deny the public the facts. That is undemocratic, and it leads to misinformed public opinion. Refusing to investigate and learn for ourselves could lead to bad laws, and it could lead to plunders unheard of.

The investigation I propose is, I think, a fair procedure. It is a democratic procedure. It will lead to an informed public opinion, and it will give Congress the facts and the understanding it needs to carry out its legislative duties.

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

WORLD PEACE, DISARMAMENT, AND THE ENEMY WE FACE

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from Wisconsin [Mr. ZABLOCKI] is recognized for 45 minutes.

Mr. ZABLOCKI. Mr. Speaker, the Communist pressure on Berlin and on other vital spots in the free world require that we take a fresh look at the situation around us—at the prospects of disarmament and world peace, and at the nature of the Communist enemy which faces us.

To this end, I would like to make a few observations in the hope that they will contribute to the serious debate on this very important subject, and stimulate greater understanding of what we are really up against.

PART I—PREREQUISITES OF WORLD PEACE

There are, of course, many prerequisites for the achievement of lasting world peace. The foremost among them, in my opinion, are justice and effective disarmament arrangements.

The first prerequisite is self-explanatory. Lasting peace can only be built on the foundation of justice. There is no other way, because injustice, particularly on a national scale, contains within itself the seeds of rebellion. And, as we all know, any revolt on a large scale will result in international repercussions which can promptly embroil the world in a new conflict.

The second prerequisite, effective disarmament arrangements, cannot be achieved unless the following two factors prevail:

First. All nations, and particularly their governments, must have a sense of moral responsibility. Such a sense of moral responsibility will cause them to honor and uphold international agreements and treaties. If there is no disposition on the part of a nation to honor agreements with other countries, an international treaty becomes just a piece of paper—completely worthless.

Second. All nations must be included in, and bound by, an agreement on disarmament. This applies particularly to all nations which—because of large population, natural resources, or possession of atomic weapons—have a power potential. What I mean by the term "power potential" is the capacity of any nation to disrupt international order by inflicting, through military means, serious damage upon some other nation.

So here, in brief, in my opinion are the prerequisites of world peace: a sense of justice, and a sense of moral responsibility on the part of nations and their governments, and the inclusion of all potentially strong nations in a workable disarmament agreement.

PART II—THE OUTLOOK FOR WORLD PEACE

Do these prerequisites of world peace presently exist in the community of nations? I use the term "world peace" in the sense in which we all know it, implying not only the absence of out-and-out wars, but also an end to the cold war.

Personally I do not find the prospects of achieving such peace to be encouraging at the present time. I say this because the Communist system violates the prerequisites of world peace.

During the 42 years of its existence, the Communist system has not changed. The Communist goal remains the same: they want to remake their own people, and the world, in the image of their atheistic, materialistic blueprint. Our country's strength and our way of life is the chief obstacle which the Communists have to overcome to realize their plans.

Justice and moral responsibility, as we know them, are completely alien to the Communist system. The Communists have in the past and are always ready to lie, to murder, to enter into agreements—and to break them—in order to achieve their purpose.

These are the facts which must be realized clearly and fully by all of us.

If the past 42 years of experience with communism have not taught us this simple lesson, then I am very much afraid that we are in mortal danger of being hoodwinked, outwitted, outflanked, and ultimately destroyed by the masters of the Kremlin.

I repeat: Until the Communists in power crumble or undergo a complete moral reorientation, it is foolish to appeal to their sense of justice, simply because they do not have one; and we would be equally naive to stake our future on any agreements or treaties with the Communists. The Communists may temporarily honor an agreement, even when it works to their disadvantage. They are ready to accept such tactical losses. In the long run, however, they will break the agreement the minute they feel that, by doing so, they can advance their plans for world domination.

These are not empty phrases. They are fully supported by the record of countless treaties broken by the Communists during the last 42 years, and by their ruthless persecution, enslavement, and wanton murder of millions of peoples in Soviet Russia and in Communist-dominated territories. If history can teach us anything, this is one fact which it should have taught us to date.

This is the primary reason why I do not believe that we can achieve world peace, and easing of tensions between the East and the West, at the present time; to repeat, simply because the Communist system, as it stands today, has no room for justice, moral responsibility, or similar considerations.

This obstacle to the attainment of world peace will be overcome when the Communist leadership disintegrates, is overthrown, or undergoes complete moral and political reorientation. The latter change will be quickly apparent to the free world. We will see evidence of it as soon as the Communists make peace with their own people. But as long as they remain at war with their own people, and with the free world, their fundamental concepts and goals have not changed, no matter what they say.

Let us now consider the second prerequisite of an effective disarmament agreement. I have already pointed out that, to be effective, such an agreement, in addition to providing for inspection and enforcement, must apply to, and bind, all nations which have a power potential.

We do not have to look far to find the reason for this requirement. We have seen in recent years how the Soviet Union, in its strategy aimed at conquering the world, has used other nations, and other peoples, for its own ends. Communist-inspired use of force and instigated aggression in Korea, on the borders of Tibet and Burma, in the Formosa Straits, and in Hungary are cases in point.

Even if we could achieve an effective disarmament agreement with the Soviet Union, including provisions for inspection and enforcement, and even if we had adequate reason to believe that Soviet Russia would uphold their end of the agreement, we would still lack any appreciable degree of security if the Communists could circumvent the agreement by advancing and sponsoring aggression through Red China, North Korea, or any other Communist-dominated nation which was not a party to the agreement.

I do not believe, therefore, that we will be able to achieve any effective disarmament agreement until all countries with any appreciable power potential will be included in such an agreement, and will have the moral responsibility and desire to be bound by its terms.

PART III—THE COMMUNIST STRATEGY

If my analysis of the nature of the Communist system is correct, and I sincerely believe that it is, then it follows that we must squarely face the facts and make some serious decisions.

First of all, we cannot expect that the easing of tensions between the East and the West, wishfully envisioned by some people, will occur easily or in the near future.

Second, we must accept the fact that Communist pressures will continue as long as their goals remain unchanged. Conflict is the chief instrument of their drive to remake their people, and the world, in accordance with their Communist blueprint. We must, therefore, be prepared for a long siege of continuing Communist pressures.

Third, we have every reason to believe that the Communists realize that an open attack upon our Nation, or upon one of our allies, will lead to immediate retaliation which could result in mutual destruction. For this reason, I do not believe that they will chance an all-out war. As a matter of fact, I am strongly of the opinion that, no matter how hard they will push us, they will take precautions to stop short of any large-scale open outbreak. But they will continue their war of nerves, hoping that we will not call their bluff, and that we will yield and retreat under pressure, surrendering new areas to their domination.

Mr. JUDD. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Minnesota.

Mr. JUDD. I want to commend the gentleman from Wisconsin for the very excellent statement that he is making. He is one of the ablest and hardest working members of the Committee on Foreign Affairs. He has done a lot of work and thinking in preparing his comprehensive discussion and review of our foreign policy in the present world situation. He speaks from years of experience and firsthand knowledge. On the point that the gentleman is just making, I should like to ask, Does the gentleman feel that the greater danger to our country at this moment is that the Communists may go ahead, come what may, and start a war over Berlin? Or that they may successfully prevail upon Americans who misunderstand the situation to put pressure on our Government to weaken its position in the face of their intransigence?

Mr. ZABLOCKI. There is no doubt in my mind that the greater danger is that they will prevail upon some of the wishful thinkers in our country to prevail upon our Government to weaken our position. It would be a mistake on the part of our Government to weaken under Communist pressure. As the gentleman will recall, last year, when the Communists threatened Quemoy and Matsu, some people in our country said "What do we need those two islands for," or "For what purpose should we be firm in saying that the Communists shall not forcibly take those islands?" I think it was a blessing that we stood firm. The Communists did not take those islands. They were testing us. I think that their pressure on West Berlin, like their pressure on Quemoy and Matsu, is another test.

Mr. JUDD. I certainly agree. The gentleman knows that the Prime Minister of, perhaps our closest associate and ally, the United Kingdom, has just come back from the Soviet Union to report that Khrushchev really means business. Some people seem to conclude that, therefore, we must rush over to make some more concessions. Does not the gentleman believe that, on the contrary, the surest way to war, or to surrender would be to indicate that we are less firm than they? The fact is that we are in a much stronger position in Germany and in Europe than they are. They are under greater pressure to solve the Berlin problem than we are. It hurts them worse than it hurts us. Why should we pursue them and reduce our chances of success? If they want to liquidate the West Berlin situation, as they do because it is a tremendous thorn in their flesh, let them offer some concessions. If we stand firm and show that we too mean business, there will not be any war.

Mr. ZABLOCKI. I agree with the gentleman, and that is the very reason I am taking this time to address the House today. Khrushchev means business in this sense: the Communists have been and continue to be dedicated to conquering the world for their purpose. That is the business in which they are engaged. They have been in this business right along, and they are undoubtedly sincere about it. We should, and must, be just as sincere in our determination to prevent them from conquering the world.

Mr. JUDD. Does not the gentleman agree that their objective in the Far East last fall was not just a little island, it was an attempt to force the United States to retreat under pressure and thereby demonstrate to all the free peoples of Asia, pretty nearly a billion of them, that we are a weak and undependable ally? And likewise that their objective now is not just West Berlin, they are trying to convince the people behind the Iron Curtain and the peoples on their borders that those peoples cannot count on the free world, that it is the Communists who have tough nerves, and that the free world governments will timidly say, "We have just got to yield something here, and make a few more concessions there," demonstrating weakness and retreat which can bring only a disintegration of the whole collective security system and our own security?

Mr. ZABLOCKI. Exactly. Our action in yielding under Communist pressure would have a particularly serious effect on the smaller nations of the free world. They could easily conclude that their fate does not matter to us—that, under Communist pressure, we will someday cast them to the wolves. This would be a terrible mistake.

Mr. JUDD. I agree completely with the gentleman. I hope that the press will quote at length from his remarks and that our people will read them and realize first, that there are inescapable and grave risks in living on the same planet with a conspiracy that is dedicated to our destruction; but that the risks of standing firm in support of our principles, in support of our honorable commitments, in support of our allies, and in support of the efforts of peoples everywhere to retain their freedom or to regain it, are less than the risks of softness and weakness, and that the former course provides infinitely greater hope of preventing war.

Mr. ZABLOCKI. I thank the gentleman for the fine contribution he has made.

To continue, Mr. Speaker:

Fourth, the Communists, while playing their deadly game of poker in international politics versus the governments of the free nations, are continuing their undercover drive to absorb southern Asia and the Middle East, to disorganize Africa, to undermine Africa, and to disrupt the cohesion of Western Europe. In this manner, they are trying to isolate the United States before staging the final showdown.

It is an established fact that the Communists have thousands of agents all over the world, working for their goals. These agents are today particularly active and strong in the vital free areas of southern Asia, the Middle East, and Africa. Many of them have been drawn from native populations, trained in Moscow, and returned to their homelands to carry the Communist message directly to the people. They are united by Communist ideals, dedicated to them, and actively supported by funds, propaganda material, technical and economic aid from Moscow.

The work of these agents is to win the people of those nations to communism, to turn them against the United States, and to subvert or infiltrate their governments. They are trained not only in Communist ideology, sabotage, and political agitation, but also in the native dialects and languages, customs and traditions of the areas to which they have been assigned. With an eye to the future, Soviet Russia continues to train thousands of such agents each year. Through these agents, who work directly through the people and not only through the official and very often artificial and even corrupt channels of governments, the Communists plan to accomplish the greater part of their goal of peacefully absorbing southern Asia, the Middle East, and other vital areas of the world.

PART IV—THE COURSE WE MUST FOLLOW

In view of these facts, there is but one course we should follow. In order to avoid the horrors of a general hydrogen war or the terror of worldwide Communist dictatorship, we must beat the Communists at their own game. We have to stand fast under their pressures, and we have to make it impossible for them to outflank and envelop our country.

We have been, of course, working for these goals. Our mutual security effort, our student and leader exchange programs, our sharing of agricultural commodities with our friends abroad, and our other programs in this field are dedicated to the containment of Communist aggression and expansion, and to combating the undercover Communist activities in the underdeveloped countries of the world.

It seems to me, however, that, in the process of designing and improving those programs, we may have underestimated the full implication and effectiveness of the Communist effort to encircle and isolate our country. It is for this reason—because I earnestly believe that insufficient awareness of the Communist threat and inadequate steps to beat it will exact a heavy price from us within the next 10 or 15 years—that I offer the following suggestion for debate and consideration by the Members of this House:

First, we should endeavor to strengthen all positive non-Communist energies behind the Iron Curtain—not by exciting them through irresponsible short-range propaganda to ephemeral rebellions, but by developing them in depth by long-range action which will—by a gradual, steady process—reorientate all levels of the administration, economy, social, and cultural life within the Communist-dominated empire.

To this end, we must continually strive to keep alive the love of freedom which is firmly implanted in the hearts of many Communist-dominated peoples; make them constantly aware of the fact that we are concerned about their tragic plight; and convey to them, in meaningful terms, the true spiritual, religious, and cultural basis of our way of life, in addition to showing them how our system, which respects the dignity of the individual human being, is capable of providing them with material advancement.

I am afraid that, thus far, we have laid altogether too much stress on the material and technological components of our way of life, creating the impression in the minds of some people in other lands that we are dedicated to the pursuit of materialistic ends. This, to my mind, has been one of the grave shortcomings of our efforts in this field—a shortcoming unfortunately too much in evidence among our Government and private personnel abroad.

Second, we should try to immunize the most exposed areas of southern Asia, the Middle East, and Africa against Communist expansion, and thereby slow down the Communist envelopment movement.

This objective should be accomplished through long-range, efficient action, one, on an ideological level, spreading ideas and vision surpassing the Communist ideology; and two, by persons and teams which will organically carry this vision directly to the peoples of those countries. We must remember that ideas without a movement remain disincarnated. As I already pointed out, the greatest strength of the Communist offensive is that they have men and women throughout the world who are imbued with Communist ideals and zealots who are able to carry their message directly to the peoples of the underdeveloped countries. The free world has thus far failed to come up with a comparably comprehensive movement.

We need more people who will be able to communicate directly and carry our message, our vision, our philosophy our way of life to the peoples behind the Iron Curtain, and in Southern Asia, the Middle East, Africa and other parts of the world where the Communists are actively campaigning for their system. We have in our midst a reservoir of people who themselves, or whose parents, came from those areas. Many of them know the language of the nations I have mentioned. In addition, they fully appreciate our American way of life and our ideals. I do not think that we have sufficiently availed ourselves of their talents. They can be invaluable in combating communism. In addition, we should encourage our youth, our technical specialists, and our Government personnel to study foreign languages and the traditions of foreign lands, so that they will be able to better communicate with the people of those countries whenever they have the opportunity to personally participate in our anti-Communist offensive.

We must strive for a more direct contact with the peoples of those countries and this brings me to my third point, which goes hand in hand with what I have just said.

Third, we should put new life into our point 4 program and allied undertakings, intended to help eliminate starvation, oppressive poverty and diseases which create the most fertile soil for Communist agitation.

This social, economic, and technical aid can be much more effective and helpful for the human freedom in the world if the men and women channeling it are not only technical specialists but also imbued by an ideal and vision. Otherwise, they can prove to be just the forerunners of the Communist dynamism which will rush in to fill up the moral, spiritual, idealogical vacuum.

A technique is a necessary means, but not a full answer to the human problems. The Communist technicians usually are not just professional technicians. If our and other free world technicians should be only technicians, they will not achieve our goals. A bulldozer, a plane, a chemist, an engineer, a medical doctor can be used to build a Communist world as well as the free world. What matters is the spiritual inspiration.

We have been fortunate indeed to have our church and voluntary organizations imbued with spiritual ideals working against communism in all parts of the world. I could not adequately praise their efforts and achievements. We have supported their efforts through private contributions and through governmental measures. I believe, however, that we have not done enough. More emphasis, attention, and assistance should be given to these efforts.

Fourth, we should thoroughly review the effectiveness of our overseas information-disseminating mediums and efforts.

I have some doubts whether our radio broadcasting activities, directed to the peoples behind the Iron Curtain and to other areas where communism is on the march, are fully effective. To mention but one point, they reach a limited number of people. Further, the choice of some of the material prepared for broadcasting which I have seen did not impress me. Nevertheless, properly used, this instrument can be a potent, if limited, force in our hands.

To cite but one example: reports received by the Far East Subcommittee of the Foreign Affairs Committee indicate that the Communist attack on Chinese family life through the imposition of the commune system in Red China has profoundly affected those Chinese who live in free countries in southeast Asia, the Far East, and the Pacific.

The free Chinese residing in that region have been deeply shocked by the commune movement in Red China. In the judgment of informed observers, this sense of shock has strengthened their opposition to the recognition of the Chinese Communist government. Many of them have now begun to realize that communism is fundamentally opposed to, and threatens, their way of life which has long centered on the unity and integrity of the family unit.

The subcommittee also received reports that the Chinese living in various free countries have stopped sending remittances to their families on the Communist mainland, because such funds are not permitted by the Communist regime to reach their relatives.

The Communist suppression, by military force, of the uprising in Hungary, in Poland, and in other nations, has not been fully exploited.

These are some of the issues and developments which should be explored fully and thoroughly. We must bring

before the peoples of the world the true nature of the Communist system. We must expose the Communists for what they really are, by showing—step by step—what they are doing behind the Iron and the Bamboo Curtains. We must carry these facts not only to the peoples who live in cities and towns, but also to every last village and hamlet.

In this regard, it seems to me that we should put greater stress on unmasking the true nature of communism—and, what is equally important, on carrying the facts about our way of life, our spiritual concepts, and our ideals—through the means of simple, graphic publications distributed freely in Communist-infested areas.

There are regions in the free world today where Communist literature and propaganda enjoy virtual monopoly—simply because, heavily subsidized by the Kremlin, such Communist reading material is made available to the peoples of those nations either at very low cost or completely free of charge, This can hardly be expected to work to our advantage.

Finally, we must at all times remember that adequate military strength must underlie and support all of our efforts against the Communist menace. We must advance our goals from a position of strength. We cannot afford to reduce, or to economize, on our military defenses. Our military power remains the key factor in our efforts against Communist expansion and Communist pressures. If anything, we must continue to consolidate and improve our position of strength.

These, then, are some of the thoughts that I would like to leave with you. Many of them have been already expressed by others. Nevertheless, I believe that these issues are so important, and the crisis facing our Nation and the free world so very grave, that they need to be repeated, discussed, and understood by everyone.

We must successfully answer and defeat the challenge of communism, or we shall be destroyed—and with us, the freedoms and the entire precious heritage which our forefathers have fashioned for us through the long centuries of our Judo-Christian civilization.

Mr. ADAIR. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Indiana.

Mr. ADAIR. I would like to commend the gentleman for the very excellent speech he has made. We certainly cannot be too often reminded of the universal threat of communism, and particularly Russian communism. As the gentleman has pointed out, this is not a threat upon a single front, but the Communists use every possible avenue to accomplish their end. I hope that our people will read and study this speech and will take it to heart in our continuing effort to preserve the way of life which we cherish.

Mr. ZABLOCKI. I thank the gentleman.

Mr. JUDD. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Minnesota.

Mr. JUDD. May I add a little footnote to what the gentleman from Wisconsin has said so well and so convincingly. Some people may feel it is not wise to emphasize what the gentleman has pointed out, the picture may seem to them too desperately dark. But is it not true that we have had testimony before our committee in recent weeks that there is increasing awareness of the nature and seriousness of the Communist threat among the people along the borders of the Communist bloc? A few years ago, particularly in some Asian countries, many were enamored by the material progress that was allegedly being made in China, even though at the price of all freedoms. But now, largely because of the strong, patient, and firm stand of our Government in resistance to further Communist expansion, several years of time have been bought in which the full truth of what happened to people in Red China has come home to the non-Communist peoples, and more of them today realize that the great threat, in fact the only threat, to themselves comes from the Godless, ruthless, Communist system that has been imposed upon the Chinese people. Therefore we can be encouraged to continue policy of strength that events have proved sound. Some people say our policy is sterile because we are not running off in all directions to sign worthless agreements. Actually our policy has been very, very productive. Patient, constant firmness and strength in support of freedom has enabled the truth about communism to become more and more apparent to peoples who were not previously awake to it. In my opinion many in those countries are more wide awake now to the nature of this threat than a lot of people in our own country are.

Mr. ZABLOCKI. I thank the gentleman and I fully agree that more nations are beginning to realize the full implications of Communist goals and Communist strategy. Some of them are not as yet ready to join with us in an open fight against communism, but they do see the danger of communism. As the gentleman said, our past efforts are bearing fruit, and our position is not a sterile one. We are prepared to negotiate with the Communists in an effort to resolve world problems, but we cannot hope to reach an effective agreement until the Communists will demonstrate their sincerity, their willingness to reach a just settlement, and their determination to abide by any such agreement. Thus far, we have no evidence that they have any such intentions.

Mr. JUDD. So that the position of the United States is one of holding the door always open for any genuine cooperation and concessions, but firmly closed to any blackmail or further one-sided surrenders.

Mr. ZABLOCKI. That is correct.

If my statement appears a bit dreary and dark, I can assure my colleagues that if the Kremlin would pull aside the Iron Curtain, and make peace with their own people, we could very possibly find a bright solution to the world's problems.

That, however, can never be the case when one has to bargain with a government that has no intention of either entering into an agreement, or keeping an agreement.

The Communists announced not long ago that they were willing to make some concessions, but what were their concessions? Their concessions amounted to a restatement of their original demands. So if our position is moral and right, and it certainly is, then we need not compromise. It would be fatal to compromise on any moral principles.

Mr. JUDD. Is it not also true that their behavior during Macmillan's visit made clear that their purpose was not to get a settlement? Their purpose was to try to demonstrate, to people who are still uncertain, or wavering, that the Communists are masters of the situation, that they can insult the head of the great British Commonwealth with impunity, and thereby try to weaken the resolve of those peoples?

Mr. ZABLOCKI. That is so true.

Mr. JUDD. And, to some extent, some people in this country, as well as in other countries, are perhaps giving the impression to others that, because we are peaceful and decent and long-suffering, we therefore are being or can be intimidated. It should be made very plain to the leaders in the Kremlin that they will be making a fatal mistake if they come to any such conclusion.

Mr. ZABLOCKI. I thank the gentleman.

Mr. BOW. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Ohio.

Mr. BOW. I compliment the gentleman for the address that he has made here today and his reference to the things that we are today doing to strengthen our position in the free world in our stand to fight against Soviet communism and communism throughout the world. I wonder if the gentleman would agree with me that among these things that we should be doing perhaps there is some self-analysis that we should make of things that we should not be doing.

Would the gentleman agree with me that we do not paint a particularly good picture at times of ourselves which can be taken to other countries and be used against us? I have in mind particularly, if the gentleman will yield further, some of the motion pictures sent abroad. The gentleman has referred to USIA. I make reference to efforts we are making in motion pictures abroad with USIA, and the fact that the motion-picture industry in this country will send motion pictures abroad that do great violence to this country and do violence to our system of government and do not show the real free world or the real America. They destroy the effect of the effort of USIA.

Mr. ZABLOCKI. I agree with the gentleman. Some of the things which the gentleman from Ohio mentioned certainly do not show our country in good light.

When the study mission of which I was the chairman was in the Far East in 1955, we visited countries in which such situations existed. It is unfortunate that our Government apparently cannot pre-

vail upon some profit-motivated companies not to export such films and other material which create erroneous impressions about our country. I think that we should register our objections more strenuously.

Mr. BOW. It seems to me we should raise this question throughout the country so people will know of the great harm being done. We should object to these things that are discrediting Americans here and abroad. Books written in fiction that give a false picture of our service in foreign lands have done us great harm. Certainly such pictures do not help our situation in the free world. The same applies to those who write magazine articles that create situations that are destructive of all we have been trying to do in certain countries. This applies likewise to some of the broadcasts other than the Voice of America that go out in world broadcasts which attack the freedoms upon which this Nation is founded. Each individual American should think carefully before he acts in a manner that may place his country in an unfavorable light in the eyes of the world. Then there are those of us who serve here in the Congress who do not take seriously our obligations to the people, and that makes the Congress at times look bad throughout the world. It seems to me some of these things that should not be done should be considered along with the gentleman's suggestion of things that should be done.

Mr. ZABLOCKI. I thank the gentleman from Ohio for a very valuable contribution and assure him that a subcommittee of the Committee on Foreign Affairs is studying that very problem. We do hope that we can find a solution, because some of these things, as the gentleman pointed out, truly work to the detriment of our country.

NATIONAL TURKEY MARKETING ACT

Mr. HEMPHILL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina.

There was no objection.

Mr. HEMPHILL. Mr. Speaker, I have introduced today a bill which I hope will become the National Turkey Marketing Act of 1959. This bill is similar to that introduced by our esteemed colleague, the gentleman from Kentucky [Mr. WATTS], and follows, in part, the bill introduced by him last year and which I testified in favor of. The bill was not reported out by the Agriculture Committee last year. I intend to write today to my neighbor of North Carolina, Chairman HAROLD COOLEY, of the House Agriculture Committee, and ask for early hearings.

In December of 1958 I had the privilege of addressing, and conferring with, the officers and members of the South Carolina Turkey Federation. Almost unanimously, this fine group of food producers expressed themselves in favor of this legislation. Upon such expression I feel honor bound to push this legislation.

This legislation favors Government regulation and control of marketing conditions, and seeks to promote and expand the consumption of turkeys and turkey products. I am wary of Government interference, and except for the overwhelming desire from the producers themselves, would hesitate to promote governmental control. I feel, however, that the best interests of the industry justify this measure.

In order to include some escape clause, wherein the industry can throw off the controls if they become as obnoxious as most governmental controls grow to be, I have provided that the industry, by demand of 25 percent by volume of the commodity affected, may call for a referendum, on any or all of the provisions of this act, even to its complete abolition if it becomes detrimental to the industry. This is the only way some measure of control by the industry, instead of the bureaucracy, can be accomplished. This gives the industry a final veto power.

We are proud of our turkey industry, and grateful for its contribution to the economy of this Nation, to the food capacity, the high standard of living of our people. I know my people favor legislation to help them. I hope this legislation will pass.

LET THE RECORD SPEAK THE TRUTH ABOUT THE FARM PROGRAM

Mr. COOLEY. Mr. Speaker, I ask unanimous consent to address the House for 10 minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

THE FARM PROGRAM

Mr. COOLEY. Mr. Speaker, this Country is being flooded with erroneous and misleading information in a deliberate campaign to bring the whole farm program into disrepute.

While this campaign is widespread, well directed and has many facets, I will limit my discussion today to matter recently placed in the CONGRESSIONAL RECORD and the news reports thereon which carried to the Nation the impression that some large farmers are receiving payments or subsidies from the Government amounting to $1,000,000 or more each, while our small farmers are being neglected.

It is unfortunate and almost tragic that the RECORD of this Congress should carry such statements which, whether intentional or not, are calculated to mislead the public, to bring the farm program into disrepute, and to hold the farmers of the Nation up to ridicule.

The material placed in the RECORD referred to benefits or supports to farm operations, indicating that these agricultural enterprises, individual or corporate, had received direct subsidies amounting to many thousands of dollars each. Particular attention was given to so-called benefits to cotton producers.

Mr. Speaker, no farmer in the United States has received a "payment" for growing cotton. They have been aided by the Commodity Credit Corporation loan program which is available to every cotton farmer—large or small.

The CCC loans to a few large farm operations, to facilitate orderly marketing, have been misrepresented to discredit the whole price support program which has been of such great benefit to many hundreds of thousands of our smaller farmers.

It is unfortunate that those who are spreading the incorrect and misleading information do not understand, or do not care to know about, either the philosophy or the operations of the loan program which is conducted through the Commodity Credit Corporation. They pretend not to know that each cotton loan is secured by a first mortgage on cotton and that cotton has been good collateral since the very beginning of our Government.

It is unfortunate that they do not tell the American people that the transactions referred to were in fact legal interest-bearing loan transactions and neither gifts nor subsidies. The Government actually collected on all the loans on cotton which was withdrawn from the Commodity Credit Corporation and sold on open markets in an orderly fashion.

It is also unfortunate that they do not tell the American people that on January 1, 1953, when the Eisenhower administration came into office, the cotton price support loan program administered by the Commodity Credit Corporation, actually showed for its 20-year operation a net profit to the Government of $268,629,000. Neither do they point out that under the present administration we have lost in the last 6 years on the cotton program approximately $850 million.

Moreover, the people should be advised that the price support program through the Commodity Credit Corporation on all the six basic crops—corn, wheat, cotton, tobacco, rice, and peanuts—after the program had been in operation for 20 years, showed a net profit of $13 million, but under the present administration the program for these same crops now shows a loss in excess of $2,500 million.

When Mr. Benson took office losses on all crop support programs through the Commodity Credit Corporation for 20 years, on perishables and nonperishables, amounted to only $1,064 million. The same program now shows a loss of approximately $6 billion.

When the Republican administration took over the program the Government had invested in commodities and commodity loans only $2,452 million and now we have invested right at $8,500 million notwithstanding the gigantic losses which have been sustained.

And how have our farmers fared? Net farm income in the last 6 years, while Mr. Benson has been administering the farm program, has been $17 billion less than in the 6 years prior to his taking office.

Mr. Speaker, as heretofore mentioned, the RECORD has carried the names of several farmers and farming businesses, as

recipients of large benefits or subsidies from the Government.

I have been supplied reliable information that Delta Pine Land Co., of Scott, Miss., which was cited as recipient of the second largest farm subsidy in 1957, used price support loans to promote orderly marketing, that this company placed 7,919 bales of cotton with the Commodity Credit Corporation for which it received a loan of $1,167,502.35, that every bale of this cotton was withdrawn from the loan before the end of the marketing year and sold on the market, that the Government collected the total loan of $1,167,502.35 plus $17,370 in interest plus carrying charges, thus making a profit.

Further, I am informed that Dan Seligman, of Shaw, Miss., pledged 1,291 bales of cotton to the CCC for which he received a loan of $173,631.68, that Mr. Seligman withdrew 1,205 bales of cotton and sold it on the market, leaving only 86 bales in the loan, and that he paid the Government $2,111 in interest; Woolfolk Farms, Tunica, Miss., pledged 1,051 bales of cotton for which they received a loan of $155,787.12, that 986 bales of this cotton were withdrawn and sold leaving 65 bales in the loan, with interest paid amounting to $2,120.76; M. S. Knowlton Co., Perthshire, Miss., pledged 1,075 bales for which it received a loan of $155,438.80, that Mr. Knowlton withdrew 1,008 bales leaving 67 bales in the loan, and that he paid interest amounting to $2,197.44; J. G. Adams and Son, Hughes, Ark., pledged 3,024 bales to the loan and received an advance of $420,343.70, that he withdrew all but 318 bales and sold it in the market, and he paid the CCC interest amounting to $2,871.82.

My inquiry has produced the information that the Producers Rice Mill of Stuttgart, Ark., cited as receiving the largest 1957 subsidy, actually is a cooperative composed of 400 individual grower members. The cooperative received loans and not payments or handouts.

I cite these few cases as typical of the misleading information inserted in the RECORD recently with respect to the CCC commodity loan program.

The Commodity Credit Corporation has been operated in recent years in such a manner that it has lost substantial amounts of money on the commodities it has taken over when many farmers did not pay off their loans and instead surrendered to the CCC the commodities they had put up as collateral. But the amount of a loan to an individual producer in no way is a measure of any cash benefit that producer has received through the operation of the commodity loan program.

Mr. Speaker, these are the facts. I have presented them to correct the RECORD so that the RECORD will speak the truth.

LATIN AMERICA AND THE STATE DEPARTMENT

Mr. POWELL. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POWELL. Mr. Speaker, now we can understand why the administration is so soft on the dictatorships of Trujillo, Duvalier, and Batista. Five political appointees have gone on trips totally free for the past few days. Among those who went are a White House secretary, a Government lawyer, a member of the Department of Justice, a top official of the Republican National Committee, and a Presidential appointee to an important national commission.

The State Department and the administration are again in the business of supporting bloody dictators. Months ago in my office I questioned very sharply the Assistant Secretary of State, Mr. Rubottom, concerning the sending of Marines to bolster up the Haitian Army. I was shocked when they told me that "all of the Haitian people had asked for the Marines." This is an out and out untruth. At that time I asked the members of the State Department whether they had consulted with the three most important Haitians living today, namely Senator Dejoie, Clement Jumelle, and Daniel Fignole? These three men between them represent 80 percent of the Haitian people. The State Department said that they had not. These men, or their representatives, were available right here in Washington, D.C. The State Department stated further that they would back up Duvalier because he had given more stability to Haiti than any other of his numerous predecessors.

Does the State Department think that the American people have forgotten that an American was beaten to death by the Army of Duvalier after he had guaranteed the U.S. Embassy safe custody? Does the stability of Haiti depend upon destroying every single newspaper in Haiti, the imprisonment of its owners and editors, and the breaking up of the printing presses?

Does the stability of Haiti depend upon members of the Army who roam the streets under the orders of Duvalier at night clothed in masks beating and shooting citizens and looting and destroying property?

In my conversations with the people in Cuba, including Senator Dejoie, I can reveal that there are hundreds of men in training now ready to invade Haiti. These men are under the leadership of the Dejoie-Jumelle-Fignole coalition. There are over a hundred thousand Haitians in Cuba—50 miles from Haiti.

The treasury of Haiti was empty when Duvalier took over and it now has $8 million deficits—is that good financial stability? Yet, from the pockets of American people will come the money to shore up another dictator and pay for his program of murder, terrorism, and the destruction of property.

The International League for the rights of man in with such distinguished executive officers as Pearl Buck, Norman Aneglo, and Eduardo Santos has already written the Acting Secretary of State protesting that they are astonished at the United States deciding to support the present dictatorship in Haiti. The International League for the rights of man has presented to the Department of State a factual record of the political assassinations, imprisonments, exiles, raids, suppression of newspapers and police violence. Protests have been lodged in the United Nations against Haiti and its violations of civil and political liberties.

American support of the present dictatorship will not only fail but even more surely it will antagonize throughout Latin America and elsewhere the democratic forces on which the American Government should depend for defense of the non-Communist world.

I call on the Foreign Affairs Committee to investigate this entire situation; to pay strict attention to the number of administration officials and appointees who have been taking free rides with all expenses paid recently as guests of Duvalier, Trujillo, and Batista. And while they are investigating they should investigate the private individuals who received $150,000 that Duvalier gave for public relations in the United States. Were the recipients of this money or were they not close White House advisers and outstanding leaders in the present administration?

Our State Department's stupidity with Cuba and Castro may yet be matched by or surpassed in our dealings in Haiti and the Dominican Republic. If so, God help us. Latin America is about to be lost. By the force of communism? No. By the force of American aid to Fascists. If so, what a tragic sellout it would be of the American people by the State Department and the administration.

SCANDAL IN THE AIR FORCE

The SPEAKER pro tempore (Mr. LANE). Under previous order of the House, the gentleman from Iowa [Mr. GROSS] is recognized for 30 minutes.

Mr. GROSS. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include an article from True magazine.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. GROSS. Mr. Speaker, never have I read a more shocking indictment of a military training program than that reported in an article in the current issue of True magazine entitled "Scandal in the Air Force."

It is impossible for me to believe conditions could exist at one of our military installations such as those described in the article. It relates how recruits at Lackland Air Force Base, San Antonio, Tex., are being toughened physically by roller skating to the strains of waltz music.

According to the article:

> It is official Air Force training policy—endorsed by the Secretary of the Air Force himself.

The article goes on to report:

> And, surely for the first time in military history, the recruits are paying for their own physical training.

And where does the money go? Most of it, at least, goes straight into the pockets of the rink operator, a fatcat civilian concessionaire who is already several times a millionaire.

Mr. Speaker, I have written to the Secretary of the Air Force to demand an explanation. In particular, I want to know if it is, in fact, official Air Force policy that recruits are required to roller skate as part of their training, and at their own expense.

Here is a situation, if true, that demands the attention of this body, and I call to the attention of all Members, and members of the Armed Services Committee in particular, the complete article from True magazine, which follows:

SCANDAL IN THE AIR FORCE—WHEN U.S. AIRMEN BEGAN PAYING FOR THEIR OWN TRAINING TO FATTEN A CIVILIAN PROFITEER, ONE MAN HAD THE GUTS TO RISK HIS CAREER TO EXPOSE THE CORRUPTION—YET IT CONTINUES TODAY

(By David Nevin)

SAN ANTONIO, TEX.—This may come as a happy surprise to the Russians, but the U.S. Air Force, constantly striving to maintain combat readiness for what would be the most horrible war in history, is training its new recruits on roller skates. At Lackland Air Force Base in San Antonio, Tex., the Nation's only training center for basic airmen, the men who may someday punch SAC bombers over the polar cap are getting toughened up by drifting gracefully around a skating rink to the strains of waltz music.

It has to be a waltz; anything faster is considered dangerous. And this, mind you, is supposed to be physical conditioning—the toughening of future combat airmen. Some 120,000 young men a year—every single recruit who enters the Air Force—start military life at Lackland. And this is their introduction to the service; not the tough atmosphere of a Navy or Marine boot camp but the soft symphony of a Strauss waltz.

This is no gag. It is official Air Force training policy—endorsed by the Secretary of the Air Force himself.

And, surely for the first time in military history, the recruits are paying for their own physical training. This is not, of course, strictly voluntary. Their arms are twisted more than somewhat by orders of Lackland's determined high brass.

And where does the money go? Most of it, at least, goes straight into the pockets of the rink operator, a fatcat civilian concessionaire who is already several times a millionaire.

In fact, that's the whole point of training on roller skates, according to the sworn testimony of Lackland's chiefs—not good training but the desire to further enrich a millionaire.

Naturally this doesn't lead to high morale any more than it does to adequate training, as witness the Lackland recruit whose letter to his mother was quoted recently in Reader's Digest magazine.

"We were supposed to have survival training today," wrote this potential fighting man, "but it was postponed on account of rain."

This ran in a gag column, but it was something less than funny to Americans who know the Air Force stands between them and global atomic war. Nor was it funny to the officers and men at Lackland who are supposed to make fighting men of recruits in 4 short weeks. But they're keeping quiet about it, for they've had a vivid demonstration of what happens to anyone who tries to fight the system.

Col. James Smyrl tried it. At 39 he was a tall, tough officer, his chest splashed with combat decorations. As commander of the recruit training group, he was responsible for tomorrow's Air Force. Roller skates and a rich concessionaire infuriated him and he had the courage to buck the man who was responsible. Unfortunately, that was Maj. Gen. Herbert L. Grills, the commander of Lackland and a man little interested in reason or logic.

Colonel Smyrl has left Lackland now. Only by the bitterest battling did he survive the most savage attempt to ruin a field grade officer in recent military history.

General Grills has left Lackland, too, anything but the victor in the sorry war he started. The battle smoke has cleared a little, but all it reveals is an electric sign reading "Waltz" that still burns steadily over a floor full of fighting men on roller skates. It's a battle the Air Force would like to file and forget, but that sign keeps shining. And the cause for which Colonel Smyrl sacrificed himself is far from won.

The crisis began in General Grills' office on the afternoon of March 15, 1957. Grills was 56 then, a barrel-bodied man who, when he remembered, spoke in a cultivated rumble and twirled his horn-rimmed glasses with what he considered a philosophic air. But he wasn't philosophic that day. He was angry to the bone, for headquarters had lined him up to take the rap. Instinct told him he needed a fall guy. "Get Colonel Smyrl over here," he snapped to his deputy commander. "I'm going to teach him the facts of life."

To be fair to Grills, he had not created his problem. The rink had already been built by the time he took command of Lackland in 1956. But, unfortunately for the builder, tomorrow's airmen had shown little interest in roller skating and the pressure on Grills to change this situation was mounting. You might think General Grills would have questioned the propriety of urging recruits to use the rink, but he apparently did not. He merely saw this as a nasty little problem that must be solved. How could he induce his men to pay their money for roller skating and thus pull the civilian concessionaire's chestnuts out of the fire?

The rink itself is the heart of the trouble. Roller skating, particularly without girls, is hardly a national sport. It was a mistake to authorize the rink in the beginning, but the Air Force brass doesn't like to admit mistakes, so they had to make the rink pay off.

No one will deny that soldiers need recreation. But, aside from the fact that there were already plenty of recreation facilities at Lackland, no one bothered to find out if today's young men were roller-skating addicts. Air Force brass all the way up to Pentagon level decided that they'd love a rink, but there was a problem. The Air Force had no spare cash for building rinks, yet the law forbids private ownership on a military base.

They needed a gimmick, and somebody found one: The builder would turn ownership of the rink over to the Air Force in return for a 10-year contract to operate the business.

Oddities that suggest this was more than a simple business deal cropped up immediately. Contrary to the law, for instance, no written specifications were issued to insure uniformity of bidding. Therefore, there was no competitive bidding.

A contractor who offered to put a tent over a hardwood floor for $40,000 was laughed out the back door while a red carpet was rolled out the front for one Morris Jaffe. Jaffe is an exceedingly wealthy man with a record of strange business deals that produce great sums of money—and his Lackland enterprise was no exception. He offered to build a magnificent rollerdrome of brick and stucco, complete with a snack bar and a gleaming neon sign. It would cost more than a quarter-million dollars and it would be given to the Air Force.

As the Air Force later was to admit, complaining "lax procedures permitted preferential treatment" for Jaffe, that contract smelled. But there wasn't much investigation, for the simple reason that every record of the contract negotiations suddenly disappeared. The opinion around Lackland is they were destroyed quickly when the heat went on. Strangely, the investigation stopped there, despite certain obvious implications which always arise when questionable public records mysteriously vanish.

Grills took over Lackland in time to see the beautiful rollerdrome finished, its ground landscaped in sharp contrast to the barren base, its lavish snack bar crowded with pinball machines which—though it doesn't bother the Air Force—are illegal in the Texas country surrounding Lackland. It stood on a foundation capable, so the operator boasted, of supporting a 10-story building. Just why has never been explained.

But, spectacular as it was, nobody wanted to roller skate. So the rink stood gleaming and empty, skates in their racks and cash registers silent. The operator, his dreams of sudden wealth dissolving, screamed in anguish. General Grills reacted by issuing orders which he thought would remedy the situation. The failure of those orders sent him barreling into war—the war that flamed into the open that Friday afternoon.

Colonel Smyrl walked into Grills' office with a salute that snapped. He is a tall man, wide shouldered and dark haired, and he has a look of power contained by rigid self-discipline. A prudent man would know immediately Smyrl would be a bad man in a fight, but Grills was hardly prudent.

As commander of the basic training group, Smyrl had the considerable responsibility of introducing as many as 24,000 youngsters at a time to their new military life. He was a firm, tough, but apparently well-liked commander.

Grills glared furiously at Smyrl, picked up the report from headquarters and began to read. "The rollerdrome * * * apparently (is) not receiving the support of the basic trainees. There has been a considerable investment in these facilities. To insure successful operation, wholehearted support will be required."

He stared at Smyrl and added in an ice water voice. "You are not supporting my policy on open post. Do you intend to or must I start looking for a new group commander?"

Naturally, Smyrl was stunned. The threat to relieve a field grade officer is one of the most serious possible in the military. It implies extreme malfeasance. Smyrl certainly had opposed the open post plan verbally, but only for what it clearly was—a scheme to fatten a millionaire's bankroll at the expense of basic training.

The open post had been Grills' first plan to boost the rink's attendance, thereby getting his concessionaire friends off his back. When the rink was planned, the recruits were spending 11 weeks at Lackland. The first 4 weeks consisted of intensive and highly restricted indoctrination. The last 7 were more relaxed, giving the recruits more free time—which it was expected they'd spend at the rollerdrome.

Before it could open, the system was changed. Most recruits were sent to other bases after the intensive 4 weeks. So when the rink opened, even had recruits been inclined to skate, they'd have had mighty little time. But Grills saw time as the only obstacle.

"I have a deep knowledge of human nature," he once said. "I know young men. If they were free to skate, they certainly would skate." In Grills' youth, they might have—but times have changed.

Still clinging to his faulty theory, Grills ordered a quarter of the basic trainees given the freedom of the post on each of four nights

per week. This open post policy gave them the time but did nothing for their inclination. After marching all day, the recruit didn't want to march another 2 miles to the rink and pay 50 cents for the privilege of marching some more on roller skates.

Smyrl opposed the plan as a dangerous slackening in a training period purposely and intelligently designed to harden soft youths for the tough jobs they would face. When he protested, his commanding general ordered: "Smyrl, I want you to support that rink and I want you to encourage your trainees to use it."

"Sir," Smyrl said in a tight voice, "I understood the open post policy was to give trainees more free time. Would you mind clarifying just what this policy is supposed to accomplish?"

"It's up to you to see that the rink gets all the support it needs," Grills said flatly.

"How far am I supposed to go with this support?"

The deputy commander said, "I've made a complete study of the rink's needs, and it takes $300 a day income to get the job done." (Later the deputy admitted under oath his complete study consisted solely of asking the concessionaire how much money he wanted to make.)

"There you are," Grills said. "Go do it."

It didn't take much thought to get the picture. Smyrl said later, "It was apparent that General Grills wanted me to use my position to put pressure on the basic airman to use the roller rink."

It just happens such pressure is illegal. But when he protested, Grills said: "The average basic airman has more money in his pocket than he's ever had before. He is going to spend it somewhere and we might as well get it here."

It is perhaps the first time in history that a major general has been concerned with "getting" his troops' pocket money. Having left Smyrl speechless with that one, Grills ended the discussion with: "Now you know how much the rink needs to make and it's up to you to get the job done. You get out of here now and decide what you're going to do. Come back Monday, and give me your answer."

Smyrl is from Manchester, N.H. He is a polished and handsome man, and yet there is something of the New England Puritan about him. He drinks only socially, rarely swears, sometimes even walks out on a dirty story. He is one of those rarities, a born military man, and he carries a soldier's sense of duty and ethics firmly grafted to his somewhat stern native character.

He has an excellent military record. During some of the toughest raids in bombardment history, he rose from lieutenant to lieutenant colonel in 18 months and volunteered for a second tour over Germany. While he was proving himself in combat, he also developed a flair for administration and after the war he drew diplomatic assignments and bigger commands. At Lackland he reorganized the recruit group until, according to Grills' predecessor, it ran smoothly for the first time in base history.

Certainly the rapid rise of this proud, highly principled man had not been without clashes, often enough with superiors. But no trouble in the past had so thoroughly outraged him nor caused him such soul searching. He went to the wing chaplain, who agreed that Smyrl's reaction to Grills' order was morally right. Then Smyrl sat down to think through that weekend of decision. If he blew the whistle, he knew, he could blast his career to pieces. But, to him, the choice was clear and unavoidable.

On Monday he was in Grills' office. "Sir, I've tried hard, but I haven't yet found any way to accomplish your directive to support the rink to the extent of $300 a day." Face tightening, he added, "It seems to me you're placing me in the impossible position of using the basic trainees to insure the concessionaire's investment."

"There's no moral issue here," Grills snapped. "Or if there is, it's my decision and the moral issue is up to me." (Later he was to say under oath: "He voiced some obscure moral issue which I was unable to understand.")

Anger pales some men, but not Smyrl. His face flamed a deep scarlet now as he stared at Grills. "Sir," he said in a deadly quiet voice, "can you advise me how I can guarantee skaters without simply ordering these recruits to skate?"

"That's why you're drawing a colonel's pay—to figure out things like that," Grills snapped angrily, thus passing the buck neatly back to Smyrl.

Smyrl took a deep breath. "Then I must inform you, sir, that I know of no way to insure patronage to the rink without coercing my men—and that I will not do."

There was a long silence. Then Grills said, "You are to remain in command of the basic training group and to run it in accordance with your convictions until such time as I can obtain a replacement for you."

With those words the die was cast, the battle joined.

Three days later Colonel Smyrl was officially relieved of duty. But of course that didn't make the open post policy a success, so Grills announced a new policy.

Recruits could take up to 10 of their required 28 hours of physical training on roller skates. And they would pay, at 50 cents an hour, for their own training. They were given alternatives, of course. They didn't have to skate—they could do an hour of pushups under a blazing Texas sun or police the grounds on hands and knees. Few of them thought twice.

This was—and is today—official Air Force policy, endorsed by the Pentagon itself. While it does not do much for the physical well-being of the recruits, it did accomplish its primary objective. It filled the rink with skaters at 50 cents a head, much to the joy of Morris Jaffe.

Maybe the rink's new success mellowed Grills. Or perhaps he had begun to realize that he was on shaky ground. At any rate, he did not write an unsatisfactory effectiveness report on Smyrl. The report merely noted Smyrl had been relieved "for failure to support and encourage resistance to the open post policy."

But the dismissal of a field-grade officer does not go unnoticed. Lt. Gen. Charles Myers, head of Air Force Training Command, promptly called Smyrl to his headquarters. It wasn't a pleasant talk, for Smyrl had committed himself to fight, and he fought hard.

"Sir," he said bluntly, "at Lackland there is a climate—an atmosphere—of exploitation of basic trainees."

He directly accused Phillip A. Johnson, civilian manager of the base exchange system. Supervisor Johnson ran liaison between the concessionaires and the Lackland brass. Civilian-operated concessions included an archery range, a riding stable, too many barber shops, laundries, shoe shops and a photo concession which victimized recruits with specific Air Force help. When those select concessionaires who made it their business to stay on Johnson's good side complained that their profits were less than they wanted, Johnson bee-lined for Grills' office, pressure went on the recruits, and business boomed.

Life was pleasant for Johnson, for concessionaires went all out to please him. The photo studio operator built him a magnificent home at a saving estimated as high as $12,000. Others enabled him to own a boat, a barbecue pit, a car air conditioner and other luxuries at or well below cost.

Johnson and Grills were famous pals. Under oath Grills once said, "We went hunting and fishing together. I practically lived with him on several occasions on weekend fishing trips." The latest of these trips came just before Smyrl was dismissed.

When Smyrl raised an objection about gifts showered on himself and other senior officers, the deputy commander snapped, "If you don't want to drink it, bring it up here." A major general reasoned: "Oh, you're paying too much attention to that. General Twining (then Air Force Chief of Staff, now Chairman of the Joint Chiefs of Staff) is entertained (by contractors) and everyone expects that."

Grills has observed sourly, "Some people have such a confused, warped sense of ethical principles they believe people can't be friendly without being in collusion."

When Smyrl insisted good training was more important than Jaffe's bankroll, Jaffe paid him a personal visit two weeks before the showdown. "Jim," he said heavily, "I've got $275,000 invested in that skating rink. I'm in it to make money and the way I operate, I'm not particularly interested in any five or six percent return on my investment. If I was, I'd have put my money in General Motors." Then the velvet glove came off to show the mailed fist. "We've got this thing pretty well set up. Everybody seems to be going along with us but you. Now I've watched you operate and you're a bright young fellow. I like you. But I'm going to tell you, you'd better get with the system or you'll get hurt."

The incredible situation of a civilian threatening an Air Force group commander rocked Smyrl. His face flamed red and his hands gripped his chair until they were white. But he maintained perfect control and this is an important point. Jaffe is not an observant man. Later he was to say naively, "I thought it was a very pleasant conversation."

General Myers listened to Smyrl's story in chilly silence. But the colonel had gone too far to be ignored. Myers ordered his inspector general, a Colonel John E. Fox, to Lackland to investigate.

Fox sniffed around a little and reported that Smyrl's charges were unfounded. Unfortunately for Smyrl, he was wrong. Later, Fox himself even admitted under oath: "I guess we didn't look very hard. There was a lot we missed. I guess it wasn't a very good investigation."

But Myers couldn't know that. He assumed Smyrl's charges were the inventions of an immature man trying to get himself off the hook by blackening others. In disgust he changed Smyrl's effectiveness report to unsatisfactory and ordered him to show cause why he should remain in the Air Force.

When Smyrl learned in effect he would have to stand trial for his commission, he demanded a court of inquiry. Instead the Pentagon gave him a board of inquiry. The difference was significant. A court would have permitted him to subpena witnesses and records to prove his points. A board, lacking subpena powers, gave him almost no authority to do anything.

It was like handing him a pistol with which to defend his life—but carefully withholding the bullets.

Then the Air Force announced the hearing would be closed to the press and public. It was pretty clear what that meant, and so Smyrl settled down to fight another skirmish. Through the summer of 1957, his civilian attorney fired thousands of angry words into the Pentagon and the newspapers. He won—but later he paid dearly for that fighting. When other charges against Smyrl began to collapse, those press releases were added to the list of crimes for which he should be booted from the Air Force.

At the same time, Grills and his staff officers attacked Smyrl in television and newspaper releases. Grills was heard to say in public: "Smyrl is a man of no intellectual honesty. He has no moral sense. * * * I

wasn't mad at first. I thought he was just a misguided lad. But now I'm boiling."

As the hearing grew nearer, a phalanx of Air Force public relations men dedicated themselves to selling newsmen on Grills. One of the sillier—a Pentagon import—told this reporter solemnly: "General Grills is a great—truly a great man. Once he took me into his kitchen for a drink. That tough old general had tears in his eyes when he told me, 'It hurts me all over when I think what that boy Smyrl has done.' Really, Grills is one of the Air Force's great gentlemen."

A few days before, that "great gentleman" personally had fired Mrs. Jacqueline Smyrl from the base hospital where she was one of the very few officers' wives who had volunteered for humanitarian work.

The skating rink, meanwhile, ran wide open—but hardly with voluntary attendance. A medical WAF recalled skating formations assembled at dawn. All day flights marched to the rink. Few recruits complained. After all, it was a hell of a lot more fun than pushups.

Still, nobody was skating on his own time. Recruit barracks were from a half- to a 2-mile hike from the rink. On free nights the men showed a singular preference for the soft drink machines in their own barracks patios. And if they wanted more entertainment, the Air Force supplied it.

In their immediate area were 4 air conditioned movie theaters, 4 ice cream stands, gyms, 6 swimming pools, bowling alleys, a golf course, a hobby shop, 20 tennis courts and 2 service clubs with television, records, libraries, games, and snack bars. There were also regularly scheduled concerts, shows, and boxing matches. Obviously, there had been little need for the roller rink. Morris Jaffe's hired man who ran the rink thought they were uninterested because they'd never skated. "A lot of these boys have never been on skates," he observed brightly. Then, as if to prove his point, he tried the rink himself, fell and broke three ribs.

But Grills' orders insuring that the rink make money were enforced. The civilian concessionaire told the group first sergeant which flights to send for training, and oh, how the money rolled in.

The hearing at which Colonel Smyrl's future would be determined opened September 24, 1957, in a psychology research center at Lackland. It was an ironically fitting setting. The psychologists watched the clashing and often ill-concealed motives in the courtroom with professional glee.

The board consisted of two brigadiers and a major general, all in training command. General Myers, who appointed them, was also their boss and custodian of their futures. It was a little like letting the district attorney hire and fire the judges who hear his cases.

Jim Smyrl walked in, his chest covered with ribbons, his face impassive. As the days passed and hundreds of thousands of words rolled on—most of them insulting—his jaw jutted out just as it had so many times in his career. His eyes stayed calm and almost remote, but his face flushed deeply. And a sensitive man, watching the contained passion in that graven face, would have known that here was a man who would fight until he was dead.

They started with his record, from recruit to full colonel at 35, and it was clear Smyrl was a fighter from the start. He had ambition and conceit and he worked like fury. Like most fast climbing men he had troubles along the way. But his faults were the faults of a rather humorless man of force and drive who does the job as he thinks it should be done, not to please others.

He tangled with his command at Moody AFB. But a major general testified he believed that was a mere personality clash.

He crossed a general while on duty in El Salvador and on this the board pounced happily. After a hearing, the matter had been stricken from his record, but now the board insisted he discuss it. To their dismay, they learned the trouble started when he exposed two favored officers. One ran munitions to El Salvador. The other was dickering for a fat job supervising the El Salvador Air Force.

The charges at Lackland were failure to carry out an order, failure to demonstrate leadership, and temperamental unsuitability. The latter is an ambiguous general charge particularly handy for railroading someone out of the service, since it involves opinions rather than provable facts. By implication, it is particularly damaging, for it is in this category the Air Force lumps homosexuals, security risks and thieves.

The testimony showing Smyrl's alleged temperamental unsuitability was pitiful. A colonel said he considered Smyrl unsuitable because Smyrl had contradicted him a little too bluntly in a meeting. An Air Force doctor who, with two colleagues, had treated Smyrl for stomach cramps, swore they were induced by hysteria. He was flatly contradicted by the other two doctors who since had left the service and so were not obliged to please generals.

But the board ignored the even temperament displayed by Smyrl's calm when Jaffe threatened him.

When General Grills took the stand, startled reporters wondered just who was charged with temperamental unsuitability. He strode in like a pompous bulldog, sat down, glared around the room, and said, "I've been in the service more than 30 years and in that time I've acquired an excellent knowledge of human nature. I know young men like to roller skate. They would have skated if they'd been given the opportunity.

He blandly ignored the fact these same young men still refused to skate more than was necessary to dodge real physical training. Under questioning he admitted without hesitation his sole concern with the new training program was the rink's prosperity. Then the prosecutor pulled the plug on Grills' emotions by asking if there was anything he cared to add.

"I certainly do," Grills rumbled and set off on a tirade that left both reporters and the board open-mouthed, and reminded observers of Captain Queeg's celebrated crack-up scene in the Caine Mutiny. Air Force public relations men, charged with making him look good, turned pale. His voice lost its cultivated rumble and edged toward hysteria. Veins throbbed in his face as he shouted, "Colonel Smyrl is a childish man, a man of much egocentricity. He apparently has no understanding of the responsibilities or of the professional ethics of the military service. Smyrl was grossly disloyal to me personally and to the Air Force. He played all sides of the street. He tried to subvert my officers against me."

He ranted on to an incredible climax. "Smyrl shows extreme vacillation of purpose. I believe it results from a peculiar influence exerted on him by his wife. She is a foreign-born woman——"

Jacqueline Smyrl is an exceedingly handsome and cultured Frenchwoman who stood by her husband with steadfast devotion. Her uncle and guardian is a former commander of the French Foreign Legion and she grew up in the leading military and political circles of Europe. Such an intemperate attack by a general officer of the United States constituted a deep insult to this Nation's allies—and diplomatic circles buzzed with it for months.

Smyrl's attorneys broke into the general's diatribe with the objection that Mrs. Smyrl had not been mentioned previously. But before the board could rule, Grills shouted, "I object to that objection. I'm trying to show Smyrl's immaturity, and his wife figures heavily in it."

Shocked, Smyrl's attorney fired, "We object to the attempt of the witness to act as an advocate."

"Objection sustained."

Grills glared at the board, which he barely ranked. "Well, now, I object to that. I believe a discussion of his wife is germane. She's caused enough trouble around my base——"

desperately, "the board is in recess for 10 minutes." He turned his back on the enraged general as newsmen dashed for telephones.

The hearing resumed, never again to reach such dramatic heights. Now a procession of Smyrl's officers and enlisted men paraded through the room, all testifying that he was fair and reasonable and that on his explicit orders they had obeyed the open post policy.

Grills' admitted reason for firing Smyrl was failure to obey that policy. He admitted he based his belief on concessionaire complaints. Now it was clear if he'd ever bothered to check his facts, he wouldn't have fired Smyrl. And it was equally clear had Myers known Smyrl's complaints were true, he wouldn't have ordered the hearing. It was a tragic comedy of errors.

Smyrl's counsel fought to introduce the concession irregularities. "We have evidence of a $10,000 payoff," they said bluntly. But the board, insisting the issue was simple disobedience, refused to hear it. Yet the most serious charge against Smyrl was based on just that. In effect, his best defense was thrown out while the dirtiest charge stuck.

Then a sergeant from the ground safety office heaved a bombshell. During the first 8 months of Rollerdrome operation, he said, it had 14 disabling accidents. They cost the Air Force 248 lost work days and, thereby, more than $7,410. This was greater for the same period than injuries in all other physical training, including football and gymnastics.

At Lackland, any activity that produces two disabling accidents is considered dangerous. The waxing of office floors was discontinued after two men slipped and fell. But no one seemed worried by the rink's toll.

Next came a dreary parade of senior officers, most of them Smyrl's former friends. They sat hunched, not looking at Smyrl, as they nervously muttered that they believed him guilty. A reporter whispered wonderingly, "Why, they're frightened."

One of them was the wing chaplain who'd given Smyrl moral advice. He was a sick man, soon to retire. Now, avoiding Smyrl's unbelieving stare, he not only repudiated his former support but offered this clincher: "I believe it is the duty of young Americans to support those facilities which are set up for their pleasure and benefit."

Thus the guarantee of Morris Jaffe's bankroll had become a matter of moral obligation for young soldiers.

The shameful farce finally ended and on October 3, 1957, the board found Smyrl was not guilty of disobeying an order. But it said he was guilty of temperamental unsuitability and failure to demonstrate leadership. "The board recommends that Col. James A. Smyrl be removed from the active list of the regular Air Force."

Smyrl, at attention before the board, stepped forward, saluted with great precision and wheeled from the table. His face was pale and drawn. He looked as if he'd been punched in the stomach. The wife of one of his attorneys went to him in tears. He smiled then and comforted her. In a few minutes he left, head high and walking like a soldier.

Air Force regulations say such a hearing shall be "fair and impartial." But this was a damned peculiar example.

Grills said with satisfaction. "I consider the Smyrl case a closed issue."

It was not the first time in his life that Gen. Herbert Grills had been dead wrong.

Smyrl appealed the verdict to a five-general board of review in Washington which met January 7, 1958. In the meantime, he lived on at Lackland in loneliness. Friends dropped him. A man who fed on action, he spent a year without duties. He was one of the few full colonels at Lackland to be jet qualified. Now he sat at home and listened to the jets come over fast and sweet, leaving far behind their scream of passage. Sometimes they popped their afterburners and the violence of it shook his house with a muted thump. He would walk out then and study the sky and finally go back to his books and say nothing. Smyrl and his wife were lonely outcasts in the only world they cared for.

The hearing in Washington followed the same lines and produced the same result: Dump Smyrl.

It was a savage blow for the man who dared challenge the generals. But Smyrl had come in fighting and he meant to go out the same way. He had just one more hope.

Through New Hampshire Senator STYLES BRIDGES, Air Force Secretary James Douglas had agreed to give Smyrl an interview before acting on the board's recommendation. The scheduled 15 minutes lasted more than an hour while Douglas, himself an attorney, heard Smyrl's story.

Then he offered a compromise. Smyrl could stay in service with a rank reduction of one grade. Smyrl gazed at the Secretary a long time. Then, as his attorneys' smiles changed to looks of horror, he said quietly, "Sir, I believe I performed the duties of a colonel adequately. I see no reason why I should accept a reduction in rank."

Douglas studied him a moment in thoughtful, perhaps admiring, silence. Then came his decision. Smyrl not only would stay in the Air Force as a full colonel but would be transferred to the elite Strategic Air Command.

The San Antonio Light bannered it simply: "Colonel Smyrl Wins."

To the dismay of the Lackland group, itself already in serious trouble, it became even a greater victory than it had seemed. Given his choice of assignments, Smyrl asked for Morocco where he'd met his wife. A month after he arrived at Nouasseur AFB, French Morocco, he was named deputy commander of the base—the biggest job he's ever held.

There were other victories. Back at Lackland, Johnson was fired and Grills used his pal's hearing as a podium from which to loose a furious *blast* at Gen. Thomas White, Air Force Chief of Staff. Immediately he found himself out of Lackland and in a NATO post in Italy usually reserved for a mere brigadier. And to top it, a brigadier was sent to Lackland to take Grills' job.

So Smyrl won—and yet, in a larger sense, he lost. For everything he was fighting remains unchanged today.

At Lackland, Air Force recruits still travel toward an unknown and frightening future on roller skates. They still pay for their own training. This is still official Air Force policy.

The men coming out of Lackland today are not the rugged fighters Americans expect for their combat airmen.

Discipline and morale are shot. A husky recruit recently broke his element leader's nose and got off with a $50 fine. He mauled his training instructor and merely was transferred to another flight.

This is commonplace at Lackland and it grows from a sick attitude that comes down from the top—an attitude typified by a skating rink that's considered more important than effective training methods.

In the midst of the great rink battle, the archery concessionaire asked that troops also be marched to his range for physical training credit. In a way, he made sense. If we're training our first line of defense on roller skates, they may someday have to fight with bows and arrows.

SPECIAL ORDER

The SPEAKER pro tempore (Mr. LANE). Under previous order of the House, the gentleman from Massachusetts [Mr. O'NEILL] is recognized for 30 minutes.

Mr. WILLIAMS. Mr. Speaker, a point of order. The gentleman from Massachusetts has indicated to me that he desires to speak on the subject of an election contest. That being a matter upon which the entire membership of the House should be informed, I make the point of order that a quorum is not present.

Mr. HAYS. Mr. Speaker, will the gentleman withhold that for a moment?

Mr. WILLIAMS. I withhold the point of order.

Mr. HAYS. Mr. Speaker, I would like to say to the gentleman if this is going to be the practice there will be no more special orders by the gentleman or any of his friends.

Mr. WILLIAMS. Mr. Speaker, I renew the point of order.

Mr. ALBERT. Mr. Speaker, if the gentleman insists on his point of order I shall feel obliged to move to adjourn the House. Does the gentleman insist on his point of order?

Mr. WILLIAMS. Mr. Speaker, I do not think this speech should be made without the membership of the House being present and I insist on the point of order.

Mr. ALBERT. Mr. Speaker, I move that the House do now adjourn.

The question was taken; and on a division (demanded by Mr. ALBERT) there were ayes 6, noes 47.

So the motion was rejected.

CALL OF THE HOUSE

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 8]

Anderson, Mont.	George	Philbin
Ashley	Gray	Pilcher
Barden	Green, Pa.	Preston
Barrett	Griffiths	Prokop
Belcher	Hall	Roush
Blitch	Hébert	Rutherford
Bolling	Hechler	Shipley
Bowles	Herlong	Sikes
Brademas	Holland	Spence
Breeding	Hosmer	Springer
Brock	Jackson	Taber
Bush	Johnson, Colo.	Taylor
Carter	Jones, Ala.	Teller
Celler	Kee	Thompson, Tex.
Chenoweth	McDowell	Udall
Clark	McGovern	Vanik
Cooley	McSween	Van Pelt
Corbett	Mack, Wash.	Walter
Denton	Madden	Wampler
Edmondson	Magnuson	Widnall
Evins	Martin	Withrow
Farbstein	Meader	Wolf
Fenton	Miller, George P.	Zelenko
Frelinghuysen	Moss	

The SPEAKER. On this rollcall 348 Members have answered to their names, a quorum.

By unanimous consent further proceedings under the call were dispensed with.

PERMISSION TO SIT DURING SESSION OF THE HOUSE

Mr. PRICE. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services may be permitted to sit during the session of the House this afternoon.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

HAYS-ALFORD CONTESTED ELECTION CASE

The SPEAKER. The gentleman from Massachusetts [Mr. O'NEILL] is recognized for 30 minutes.

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent to revise and extend my remarks.

Mr. WILLIAMS. Reserving the right to object, do I understand the gentleman does not plan to yield to anyone to permit a full discussion of what he is now about to say?

Mr. O'NEILL. It is my intention to complete my remarks. At that time I will yield to anyone who wishes to discuss the matter.

Mr. WILLIAMS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. O'NEILL. Mr. Speaker, during the 85th Congress I was appointed by the Speaker to serve on the Special Committee To Investigate Campaign Expenditures created by House Resolution 656, a special committee to investigate the election of Members of the House of Representatives. We met here after the election during the month of December.

Among the duties imposed upon by the committee by House Resolution 656 were those of "investigating and reporting to the House by January 3, 1959, any violations of Federal or State laws which would affect the qualifications of a Member of the House of Representatives within the meaning of article I, section 5, of the Constitution."

The committee was also charged with the "investigation of such matters relating to the election of Members of the House of Representatives in 1958 and the amounts spent by candidates thereon as the committee deems to be in the public interest and which in its opinion will aid the House of Representatives in deciding any contest that may constitute and involve the right to a seat in the House of Representatives."

Under the rules of the committee:

The committee is authorized to act upon its own motion and upon such information as in its judgment may be reasonable or reliable. Upon complaint being made to the committee under oath by any person, candidate, or political committee setting forth allegations as to facts which under this resolution it would be the duty of said committee to investigate.

Several people came forward. I believe there were seven elections regarding which evidence was presented to the

committee. It is my intent this afternoon to speak only with regard to the Alford-Hays campaign or election which took place in Arkansas.

After we had completed a number of investigations of the Arkansas election your committee went into executive session and voted. I voted with the majority. It was the recommendation of this committee that when the 86th Congress convened that Dr. DALE ALFORD be asked to stand aside and be not seated until a thorough investigation of this matter, including all questions of fact and of law, be undertaken and completed by the Congress.

This committee also recommended that the House fix such a time within which the investigation be completed and reported to the House as the magnitude of this investigation required.

The reason why I voted that way was because I recall a year ago or in the past 85th session there was a contested election between Mr. Oliver and Mr. Hale, and the committee decided the matter on the closing day of the 85th session. It so happens Mr. HALE was the man who was seated. When the investigation and election were over and the returns considered, he was still a Member. But had Mr. Oliver been declared the winner, he would have been denied the right to a seat in this House while the House was actually in session.

So I believed that for an election of this type, with the evidence such as was presented to the committee, instead of referring it to the Committee on House Administration, which is the custom, a special committee should be set up and they should go forward immediately.

On the opening day of the session this year Mr. DINGELL asked that Mr. ALFORD step aside. I was on my feet. It was my intention to ask that Mr. ALFORD step aside. The Members of the House took the oath of office, and immediately following that Mr. MCCORMACK rose and presented a resolution. I was on my feet at the same time. I had intended to present a resolution, but the majority leader was recognized. Had I been recognized I would have presented a resolution asking that Mr. ALFORD not be seated in this Congress until such time as the investigation had been completed.

It was my intention when Mr. MCCORMACK offered his motion to offer a supplementary motion to amend his motion. But he moved the previous question and I was shut out. The previous question was ordered.

Mr. Speaker, as far as minority views are concerned with regard to the Members who were on our special committee, this is what they have to say:

5. We entertain the highest respect and regard for Mr. Hays based upon our long and close association with him in the House of Representatives. However, Dr. ALFORD was granted a duly executed Certificate of Election by the proper officials of the State of Arkansas and it is our firm belief that the Congress of the United States has a responsibility to acknowledge and to give this certification the recognition to which it has been historically entitled in the absence of proof of fraud.

It is the further view of the minority that further investigation is justified in this matter and to this extent we agree with the majority.

In the opening days of the Congress when there was quite an ado about the Alford case and there was publicity in the papers about it, I sat down with some of the Members from the South who had known of my plans. They tried to prevail upon me not to go forward. However, the parliamentary procedure prevented me. Those Members were far more friendly to Brooks Hays than I was. They had known Brooks Hays for all of the 18 years that he served in the Congress, and there was never one word of criticism of Mr. Hays. He never was a social friend of mine.

Mr. Speaker, this is not an issue of segregation. This is an issue as to whether a man who has served in this Congress for 18 years can by, in my opinion, a corrupt election be defeated, or knocked out by a stolen election. I would not care whether that man came from the South, the North, the East, or the West or whether he was black, white, Hindu, or what his religion was. If I served on that committee, as I did, and in my heart, in my mind and conscience I thought there was a fraudulent election, then I would stand on this floor, if I stood alone. That is what I honestly believe about this election.

I do not want to get up here and tend to indulge in any demagogery. I do not want to get into the issue of segregation at all. That is not the question.

There has been a report filed by our committee. I do not know how many Members of the Congress have read it. But let me read a little bit to you now.

I made mention earlier in my remarks that any person under oath could bring a complaint before our committee. You do not necessarily have to be a candidate of a political party. But, in this particular case we had a gentleman by the name of John F. Wells, of Arkansas, who made the complaint, and it was on his complaint that we acted. Now, he presented evidence to the committee.

On December 15, 1958, the committee heard the complainant, John F. Wells, and the successful candidate, Dr. DALE ALFORD, in public hearings. At that time, Mr. Wells submitted a second sworn statement supplementing his complaint of December 3, 1958. With his supplemental statement he also submitted the affidavit of A. Christos, manager of operations of the Service Bureau Corp., an affiliate of International Business Machines, dated December 14, 1958, describing the methods used in checking the names of those who voted in Pulaski County, Ark., against the official 1958 list of electors for that county.

Mr. Christos' document was subscribed to before a notary public.

So, let us see what happened down there in the Little Rock election.

In North Little Rock, ward 3, precinct B, Mrs. Van Mills, 2022 West 16th Street, was a judge. She states that the polling place was overrun by persons handing out Alford stickers and that despite her protest that this was illegal the activities continued, and that two deputy sheriffs who delivered an additional box for the ballots declared that the distribution of the stickers within the polling place should not be stopped.

Then we have evidence that showed that when the ballots arrived and they opened the box that the ballots were in, there were stickers in the ballot box.

We have evidence that showed that the stickers were lying on the table when you came to get the ballot and that you would also take the sticker.

There was evidence presented that showed that a group of Negroes were brought in and voted en bloc.

There was evidence that showed that when certain people came up to vote, members of the council would go over and peer over their shoulders and watch them while they were voting.

Now, that evidence came to the various members of the committee in letters, including myself. But, in regard to the testimony of the Service Bureau Corp., let us get down to this.

The Service Bureau Corp., an affiliate of International Business Machines, was engaged to compare the voters' list with the Pulaski County official list of qualified voters, that is, all persons registered as qualified electors not later than October 1, 1958.

In Jacksonville, SBC reports after a series of checks that 129—over 10 percent—of those listed as voters there did not appear from the records to be qualified electors in that town.

In other words, 129 people voted in that town on that day who were not registered voters and who were not qualified electors to vote in the town on that day.

It would be necessary, of course, to have access to the ballots to determine how many of those were among the—at least—66 votes reported in Jacksonville, ward 2, in excess of the number of persons who, if the register can be relied upon, actually received ballots in that precinct. Here 434 votes were counted in the Congress race—325 for ALFORD and 109 for Hays—whereas in the Governor's race, with names of both candidates printed on the ballot, the total vote was only 164.

In the contest for Governor, Democratic against Republican, with both names on the ballot, 164 votes were cast, but in a sticker contest, where only the name "Hays" appeared on the ballot, 434 votes were cast. In Jacksonville ward 2, there were 195 prima facie questionable ballots.

In North Little Rock ward 4, precinct B, where 368 names were on the list of persons voting but where 427 votes for Congress candidates were counted, 243 for ALFORD and 184 for Hays—SBC reports that 50 persons who appeared not qualified to vote were among those listed as having voted.

Adding the 59 excess of votes over voters in that precinct to the 50 apparently not qualified voters, the prima facie void vote in that precinct is 109.

Now we come to the Big Rock Township, precinct E.

In Big Rock Township, precinct E, where 569 voters were listed but where 626 votes were counted for Congress candidates—452 for ALFORD and 174 for Hays—SBC reports that 67 persons who appeared not qualified

were on the list of voters for that township. Adding the 57 votes in excess of the total number of voters in that precinct to the 67 apparently not qualified voters, the prima facie void vote in that precinct is 124.

It is not all on the side of ALFORD. Reading from the report, we come to the town of Little Rock ward 3, precinct C.

Thus in Little Rock ward 3, precinct C, where 522 votes were counted for Congress candidates—437 for Hays and 85 for ALFORD—and where only 520 names of voters were listed, an explanation should be forthcoming. This can only be had by taking the legal steps by which your committee might have the ballot boxes opened and the ballots checked.

In other words, of 12 communities that were reported to us, in all of these precincts it showed that there were more votes cast for the Congress than were actually listed. Brooks Hays was the winner by a considerable number of votes in one precinct.

I said this to various witnesses before the committee. I said, "I have been familiar with campaigns. I have been familiar with recounts through the years. If they say there are 500 registered voters in the precinct, how is it possible for 600 or 700 people to vote? Where do the ballots come from? I know in my particular area they only send 5 percent over of ballots to the election commission, and they must be accounted for."

Mr. HARRIS. Mr. Speaker, will the gentleman yield for an explanation on the question he asked?

Mr. O'NEILL. Yes, I yield.

Mr. HARRIS. The gentleman has just made the remark concerning certain precincts in which apparently there were more votes cast at that time than there were on the poll tax list for that precinct; is that the question?

Mr. O'NEILL. Yes, that is the question in part.

Mr. HARRIS. In our State, the State law is that we have a 30-day qualification in the precinct, 6 months in the county, and 1 year in the State. It happens that we have had a housing development in that area. That is not in my district and I have not been into this issue or in this controversy, but I do know something about the procedures under the law. There was this housing development in Jacksonville, one of the places the gentleman mentioned. That housing development had progressed to the point where it had been completed and many of those houses became available. People moved from within the county into that precinct, and that is responsible for the number of votes in that particular precinct.

Did the committee look into that and find out the reason for it?

Mr. O'NEILL. We were going into that as of the date of October 30.

Mr. HARRIS. That is the explanation. The gentleman asked how they could do it? I am telling the gentleman that under the law of our State, if a man has lived within that precinct for 30 days, or if he has lived in the county for 6 months, he becomes eligible.

Mr. O'NEILL. Basically the law in the gentleman's State is not any different from any other law. A man must be listed; regardless whether he moves or does not move, he must be listed.

Mr. HARRIS. They are listed. If the gentleman would look further he would find they were listed in another precinct, and within that county. He would find that they were eligible voters within the laws of our State.

Mr. O'NEILL. I know I have looked into them very thoroughly, and I cannot agree with that interpretation. We have the report of the SBC.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from Illinois.

Mr. YATES. Is that not exactly what the gentleman wants? He wants the committee to look into it further.

Mr. O'NEILL. The gentleman is correct.

Mr. HARRIS. I do not want any wrong impression to be gotten by anybody. I am not opposed to any investigation and I do not know of anyone in my State who is opposed to the investigation.

Mr. O'NEILL. I thank the gentleman for making that statement. That is my only purpose for being on the floor this afternoon. In my opinion, after having served on the committee, it appears to me that a former Member of this House is entitled to an investigation by the House. As a matter of fact, I could even go further than that. I would say that perhaps between certain people there was an implied agreement that there would be an investigation of this matter shortly after the House was in session.

Mr. HARRIS. I was not in that agreement.

Mr. O'NEILL. I did not say the gentleman was. Now we are into March. I have asked the Committee on House Administration to go forward immediately. Dr. DALE ALFORD when he appeared before the committee did not seem reluctant to have a committee hearing. All he wanted to do was, "Well," he said, "if there is going to be a committee investigation, I want my rights protected." His rights will be protected, and so should the rights of Brooks Hays be protected. I am asking the Committee on House Administration to go forward immediately and to have this investigation and clear the matter up once and for all.

Mr. HARRIS. The reason I asked the gentleman to yield was not to indicate that I personally or, so far as I know, anyone within my State would be opposed to an investigation, but the gentleman is giving facts here to the House in this RECORD on a matter which to me is so academic, because, if you were familiar with the laws of the State, it could be so easily explained; but reading the context of the gentleman's report, it is so far from what the facts are. That is the reason I rose at this time.

Mr. O'NEILL. Does it appear to the gentleman that an affiliate of the International Business Machines Corp. who went into a district to make a survey, and who would bring back these facts and these figures, a paid organization, would bring back a false report and submit it? This was the evidence presented to our committee.

Mr. Speaker, I yield back the balance of my time.

TURBINE CONTRACTS

The SPEAKER. Under previous order of the House, the gentleman from New York [Mr. STRATTON] is recognized for 10 minutes.

Mr. STRATTON. Mr. Speaker, I appreciate the fact that so many Members of the House are assembled to hear my remarks. This is a matter, I think, that will be of interest to every Member of the House, because it concerns the award of certain turbine contracts outside the United States, with the consequent loss of employment within the United States.

Mr. Speaker, I have risen on this floor before and other Members have risen to discuss the subject of the awarding by the Tennessee Valley Authority of a contract for the construction of a half-million-kilowatt generator to a British firm rather than to one of two American firms that have had wide experience in this field and both of which are located in areas of major unemployment and of labor surplus. This 500,000-kilowatt generator is, incidentally, one of the greatest machines of its kind that has ever been constructed. There are very few, if any, machines of this size which have previously been constructed. The Tennessee Valley Authority, as a part of its overall power complex, is now acquiring this huge machine and is going to go to Britain to buy it unless the Office of Civilian and Defense Mobilization intervenes on Monday to prevent the purchase.

Mr. MILLER of New York. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I would like to yield briefly to the gentleman, but my time is limited. If the gentleman will join with me in getting an extension of time, I would be more than happy to yield to him, but because of the rather complex nature of the material, I prefer not to yield until after I have completed my remarks.

Mr. WIER. Mr. Speaker, will the gentleman yield for a little help?

Mr. STRATTON. I am always happy to have help.

Mr. WIER. I join with the gentleman with reference to this matter because I have a firm that is in the same boat, that has been losing these REA and large generator bids to foreign competitors, and I join with the gentleman in checking into this whole matter of these bids being let on these big projects.

Mr. STRATTON. I thank my colleague from Minnesota.

Mr. MILLER of New York. Mr. Speaker, will the gentleman yield for a little more help?

Mr. STRATTON. I am happy to yield to the gentleman for some help.

Mr. MILLER of New York. I am in accord fully with every statement that the gentleman makes, and I have always opposed strenuously these public power authorities, and I presume before this session will end that there will be a bill presented here to permit the TVA to handle its operations by the flotation of bonds. I hope the gentleman will keep that in mind when the bill comes up and help to get the House to pass it.

Mr. STRATTON. I thank the gentleman from New York. Let me assure him that the actions of the TVA in this instance are not making too many friends in the 32d Congressional District of New York.

Mr. Speaker, the whole matter of this contract has been appealed before the Office of Civilian and Defense Mobilization by the General Electric Co. on the grounds of national security. Just yesterday I received a lengthy communication from the TVA in which they discussed this matter and at least to their satisfaction disposed of it. In my judgment, the answer of the TVA has not satisfied me on this point of national security. I think they have failed to make out their case that the national security would not be jeopardized by this award; and I would like to discuss briefly just three of the reasons why I think they have failed to make this case. First of all, Mr. Speaker, it seems to me clear that the whole electrical power complex of the United States is very important and an essential component of our national defense. We have been discussing in the Committee on Armed Services, for example, the so-called hardened installations for intercontinental ballistic missiles and the point always comes up that at some point you have to cut into the power complex and at that point the hardening becomes a little soft. Certainly the overall framework of our power is one of the most critical points in our whole defense structure. It just does not make sense for Government agencies to undertake to equip their power-producing centers with material which is made in foreign countries. This is not a matter of trying to stir up ill feeling between these countries. It is not a matter of trying to interfere with our reciprocal trade. It is simply recognizing that when it comes to important elements of national defense, it does not make any more sense to acquire power generators abroad than to acquire battleships or military aircraft. The British themselves have had a policy of not acquiring this large electrical generating equipment outside their own borders. Canadians who have been buying it from abroad are now also considering limiting purchases to Canada itself. Obviously, if we are going to build up our defense with equipment which is purchased abroad, and which would have to be serviced abroad and repaired abroad, in the event of a national emergency we would have needlessly jeopardized a substantial part of our national defense structure.

The second point concerns certain engineering aspects of this question. I am not an engineer, but as the Representative of a district which has a large number of distinguished engineers living in it, I have perhaps acquired a little of this information by osmosis from my constituents. At least the main point, as the engineers explain it to me, is that this TVA generator is designed to generate 500,000 kilowatts of electricity. That is larger, by some 300,000 kilowatts, than the largest generator that has ever been manufactured and put into operation by the British firm of Parsons, which was the successful bidder. Even the great General Electric Company of Schenectady has previously built and put into operation only a generator capable of generating 400,000 kilowatts, and our engineers tell us when you move up, the wisest step is to move up in stages of 100,000 kilowatts, rather than to jump up 300,000; as Parsons is doing here. To do otherwise is to run the risk of major engineering failures or engineering delays. Those of you who have been in England know that the electric lighting system there seems to flicker a little. That is because theirs is a 50-cycle system rather than 60-cycle system we have in the United States. That means that an American generator has to revolve at 3,600 revolutions per minute, in comparison with a British generator revolving at 3,000 revolutions per minute. This means an increased engineering burden which the British firm will encounter in trying to meet TVA requirements. How can we be sure they will measure up to the job?

Two Parsons generators failed in Canada in 1954, Mr. Speaker, and it took a year and a half to repair them in comparison with a requirement of only 76 days in one case and 129 days in another required to repair generators manufactured in the United States.

If we ever get into another emergency—and I hope we never will—this kind of delay could indeed be fatal. In fact, the requirements of the TVA, if all of the generating equipment now on order performs at top performance, will exceed by only 3 percent the peak load which the TVA expects for 1962. If there is any failure in this equipment, if there is any failure to measure up to the very large requirement that has been estimated by this British firm, if the TVA has underestimated its needs, then we may well find ourselves short when an attack comes, of vital and necessary electric power.

I feel that the matter ought to be fully examined by the Office of Civil Defense Mobilization. We have an important problem here that involves our national defense, and I feel that these national defense factors must be considered by the one agency which is charged with that responsibility—the Office of Civilian Defense Mobilization and not left for final determination by TVA.

The TVA has also said, Mr. Speaker, that the bids placed by the American firms of General Electric and Westinghouse were excessive in cost, and amounted to a sum almost $6,000,000 greater than the British bid. The TVA thus suggests indirectly that they have placed their contract abroad in the hope of forcing American producers to lower their price. Considering that the American bids were both very close, a question arises in my mind as to just how the British firm could manage to quote a figure so much lower than the prevailing American figure. Even the differential in wage costs, as the TVA analysis points out, amounts to only about $1.5 million. Could it be that the British firm of Parsons & Co. is being subsidized by the British Government in an effort to enable them to break into this important manufacturing field in the United States? I have no desire to see American agencies pay excessive prices for equipment, but we already have, Mr. Speaker, a procedure which permits the renegotiation of important defense contracts. I would think that the proper solution in this case, if TVA feels that the price is excessive, would be to require a renegotiation of the contract with a domestic firm rather than placing the contract abroad in an effort to penalize American manufacturers.

I am particularly dissatisfied with TVA's understanding of the unemployment problem in this country. Unemployment is no joke, and I think its significance deserves to be considered far more seriously by all agencies of the executive branch of our Government. The TVA has suggested that funds spent in Britain will go just as far toward relieving unemployment in this country as funds spent domestically. This, Mr. Speaker, is complete nonsense. The unemployment problem which we face today is a localized problem centered in certain specific localities, and bearing most heavily on heavy industrial manufacturing areas like Schenectady, N.Y. Money which may be spent in this country by British purchasers would do almost nothing to relieve this problem since at best it would be spent without regard to location. The only expenditure that will help these heavy industries would be increased purchases of this heavy industrial equipment, and this is precisely what we are hoping that American Government agencies would be able to do these days rather than going abroad. It has been estimated that the award of this contract to the General Electric Co., for example, would provide employment for 600 persons for a full year in Schenectady.

What is particularly serious about the TVA decision is the danger that it will set a new trend in purchases in the turbine field. The city of Los Angeles is already considering the purchase of a 200,000-kilowatt turbogenerator from a Swiss firm, and they may indeed already

have acted to award that contract to the Swiss firm instead of to General Electric. If this trend carries on there can be real disaster for those areas of this country where heavy electrical equipment is now being manufactured. It is quite true that the power needs of this country will grow, but if a trend develops at the same time to purchase the generating equipment for this increased power from abroad, then this growth will contribute to unemployment here rather than the reverse. In fact, if foreign firms, as Mr. William S. Ginn, vice president of the General Electric Co. in Schenectady, has suggested, can underbid American firms in this field any time they want to, then there is a real danger that American capital will also consider moving overseas in order to compete in this field, and the result in America will be ghost towns at regular industrial localities from one coast to another.

I believe, Mr. Speaker, that the American Government has a serious responsibility in this matter. I believe that the Government ought to take the lead in recognizing the importance of this heavy electrical industry and the importance of stimulating its productive activity, rather than letting the situation drift.

As I have mentioned, the Office of Civilian and Defense Mobilization has been urged to recommend to the President that this contract with Parsons & Co. be canceled on the grounds of national security. Monday, March 9, is the last day on which the contract can be canceled without penalty to the Government. I hope, Mr. Speaker, that the Director of OCDM will take these arguments seriously to heart and will exercise the power conferred upon him to rescue this situation before it is too late. I hope that on Monday next the action of OCDM will be an action in support of American industry and a decision to maintain our American power facilities on a genuinely American basis. I hope that there will not be any shrinking of this responsibility in OCDM, so that we will not have to consider Monday next a blue or even a black Monday for American industry and American employees. Just a few weeks ago OCDM recognized the importance of national security in the case of a 50,000-kilowatt turbine for the Greer's Ferry project in Arkansas. Surely, they can recognize the importance of national security in a unit which is so comparatively small, how can they fail to recognize the even greater aspect of national security interest implicit in the construction of a piece of machinery 10 times as large? Surely, Mr. Speaker, the laws of the game must apply to all players, not just to a privileged few. I hope that the decision of OCDM, taken on Monday next, will be one that will renew confidence in the people of our land and will reestablish their faith that those who decide on these matters in Washington are genuinely concerned about their welfare and are sensible to their economic needs.

Mr. Speaker, in order to give the Members of this House some indication of the sentiment in my district, I ask unanimous consent to include at this point the text of a resolution adopted by post 41 of the AMVETS organization located at Fort Hunter, N.Y., a resolution adopted by the city council of the city of Schenectady, and also an editorial which appeared in the Watertown Daily Times of February 11, 1959. Although Watertown is not in the immediate area of Schenectady and is outside my district, I know the people of our district are gratified to realize the extent to which the people of other sections of our State understand the serious concern which we have in this award. I hope that every Member will have an opportunity to read these resolutions and to make his views felt to the OCDM before Monday next.

RESOLUTION OF AMVETS QUEEN ANN POST, NO. 41, OF FORT HUNTER, N.Y.

At a regular meeting of this post on February 11, 1959, at 8 p.m., in Fort Hunter, N.Y., the following resolution was unanimously adopted:

"*Resolved*, That inasmuch as all members of this post and residents of this area are vitally concerned with the labor surplus which already exists in this area and inasmuch as many of the members of this post and residents of this area depend upon income derived from employment in this area and particularly the General Electric Co. at Schenectady, N.Y., we feel compelled to go on record in this manner as being unalterably opposed to the letting of a large Federal Government contract for a turbine to a foreign firm when such can be built just as well, and perhaps better, in this country and particularly in Schenectady, N.Y.; that this is a gross miscarriage of governmental consideration toward its own people which will tend further to depress the economic condition of this area; that the living standards of our own people must be first taken into consideration and compared with foreign labor; that by making governmental purchases in this country a large portion of the purchase price will be returned to the Government in corporate and individual taxes; that our Representatives in the Congress and Senate be urged to take all steps necessary to reverse this decision and to prevent future instances of the same nature."

RESOLUTION NO. 6571 OF THE COUNCIL OF THE CITY OF SCHENECTADY, N.Y.

"Whereas the Tennessee Valley Authority recently awarded a contract for a large steam turbine generator to a foreign manufacturer, outbidding the General Electric Co.; and

"Whereas it is reported that four foreign firms are now bidding against General Electric Co. for a large order soon to be placed by the city of Los Angeles; and

"Whereas because of the low-cost labor in foreign countries it is possible for a foreign firm to outbid a domestic concern; and

"Whereas General Electric Vice President W. S. Ginn estimated that the Tennessee Valley Authority and Los Angeles orders involve a total of more than 3 million manhours of work, enough to supply jobs to 750 office and factory employees for 2 full years; and

"Whereas the granting of such contracts to foreign firms will increase our unemployment throughout the Nation, and, even more important, will endanger our national security in time of war inasmuch as we might have to rely on foreign labor and foreign skills to maintain equipment in our arsenal of democracy; and

"Whereas in the city of Schenectady the awarding of such contracts to foreign firms affects management not only of the General Electric Co. but Alco Products, Inc., as well, together with the IUE Local 301 and the United Steelworkers of America, AFL, Local 128 Steamfitters, Plumbers, and Helpers, as well as all of the Schenectady business enterprises and their employees: Now, therefore, be it

"*Resolved*, That the Council of the City of Schenectady, on behalf of its citizenry indignant because of the jeopardy of their economic security and national wartime stability, vigorously protests the awarding of contracts to foreign powers by governmental units in competition with domestic bidders; and be it further

"*Resolved*, That the present contract between the Tennessee Valley Authority and the C. A. Parsons Co., Ltd., of Newcastle, Great Britain, be rescinded; and be it further

"*Resolved*, That before any contract be entered into between the U.S. Government or any agency thereof and any person, firm, or corporation of and located in a foreign country the entire matter shall be referred to the proper congressional committee for review and approval; and be it further

"*Resolved*, That this resolution be spread upon the minutes of the Council of the City of Schenectady and copies thereof be sent forthwith by the clerk of the city of Schenectady to Senator JACOB K. JAVITS, Senator KENNETH B. KEATING, Congressman SAMUEL S. STRATTON, Congressman J. ERNEST WHARTON, Congressman LEO W. O'BRIEN, and Congressman DEAN P. TAYLOR, and to each and every other member of the New York State congressional delegation."

This resolution was unanimously adopted by the Council of the City of Schenectady on Monday, February 16, 1959.

FREEMAN K. KELLER,
Clerk of the City of Schenectady.

[From the Watertown (N.Y.) Daily Times, Feb. 11, 1959]

TVA AWARD TO ENGLAND

The Tennessee Valley Authority has awarded a contract to an English firm for a huge steam turbine-generator, refusing to consider the higher bids by domestic firms. Naturally this decision to bypass the American firms to give the contract for the 500,000 kilowatt unit for TVA's Colbert plant is protested, most vehemently by General Electric which submitted the low domestic bid.

It is only right to make such an award to the lowest bidder when domestic companies are concerned. But this case is different. A foreign corporation was one of the competitors and entered the bidding with a loaded deck. There was little danger of being outbidded for it had the immediate advantage of lower construction costs due to the abnormally low wage scale prevailing in England.

The General Electric has every right to make a vehement protest for this company and for that matter any company in the country is at a disadvantage in competing against foreign manufacturers. Naturally the bid of the British firm was lower, $5,500,000 to be exact, and that is quite a sizable difference.

But there are other facts to consider. All of the money expended on the turbine-generator unit will be spent in England. American labor and allied manufacturers will not share in any of the work. There is also the matter of necessary repairs, which would be handicapped when they are to be done by the foreign builder. Much valuable time would be lost.

In these days of high unemployment every effort should be made, especially by such agencies as the TVA, to aid in every way to create jobs. That cannot be done if firms from outside of this Nation are given contracts. A protest over this TVA action is in order.

The SPEAKER. The time of the gentleman has expired.

FEDERAL AID TO EDUCATION

The SPEAKER. Under the previous order of the House the gentleman from West Virginia [Mr. STAGGERS] is recognized for 10 minutes.

Mr. STAGGERS. Mr. Speaker, for many years the question of Federal aid to education has been discussed by the Members of Congress, by educators, and by interested lay citizens. There has been much difference of opinion among those engaging in these discussions as to the role of the local, State, and Federal Governments in providing for the education of our youth. Despite the differences of opinion there were these basic agreements: First, that the youth of each State and each local community should be provided an opportunity to attend a school of acceptable quality; second, that the opportunity to attend a good school is still being denied many thousands of children in many of the States of our country.

Until a year ago last October it appeared that this might be treated as an academic question subject to continued debate. With the launching of the Russian sputnik it became apparent to the discerning people of this country that our relative position among the nations of this earth was not what we had been led to believe with regard to education and technological skill. From the position of the acknowledged leader in education and technology one day, we found ourselves, but a few hours later, forced to concede that the growth of education and science in Russia since the war has been accelerated to the extent that our safety, our continued existence as a free people is gravely threatened.

While we were debating whether or not we would choose to use our full resources to give our people the quality of education which we agree they need, Russia, recognizing that the position of any nation in today's world will be determined by the quality of the education of its people, gave first priority to the improvement of its schools. Physical facilities and equipment were improved. A program of studies designed to meet their purpose with standards of pupil achievement was established. The position of the teacher was elevated to that held by other important professions. Their recent achievements in space exploration and in other scientific endeavors are strong evidence that progress comes through education. Can we longer persist in debating how we shall provide good schools for all of our people? Russia has chosen to battle, at the present, in the classroom. Have we any alternative other than to accept that challenge? Must we not acknowledge that the education in this country is an essential part of our national defense and as such becomes a joint responsibility of the local, State, and National Governments?

Let us take a look at some of the conditions to be found among the school systems of our States. To what extent is there an ability to provide the money needed for good schools? Estimated average salaries paid the instructional staff range from a high of $5,925 in one State to a low of $2,650 in another. The estimated average per pupil expenditure ranges from a high of $482 to a low of $158 with the national average being $340. In education as in business, experience teaches us that there is a positive relationship between the price we pay and the quality of the product we receive. This range of teachers salaries and per pupil expenditure indicates that many of our schools are substandard. A good teacher in a poor State needs the same professional training as does the teacher in a wealthy State. If the teaching profession is to secure and keep the number of able young people needed in our schools, teaching must be made as financially attractive as are other professions requiring an equal amount of college preparation.

We are told that the average age of the teachers in the public schools is 48 years and that more than a hundred thousand qualified teachers are now needed. From 4 to 7 years are required to prepare a high-school graduate to teach. The school population will continue to increase drastically as long as the growth in the birth rate continues. Provisions should be made at once to insure our having an adequate supply of qualified teachers. This can be done only through increased local, State, and Federal support for schools.

The aid to education as provided under the Murray-Metcalf bill cannot longer be delayed without further jeopardizing our national defense.

As a second step toward an ultimate solution of the problem of providing a good school for each boy and girl, I would recommend the establishment of a relatively small commission to set forth in as clear and simple manner as possible a statement of standards which could enable the interested lay citizen along with the education profession to more readily evaluate each individual school as to the quality of its staff, program, plant, equipment, and maintenance.

As a third step, I would provide for the employment of a qualified staff to determine the relative ability of each State to support a school program of an acceptable standard.

There is a fourth step—probably the most important. Enlighten the people to our plight. I would recommend an all-out crash program to inform and alert every community, every county, and every State to the second-class status of the great majority of our teachers and schools. Bombard the people with the unvarnished truth in understandable terms. As an eye opener: During the year 1956 this Nation spent for liquors over $9 billion; for tobacco almost $8 billion; and for cosmetics, beauty, and barber shops, close to $4 billion which makes a sum of almost $21 billion.

Now, compare $21 billion with $11 billion spent for education for the same year. Half again more for liquor, tobacco, and beauty than for education of our youth. It just does not make sense.

When the people are awakened to the truth, they will urge and support appropriations for better schools and better paid teachers. A basic salary of $10,000 is not too much for well qualified teachers who have spent thousands of dollars and years of study and research to prepare themselves for the educational field. A good teacher should earn as much as a lawyer, a doctor, or a politician.

Again, I remind you our only hope and salvation is an enlightened people. With the will and means to grow and improve, our educational system in this country will cease to be second rate. We want to be as good as any. We should be the best.

I urge all elected officials from the county level up to the President of the United States to recognize our situation and prove to the mothers and fathers that their trust is well placed, and with their help and with the help of the good Lord, new life will be put into our crippled educational system.

AMICABLE RELATIONS WITH CANADA ENDANGERED BY H.R. 1

Mr. JOHNSON of Wisconsin. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include an article by the attorney general of the State of Wisconsin.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. JOHNSON of Wisconsin. Mr. Speaker, under leave to extend my remarks I am calling attention to the statement made by the Honorable John W. Reynolds, attorney general of the State of Wisconsin, before the Subcommittee on Rivers and Harbors of the Public Works Committee on February 17, 1959.

Mr. Reynolds was elected to the office of attorney general on November 4, 1958, and is the third Democrat to serve Wisconsin in that position during my lifetime. It was my privilege to know John W. Reynolds, Sr., the father of the present attorney general, who served as attorney general from 1927 to 1933 as a Progressive Republican. From 1935 to 1938, John W. Reynolds, Sr., served in the office of the Wisconsin Progressive Party, Madison, Wis., and it was my privilege to know him personally and to work with him at the time I was chief clerk of the Wisconsin Assembly. He made an outstanding record in the 6 years he served as attorney general of Wisconsin. As a matter of fact, it was John W. Reynolds, Sr., while he was attorney general of Wisconsin, who secured the original decree from the U.S.

Supreme Court in 1930 which established the present limit on the amount of water that Chicago may take from Lake Michigan. I am glad his son now has the opportunity to carry on his father's work.

Since the Public Works Committee has reported out H.R. 1, amended, I would like to call my colleagues' attention to the fact that Canada has renewed its firm opposition to the Chicago water diversion, and that the Honorable Sydney Smith, Secretary of State for External Affairs of Canada, has transmitted a note of opposition to the U.S. Ambassador at Ottawa.

At this point in the RECORD I am glad to submit the statement of the Honorable John W. Reynolds, Jr., attorney general for the State of Wisconsin:

STATEMENT OF JOHN W. REYNOLDS, ATTORNEY GENERAL OF WISCONSIN, BEFORE THE SUBCOMMITTEE ON RIVERS AND HARBORS, COMMITTEE ON PUBLIC WORKS, HOUSE OF REPRESENTATIVES, FEBRUARY 17, 1959

Gentlemen, my name is John W. Reynolds, and I am the attorney general of the State of Wisconsin. I would like to thank you for the opportunity you have given me to appear before you.

Speaking on behalf of the State of Wisconsin, the city of Milwaukee, and the Milwaukee Port Authority, I urge this committee to take no action on H.R. 1 at this time for the following reasons:

1. The matter of the diversion of Lake Michigan water is presently the subject of litigation. In December 1958, Wisconsin, joining with the other Great Lakes States, which were parties to the original action in the case of *Wisconsin et al.* v. *Illinois and the Chicago Sanitary District*, filed its application with the Supreme Court of the United States to reopen the decree of April 21, 1930. By that decree the United States Supreme Court retained jurisdiction over present application to the United States the subject matter of H.R. 1. Wisconsin's Supreme Court is for the purpose of requesting the Court to appoint a special master to take evidence to determine whether Chicago should be compelled to follow the practice of all other Great Lakes cities and return its unused domestic pumpage, after it had passed through its waterworks and purification system, to the Great Lakes Basin.

The State of Illinois and the Sanitary District filed their brief in opposition to our application in January of this year.

In connection with this litigation, I would like to point out that the Solicitor General of the United States, Mr. J. Lee Rankin, is taking an active interest in this case. He has notified the United States Supreme Court that in order to protect the sovereign interests of the United States he will file a brief in March of this year.

In addition, the Solicitor General has called a conference on March 2, 1959, of all the Great Lakes States concerned, including Illinois. I cannot predict what results may be reached at that conference, but I respectfully and specifically request that the records of this committee be kept open to receive a report of that conference.

2. The second reason that we request this committee to take no action on H.R. 1 at this time is that on February 25 and 26 of this year there is going to be held in Detroit a meeting of Senators, Governors, attorneys general, and mayors of Wisconsin, Ohio, New York, Michigan, Pennsylvania and Minnesota, and mayors of several Canadian cities, to plan unified opposition to bills and suits on the diversion of water from the Great Lakes. I also request that the records of this committee be kept open to receive a report of that conference.

On behalf of the State of Wisconsin I am here to reiterate our strenuous objection to the never-ending effort of the Chicago Sanitary District to take the waters of Lake Michigan. No other city on the Great Lakes in the United States or Canada has ever sought or asserted the right to deplete the waters of the Great Lakes Basin.

Wisconsin has been fighting for 30 years to preserve and protect the water of Lake Michigan. As a matter of fact, it was my father as attorney general of Wisconsin who got the original decree from the Supreme Court of the United States in 1930, which established the present limit on the amount of water that Chicago may take from Lake Michigan.

Since our time as well as the subject matter at this hearing is strictly limited, I would like permission to incorporate in the RECORD at this point two statements of the attorney general of Wisconsin. The first was made to this subcommitte in March 1957 and recorded in the report of this committee on the hearings of H.R. 2, March 26 and 27, 1957, pages 66–68. The second is reported in the hearings before a subcommittee of the Committee on Public Works of the U.S. Senate on H.R. 2 and S. 1123, held July 28–29 and August 7, 1958, pages 273–275.

These two statements outline the position of Wisconsin. First, that it is a scientific fact that the diversion of an additional 1,000 cubic feet per second of Lake Michigan water will have no effect upon pollution in the Chicago drainage canal or the Illinois River Waterway; and second, that an attempt by the U.S. Congress unilaterally to divert this water from an international system of lakes and rivers is violative of international law and would create a dangerous precedent in our dealings and negotiations with Canada over the mutually beneficial use of international waters.

The present bill proposed on behalf of the Chicago Sanitary District, H.R. 1, is considerably watered down from previous bills which have been before the House of Representatives and before your committee. It makes the comparatively modest proposal to increase the diversion of water by the city of Chicago by 1,000 cubic feet per second for 1 year. The alleged purpose of the bill is to permit the U.S. Public Health Service to determine the effect of such increased diversion upon Chicago's woefully mismanaged sewage disposal problem and the problem of pollution in the Chicago Drainage Canal and the Illinois River Waterway.

Our primary objection to this bill is twofold. First, such a bill would establish a highly undesirable precedent. Our second objection is that according to the best scientific and professional advice that we can obtain, we know in advance it is not going to do the city of Chicago or the Chicago Sanitary District one iota of good. The available evidence which we have already accumulated indicates that the mismanagement by the city of Chicago of its sewage disposal facilities has now resulted in a pollution problem so great that nothing less than the diversion of 10,000 cubic feet of water per second would do any good.

Surely, gentlemen, if you propose to recommend this bill for passage, you should insist that the proponents of this bill present the testimony of at least one competent and qualified sanitary engineer that there is at least a possibility that the proposed diversion will have a beneficial effect upon the pollution caused by the city of Chicago in its drainage canal and the Illinois River Waterway. According to the best advice I can obtain, the proponents cannot obtain such testimony.

This bill would interfere with a difficult and perilous international question. To increase Chicago's take of Lake Michigan water could seriously jeopardize the negotiations which I understand our State Department is now conducting with Canada concerning our mutual rights and obligations in the use of all international waters including, particularly, the Columbia River.

In this connection I would respectfully call your attention to two publications. The first is entitled, "Document on the Use and Control of Waters of Interstate and International Streams," which is a compilation of compacts, treaties, and adjudications affecting the use of interstate and international waters, published by the U.S. Department of the Interior in 1956. The second is the proceedings of the 10th conference of the Inter-American Bar Association held in 1957 at Buenos Aires, Argentina, entitled, "Principles of Law Governing the Uses of International Rivers and Lakes," published in Washington, D.C., in April 1958.

It is my considered opinion that these two publications establish beyond all reasonable doubt the principle that no state or nation can act unilaterally on a matter affecting an international water in a manner which will adversely affect some other state or some other nation.

The distinguished authority on international law, Lauterpacht, who is now a judge of the International Court of Justice, has stated that "the duty of the state not to interfere with the flow of a river to the detriment of other riparian states" is "one of those general principles of law recognized by civilized states which the Permanent Court is bound to apply to virtue of article 38 of its statute" (1 Oppenheim, International Law, 346–347 (8th ed. Lauterpacht, 1955)).

The so-called Harmon doctrine, under which former U.S. Attorney General Harmon asserted in 1895 that the United States could deal with the waters of the Rio Grande without regard to the rights of the United Mexican States, has never been followed. In fact, by the Rio Grande Convention negotiated in 1906 by the President of the United States of America and the President of the United States of Mexico, the United States agreed to insure delivery to Mexico of 60,000-acre feet of water annually. And in our relations with Canada we have entered into four separate treaties: The Boundary Waters Treaty of 1909; the Lake of the Woods Convention of 1925; the Rainy Lake Convention of 1938; and the Niagara River Water Diversion Treaty of 1950.

If we are to protect and preserve our amicable relations with Canada, I most respectfully suggest to you that no diversions of water whatsoever from the Great Lakes Basin should be authorized or permitted in the absence of a specific convention or agreement ratified by our own U.S. Government and the Government of Canada.

In conclusion, it is Wisconsin's position that to permit an additional diversion of 1,000 cubic feet per second so that the U.S. Public Health Service can make a so-called study of the effect of a diversion is totally unjustified for the following reasons:

1. Such a study would be fruitless and a waste of the time of an important Federal agency as well as the taxpayers' money.

2. Such unilateral additional diversion would violate international law and seriously affect our relations with Canada.

3. Such additional diversion would create a disastrous precedent, and if followed by other Great Lakes cities would have the effect of seriously diminishing the value of the St. Lawrence Seaway project.

4. Such additional diversion would interfere with the jurisdiction of the U.S. Supreme Court.

I would like to remind the committee of our sincere belief that the riparian rights of the Great Lakes States of the United States are subject to the jurisdiction only of the U.S. Supreme Court under the decree of April 21, 1930, and of any modification that the Court may make thereof upon proper application. As I have stated, there is litigation presently pending affecting those rights, and I most respectfully urge upon the Congress that it should do nothing which would prejudice the outcome of that litigation.

Gentlemen, I would like to again thank you for your consideration.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. STRATTON, for 10 minutes, today.

Mr. BECKER (at the request of Mr. HALLECK), for 60 minutes, on Monday, March 16.

Mr. STAGGERS, for 10 minutes, today.

Mr. CURTIS of Missouri, for 60 minutes, on Monday next.

Mr. WILLIAMS (at the request of Mr. ALBERT), for 45 minutes, on Monday next, March 9, 1959.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. PELLY in two instances.

Mr. ALGER.

Mr. FULTON.

Mrs. SULLIVAN and to include an article by Mrs. Roosevelt.

Mr. LINDSAY and to include extraneous matter.

Mrs. DWYER and to include extraneous matter.

Mr. CRAMER (at the request of Mr. HALLECK).

Mr. BOLAND.

At the request of Mr. MCCORMACK, the following Members to extend their remarks in the RECORD:

Mr. BARING and to include extraneous matter.

Mr. ANDERSEN of Minnesota.

Mr. O'HARA of Illinois in three instances, in one to include a remarkable article by the senior Senator from Illinois, Senator PAUL DOUGLAS.

(At the request of Mr. COLLIER, and to include extraneous matter, the following:)

Mr. SCHWENGEL.

Mr. DIGGS.

(At the request of Mr. ALBERT, and to include extraneous matter, the following:)

Mr. COFFIN.

Mr. ANFUSO in two instances.

Mr. FOGARTY and to include an article entitled "A Report to the Nation Presented by American Heart Association and National Heart Institute on 'Decade of Progress Against Cardiovascular Disease,'" which is estimated by the Public Printer to cost $621.

ADJOURNMENT

Mr. ALBERT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 47 minutes p.m.), under its previous order, the House adjourned until Monday, March 9, 1959, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

666. A letter from the Director, Office of Civil and Defense Mobilization, Executive Office of the President, transmitting the 32d report on property acquisitions for the Office of Civil and Defense Mobilization for the quarter ending December 31, 1958, pursuant to the Federal Civil Defense Act of 1950; to the Committee on Armed Services.

667. A letter from the Administrator, Small Business Administration, transmitting the 11th Semiannual Report of the Small Business Administration covering operations between July 1 and December 31, 1958, pursuant to Public Law 85-536; to the Committee on Banking and Currency.

668. A letter from the Acting Secretary of the Treasury, transmitting a draft of proposed legislation entitled "A bill to amend title 14, United States Code, entitled 'Coast Guard,' to authorize the Coast Guard to sell supplies and furnish services not available from local sources to vessels and other watercraft to meet the necessities of such vessels and watercraft"; to the Committee on Merchant Marine and Fisheries.

669. A letter from the Postmaster General, transmitting a draft of proposed legislation entitled "A bill to restore the authority of the Postmaster General to adjust the postage rates for airmail weighing in excess of 8 ounces, and for other purposes"; to the Committee on Post Office and Civil Service.

670. A letter from the Director, Bureau of the Budget, Executive Office of the President, transmitting a draft of proposed legislation entitled "A bill to amend the Railroad Retirement Act and the Social Security Act to change the basis for financing military service creditable under these acts, and for other purposes"; to the Committee on Ways and Means.

671. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation entitled "A bill to amend the Internal Revenue Code of 1954 to exclude from gross income amounts paid by the United States to certain nonresident alien employees or their beneficiaries"; to the Committee on Ways and Means.

672. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ROGERS of Texas: Committee on Interior and Insular Affairs. H.R. 1306. A bill to amend section 2(b) of the Columbia Basin Project Act, as amended; with amendment (Rept. No. 176). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROGERS of Texas: Committee on Interior and Insular Affairs. H.R. 4405. A bill to authorize and direct the Secretary of the Interior to conduct studies and render a report on the feasibility of developing the water resources of the Salt Fork of the Red River in the State of Texas; with amendment (Rept. No. 177). Referred to the Committee of the Whole House on the State of the Union.

Mr. DELANEY: Committee on Rules. House Resolution 93. Resolution authorizing the Committee on Agriculture to make certain studies and investigations; with amendment (Rept. No. 182). Referred to the House Calendar.

Mr. DELANEY: Committee on Rules. House Resolution 182. Resolution authorizing the Committee on Ways and Means to conduct studies and investigations relating to matters within its jurisdiction; with amendment (Rept. No. 183). Referred to the House Calendar.

Mr. TRIMBLE: Committee on Rules. House Resolution 200. Resolution providing for the consideration of S. 79, an act to amend the Federal Food, Drug, and Cosmetic Act to permit the temporary listing and certification of Citrus Red No. 2 for coloring mature oranges under tolerances found safe by the Secretary of Health, Education, and Welfare, so as to permit continuance of established coloring practice in the orange industry pending congressional consideration of general legislation for the listing and certification of food color additives under safe tolerances; without amendment (Rept. No. 184). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WALTER: Committee on the Judiciary. H.R. 3816. A bill for the relief of Mukhtar Mohammed; without amendment (Rept. No. 178). Referred to the Committee of the Whole House.

Mr. SMITH of California: Committee on the Judiciary. H.R. 3817. A bill for the relief of Jose Santiago Savedra Calza; without amendment (Rept. No. 179). Referred to the Committee of the Whole House.

Mr. MOORE: Committee on the Judiciary. H.R. 4445. A bill for the relief of Stirley Louis Berutich; with amendment (Rept. No. 180). Referred to the Committee of the Whole House.

Mr. FEIGHAN: Committee on the Judiciary. H.R. 4549. A bill for the relief of Jacob Naggar; without amendment (Rept. No. 181). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSEN of Minnesota:

H.R. 5302. A bill to extend rural mail delivery service; to the Committee on Post Office and Civil Service.

By Mr. ANDERSON of Montana:

H.R. 5303. A bill to make permanent the provisions of the Sugar Act of 1948; to the Committee on Agriculture.

By Mr. ANFUSO:

H.R. 5304. A bill to establish in the Bureau of Customs the U.S. Customs Enforcement Division in order to improve the enforcement of the antismuggling laws; to the Committee on Ways and Means.

By Mr. BECKWORTH:

H.R. 5305. A bill to amend chapter 35 of title 38, United States Code, to provide educational assistance to the children of veterans who are permanently and totally disabled from wartime service-connected disability; to the Committee on Veterans' Affairs.

By Mr. COFFIN:

H.R. 5306. A bill to provide for unemployment reinsurance grants to the States, to revise, extend, and improve the unemployment insurance program, and for other purposes; to the Committee on Ways and Means.

By Mrs. DWYER:

H.R. 5307. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for income-tax purposes of expenses incurred by an individual for transportation to and from work; to the Committee on Ways and Means.

By Mr. FINO:

H.R. 5308. A bill to amend title II of the Social Security Act to eliminate the provisions which reduce the old-age or wife's insurance benefits of a woman becoming entitled to such benefits before she attains age 65; to the Committee on Ways and Means.

By Mr. GARY:

H.R. 5309. A bill to amend part I of the Federal Power Act; to the Committee on Interstate and Foreign Commerce.

By Mr. GRIFFIN:

H.R. 5310. A bill to amend title II of the Social Security Act to provide that the rental value of a parsonage shall not be included in determining the amount of a retired minister's outside earnings for purposes of the work clause; to the Committee on Ways and Means.

H.R. 5311. A bill to authorize the use of Great Lakes vessels on the oceans; to the Committee on Merchant Marine and Fisheries.

H.R. 5312. A bill to amend the Federal Coal Mine Safety Act so as to provide further for the prevention of accidents in coal mines; to the Committee on Education and Labor.

By Mr. HEMPHILL:

H.R. 5313. A bill to enable producers to provide a supply of turkeys adequate to meet the needs of consumers, to maintain orderly marketing conditions, and to promote and expand the consumption of turkeys and turkey products; to the Committee on Agriculture.

By Mr. HORAN:

H.R. 5314. A bill to amend the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture.

By Mr. LINDSAY:

H.R. 5315. A bill to amend the National Defense Education Act of 1958 to eliminate the requirement of an affidavit provided by subsection 1001(f)(1) thereof; to the Committee on Education and Labor.

By Mr. MACHROWICZ:

H.R. 5316. A bill to extend by 1 year the period for which additional benefits may be paid under the Temporary Unemployment Compensation Act of 1958; to the Committee on Ways and Means.

By Mr. MATTHEWS:

H.R. 5317. A bill to amend section 21 of the Second Liberty Bond Act to provide for the retirement of the public debt; to the Committee on Ways and Means.

By Mr. MORGAN:

H.R. 5318. A bill to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically depressed areas; to the Committee on Banking and Currency.

By Mr. PATMAN:

H.R. 5319. A bill to provide readjustment assistance to veterans who serve in the Armed Forces between January 31, 1955, and July 1, 1963; to the Committee on Veterans' Affairs.

By Mr. PELLY:

H.R. 5320. A bill to amend the Internal Revenue Code of 1954 to make it clear that the tax on transportation of persons does not apply to ferry service provided by State-operated ferryboats; to the Committee on Ways and Means.

H.R. 5321. A bill to extend medical, surgical, and dental treatment in hospitals and stations of the Public Health Service without charge to certain seamen on U.S.-flag fishing vessels in international waters; to the Committee on Interstate and Foreign Commerce.

By Mr. POFF:

H.R. 5322. A bill to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes; to the Committee on the Judiciary.

By Mr. RODINO:

H.R. 5323. A bill to insure the equal protection of the laws to all persons regardless of race, color, religion, or national origin; to the Committee on the Judiciary.

By Mrs. ROGERS of Massachusetts:

H.R. 5324. A bill to incorporate the Army and Navy Union of the United States of America; to the Committee on the Judiciary.

By Mr. SANTANGELO:

H.R. 5325. A bill to amend title II of the Social Security Act to reduce from 62 to 50 the age at which widows' benefits become payable thereunder; to the Committee on Ways and Means.

By Mr. SIMPSON of Pennsylvania:

H.R. 5326. A bill to amend the Internal Revenue Code of 1954 to permit an accelerated amortization deduction for facilities devoted to the conduct of aeronautical and space activities; to the Committee on Ways and Means.

By Mr. SMITH of California:

H.R. 5327. A bill to amend section 1371 of the Internal Revenue Code of 1954 to permit stock of a small business corporation which is owned by a husband and wife to be treated as owned by a single shareholder for purposes of determining the number of shareholders of such corporation; to the Committee on Ways and Means.

By Mr. STAGGERS:

H.R. 5328. A bill to amend the Federal Employees Salary Increase Act of 1958 to grant certain increases in compensation to employees of the agricultural stabilization and conservation county committees, to bring employees of agricultural stabilization and conservation county committees within the purview of the Civil Service Retirement Act and the Federal Employees' Group Life Insurance Act of 1954, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. TAYLOR:

H.R. 5329. A bill to provide for the issuance of a postage stamp in commemoration of the 125th anniversary of the granting (at the Rensselaer Polytechnic Institute, Troy, N.Y.) of the first degrees in science and engineering ever granted in any English-speaking country; to the Committee on Post Office and Civil Service.

By Mr. TOLL:

H.R. 5330. A bill to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically depressed areas; to the Committee on Banking and Currency.

By Mr. ASPINALL:

H.R. 5331. A bill to provide for the preservation and development of the domestic fluorspar industry; to the Committee on Interior and Insular Affairs.

By Mr. BARING:

H.R. 5332. A bill to provide for the preservation and development of the domestic fluorspar industry; to the Committee on Interior and Insular Affairs.

By Mr. BOSCH:

H.R. 5333. A bill to amend section 1372 of the Internal Revenue Code of 1954 with respect to the period for the making of an election as a small business corporation, and for other purposes; to the Committee on Ways and Means.

By Mr. BOYLE:

H.R. 5334. A bill to extend credit to private nonprofit hospitals for the purpose of construction and expansion of facilities; to the Committee on Interstate and Foreign Commerce.

By Mr. CHENOWETH:

H.R. 5335. A bill to provide for the preservation and development of the domestic fluorspar industry; to the Committee on Interior and Insular Affairs.

By Mr. FORD:

H.R. 5336. A bill to amend title 28 of the United States Code to increase the limit for administrative adjustment of claims against the United States under the tort claims procedure to $2,500; to the Committee on the Judiciary.

By Mrs. GRANAHAN:

H.R. 5337. A bill to amend section 401 of the Postal Field Service Compensation Act of 1955, as amended, with respect to the salaries of certain Postal Transportation Service substitutes; to the Committee on Post Office and Civil Service.

By Mr. GRIFFIN:

H.R. 5338. A bill to amend and clarify the reemployment provisions of the Universal Military Training and Service Act, and for other purposes; to the Committee on Armed Services.

By Mr. HALPERN:

H.R. 5339. A bill to raise the minimum wage under the Fair Labor Standards Act of 1938, as amended, to $1.25 an hour, and for other purposes; to the Committee on Education and Labor.

H.R. 5340. A bill to amend the Civil Service Retirement Act to increase to 2½ percent the multiplication factor for determining annuities for certain Federal employees engaged in hazardous duties; to the Committee on Post Office and Civil Service.

By Mr. HEALEY:

H.R. 5341. A bill providing for the Surgeon General of the United States to establish a hospital in the State of New York especially equipped for the treatment of persons addicted to the use of habit-forming drugs; to the Committee on Interstate and Foreign Commerce.

By Mr. LANE:

H.R. 5342. A bill to create a presumption that certain impairment of health caused by hypertension or heart disease of a Federal or District of Columbia employee is incurred in line of duty for purposes of certain retirement and disability compensation laws or systems; to the Committee on Post Office and Civil Service.

By Mr. LANKFORD:

H.R. 5343. A bill to amend the Internal Revenue Code of 1954 to repeal the manufacturers excise tax on lacrosse sticks; to the Committee on Ways and Means.

H.R. 5344. A bill to establish the Chesapeake & Ohio Canal National Historical Park and to provide for the administration and maintenance of a parkway, in the State of Maryland, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mrs. MAY:

H.R. 5345. A bill to strengthen and improve State and local programs to combat and control juvenile delinquency; to the Committee on Education and Labor.

By Mr. MORRISON:

H.R. 5346. A bill to amend the Federal Employees Salary Increase Act of 1958 to extend to employees of agricultural stabilization and conservation county committees the salary increase benefits provided by such act; to the Committee on Post Office and Civil Service.

By Mr. STUBBLEFIELD:

H.R. 5347. A bill to provide for the preservation and development of the domestic fluorspar industry; to the Committee on Interior and Insular Affairs.

By Mr. THOMPSON of New Jersey:

H.R. 5348. A bill to incorporate the U.S. Civil Defense Council; to the Committee on the Judiciary.

By Mr. UTT:

H.R. 5349. A bill to provide for the conveyance to Orange County, Calif., of all right, title, and interest of the United States in and to certain real property situated in Orange County, Calif.; to the Committee on Public Works.

By Mr. BECKWORTH:

H.J. Res. 287. Joint resolution designating the rose as the national flower of the United States; to the Committee on House Administration.

By Mrs. DWYER:

H.J. Res. 288. Joint resolution proposing an amendment to the Constitution prohibiting a State from taxing certain income of a nonresident; to the Committee on the Judiciary.

By Mr. HESS:

H.J. Res. 289. Joint resolution designating the 7-day period beginning October 25, 1959, as Cleaner Air Week; to the Committee on the Judiciary.

By Mr. MERROW:

H.J. Res. 290. Joint resolution proposing an amendment to the Constitution of the United States relative to disapproval of items in general appropriation bills; to the Committee on the Judiciary.

By Mrs. ROGERS of Massachusetts:

H.J. Res. 291. Joint resolution to establish a commission for the celebration of the 100th anniversary of the birth of Gen. John J. Pershing; to the Committee on the Judiciary.

By Mr. CELLER:

H. Con. Res. 97. Concurrent resolution authorizing the printing of additional copies of House Report 1328, 85th Congress, 2d session; to the Committee on House Administration.

By Mr. McGOVERN:

H. Con. Res. 98. Concurrent resolution expressing the sense of the Congress with respect to a program for paying the national debt; to the Committee on Ways and Means.

MEMORIALS

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By Mr. FORAND: Memorial of the Rhode Island General Assembly, memorializing the President of the United States, the Senators and Representatives from Rhode Island in the Congress of the United States, and the Secretary of the Interior, to make every effort to have built on Federal unused land in the city of Newport, R.I., a saline water conversion plant; to the Committee on Interior and Insular Affairs.

Also, memorial of the Rhode Island General Assembly commending Hon. JOHN O. PASTORE, Senator from Rhode Island, for his stand and recommendations with respect to the creation of a permanent Textile Interagency Committee in the Department of Commerce to deal with the problems and foster the interests of the ailing textile industry and memorializing Congress to enact legislation to activate these recommendations; to the Committee on Ways and Means.

By the SPEAKER: Memorial of the Legislature of the State of Idaho, memorializing the President and the Congress of the United States, urging that 15 percent of all Federal income taxes paid into the Federal Treasury by the public in the State of Idaho and the various other States be retained in the State of Idaho and the various other States to be placed in the general funds of the respective States, etc.; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Montana, memorializing the President and the Congress of the United States, requesting appropriation of $10 million so that the construction of the Yellowtail Dam project may begin at once; to the Committee on Appropriations.

Also, memorial of the Legislature of the State of Oregon, memorializing the President and the Congress of the United States, requesting that immediate statehood be granted to Hawaii; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Wyoming, memorializing the President and the Congress of the United States with reference to the opposition of the people of Wyoming to any form of Federal, regional, or watershed rules or regulations set up either by legislative act or Executive order, in which the States involved would have no real voice in administration thereof; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Alaska, memorializing the President and the Congress of the United States, urging enactment of legislation that will raise the fixed price of gold to $70 an ounce; to the Committee on Banking and Currency.

QUARTERLY REPORTS

The following quarterly reports were submitted for the fourth calendar quarter 1958:

(NOTE.—The form used for reports is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE TWO COPIES WITH THE SECRETARY OF THE SENATE AND FILE THREE COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names or agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed, (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $_____Dues and assessments
2. $_____Gifts of money or anything of value
3. $_____Printed or duplicated matter received as a gift
4. $_____Receipts from sale of printed or duplicated matter
5. $_____Received for services (e.g., salary, fee, etc.)
6. $_____TOTAL for this Quarter (Add items "1" through "5")
7. $_____Received during previous Quarters of calendar year
8. $_____TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $_____TOTAL now owed to others on account of loans
10. $_____Borrowed from others during this Quarter
11. $_____Repaid to others during this Quarter
12. $_____"Expense money" and Reimbursements received this Quarter

Contributors of $500 or more
(from Jan. 1 through this Quarter)

13. Have there been such contributors?
Please answer "yes" or "no": _____

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor* ("*Period*" from Jan. 1 through _____, 19____)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $_____Public relations and advertising services
2. $_____Wages, salaries, fees, commissions (other than item "1")
3. $_____Gifts or contributions made during Quarter
4. $_____Printed or duplicated matter, including distribution cost
5. $_____Office overhead (rent, supplies, utilities, etc.)
6. $_____Telephone and telegraph
7. $_____Travel, food, lodging, and entertainment
8. $_____All other expenditures
9. $_____TOTAL for this Quarter (Add "1" through "8")
10. $_____Expended during previous Quarters of calendar year
11. $_____TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditures' includes a . . . *loan* . . ."—Sec. 302(b).

12. $_____TOTAL now owed to person filing.
13. $_____Lent to others during this Quarter
14. $_____Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7–11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7–15, 8–15, 9–15: Britten & Blatten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

A. Claris Adams, 1701 K Street NW., Washington, D.C.
B. American Life Convention, 230 North Michigan Avenue, Chicago, Ill.

A. J. Carson Adkerson, 976 National Press Building, Washington, D.C.

A. Arthur F. Aebersold, 900 F Street NW., Washington, D.C.

REGISTRATIONS

The following registrations were submitted for the period from October 1, 1958, to January 20, 1959, inclusive.

(NOTE.—The form used for registration is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE TWO COPIES WITH THE SECRETARY OF THE SENATE AND FILE THREE COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th

(Mark one square only)

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employes subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names or agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

EXTENSIONS OF REMARKS

Jackson Day Dinner Address Delivered by Hon. Edmund S. Muskie, of Maine

EXTENSION OF REMARKS
OF
HON. STUART SYMINGTON
OF MISSOURI
IN THE SENATE OF THE UNITED STATES
Thursday, March 5, 1959

Mr. SYMINGTON. Mr. President, on Saturday, February 21, the distinguished junior Senator from Maine [Mr. MUSKIE] spoke at Springfield, Mo., on the occasion of our annual Jackson Day dinner.

We in Missouri were privileged to play host to Senator MUSKIE. We know him as a gracious gentleman and a true servant of the people.

His speech on that occasion was inspirational to all of us who had the opportunity to hear him.

I ask unanimous consent that it be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH BY HON. EDMUND S. MUSKIE, OF MAINE, AT SPRINGFIELD, MO., FEBRUARY 21, 1959

I can think of a number of reasons why it is good to be in Missouri.

First of all, there was the cordial invitation extended to me by your distinguished Senators, STU SYMINGTON and TOM HENNINGS, and your able Congressman, CHARLIE BROWN. To my previous awareness of their impressive records of public service, I have been privileged to add the warmth and friendliness of personal association. The fact that outstanding Americans of this stature should welcome such a contribution as I can make to this great gathering is a compliment I could not ignore. Secondly, I have long had a healthy curiosity about the State which entered the Union at the same time as my own State of Maine. The compromise, which made possible that historic coincidence, reflected sharp differences in public opinion with respect to the great political issues which were involved; but, more important, it was symbolic of the fact that, in America, such differences can be resolved, given mutual respect, patience, understanding, and good will.

Thirdly, I have enjoyed my associations in the Governors' conference with your personable and capable Governor, Jim Blair, who has a common sense knack of striking to the core of a problem which is familiar to one accustomed to dealing with practical, down-to-earth Maine Yankees.

Finally, this is the home of Harry Truman—the man who made great decisions with the sure touch and unhesitating courage of a man of clear vision—with an instinctive understanding of the importance of firm and positive leadership in his high office. Our times would be different and far more fearful but for this fact.

It is appropriate that Democrats should gather from time to time as you have here, tonight. It is understandable that we should indulge in a little partisan rejoicing over the victories which swept the country from coast to coast—from Maine in September to Alaska in late November. It is proper that we take stock of yesterday's results and tomorrow's prospects—which have never looked brighter. It is an opportunity to gain inspiration and enthusiasm from each other's presence. More important, it provides an opportunity to reevaluate our party's meaning for ourselves, our neighbors, and our children.

There has never been a time in our country's history when such a reevaluation was so vital to our survival and our well-being as it is today. We love freedom. We believe in the dignity and the worth of the individual. We hold that a society which recognizes and implements these principles is best calculated to achieve happiness for each of us and for our neighbors. Today, all of this is in deadly danger, and cannot survive unless we are alert to the danger and willing to mobilize all our resources to meet the threat—intelligently, effectively, and immediately.

Over the long years of its great history, the Democratic Party has demonstrated a sensitivity to the objectives of a free society, an alertness to the challenges and opportunities of each new day, and a willingness to move forward in the face of great obstacles and difficulties, which has been unmatched among political parties. This is not to say that every Democrat who ever lived has been, and is, more effective than any Republican who ever lived. We know this is not so. It is not to say the Democratic Party has always measured up fully to the responsibilities of any given day. We know this is not so. It is to say that, on the record, the Democratic Party has been a party of great achievements and that it will continue to be if we, who are entrusted with the stewardship of its affairs, will fortify ourselves with the best of its traditions.

What is required today?

Let me give you some thoughts expressed by Thomas Jefferson in 1816 in a discussion of the relationship between men and their governments:

"I am certainly not an advocate for frequent and untried changes in laws and constitutions. I think moderate imperfections had better be borne with. But I know also that laws and institutions must go hand-in-hand with the progress of the human mind. As new discoveries are made, new truths disclosed, and manners and opinions change with the change of circumstances, institutions must advance also, and keep pace with the times."

Expressed and implicit in these words are some impressive beliefs:

1. That change, new and more difficult problems, unforseen circumstances, are inevitable in human affairs.

2. That the human mind and the human spirit are capable of recognizing and adjusting to them.

3. That society and governments must be so constructed as to give free play to this great potential for adaptability and change.

4. That our country has the resources—material, human and ideological—to meet any challenge, however great.

5. That our people, within the framework of a free society, have a capacity for growth which can carry them to even greater heights of achievement: but only if they are constantly stimulated by broad and wide-ranging thinking, and by imaginative and purposeful leadership.

I say these beliefs are impressive. This is so because, although they are as old as our country, they are a fresh and ever-flowing fountain of inspiration and reassurance at a time when confusion tends to blur our vision, when doubt tends to paralyze action, when timidity and fear of the unknown feature tends to blunt our instinctive urge to grapple with the problems of the day in their full dimensions.

At the age of 81, with his youth and vigor far behind him, Jefferson said, in a letter to a friend:

"Men by their constitution, are naturally divided into two parties. Those who fear and distrust the people—those who identify themselves with the people, have confidence in them, cherish and consider them as the most honest and safe depository of the public interest."

I don't know what kind of a program Jefferson would present to us if he were President today. I don't know what, specifically, he would have proposed to do about the budget, education, the Soviet menace, our military posture, labor-management relations, or any of the host of problems which beset us. There are those who indulge themselves in the game of speculating upon such things for the purpose of suggesting Jefferson's approval or disapproval of some point of view. Jefferson himself was not so presumptuous. Many times, he warned against those who ascribe to the men of the preceding age a wisdom more than human, and suppose what they did to be beyond amendment.

I do know that Jefferson's attention was always focused on the ultimate objective of a free society—the advancement and well-being of the people. I know that his versatile and searching mind was not restricted by the straitjacket of outmoded and outworn ideas and methods, however worthwhile they may have been yesterday. I am confident that he would have chosen means and methods suited to the dimensions of the tasks with which we are confronted. He would have believed today, as he believed in his own day, that there is a greater risk in standing still than in moving forward, that a problem is not solved by half measures, that a problem does not disappear because it is ignored: That, above all, the American people are willing, able, and eager to know the truth, to understand the truth, and to assume the burdens and sacrifices which the truth indicates they must assume. I believe this about Jefferson because he understood the nature and the responsibility of leadership in a free society—leadership as demonstrated by the Jacksons, the Lincolns, the Roosevelts, the Wilsons, the Trumans.

What is the truth?

The truth today is that our position in the world, by any standard of measurement we chose to use, is incomparably weaker than at any other time since the dark days of World War II. The truth today is that there is less than full realization of this fact, and that there should be and must be if we are to make the hard decisions which are indicated. The truth today is that we are not being called upon to make the supreme effort that those in a position to know the facts should realize must be made. The truth today is that there is a lack of faith among too many that we have the resources, the stamina, and the guts to do all that must be done.

To these people of little faith, those who indulge in creative thinking are radicals.

To these people of little faith, those who honestly expose our weaknesses as a challenge to greater effort are purveyors of gloom and doom.

To these people of little faith, those who believe that a given problem cannot be solved without a greater effort are spenders.

To these people of little faith, our growth has stabilized at a level which holds little promise of greater things to come. In speaking of people, I am not thinking of individuals or of particular parties. I am, rather, personalizing an apathy, a complacency, and

a stagnation in thinking which is seeping out into the country and which can destroy us before a foreign enemy can get the chance.

To point out this weakness is not to say that the alternatives are prodigal spending, wasteful effort, or a frenzy of activity to do everything which comes to mind. There are things which government must do. There are other things which government should not do. There is a great broad area of desirable activity as to which we must be discriminating and intelligent in assigning proper priorities. There is room in this area for differences of opinion—differences which can and ought to exist as between the executive and legislative branches of government—differences which can and ought to exist as between Members of the legislative branch. It is only by exposing these differences, by subjecting them to the crossfire of debate that we can work out sound and enduring answers.

The current concept that the Congress has no prerogative and no duty to think independently, to reach independent conclusions, and to act independently in its sphere of activity is destructive of the very vitality of our democratic process. It must not be allowed to prevail.

It is in the area of things that must be done, that we must give our concentrated and immediate attention.

This has to do with our national survival—not just as an independent, geographically identifiable state—but as a vital, meaningful force which, by its leadership and by its example, can lift the world upward to ever higher levels of social and economic progress for men and women everywhere. Unless we are the latter, we will not always be the former. This suggests, I hope, that we are concerned with more than Maginot line security. We are concerned with more than a retaliatory capability which can destroy our potential enemy. We are concerned with more—and I should say something far different—than political domination of other areas of the world. We are concerned with demonstrating here, at home, and to the peoples overseas that our way of life does give us strength, that it does enable us to prevail over those who would destroy us, and that it is the last best hope of little people everywhere who yearn for opportunity, dignity, and freedom.

I say that we are concerned with this—and I mean concern with an emotion that we have never had to feel before. Our policies and programs since our beginnings have been based on the assumption that we had resources to burn, that no other nation could match them, that our way of life and our institutions had an irresistible attraction for peoples not privileged to enjoy them—the assumption of manifest superiority.

This is assumption that is no longer valid. What we are, what we have, and what we offer, are being weighed on the balance against the supposed attractions of an alien system. We are being judged by peoples who are not advocates of either democracy or communism, but who are concerned as to their own status in life and its improvement. To these peoples, we are no longer manifestly superior.

To capture their minds and hearts—and there are more than a billion of them—it is necessary that we utilize to the maximum every resource at our disposal—material, human, and ideological. We must live our national life with a fire, and enthusiasm, and a confidence in ourselves that we have always found it possible to summon in times of national crisis.

What does maximum utilization require?

It requires, first of all, that we become a progressively stronger economic force in the world, gaining strength not only for ourselves, but for peoples everywhere who seek to develop an economic climate favorable to the recognition of the dignity and worth of the individual.

It requires, secondly, the establishment of a military posture which is dynamic, not static; which utilizes to the full the tools of scientific research; and which unhesitatingly and firmly seizes every advantage and makes maximum use of every new development which promises to strengthen our sinews. Such a posture is the shield behind which we can mobilize the economic and ideological strength which will give us the ultimate victory.

Thirdly, that we develop every resource here at home. Measured by the tasks to be performed, there is plenty of work for all our people and they must all be kept busy to the limit of their skills and their capacities. We do not have enough scientists. We do not have enough teachers. We do not have enough doctors, nurses, psychiatrists, technicians of all kinds. Everywhere we turn, we find shortages of skills. Who says there isn't enough work to keep all Americans employed? There is work begging to be done. How do we fit the square pegs in the round holes?

One great bridge between the man and the job is the educational process. This isn't to say that with the proper school we can train anyone to do anything. It isn't to say that the answer to current unemployment is to send everyone to school. It is to say that we have great unfilled needs in the field of human skills, that we are doing too little about it, and that we cannot retain the image of America as the strength and hope of the world unless we utilize every potential talent which we have wherever it may be found. It is time to deal with a national problem by providing a national answer to it.

These are the kind of great challenges to which the Democratic Party traditionally rises. These are the great crises of the kind which the Democratic Party has always been eager and willing to meet. These are the needs for great leadership of the kind which the Democratic Party has so often been able to provide.

We won't do it today, or tomorrow, by sitting on our hands. We will not do it today, or tomorrow, by smugly glorying in past victories. We will not do it today, or tomorrow, without thinking without taking the people into our confidence—without asserting the creative and productive capacity which lies in the hearts and minds of a free people.

Someone once said, "The road that stretches before the feet of a man is a challenge to his heart long before it tests the strength of his legs." What he was saying is that the heart is often capable of greater decisions than the mind. The heart of America is its secret weapon.

New Legislation To Bring Relief to the Fishing Industry

EXTENSION OF REMARKS

OF

HON. THOMAS M. PELLY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 5, 1959

Mr. PELLY. Mr. Speaker, for reasons which are pretty generally known, fishermen and the fishing industry have been suffering from cheap foreign imports. Tariff relief under regular procedure which should have been available to the New England industry, for example, was denied because of factors of foreign policy relating to national security. That is not an easy obstacle to overcome.

One of the great problems of fishermen is an item of expense arising from the cost of insurance which runs into hundreds of dollars for each boat. As I understand it, the high claims and experience of losses cause the insurance underwriters to continually increase their rates.

There have been various suggestions as to ways in which the Federal Government might help. One of these has been to underwrite a portion of these insurance premiums, but knowing and sharing the prejudice against special subsidies, I have come up with a proposal which might indirectly contribute toward a solution by means of greatly reducing insurance costs.

The idea has been incorporated in a bill which I introduced today. This measure would extend medical, surgical, and dental treatment in hospitals and stations of the Public Health Service without charge to seamen on American-owned U.S. flag vessels in excess of 20 feet in length regularly engaged in fishing in international waters.

This medical care and hospitalization is available, of course, to our sailors and seamen in larger oceangoing boats. My bill would simply extend this service and by the saving to insurance companies through lesser number of claims result in a reduction in premium rates.

Here is a means of assisting the entire fishing industry. As I see it, all fishermen, Atlantic, Gulf, and Pacific coast, would benefit by my bill. Accordingly, I offer it for consideration with the hope it might invite united support from the fishing industry and thus encourage the Congress to give it utmost consideration.

Think Anew, Act Anew

EXTENSION OF REMARKS

OF

HON. THOMAS H. KUCHEL

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Thursday, March 5, 1959

Mr. KUCHEL. Mr. President, I ask unanimous consent that a speech I made before the San Francisco County Republican Central Committee last February 10 be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THINK ANEW, ACT ANEW

(Address by U.S. Senator THOMAS H. KUCHEL before the San Francisco County Republican Central Committee, Elks Club, San Francisco, Calif., February 10, 1959)

I suggest that a very special and fundamental responsibility devolves upon each of us who continues his basic Republican allegiance at Lincoln's natal celebration in 1959. For the strength of the traditionally American two-party system becomes pretty much of a question of what we Republicans now do and now say. That the system of two strong parties, not three or four or eight or ten—and God help us, not one—represents one of the greatest assurances for the maintenance of our free American political system no reasonable citizen can deny. The splinter parties of some Western nations

which require patchwork coalition ministries do not fit the American pattern. And the one-party system—the "one party or else" doctrine of Russia and of communism generally—is as painfully clear an example as I know of why the American people will never, never embrace the Red ideologies of Moscow. Our conception of freedom includes freedom of choice at the ballot box. It is unquestionably true that the two-party system, American style, has effectively prevented the destruction of individual liberty which the one-party Communist system has enforced.

Thus, for us who constitute the presently remaining membership of the minority party in California and in much of the United States what we do, what we say, as partisans, will have a telling—perhaps I can fairly say a crucial—impact upon the future of our wonderfully unique kind of personal and political freedom which the Colonies of 1776 fought for and won and sought to preserve in constitutional guarantees, and for which Mr. Lincoln, one of the greatest leaders in the cause of freedom in all recorded history, gave almost all his adult years, and gave his life as well.

What then, my fellow Republicans, can we now do, or begin to do, to attract to our banner men and women who are registered in the Democratic Party or who are registered in neither party, or who—though registered Republicans—habitually stay at home or habitually vote against Republicans?

Can we not first agree that the Republican Party deserves to win only when it represents the better, or the best, means of assuring the maintenance of our free constitutional system? This must be true, and we recognize that, on many occasions, maybe almost all, that question is entirely a matter of opinion of the people. And on many, many occasions, let the record show, the people of our State and country have voted Republican. I predict they will again.

Is it not also true that the best means of assuring—or of honestly trying to assure—the maintenance of this free Republic, is to chart our course, our partisan and our political course, as Americans as well as Republicans, on one basis and one alone—the old textbook maxim, "the greatest good for the greatest number"?

Mr. Churchill said to the American Congress in the early days of the war that in his father's time in Great Britain, it was deemed that government was meant "for the few and for the very few." He and his political party overcame that special interest creed when they came into power in England in the early days of World War II. The exhilarating path for Republicans to travel in 1959 is the way of government for the many and for the very many.

Mr. Chairman, friends, Lincoln and his fellow Republicans were abused and denounced in their day, a century ago, as dreamers and political radicals. Is there not some basis here, now, in this new era of human life, for us to rededicate our party to the Lincoln role, the role of neither dreamers nor radicals, but the role of one group of fellow citizens whose love of man's freedom strengthens them and gives them courage to keep it and, beyond that, to share it with all humankind?

It is the people—the best interests of all the people—which our Republican Party must strive to serve. That is the Lincoln tradition. And that is the way, my fellow Republicans, by which I believe the rehabilitation of our honorable political party must surely come.

This great century-old, free Republican Party of ours came into existence by the courage of those Americans who were determined to wipe out human bondage and to push on our frontier to the Pacific Ocean limits of this North American Continent. And it is in precisely that same spirit of man's freedom of opportunity and of life, and of a never-ending pioneering for new hopes and aspirations for all humankind which must rekindle our partisan spirit as we look forward to the presidential and congressional election of 1960.

The Republican Party must, and ought to, attract to its cause men and women from every walk of life and from every creed and color and race. Thus Lincoln's philosophy will live on in our party. We are, and we should be, dedicated to human freedom. We are an American party, and thus eternally dedicated to America and America's welfare. We ought to gain our strength as our country gains her strength: from having among our members citizens of diverse religious and racial ancestry, and from every walk and segment of our national life.

We are not, and we do not intend to be, a party of extremists. We seek man's progress by avoiding the two opposing poles on the political spectrum. We believe that man is entitled to a reasonable compensation for his toil, and we respect the virtues of thrift and savings. Thus, we want to consider the problems of both the wage earner and the person living on a fixed income. Republicans believe in free enterprise, but we do not intend to permit any group to take advantage of the people as a whole. We believe there is a national interest in the health and the economic well-being of all our people without condemning them to the regimentation of a welfare state. We believe there is a national interest in the proper education of our youth, regardless of color, and we applaud the Federal Government's record of reclamation assistance to western America under a policy initiated by the Republican Roosevelt over 50 years ago. We accept the responsibility of leadership in the cause of a just peace in the world, and we extend our hand of friendship to free peoples all around the globe.

To be given the people's faith, the Republican Party cannot be antilabor, organized or unorganized, nor can it be prolabor either. Labor reform legislation, on a national level, is long overdue and Republicans need here to keep the public interest uppermost in mind. We have had, alas, Republicans who have almost genuflected before some labor leaders. Those Republicans are just as offensive to the public weal as those other Republicans who automatically say "No" to anything which organized labor through their leaders espouses. In this connection, I suggest that we cannot shift with the winds. We cannot in one election campaign exalt the right of labor to bargain collectively, and to enjoy job security, and then, in the next election, advocate legislation to destroy job security or to undermine collective bargaining.

With equal finality, we, the Republican Party, decline to act as the political advocate of any business organization or individual, or, for that matter, of any special interest group, as against the great unorganized body of people as a whole. To the contrary, we—Republicans—ought, I think, now to rededicate our party to the splendid theme: "Let us raise a standard to which the wise and honest may repair."

Republicans, there is a tremendous record of constructive accomplishment by our party during these last 6 years. The earnest thanks of peace-loving Americans go to Dwight Eisenhower for helping to deter aggression and for fending off the terrible hazards of a red hot global conflict. America is waging peace. At home, in the early days of this administration, we banished wage controls and price controls when many of our Democratic colleagues demanded that they be continued as a part of what they called the needs of a planned economy in peacetime. The phony misnamed "excess profits" tax, with its unfair and uneven impact on business, was scrapped, as it ought to have been, over the anguished objections from the other side of the aisle. Excise taxes, on a Federal level, generally have been cut under this administration. Small business has been given tax relief. I think Republicans brought back a decent measure of fiscal sanity.

In the Lincoln field of human dignity, we passed the first civil rights law since the Civil War, and we did it over frenetic Democratic objections.

My fellow Republicans, all problems confronting our Nation are minor when measured against the threat to our national life and the lives of our people posed by international communism, and the policies which Soviet Russia has consistently practiced for at least the last 25 years, and her growing potential to wage nuclear war. All of us now know that from the date of our official recognition of Russia down through the years of the Second World War, the Russian Government, although professedly an ally in the war, was unremittingly advancing its secret policies aimed at the destruction of all free institutions. Soviet policy has utilized the techniques of indoctrination and propaganda. Infiltration has been advanced by two groups: First, the professional espionage agents who successfully sought secret information of a military character, particularly with reference to the atomic bomb; and second, the followers organized into cells and carefully nurtured in the deadly teachings which already have caused infinite damage to Western civilization.

Ever since the Second World War, the Western Powers have sought to achieve a lasting peace rooted in international law and justice. The beginning of these efforts was the Atlantic Charter, and continued through innumerable war and post-war conferences of varying effectiveness but the most productive of which was in this beautiful city when the Charter of the United Nations came into being.

Long before the war was well underway, Soviet wrecking crews were busily engaged in their deadly work. In the end they broke up the wartime alliance, violated war and postwar agreements, virtually paralyzed the United Nations with its "Nyet" and thus far have prevented any successful agreement for effective control of atomic warfare. The so-called peace treaties signed by Russia with the former Balkan States were only a means to achieve complete political subjugation of them. Now, some 17 have gone down the drain.

Now the Soviets have offered a new challenge to the West. They have handed us an ultimatum with a time limit, telling us to get out of Berlin or risk an all-out atomic war.

This is no idle threat, and we cannot be lulled into any false appraisal of Soviet motives or intentions, despite Mr. Mikoyan's charming suggestion that we must forget the past and look to the future. The Kremlin has been able to exploit, periodically, the earnest desire of the West to discover reasonable motives in Soviet policies by launching policies of peaceful coexistence. "We will bury you," you will remember Nikita S. Khrushchev has said, speaking about us, while his Chinese counterpart, Mao Tse-tung has declared:

"Political power grows out of the barrel of a gun. * * * Yes, we are advocates of the omnipotence of the revolutionary war, which * * * is good and is Marxist."

We have come to believe that dictators do mean what they say, a belief founded upon the painful experience of finally discovering that Hitler's "Mein Kampf" was a complete and factual statement of future Nazis' plans and actions.

Perhaps a fitting contemporary illustration of this thesis is furnished us by putting in juxtaposition the following news

item which appeared in a recent wire service news story from the town of Presque Isle, Maine:

"The management of the Presque Isle Star-Herald has reason to believe there must be news of international interest in its columns. The Aroostook County weekly said the Washington Embassies of the Soviet Union and the Polish Peoples Republic recently have ordered 1-year subscriptions. Presque Isle is the site of the Air Force Base which soon will be one of the Nation's first operational Snark guided missile sites."

This is only one form of the Soviet threat. At the 21st Communist Party Congress in Moscow a few days ago, Soviet Premier Khrushchev predicted that the balance of world economic power will soon shift to the Communist bloc. And by 1970, Khrushchev argues that the Soviet Union will outstrip the United States in productive capacity.

Soviet successes in achieving the goals set in their new 7-year plan between now and 1965, will, according to the Soviet Premier, "attract millions of new adherents to socialism and bring about changes not only in our country, but in the whole world."

While we may doubt the validity of these assumptions, we cannot afford to be sanguine about this newest form of Soviet competition. For Khrushchev reiterated his confidence that it will be by success in this economic competition that communism will triumph on the world scene.

The administration views these threats in their true dimensions. The President has declared our intention to maintain our defense forces in sufficient size to meet both the possibility of limited war and to retain their fundamental role of deterring all-out aggression. Unlike the Soviet's, our objectives are not conquest and control of other peoples. The President declared in his state of the Union message:

"We seek victory not over any nation or people but over the ancient enemies of us all: victory over ignorance, poverty, disease, and human degradation wherever they may be found.

"We march in the noblest of causes—human freedom.

"If we make ourselves worthy of America's ideals, if we do not forget that our Nation was founded on the premise that all men are creatures of God's making, the world will come to know that it is free men who carry forward the true promise of human progress and dignity."

Now there has been considerable discussion abroad in the land which questions the adequacy of our Armed Forces and weapons systems to meet the continuous military pressures of the Soviets. Let me remind you how difficult it is to answer charges about our defense posture. The President must weigh, in the most delicate manner, the advantage to other nations of any military or defense information made available to the American public. His recommendations for defense spending are always based on what the military joint chiefs of staff themselves recommend and, of course, on what the civilian service Secretaries and the Secretary of Defense recommend to him.

Listen to what the Secretary of Defense said to me, in writing, a few days ago:

"As Secretary of Defense naturally I have complete access to the best intelligence information available to this Nation. I also have the help of the top military brains in the country interpreting this information and developing a program to meet the threat to our national security.

"I can say to you that our present and planned programs adequately meet the requirement of protecting this Nation's security."

"This country must be in a position of sufficient retaliatory strength to deter a potential enemy from launching general war. We must be prepared to handle limited war situations effectively, so that our obvious readiness will deter such wars or keep them small and handle them quickly. We have need of maintaining the defenses of the continental United States. We must keep open the sea lanes which are essential to maintaining our commitments with allies throughout the world. All these needs have been carefully considered.

"It is my belief that the program provided in the new budget meets these needs adequately. This is not only my belief, it is also the view of the President.

"Moreover, it is shared by the Joint Chiefs of Staff, who have said to me in writing that they consider that the fiscal year 1960 proposed expenditure figure is adequate to provide for the essential programs necessary for the defense of the Nation for the period under consideration. The Chiefs state that they find no serious gaps in the key elements of the budget in its present form. While expressing these views as to the adequacy of the overall programs, each Chief does of course express some reservations regarding some of the program items of his own service."

A concomitant of our military policy which is designed to insure national survival, has been our mutual security program. Initiated shortly after the Second World War, it has continued to be of fundamental importance to the western alliance. As the President put it, "The need for economic growth among the underdeveloped countries continues to be of paramount importance to the enlightened self-interest of the economically developed nations, especially our own."

Since 1954, the Communists have seized upon the social and economic aspirations of the free world's less fortunate peoples, as fertile ground in which to extend Communist influence. Of the world's population, now estimated at 2,800 million people, 35 percent, or 950 million, are under the control of the Sino-Soviet bloc; 25 percent, or 700 million people, are located in newly independent countries like the Sudan, Libya, Ghana, and so on, with the remaining 40 percent located in the free world. The Sino-Soviet bloc, during the last year, applied more of its resources to expanding trade and credit ties with less developed countries than in any similar period since the start of its economic campaign.

Such aid is highly concentrated on selected targets, with 5 of the 17 countries which receive Soviet aid being recipients of 90 percent of the total. These five are Afghanistan, the United Arab Republic (Egypt and Syria), India, Indonesia, and Yugoslavia.

You can appreciate the relative facility with which Soviet policy can be adjusted quickly to seize the initiative in a moment's notice, whenever an opportunity is presented. The Kremlin needs consult nobody but itself in deciding what to do. Consider the much greater difficulty involved in a governmental system like our own, where agreement must be worked out between the executive and legislative branches of our Government, and thereafter, where foreign policy is involved, discussed with our free allies abroad.

Much of our concern must be with international affairs and the security of the Nation; yet all our efforts in this direction are pointed to one end, the right of each of us to develop along our own lines to the full extent of our ability.

But what of other problems confronting us? What is the Republican answer to domestic questions? Here I think Lincoln expressed what our philosophy ought to be when he said:

"The legitimate object of government is to do for a community of people whatever they need to have done, but cannot do at all or cannot so well do for themselves—in their separate and individual capacities.

"In all that the people can individually do as well for themselves, government ought not to interfere."

It is in keeping with this philosophy that the administration proposes to abandon altogether the model T machinery for helping farmers gain a fair price for their products and gear farm price supports to the open market.

The New York Times described current farm legislation as a chronic festering sore on the economy since it was adopted as an emergency measure at the outbreak of World War II. This legislation has cost the Treasury a billion dollars a year just to maintain storage facilities for farm surplus and nearly $5½ billion a year to carry out the price support program. I submit to you that this is not a legitimate object of government. "The need to reduce the incentives for excess production has been explicit in the three special messages I have previously sent to Congress," the President contended, and it remains to be seen whether the Congress, under Democratic control, will go along—and go along for the benefit of all the people.

"The material foundation of our national safety is a strong and expanding economy," the President declared in his state of the Union message, and central to that material foundation is the employment of every American at a job of his choice, in a place of his choice, and at a wage commensurate with his responsibility. We Republicans must support, as a national policy, legislation designed to encourage high employment and to protect the jobs of all Americans.

By the same token, we as Republicans believe the public interest requires labor reform legislation. Such legislation on a national scale is very long overdue. In the last Congress, I voted for such things as democracy in unions, including provisions for the secret ballot and specified terms for all offices, complete disclosure of union receipts and expenditures, with subpena power in the Secretary of Labor, and fines and jail sentences for failure to comply. I regret no legislation was enacted. I hope it will be this year.

Also central to a material foundation is an educational system which will insure adequate schooling to all our people. This does not mean that Government should supersede the States in their control of this historic function. It does mean that Government must continue its support of research especially in the physical sciences, but in the social sciences and the humanities as well. It does mean that our Nation must recognize a real relationship between education and survival. You may ask how much Government support? To that question no definitive answer can be given. No blanket program of massive aid-to-education is likely to achieve the promises of its advocates, although the fact is that the Federal Government has supplied aid to education since at least the time of Lincoln when the Land Grant College Act came into being.

As a party, we have an obligation to see to it that the teaching profession at all levels be made a more attractive work. We must attract greater participation in our party of young people and the members of the academic community. Plans to implement this idea are currently being developed and have the warmest support of the President.

There are many urgent problems confronting us as a Nation and as a party. For example, the crisis over civil rights precipitated by the public officials of some States to refuse to obey the law. We may remind our Democratic friends that the solution to the school problem offered by some members of their party has been to close the schools altogether. The Republican Party has been in the vanguard of equality before the law since its very inception. The civil rights law of the last Congress is the result of Republican

leadership, and we have a right to be proud of that accomplishment.

Our party has a rich heritage, the central theme of which has been the greatest freedom for the individual consistent with the basic needs of society. We hold to that noble idea even more strongly today. Let us then, as Lincoln said, "Think anew, and act anew" to strengthen our party and to merit and to receive the people's faith. Republicans in the next century must continue to hold high the banner of human freedom, as our party's first President so nobly envisioned.

Enforcement of Our Antismuggling Laws

EXTENSION OF REMARKS

OF

HON. VICTOR L. ANFUSO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 5, 1959

Mr. ANFUSO. Mr. Speaker, during the past dozen years or so since the end of World War II there has been a considerable increase in the illicit traffic in narcotics throughout the world, and we know that there is much smuggling of narcotic drugs into our country. We also know that the growth of juvenile delinquency in recent years is attributable in large measure to narcotic addiction among teenagers, who are driven to commit serious crimes in order to obtain funds to purchase these drugs.

In a report to the United Nations Economic and Social Council regarding its session in Geneva in May 1957, the Commission on Narcotic Drugs discusses the resolution it adopted concerning the illicit traffic in narcotics. The resolution states:

ILLICIT TRAFFIC

The Commission on Narcotic Drugs, noting that the volume of illicit traffic in narcotic drugs throughout the world is considerable and that there are indications of an increase in this traffic, considering the seriousness of the problem of this traffic in its different stages (production, transit, consumption), recalling that the Economic and Social Council has, on several occasions, requested Governments to give particular attention to the control of illicit traffic—

1. Urges governments to apply strictly the provisions of Economic and Social Council resolutions 159 II A (VII), 246 E (IX), 436 C (XIV) and 548 J (XVIII).

2. Again urges Governments to take appropriate measures to combat the illicit traffic, in particular by:

(a) Increasing their efforts to detect and suppress the illicit production and illicit manufacture of drugs, and strengthening the measures for apprehending traffickers.

(b) Imposing on persons convicted of narcotic offences very severe penalties in every country.

(c) Reviewing preventive measures for the purpose of satisfying themselves that the competent administrative bodies have the power everywhere to combat the illicit traffic.

(d) Arranging for the direct exchange of information with the authorities which in other countries are responsible for the control of the illicit traffic.

(e) Discharging fully the obligations placed on the states parties to the international narcotics treaties, in particular so far as the communication of information relating to the illicit traffic is concerned.

Mr. Speaker, you will note that the resolution speaks of the increased volume in the traffic of narcotics and the seriousness of the problem. It then urges appropriate measures to combat this illicit traffic and recommends five steps. I should like to call your attention to step (a) which advocates strengthening the measures for apprehending those who traffic in narcotics, and step (c) which calls for a review of preventive measures to ascertain that the competent administrative agencies have the power to combat this traffic.

Regarding the first of these steps referred to above, it is interesting to note that instead of strengthening the ranks of customs enforcement officers whose task it is to apprehend traffickers in narcotics, their ranks have actually been reduced to a point where we now have fewer officers in the Customs Enforcement Division since its establishment in 1909.

Furthermore, in order to make up budget deficits, it has recently become customary to close customs offices on Federal holidays and to give the enforcement officers time off. Smugglers are quick to take advantage of this situation which provides them with a safe period in which to carry on their operations. It should be realized that law enforcement should be carried on at all times. Crime does not take a holiday.

Not to be confused with customs agents or customs inspectors, the customs enforcement officers are the only armed personnel regularly assigned to our ports of entry and international airfields on a 24-hour basis in order to detect and apprehend anyone engaged in smuggling activities. Thus the customs service has sole responsibility to prevent smuggling and its enforcement officers constitute our first line of defense against smuggling. It is imperative, however, that this remain a 24-hour-per-day service if is to be effective.

As for the other step listed above, that is, a review of the preventive measures to give the agencies the power to combat the traffic in narcotics, it is quite obvious that at the present time the competent administrative bodies do not have such power everywhere to stop this traffic. In the same connection, it is interesting to reproduce the opinion expressed a little over a decade ago by the then Commissioner of Customs in a letter to our distinguished majority leader, the Honorable JOHN W. MCCORMACK, when a reduction in the Customs appropriation was considered. Mr. MCCORMACK inserted that letter into the CONGRESSIONAL RECORD of March 11, 1947, and from it I quote the following paragraph:

Careful examination of the possibilities for meeting this situation (i.e. curtailment of activity) satisfied me that the only activity that can be discontinued without a substantial revision of statutory law is that directed toward the prevention of smuggling. While this is a clear statutory duty of the customs service, there is no statutory prescription as to how it shall be conducted and the effectiveness of our smuggling control has always depended upon the action of the Congress in furnishing funds.

This clearly shows that the extremely important work performed by the Customs Enforcement Division is not established by law. This was the time when the Customs Border Patrols were discontinued entirely and the Port Patrols were decimated to the point of ineffectiveness. The doorways of entry into our country remained wide open and practically unguarded. Narcotic control had ceased then, and soon thereafter we read in the newspapers of school children buying narcotics from peddlers and dopesters on our city streets.

It is absolutely necessary to expose the narcotics trade and the evil men who smuggle this poison into our country and force it into the inexperienced hands of thrill-seeking youths. Narcotics are smuggled in by ship and plane, as well as across our borders, and then distributed to the dope traffic. If we can succeed in plugging up this evil trade and the corrosion of human lives, we will have solved much of this problem. Several years ago, Harry M. Durning, the collector of customs for the port of New York, stated that only one out of every five ships entering New York can be searched for smuggled narcotics because of the lack of sufficient personnel in the customs service. This situation has not improved since then, if anything it is worse today.

Congress must take effective action to suppress this vile trade by giving the Customs Service the means and the personnel for the proper enforcement of our antismuggling laws. In order to achieve this, I am introducing a bill to establish a Customs Enforcement Division in the Bureau of Customs in order to improve the enforcement of the antismuggling laws. The purpose of the bill is to make statutory the position of the Customs Enforcement Officer and the Enforcement Division under which he operates. This branch of Customs was originally created by Executive order of President Taft, but since 1947 its effectiveness in enforcing antismuggling laws has been seriously impaired due to budget deficiencies.

In addition to narcotic drugs, the bill also advocates the enforcement of laws relating to the prevention of clandestine introduction of biological, chemical or radiological weapons into the United States. This is a very important phase of our national security for which adequate means should be taken now to safeguard our Nation against future dangers. It should be done through specially trained enforcement officers, with special equipment and established at strategic locations.

The bill stresses that the Customs Enforcement Division is to be a major law enforcement body with adequate and most efficient means and facilities available, including radio-equipped motor vehicles, small watercraft and other equipment, for use in enforcement work in our harbors, airports and along the U.S. coasts. Enforcement officers shall be assigned to carry out their activities on a 24-hour basis, and they shall be empowered to make searches of all vessels, as well as make seizures and arrests in accordance with U.S. laws.

It should be noted also that in enforcing the antismuggling laws the customs enforcement officer renders other

important public services. He helps safeguard the public health from diseases brought in by parrots, monkeys, and other animals used as pets. He helps protect our agriculture from destructive insects which accompany certain imported plants. He similarly helps protect the livestock industry from foreign animal diseases, such as rinderpest, foot-and-mouth disease, and so forth. Furthermore, he helps to apprehend stowaways who might be subversives, to intercept obscene and seditious literature, and the enforcement of export-control and navigation laws.

Passage of this bill would once again tighten the cordon of men in our ports of entry and deal a formidable blow to the nefarious peddlers of narcotics. It would make the enforcement of the antismuggling laws a mandatory function of the Bureau of Customs. Our failure to pass this bill will result in continued violation of our laws, increase in crimes, and growing costs to the Nation and to the individual taxpayer. Hospital facilities would have to be increased to handle drug addicts, State and municipal police forces would have to be increased to cope with crimes and criminals, and the budgets of welfare agencies would have to be increased to aid victims and their families.

Mr. Speaker, there is no doubt in my mind that parents, teachers, welfare workers, church leaders, civic organizations, and especially our young people, whose health, morale, careers, and their whole future life are at stake, will heartily support this legislation. For the sake of our Nation's future, Congress must safeguard our youth.

All-Out U.S. Effort To Combat Soviet Penetration of Asia, Africa, and the Mideast

EXTENSION OF REMARKS
OF
HON. HUBERT H. HUMPHREY
OF MINNESOTA
IN THE SENATE OF THE UNITED STATES
Thursday, March 5, 1959

Mr. HUMPHREY. Mr. President, it was my privilege to be the guest speaker at the World Affairs Council meeting in Troy, N.Y., on Friday, December 12, 1958. The subject of my address was "America Needs a Constructive Program in Asia, Africa, and the Mideast."

I ask unanimous consent that excerpts from that address be printed in the RECORD.

There being no objection, the excerpts from the address were ordered to be printed in the RECORD, as follows:

EXCERPTS FROM ADDRESS BY HON. HUBERT H. HUMPHREY, OF MINNESOTA, BEFORE THE WORLD AFFAIRS COUNCIL, TROY, N.Y., DECEMBER 12, 1958

I want to talk to you tonight about the challenges to the United States on the world scene.

I will base my remarks to a considerable extent on my findings during my recent 3½ weeks' trip in Europe, particularly my week in the Soviet Union.

Europe's challenges are many—the crisis over Berlin, the question of atomic arms for West Germany, the problem of German reunification, the controversy over proposed disengagement in central Europe, the disputes over free trade and the European Common Market, the Geneva talks on nuclear test suspension and surprise attack, and many other problems as well.

Most of these issues have been rather well publicized. But tonight I should like to turn to an even more crucial area, a less understood area, Asia, Africa, and the Middle East.

For one of the principal findings on my recent trip is confirmation of this fact—the Soviet Union is laying plans and executing plans on these developing areas to a degree that we of the United States have not begun to match.

Soviet agitation in these devoloping areas, Soviet propagandizing in them, has unfortunately long since begun to pay off in terms of rising Soviet influence and prestige there.

We need only look at the disturbing headlines in the United Arab Republic, in Iraq, in Yemen and elsewhere to see proof of that fact.

But most Americans regrettably do not yet perceive the overall dimensions of the Soviet threat in the underdeveloped part of the world.

In other words, in the years up ahead, unless we take immediate effective action, we are going to find that the grim problems which we now face, for example, in the Middle East, are multiplied manyfold in South Asia, Africa, and yes, in South America.

I, for one, believe that there is still time for us to maintain and strengthen freedom among the one-third of the world which is uncommitted.

As you know, it is my privilege to serve as chairman of the Middle East Subcommittee of the Senate Committee on Foreign Relations. In that capacity, I have noted the many facets of the Soviet offensive in this part of the globe: the economic facet, such as Soviet purchases of Egyptian cotton; the military facet, such as Soviet barter of arms for that cotton; the cultural facet, such as artistic performers from Eastern Europe pouring in to the Middle East; the psychological facet, such as the playing on deep seated resentments, frustrations, and fears within the Middle East against Western Powers.

In all this, the Soviet Union is playing for enormous stakes. In the Middle East, it is playing for ultimate control of the billions of dollars of petroleum reserves lying beneath the hot desert sands. Indeed, everywhere, it is playing for access to raw material reserves upon which the Western World vitally depends, both for its factories and mills and for its earnings. Everywhere the target is people—discontented, disenfranchised, unhappy people—millions of them in the neutralist part of the globe.

The philosophy of the Kremlin is that the entire developing area of the world is in a state of revolution against present or past imperial ties with the West. The Kremlin believes, as Premier Khrushchev told interviewers, that the West has no right to seek to impose a status quo in the face of this anticolonial revolution. Premier Khrushchev has indicated without saying so that the Soviet Union has the right to advance this anticolonial revolution as it sees fit. But when he says "anticolonial" he means, of course, only Western colonialism; he does not include colonialism of Moscow or Peking.

By contrast, Premier Khrushchev denies the right of revolution in central Europe. Here he insists that the status quo—meaning Soviet imperial occupation—continue. And he further insists that the West cease and desist from any effort to impair that status quo.

This, then, is the inconsistency of the Soviet position. It is not a logical position, it is self-contradictory, but as usual, that does not bother the Soviets. For one pattern which they always observe and reject is what they regard as their own raw self-interest.

And they feel that their self-interest requires the exploitation of the conditions of Asia, Africa, and the Middle East—the exploitation of south Asia, for example, where income per capita still averages only $50 per year, the exploitation of hunger, hopelessness, fear and misery, illiteracy, and disease.

While I was in Moscow, I could see certain passes of the Soviet Asian pattern developing.

Let me refer to three such evidences:

1. In the streets of Moscow, in the theaters, the auditoriums, the schools, I could see a tremenodus proportion of visitors from Asia. Many of these visitors were from the Central Asian Soviet Republics which are part of the U.S.S.R. itself.

But many were visitors from Asian countries. For example, I spoke with students from Hanoi—the Viet Minh capital. I encountered youngsters from mainland China and other Asian countries.

Always the emphasis of the Soviet is on youngsters—youngsters who are the leaders of tomorrow, youngsters on exchange programs, youngsters who will work in Russia, not just for a year, but for many years, and whom they hope will ultimately return as the leaders in the Communist world of tomorrow.

2. In addition to the Asians whom we encountered, Mrs. Humphrey and I recall very vividly a Soviet motion picture which we saw entitled "Panorama." It is basically the American cinerama-type motion picture with three cameras projecting on a wide angular screen. Its subject was a travelog of the vastness of the Soviet Union.

But the most powerful part of the film was the sequence taken at a mammoth international student festival which was held in Moscow, attended by some 100,000 youngsters of whom around one-third came from abroad.

We cannot forget the sequence showing the students in particular from Asia and Africa, parading in the huge Moscow stadium, seating 110,000. The sequences were staged as a great propaganda spectacle, one which we know is designed for the eyes of Asia, as well as Europe.

3. And let me cite a third point now. The key theme of Soviet propaganda to the developing part of the world is:

"In 1917, we were relatively a primitive country. Now we are the second strongest industrial power on earth. What we have done you can do and just as fast. Follow our example."

This theme one could see throughout Soviet propaganda in Moscow. It has a powerful appeal to Asia-Africa. For these countries are experiencing what Prof. Arnold Toynbee has called a revolution of expectations.

These countries are impatient. They want to jump overnight from the age of kerosene oil lamps to the age of mammoth hydroelectric dams. They want steel mills and all the other symbols of Western industry, and they may be attracted to the Soviet mirage that only a collectivist society can fulfill their overnight expectations.

FOUR POINT PROGRAM

What then must be our answer to Soviet action and propaganda in the developing areas? Let me suggest the following program:

1. We must greatly increase our program of exchanges and leader grants with Asia, Africa and the Middle East. At present, for example, we have a total of 45,000 foreign students studying in the United States. This may seem like a large figure, but actually when you see the breakdown, country by country, you note how relatively thin is our

coverage of some of the distant countries which are the principal Soviet targets.

We have a great many Latin American exchanges, for naturally we are interested in inter-American relations. I hope that we will increase the number of students from this hemisphere studying here and the number of Americans studying below the Rio Grande. But I also hope that we will greatly increase the number of youngsters from elsewhere in the world, in addition to sending many of our young people to heretofore larger unfamiliar countries in the East.

2. In the second place, we must greatly increase our overall familiarity with Asia, Africa and the Middle East. We Americans have tended to be Europe-oriented for many reasons. Most of us stem from European origins. Europe traditionally has been the seat of power in the world, the seat of culture, of economic strength.

But a new day is dawning. No longer can we afford to be ignorant of or indifferent to the economics, the culture, the religions and aspirations of the Asian-African-Middle East area.

Our universities must develop centers of familiarity with the heretofore exotic cultures of the East. Our newspapers and magazines, television and motion pictures must seek to give still greater emphasis to these regions—not simply to the headline crises but rather to the long-range developing trends.

3. The backbone of our policy must be to strengthen the capacity of the newly emerged nations to fulfill their aspiration for a better life for their own people. Loans at more favorable terms than presently available through the Development Loan Fund, through the Export-Import Bank, the International Bank for Reconstruction and Development, must be provided if, for example, the second Indian 5-year plan and similar efforts are not to flounder.

And as I have repeatedly stressed, we must use the bounty of America's soil, our farm crops, through Public Law 480 sales to antidote the hunger and the shortage of capital in these regions.

4. A fourth essential point in our program is that we come face to face with reality on the big problem of Asia which occupies so much of the thinking of Asian peoples—namely, America's future relations with mainland China.

As we are all aware, the question of recognition, as such, of Red China is one of tremendous complexity. It has moral, legal, political, economic, military, social, and other overtones, none of which can be ignored. The aggression committed by the Communist Chinese in Korea as confirmed by the indictment of the United Nations, still stands for all to see and remember.

What I am urging, however, is not any premature off-the-cuff approach to the complex problem of Red China. Instead, I am urging a factual reappraisal of U.S. Chinese relationships, so that we can carefully chart our future policy, based upon the best interests of our Nation and of mankind.

The minimum fact of the matter is that we cannot any longer permit a news blackout on Red China. We cannot afford to be as relatively ignorant as we are of precisely what is going on in that vast land mass of 600 million people.

We must have more facts about the mainland.

While I was in Geneva visiting at the World Health Organization, I saw one particular phase of the serious consequences of our lack of information about the mainland.

You will recall that the Asian flu virus which struck the United States and the rest of the world was first reported via health listening and reporting posts in places like Hong Kong, Malaya, Japan, and other countries on the periphery of the mainland. Fortunately, we had this advance warning that the virus was on its way. And so we were able to prepare vaccine for our citizens. Even with that vaccine, our economy suffered a serious loss in working days because of Asian flu illness.

The important fact to remember, however, is that the first news about Asian flu virus originated inside the Chinese mainland, but it did not reach the outside world in time. The result is that 2 crucial months elapsed before the world learned that a new strain of type A virus with epidemic possibilities was on its way. Only subsequently when a letter arrived from the mainland to a WHO official was this fact confirmed: The virus could have been attacked 2 months ahead of time—if only there had been better communications with the mainland.

So the feeling among many health officials is that the world cannot afford to continue to be ignorant about even the most elementary health facts inside the Chinese land mass.

Even, however, if this health factor did not exist (and it does), the question is: How long can even the most elemental contacts between the West and mainland China be barred?

These are problems which cannot be ignored. The Peking government is, of course, seeking to exploit our interest in facts such as those I have mentioned above. We know that it has failed to date to fulfill its obligations as a member of the society of man. It has much to account for to the conscience of the world. These facts, too, must not be forgotten.

But above all, we must ask ourselves the question: How best can freedom be maintained and strengthened with all of Asia, Africa, and the Middle East? Closing our eyes or "sweeping issues under the rug" can hardly serve to satisfy the needs of our Nation.

Unemployment Compensation

EXTENSION OF REMARKS
OF
HON. FRANK M. COFFIN
OF MAINE
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 5, 1959

Mr. COFFIN. Mr. Speaker, I wish to place in the RECORD, on behalf of my distinguished colleague from the State of Maine, Mr. OLIVER, and myself, a statement regarding the unemployment situation in Maine, and its implications regarding proposals for legislation to improve the unemployment compensation program.

The continuing unemployment crisis, with its attendant human suffering, waste of productive capacity, and demoralization of workers and their families, demands early action by the Congress. There is a danger of becoming callous to the needs of the millions of unemployed as the recession stretches out beyond the shock of the initial job losses. Within a month the temporary Federal program extending benefits to workers who have exhausted their eligibility under the unemployment compensation program will cease, even for those workers in the 17 States which have taken advantage of this gesture toward the plight of those without work through no fault of their own. As unemployment continues, unless necessary legislation to establish adequate benefit levels and payment duration is adopted, the recession will tend to be self-perpetuating as purchasing power is reduced even further.

In our own State there are some 40,700 persons unemployed—10.9 percent of the total working force. In some communities the percentage is two to three times higher. Of those without jobs, 19,400 are now receiving unemployment compensation payments. In less than a year, 32.7 percent of those eligible for unemployment compensation payments—9,900 of the jobless—have exhausted their benefits. This means an additional burden on towns for relief payments at a time when there are increased demands for education expenditures. On April 1, the beginning of the new benefit year, some of these workers will receive payments again, but at a reduced rate.

The Maine State Legislature has closed the door to any improvement in the unemployment compensation program at this time. By refusing to extend the benefit period, even on a temporary basis, and by refusing, for the second time within 1 year, to take advantage of the Federal emergency program, they have dramatized the need for Federal action to establish adequate standards in the unemployment compensation program to deal with extended recessions.

There are many ways of looking at the impact of unemployment. We are conscious of the 4.7 million persons without jobs across the country; the empty factories, sitting idle in a land of plenty; bills in the home of an unemployed worker, where even inadequate unemployment payments have stopped, where children are hungry and where hope is dim; and lost purchasing power which reduces demand for products and causes other unemployment. However we view the problem, a crying need confronts us. Congress must take action and adopt legislation for Federal standards for unemployment compensation and extended duration for the payment of these benefits. Such action will give our economy needed stimulus and it will restore hope where there is fear. The legislation which we are supporting will not increase the Federal budget and it will not contribute to inflation. It is a minimum step designed to combat the recession and provide a basis for confidence for those who are without work.

Debt Reduction and Government Spending

EXTENSION OF REMARKS
OF
HON. BRUCE ALGER
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 5, 1959

Mr. ALGER. Mr. Speaker, as one who has long been concerned over our apparent unwillingness in Congress to play fair with generations of Americans

yet unborn, February 25 was a red-letter day for me. I do not know when I have been more heartened or encouraged than I was on hearing two Texas colleagues come out squarely, not only for a balanced budget, but for a sensible start toward paying off our debt—toward lifting the staggering mortgage we have all too heedlessly placed upon our children's futures.

Though the plan specifically advanced the other day involves no new idea, as its sponsors freely concede, I truly believe the Wright-Ikard resolution points the way to solvency. Of course, pointing—just pointing—is really pretty pointless, unless one is willing to travel in the direction pointed. In government, as in each of our households, there is little difficulty in formulating a balanced budget. The trick lies in living up to one—in showing enough fortitude to say "no" to our own wants and desires *until such time* as a family or a government is living on its income.

We are fortunate that, unlike many of the problems confronting Congress, this one is entirely uncomplicated; even a schoolboy knows that he cannot regularly spend more than he regularly takes in without facing bankruptcy. He knows, too, that incessant borrowing to meet regular current expenses will only beget the need for heavier borrowing to meet interest costs, and will ultimately destroy his credit, and with it, himself.

I am perfectly confident that the Wright-Ikard resolution will be roundly endorsed by those of us who have tried consistently, over the years, to tighten our governmental belt to the point of solvency. What encourages me mightily is the fact that, judging by the speeches made here the other day, the resolution will apparently command the support of a good many others, as well, some of whom have, to say the least, not acquired any reputation as nickel-nursers during their political careers. That strong support for fiscal responsibility should develop, and that it should spring from some of the quarters where it appears to be developing, is indeed most heartening.

But while this resolution, as I said, points the way, let us not kid the public about what it can actually accomplish. Any proposed budget whether submitted by a Republican or a Democratic administration, can be only a list of projected expenditures measured against an estimate of anticipated income. No administration can stipulate the amount of money to be expended nor can it determine in any way the amount of the Government's income. Only Congress can appropriate money, and even Congress can only estimate the anticipated revenues from taxes imposed by the Congress. Just as in our households, all the "budgeteering" any administration may do, and all our directions to a Treasury Secretary to include a sum for debt retirement in his anticipated expenses, will not mean a thing in the world unless we here in Congress show the fortitude and determination to live within our governmental income. We can neither wish nor legislate away the obligations we have already contracted, nor can we simply direct a Treasury Secretary to do something about it if we ourselves fail to show a self-discipline to match our heralded good intentions.

As a gentleman from Wisconsin so aptly put it the other day, "all new recruits to the economy block" are certainly to be welcomed with open arms by an encouraged minority and a grateful Nation; and surely no one would be so mean as to suspect that any Member's votes might not jibe with his avowals. However, I cannot help but recall a Democratic leader's recent admonition about setting a coyote to guard the herd of sheep. Well, our Federal expenditures are based on votes, not speeches; and after a series of sheep killings, most of us would tend to judge a dog's trustworthiness, not by the wag in his tail, but by the wool in his teeth.

Principles Which Should Guide the Republican Party

EXTENSION OF REMARKS
OF
HON. CLIFFORD P. CASE
OF NEW JERSEY
IN THE SENATE OF THE UNITED STATES
Thursday, March 5, 1959

Mr. CASE of New Jersey. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an outstanding speech by Secretary of Agriculture Ezra Taft Benson at a recent meeting in New Jersey. His frank statements about the principles which should guide the Republican Party deserve the most thoughtful consideration.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SECRETARY OF AGRICULTURE EZRA TAFT BENSON, AT NEW JERSEY REPUBLICAN STATE COMMITTEE FUND RAISING DINNER, ESSEX HOUSE, NEWARK, N.J., FEBRUARY 25, 1959

It is an honor and also a pleasure for me to be here with you tonight in the home State of your outstanding Senator, CLIFFORD CASE. He typifies the high quality Republican congressional delegation that New Jersey has sent to Washington. They're doing a good job for New Jersey and the Nation.

I'm happy that this district has continued its Republican representation in Congress with GEORGE WALLHAUSER hard at work in his first term. We all wish his predecessor, Bob Kean, were in the Senate. However, we're pleased that New Jersey is maintaining its healthy ratio of nearly 2 to 1 Republicans in Congress. I'm sure your goal is to improve even further this majority—meanwhile yours is an excellent example for Republicans throughout the Nation.

It is my privilege to bring to this meeting the greetings of our great President, Dwight D. Eisenhower. His leadership is a challenge to us all.

I want to pay tribute to Senator CASE and the able representation he is giving your State in the Senate.

Senator CASE has shown a keen understanding of agriculture. It would be easier to get constructive, sound farm legislation if we had a few more like him in Congress.

We need him there for many more years. He's setting a good example for all of us by having already started working for 1960. Senator CASE, we all pledge you our wholehearted support.

With such men as New Jersey Republicans have sent to Washington, I do not fear for the future of our party. I see no reason for any of us to fear the future as long as we face facts, stick to our principles and begin working now for victory in 1960 and beyond.

As Chairman Meade Alcorn said in Des Moines:

"We have a great party. Throughout its history of more than a century, the Republican Party has consistently risen to great challenges. Its greatest hours have often followed time of adversity and even defeat."

This is the first large Republican audience I've addressed formally since the election last November when we took a plain, out-and-out beating. We were licked pretty thoroughly from coast to coast with a few notable exceptions, some of which, I'm glad to say, were here in New Jersey.

But there are no alibis. From President Eisenhower on down, there have been no alibis. And I want to tell you tonight that I'm proud to be a Republican and I believe you are too. In the hour of our defeat is our greatest challenge.

It takes a defeat now and then to make us take a hard look at ourselves—and where we've been and where we're going.

It takes adversity sometimes to bring into focus the principles for which we stand—to recognize anew those ideals which have made republicanism a symbol of America since the days of the first great Republican President whose 150th year of birth we are currently observing.

Abraham Lincoln tasted defeat often in his rugged life. Don't forget that Lincoln's defeat of 1858 was transformed into the victory of 1860. His victories were few, though memorable. In virtually the very hour of his greatest victory tragic death overtook him. Yet even as he rose to become a greater and greater man from each of his life's defeats, he has risen in death to a degree of immortality accorded few men. He has achieved a permanent victory. He truly belongs to the ages. And as Republicans we are humbly proud it was Lincoln—100 years ago—who led our party to the White House.

Lincoln's party is made of much of the same stuff. Even before the final devastating vote total was tabulated last November, Republicans from coast to coast were saying: The 1960 campaign begins today.

Not for a moment have I seen any signs of defeatism. Ideas were immediately advanced toward strengthening the party for 1960. The Congress assembled with new and vigorous Republican leaders on both sides of the Capitol.

There were signs of fight and vitality at the party's conclave in Des Moines in late January. There is a strong feeling of strength within the administration under the leadership of President Eisenhower and Vice President NIXON. I sense much of that same vigor here tonight.

This is an opportunity then for self-examination, for restating our principles, in this hour of uncommon challenge.

The Republican Party must be first of all a party of principle. It must stand as a rallying point for sincere, patriotic, and enthusiastic people who want good government in this blessed land.

As a great midwestern newspaper put it recently in an editorial entitled "First Principles," if the party "must compromise its character to win, the victory is better lost." I call your attention to this because character is the one thing we can build in this life and take with us into the next. The integrity of the Republican Party is dependent upon the character of its members and supporters. When you give freely of your money to a political party—as you have here to-

night—you have a right to expect, and the party has a duty to reflect, character-building qualities. This means to formulate and adhere to sound basic principles.

The Republican Party must be more interested in preserving and strengthening the competitive system—more interested in real Americanism—than in winning the next election.

Here are some of the basic principles which I believe we as a party should adhere to religiously:

First. We should follow those courses of public action which seek to build character and integrity. We must hold tenaciously to those basic concepts which have built this great Nation. What is right. What is best for the Nation. These objectives should guide us. This is so basic a matter that I need not dwell further upon it, except to say that such a concern has motivated my every act during more than 6 years as Secretary of Agriculture. If a thing is right it should be done. And if a thing is right, in the long run, it will also be the best politics. If the time should ever come in this country when this is not true, it will be a sad day for America.

Second. We should pursue public policies which seek to keep men free. Free agency is an eternal God-given principle. The struggle for freedom is a never ending one. We have an obligation to unborn generations to leave this country in a state more conducive to freedom of individual action than we found it.

With respect to agriculture, one of the principal goals of this administration has been, is now, and will continue to be to unshackle the farmer from burdensome Government controls and to restore to him the ability to take his full part in the dynamic economy that has made this Nation the envy of the world. Our goal is a prosperous, expanding and free agriculture.

As the 1952 Republican platform stated so well, "the tending of the soil is a sacred responsibility. * * * Any program that will benefit farmers must serve the national welfare. And a prosperous agriculture with free and independent farmers is fundamental to the national interest."

The issue is clear indeed. Are the people in this country to manage their own economic affairs? Or, are they to be managed from Washington? Which better serves our individual interests and the Nation's welfare? Shall Government continue to subsidize the various segments of the economy, including agriculture, in such a manner that it also takes complete control? Or shall Government implement private decisions and actions in the role of a servant or partner?

Third. We must stand firmly and unequivocally for the free enterprise system. We enjoy many economic benefits today because great Republicans devoutly defended public policies which had as their aim the enhancement of a capitalistic economic system, with its emphasis upon private ownership and private management.

Our abundant blessings have come to us through an economic system which rests largely on three pillars:

1. Free enterprise, the right to venture, to choose.

2. Private property, the right to own.

3. A market economy, the right to exchange.

This means permitting—not preventing—the market forces of supply and demand to allocate resources into the most productive channels and to determine the rewards for hard work and honest endeavor.

Fourth. We must keep Government from trespassing on private initiative. Lincoln's precept, as emphasized by President Eisenhower, that the Government should do for citizens only that which they cannot do for themselves is the Republican philosophy of government. Republicans will continue to wage a hold-the-line battle on this threat.

This administration has made progress in getting the Government out of your business. The Government is in too many businesess now. It is not right for the Government to be in business in competition with its own taxpaying citizens.

Fifth. We must ever be mindful of our traditional Federal-State relationship. This administration has been determined to reverse the trend to bigger and bigger Federal Government. We will continue our fight to strengthen the States. The Federal Government did not create the States of this Republic. The States created the Federal Government.

State and local governments must accept the responsibility for problems that are essentially local and State problems. Inevitably, in centralized Federal programs the money is not as wisely spent as if the States participated financially. We believe that a larger proportion of our tax dollars should be spent at local and State levels.

Sixth. The Republican Party stands for the expansion of markets and the strengthening of our private marketing machinery—not Government handouts. Only in this way can we insure that honest economic effort will be amply rewarded.

As our most recent platform emphasizes, a sound program for agriculture, or for any other segment of the economy, must create the widest possible markets and highest attainable income for our people.

I refer to our platforms because we do not emphasize often enough just what we stand for as Republicans. Although expressions of differences of opinion during the drafting of a platform are healthy and desirable, once the party has decided upon a course of action, we should close ranks and stand firm. I mention this because, as you know, the administration's farm program, based upon the party platform, has experienced some damaging opposition from within the party. This is destructive, not helpful.

The 1956 platform makes it clear that the Republican farm program does not envision making farmers dependent upon direct governmental payments for their incomes. Rather it underscores the principle that our objective is the building and expansion of markets at home and abroad and the development of new uses for farm products. The platform recognizes, as this administration has asserted since the day it took office over 6 years ago, that a Government warehouse is not a market. Farmers want to produce for markets and not for Government bounty.

Capitalism—through our God-given freedom of choice—not government decree, creates markets. Capitalism not government decree can best reward productive effort. This the Republican Party should never forget else it fall by the wayside in its struggle for public support. What is true of agriculture is also true of other segments of our economy.

Our economic order is not perfect, because it is operated by imperfect human beings. But it has given us more of the good things of life than any other system. Let us admit the weaknesses that exist. Let us work aggressively to correct them. But let us never make the catastrophic blunder of putting the chains of big government on our basic economic freedom.

Seventh. The Republican Party stands for fiscal integrity.

Closely allied with the trend toward bigger and bigger government is the tendency toward loose fiscal policy. This is of the utmost concern to every citizen. A nation can hang itself on the gallows of excessive public debt, and we are no exception. The Republican Party believes in fiscal integrity, in living within our income especially in peacetime prosperity such as we enjoy today.

For the coming fiscal year, the President has presented a budget of $77 billion. It is a balanced budget, even though it is the biggest budget in our peacetime history. Yet some of our expert thrift opponents have called it a skinflint budget.

Actually, as the President stated, it will "help prevent further increases in the cost of living and the hidden and unfair tax that inflation imposes on personal savings and incomes."

It has been truthfully said that our free enterprise democracy is the greatest economic system the world has ever evolved. But there is one controlling requirement, and it must never be overlooked. The system is based on solven government and sound money. It is in this requirement that we have allowed ourselves to become weak.

We cannot spend ourselves into higher prosperity but we can spend ourselves into real trouble. Nor can we preserve our prosperity and our free enterprise system by following a reckless policy of spending beyond our income in peacetime. I hope and pray that the present Democratic leaders of Congress will act in a way to avoid the label of a spendthrift Congress which is already being attached to it by many of our right thinking citizens who have watched with deep concern its actions in recent weeks.

The great majority of our people need to become aware of the dangers they face from ever bigger government and loose fiscal policy.

We must wake up. We must alert the various forces in our citizenry to make sure of two things: First, whatever funds are really needed for defense, for space exploration, and for other essential military and civilian purposes must be provided, and provided soundly.

Second, we must continue our fight to eliminate waste, duplication, continuance of unsound governmental subsidies and services no longer needed. We must live within our income. We must keep our economy sound. It cannot be done by going further into debt. We must maintain fiscal integrity.

We know that our dollar tobogganed in value to 52 cents from 1939 to 1952. Today it is worth about 48 cents. This has hit our farmers hard. From 1939 to 1952 farm costs more than doubled. Since 1958 farmers' costs have increased only 4 percent.

We know what inflation has done to the people of France where the cost of living today is 37 times what it was about 30 years ago.

I am told that a pound of butter that cost 10 francs in 1927 is 410 francs today.

Don't say it can't happen here. The people of France never thought it would happen there.

All of us as Americans have a patriotic responsibility not to contribute to the inflation danger by needlessly building still higher the mountain of total debt.

Here are some of the things we can do to meet President Eisenhower's objective of establishing a firm economic foundation for the months and years ahead:

First. We must live within our means, and that means to me a balanced Federal budget.

Second. We must strive for price stability as a national goal as proposed by the President in his economic report to the Congress.

Third. We must maintain a sound credit policy and guard against the danger of low-cost credit which can feed inflationary appetites.

Fourth. We in the Federal Government must set an example of stability for the whole economy. Certainly here President Eisenhower is exercising vigorous leadership. For example, he recently established a Cabinet Committee on Price Stability for Economic Growth, of which I am privileged to be a member. We are already at work.

Fifth. We must see to it that fair competition operates in our economy. This we are

doing through judicious application of the antitrust laws, for example.

Part of our overall responsibility is to do all in our power to make sure that our Government programs are sound and realistic. I am particularly interested that this be true of our farm programs.

What is the agricultural situation today? Presumably, in this audience, there are not many directly involved with farming as an occupation. But agricultural policy is of national import and is a concern of us all.

Most of you know we are plagued by large surpluses, but only in a very few crops. Remember, when you hear and read about our surpluses and their shocking cost, that most of agriculture is healthy today and that our farmers—the best in the world—are doing a wonderful job. Only 12 out of 250 farm products produced commercially are Government supported.

But bear in mind, also, that we should be thankful for the blessing of abundance. We should be grateful that our problems are those of oversupply rather than scarcity. Not many peoples in the world can say this.

If we look at our agriculture over the broad scope, it is today a fairly bright picture.

Production is at the highest levels in history, so is gross and per capita farm income.

Farmownership is at its highest level, and so is the farmer's net equities.

Transportation, telephones, television, electricity, and other aids to abundant living are more widely available than ever before.

The standard of living on our farms is the highest we have ever known.

There are still serious unsolved problems, including the cost-price squeeze, though we are making progress.

Farming is a hazardous occupation.

Farmers are not as highly organized as other groups in our economy. They have only limited control over the supply of their products. In other words, they lack adequate bargaining power. However, they are moving in the right direction through their farmer-owned and farmer-controlled organizations.

Most of agriculture is free of controls. And this free part, representing more than four-fifths of our agriculture, is doing fairly well. The problem narrows down to a few crops—only 5 of them controlled—for which outmoded programs have been too long continued in the mistaken belief they would serve farmers.

The legal requirement that the Federal Government support a few crops at unrealistic levels is pricing us out of world markets and may be doing irreparable harm to vital exports. For example, as is generally recognized, cotton has lost markets at home and abroad—to foreign producers and to manufacturers of synthetics. Tobacco is pricing itself out of markets at home and abroad also.

But at this moment the classic example of our mistake is in wheat. After the legislation enacted at the last session of Congress, wheat today comprises a very major part of the problem. If you combine wheat, corn and cotton you have represented 85 percent of the Government inventory of price supported commodities. But these three crops produce only 20 percent of the total cash farm income.

We are growing much more wheat than we can consume and sell abroad. Most of the costs under the wheat program result from the production of a comparatively few large growers; in fact, to less than 10 percent of those who grow wheat.

The obvious answer to this problem is to eliminate as rapidly as practicable ineffective controls and use price supports at levels that will preserve and build markets.

Price support programs of a realistic nature can be a valuable tool in helping to facilitate orderly marketing. This administration has so considered them and so used them, except where the law required their mandatory use at unrealistic levels.

On July 1, 1959, it is estimated that the Commodity Credit Corporation investment in commodities for which price support is mandatory will total $7.6 billion. All but $100 million—$7.5 billion—will consist of these crops for which price support is mandatory: Corn, cotton, wheat, rice, peanuts, and tobacco.

Yes, price supports are valuable, but they should not be used to destroy markets and fill warehouses.

But there are areas in which Government can provide permanent assistance to help the American farmers achieve adequate income. Important areas, for example, are through public research, education and market expansion.

During the past 6 years the budget for agricultural research has more than doubled. Any long-range farm policy which is going to serve agriculture and the Nation must give a prominent place to research, education and market expansion.

American agriculture—our farmers, ranchers, and their families—has been victimized during the past 10 years through the failure to make such needed changes in old, outmoded legislation. Many of our farm families will continue to reap the sad economic consequences of obsolete rigid programs unless recommended changes governing our price support laws are made without delay.

The President has pointed the way to necessary changes again this year. I have amplified them in appearances before both Senate and House Agriculture Committees. It is my hope that the Congress recognizes the urgency of the situation and will make the adjustment that only Congress can make.

Only in this way can we achieve the objective which we seek—a more prosperous, expanding, and free agriculture for all America.

As Republicans we must stand up and be counted for what we believe to be right. It is not too early to start, especially for you here in New Jersey. I understand you have a vital State election coming up in November.

The way to victory is through hard work. First, get the best possible candidates for the legislature, for if anything was proved last November it was that a sound and an appealing candidate is one of the basic ingredients of victory. Second, work hard for their election by dint of plugging away on a door-to-door basis.

We Republicans have a good story to tell. But we must sell that story, and go forth as missionaries of republicanism. Thus, I was most pleased to note the plans for getting our story across to the American people that were developed at the recent meeting of the national committee.

We must continually be thankful for the blessings of good government, but, at the same time, be eternally mindful that this God-given blessing is ours only because there are those who fought and always will fight to preserve it.

Yet these very blessings could prove to be our undoing unless our perspective is right and our idealism more concerned with eternal standards and value than with material gain and worldly honors.

History tells the story again and again. As nations become wealthy and standards of living rise the tendency is to concentrate on preserving material security, not on keeping ever fresh and alive the basic concepts that made the Nation great. Security is too often sought as an end in itself. That is our mortal danger in this perilous age. Our Nation, established on great spiritual and moral principles, cannot afford to lose its sense of uprightness. We as a people must keep our sights raised above the dollar sign. We must look beyond material things.

In all this we must hold a proper regard for the importance of our political faith. I believe it no exaggeration to say that world peace and our national security depend directly on the maintenance of the free-enterprise system, which is the foundation stone of the Republican Party.

The maintenance of peace, of course, is the No. 1 goal of any God-fearing people. Thank God, this Nation under the unwavering leadership of President Eisenhower has maintained the peace.

The President would be the first to give high credit for our role as keeper of the peace to a courageous, brillant leader who has been stricken seriously ill. I refer, of course, to our great Secretary of State, John Foster Dulles.

Lincoln tasted defeat in 1858 but he led the Republican Party to victory in 1860. One hundred years later—in 1958—our party suffered defeat; so let us resolve to let Lincoln's example spur us on to victory in 1960.

With God's help, we will build a prosperous, expanding and free agriculture in a prosperous, expanding and free America—an America which is economically, socially and spiritually sound.

Thomas G. Masaryk: Defender of Freedom

EXTENSION OF REMARKS
OF
HON. EDWARD P. BOLAND
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 5, 1959

Mr. BOLAND. Mr. Speaker, Saturday March 7, is the anniversary of the birth of Thomas G. Masaryk.

It is especially appropriate for us in the United States to honor Thomas Masaryk. Here was a man who, as the founder and first President of the Czechoslovak Republic, stood for the principles embodied in the Preamble to the Czechoslovak Constitution, which bears a close resemblance to our own. The preamble unequivocably states the desire to consolidate the people in a Republic which shall establish a reign of justice, contribute to the welfare of all citizens, and secure the blessings of liberty to coming generations.

In it was stated also, that it was the desire of the newly formd Republic to take its place in the family of nations as a member at once "cultured, peace-loving, democratic, and progressive."

The ideals of this new nation were those of Thomas Masaryk, who led it, and who genuinely stood for all of these things. Among his personal characteristics was a passionate love of truth. He advocated the scrupulous preservation of the rights of individuals and the fair and just treatment of minorities. A man of the people himself, he championed the people's cause. He succeeded in building a progressive democracy.

When he died, in 1937, one of his biographers wrote:

He had founded a state in which freedom was the watchword and he had educated a nation to be conscious of both the rights and duties of democratic citizenship. • • • But he never forgot the need of "a faith, a

living faith in something higher than ourselves, something great, sublime, eternal."

That this nation to which he gave so rich a heritage should have since fallen behind the Iron Curtain with all of its curtailment of individual freedom, its insistence that man should serve the state alone, and its denial of a faith in anything higher than that state—that this should have happened to Czechoslovakia, conceived in the democratic ideal of its great leader, is the greater tragedy. But that that ideal lives on in the heart of Czechoslovakia today we have no doubt. No more have we doubt of that than we have of the permanence and effectiveness of the contribution of Thomas Masaryk himself, defender of freedom.

Metropolitan Area Residents Affected by Federal and State Tax Laws

EXTENSION OF REMARKS
OF
HON. FLORENCE P. DWYER
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 5, 1959

Mrs. DWYER. Mr. Speaker, I have reintroduced, for consideration by the 86th Congress, two bills I first introduced during the preceding Congress. Both represent efforts to deal fairly and equitably with residents of metropolitan areas, especially those areas that are located close to State boundary lines, insofar as such residents are affected by Federal and State tax laws.

The first bill, H.R. 5307, would allow as a deduction from Federal income taxes, the reasonable and necessary expenses incurred by individuals for transportation to and from work. The maximum deduction in any one taxable year would be $300, and the deductible expenses would include transportation costs either by private automobile or public transportation.

I share the conviction with many of our colleagues that this is a long overdue reform in our tax structure. Especially for those who live in the suburbs of our large metropolitan regions, the costs of transportation to and from work—the costs of commutation—are considerable. In my own Sixth Congressional District—where the number of commuters represent a fair average for the metropolitan New York-New Jersey-Connecticut area—I know of a great many instances where people must pay from $300 to $1,000 in commutation costs each year.

These travel expenses, I believe, are a necessary and legitimate cost of holding one's job, just as necessary and just as legitimate as those expenses presently authorized to be deducted on income tax returns. It is not always possible or even desirable for families to establish their homes in areas immediately adjacent to their jobs. Jobs change and employment opportunities shift, and seldom is it possible for the employee to control these circumstances. To insist that the taxpayer move his home every time he changes his job is obviously impossible and unjust, especially in crowded metropolitan areas. But we unfairly pressure such a person in this direction when we discriminate against him by refusing to permit normal, standard tax treatment for his necessary costs of traveling to and from work.

This legislation would in no way favor one group of taxpayers as against another. It would simply recognize a situation that has grown increasingly significant in recent years—the great migration to the suburbs of America. It would help restore a measure of fair and equitable treatment for these millions of our people. And it would remove the unjust price tag from one of our country's most precious freedoms—the freedom to live where one wants to live.

My second bill, Mr. Speaker, House Joint Resolution 288, proposes to amend the Constitution by prohibiting any State from taxing the wages or salaries or other compensation for personal services received by a person who is not a resident of that State.

This measure, too, has been introduced by several of our colleagues, and I am hopeful that with greater awareness of the elementary justice involved in this proposed amendment there will come the support necessary to win the approval of the Congress.

While the problem this amendment would solve affects residents of New Jersey and Connecticut especially, it also affects residents of several other States who have been recently subjected to the tax laws of the States in which their jobs are located.

Here, again, we are confronted with the same fundamental questions: Shall American citizens be free to establish their homes wherever they choose? Or shall we permit citizens who exercise this right to be penalized because of it?

Not only is there a cherished principle involved here—and who does not, in theory at least, subscribe to the dictum, there shall be no taxation without representation—but there is also much at stake from a practical viewpoint. Income taxes levied by some States have grown steadily heavier, and, of course, it has been this growing burden that has prompted some to seek added revenues from outside their boundaries. But States like New York have gone even further and discriminated against nonresidents in such a way that the nonresident's tax is more than the resident's tax, when both are in similar circumstances. Of course, the nonresident receives few if any of the benefits and services provided residents, for which the tax was levied in the first place.

But then there is little reason to expect logic where there is no justice.

Mr. Speaker, 60 percent or more of the American people have chosen for a variety of reasons to live in metropolitan areas. They are fully aware of the special problems, as well as advantages, which life under such crowded conditions means. And they are willing and able to solve these problems if they are allowed the means to do so. They ask no special privileges, no subsidies, no unwarranted exemptions from civic responsibilities.

They ask only justice, fair play, and equal treatment with fellow citizens living under different conditions. It is time, I believe, for Congress to recognize that America is no longer a rural nation. It is time for us to give the city and suburban dwellers of America a fair break.

Work Being Done by the Department of Health, Education, and Welfare in Implementing the National Defense Education Act

EXTENSION OF REMARKS
OF
HON. JOHN V. LINDSAY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 5, 1959

Mr. LINDSAY. Mr. Speaker, I wish once more to illustrate the impressive work being done by the Department of Health, Education, and Welfare in implementing the National Defense Education Act. It gives me great pleasure to advise this House that a counseling and guidance training institute will be conducted at Hunter College July 1 through August 7, 1959. Hunter College is located in the heart of Manhattan and in the heart of New York's 17th Congressional District. Hunter is one of the many institutions in the 17th District that makes the 17th one of the truly great communities of the Nation.

The selection of Hunter as the site for one of the Nation's training institutes under the National Defense Education Act results from preliminary arrangements concluded between the U.S. Commissioner of Education, Lawrence G. Derthick, and Dr. Harry N. Rivlin, dean of teacher education, College of the City of New York, representing the four municipal colleges—City, Hunter, Brooklyn, and Queens.

A central feature of the institute at Hunter will be a reexamination of guidance policies in the light of today's needs as the core of a training program for counselors.

What are some of these needs? The Congress has declared that the Nation is losing too much of our most valuable and precious resources—the talents of our children in our schools. We know, for example, that many able students do not continue their education beyond the high school. At any time, but especially in these critical times, we cannot afford such waste. The survival of our democratic way of life demands nothing less.

Consequently, the Congress, through the National Defense Education Act of 1958, authorized a program of federally financed counseling and guidance training institutes. They represent one of several features of the act designed, in the words of the act itself, "to insure trained manpower of sufficient quality and quantity to meet the national defense needs of the United States." Title V of the act is entitled "Guidance, Counseling, and Testing; Identification

and Encouragement of Able Students." The cited title suggests the problem which the program of counseling and guidance institutes—such as the one at Hunter—will attack. It will do so by expanding educational programs for the professional preparation of counselors. The need is great for professional personnel to identify, counsel, and motivate the more able students to continue their schooling. This does not mean that current educational programs for counselors are not good. It is simply that a national condition exists, which the Congress has recognized by calling on our colleges and universities to meet it. The institute at Hunter is a response to this challenge.

We can take pride that we are in a good position to help meet the challenge. Physical facilities at Hunter, and nearby, will lend themselves admirably to the purposes of the institute. In fact, since 1950, there has been an on-going program of graduate training in guidance and school counseling at our municipal colleges. The standards of this program are high and well recognized. As a result, skilled training resources will be available to meet a critical need. This insures the leadership of a faculty for an imaginative program contributing to the maximum development and utilization of the rich talents possessed by the young people of the metropolitan New York area.

This institute is but one of some 40 that will be conducted this summer throughout the Nation under the authority of title V–B of the National Defense Education Act. But it represents the imaginative way in which the Office of Education is implementing this important legislation. It is an example of the sound principle of building on strength by utilizing the outstanding skills and resources of institutions well qualified to tackle this problem. New York City and other urban areas—indeed school systems throughout the Nation—stand to benefit enormously from this militant attack upon the problem of America's loss of able manpower.

I call upon the Congress once again to act promptly on the President's request for additional funds to carry out this and other vital programs authorized by the National Defense Education Act. I know that friends of education everywhere join me in urging this action.

Independent State of Ghana

EXTENSION OF REMARKS
OF
HON. CHARLES C. DIGGS, JR.
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 5, 1959

Mr. DIGGS. Mr. Speaker, 2 years ago, on March 6, 1957, as an official representative of the United States Congress, I had the great privilege of witnessing the emergence of the Gold Coast of Africa into the independent State of Ghana. Today that occasion is being commemorated in the world as a triumph not only for the African people of this State, but for all men and women who believe in human freedom, individual dignity, and justice. In the 2 years since its independence, the State of Ghana has made significant economic, political, and social advances, despite the difficulties of its new statehood. It has evidenced a strong capacity for leadership in which the institutions of free and democratic government everywhere in the world have a vital stake. How great is this stake is made clear by the words of Prime Minister Nkrumah, of Ghana, who said recently:

> The hopes and ambitions of the African peoples have been planted and brought to maturity by the impact from western civilization. The West has set the patterns of our hopes and by entering Africa in strength has forced the pattern upon us. Now comes our response.

The American people feel these ties and are personally gratified, therefore, by the progress which the State of Ghana has made under the banners of democracy and freedom. Mr. Speaker, on this occasion, as a Member of the House of Representatives of the United States, and of the Foreign Affairs Committee of the House, I would like to extend congratulations to the State on Ghana on its second anniversary and on its progress and success. I am certain all of us share intimately the hopes of this people for a future that finds them an increasingly strong and free nation working among the family of nations for dignity, peace, and friendship among all mankind.

Broadcast Music, Inc., Has Rendered a Real Service to the People of America by Commissioning Four New Busts of Lincoln, Two of Which Were Unveiled February 9 in Washington

EXTENSION OF REMARKS
OF
HON. FRED SCHWENGEL
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 5, 1959

Mr. SCHWENGEL. Mr. Speaker, on Monday, February 9, I had the honor to participate with the distinguished Senator from Kentucky, Mr. JOHN SHERMAN COOPER, in unveiling two magnificent new heads of Abraham Lincoln executed by the internationally known sculptor, Avard Fairbanks.

This event took place at the headquarters of the Lincoln Sesquicentennial Commission in the Archives Building and was one of the numerous affairs scheduled in connection with the celebration of the 150th anniversary of Abraham Lincoln's birth.

Dr. Fairbanks, the sculptor, is consultant in fine arts to the University of Utah and resident sculptor on that campus. He will be remembered as the sculptor of the bronze statue in Greece of Lycurgus, the Spartan lawgiver; the doughboy of Idaho; the pony express for the Utah centennial; the celebrated statue of Lincoln for New Salem, Ill.; and a statue of Albert Woolson, last survivor of the Grand Army of the Republic for the cemetery at Gettysburg. He also created the 91st division memorial at Fort Lewis, Wash.; and the Marcus Whitman statue in the Capitol.

The heads unveiled by Senator COOPER and me at the ceremony depicted "The Young Lincoln" and "Lincoln, The President." They were commissioned as two of a series of four busts by Broadcast Music, Inc., of New York City, whose president, Mr. Carl Haverlin, is a distinguished Lincoln collector and an honorary member of the Lincoln Sesquicentennial Commission.

The completed heads—these were plaster models that we unveiled—will be 21 inches high, 10 inches wide and 9 inches deep. They now can be seen at the Broadcast Music, Inc., exhibit of Lincolniana at the Statler Hotel in Washington.

The other two heads, when completed, will depict Mr. Lincoln at other stages of his life.

These are inspiring works which reflect fully the statement made by the sculptor that, "The truth of spirit is more important than external form." The external form is there, however, for the model used by Dr. Fairbanks was the Volk life mask of Lincoln, cast in 1860.

Mr. Haverlin, speaking for his company, said that the four heads will be executed finally in marble by Dr. Fairbanks and will be donated to the Lincoln Sesquicentennial Commission and thereafter made available for perpetual display at an appropriate place in Washington where our millions of visitors, both American and from foreign shores, may take from them the same inspiration that those of us who participated in this ceremony experienced last Monday.

Among those present on that occasion from the Congress of the United States in addition to Senator Cooper were Senator Frank E. Moss of Utah, the Honorable Arthur V. Watkins, former Senator from that State and Senator Ralph Yarborough of Texas.

I believe that Broadcast Music, Inc., has rendered a tremendous service to the people of this Nation through this generous gift.

State-Owned Ferries Should Be Exempt From Excise Tax

EXTENSION OF REMARKS
OF
HON. THOMAS M. PELLY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 5, 1959

Mr. PELLY. Mr. Speaker, I have long held the opinion that a State-owned nonprofit ferry system is a link between State highways similar to a bridge or a tunnel, and as such no ferry tolls, more than tolls of a State-owned bridge or highway, should not be subject to Federal transportation excise taxes.

The Washington State Toll Bridge Authority, which constructs and operates

both toll bridges and ferries, held this same view in contrast to the claim of the Commissioner of Internal Revenue. In this resulting dispute to allow for an orderly judicial determination, an agreement was arrived at whereby the State in 1957 increased its ferry system fares in the amount of the Federal tax and the amount of revenue accruing as a result was to be deposited in escrow. This fund contained originally 3 percent of property freight charges and 10 percent of fares of passengers. Subsequently, when Congress repealed the 3 percent tax on freight, I had hoped for a refund or some relief to the ferry users on account of the termination of the one transportation tax but the agreement provided for the taxes under the modified law to be held until final settlement.

So until final judgment the escrow of funds is continuing, but if the United States repeals or otherwise modifies existing laws so as to specifically exempt States from the 10 percent tax on passengers, the deposits, of course, would cease.

The funds on deposit collected from users of the Washington State ferry systems on property is $114,862.05; the amount which is regularly being added on account of possible tax liability from passenger transportation at the end of January 1959 was $239,060.97.

In the 85th Congress, 1st session, I introduced H.R. 2028 to amend the Internal Revenue Codes to make it clear that this tax on transportation of persons and property did not apply to ferry service provided by State-operated ferryboats. That was before the repeal of the tax on property. But other legislation took precedence and the Ways and Means Committee was unable to consider my bill.

Now I have introduced a new bill to exempt these State-operated ferryboats from the tax imposed by section 4261 on persons transported on a nonprofit basis by a State as defined in section 7701(a)(10) or by an agency or instrumentality thereof. The tax under my bill would cease on and after January 1, 1959.

I hope now the committee will take up this bill promptly. Meanwhile, let me make it clear that the passage of my bill would not admit any previous liability of the State. Rather its passage would clarify the State exemption which I believe already exists, and, of course, the excess fares which are being collected and placed in escrow would no longer be required.

The text of the bill is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4263 of the Internal Revenue Code of 1954 (relating to exemptions from tax on transportation of persons) is amended by adding at the end thereof the following new subsection:

"(g) STATE-OPERATED FERRYBOATS.—The tax imposed by section 4261 shall not apply to amounts paid for ferry service provided by a ferryboat operated on a nonprofit basis by a State (as defined in section 7701(a)(10)) or by an agency or instrumentality thereof."

SEC. 2. The amendment made by the first section of this Act shall apply only with respect to amounts paid on or after January 1, 1959, for transportation on or after that date.

In Further Support of My Bill To Curb the National Conspiracy of Gangsters Through the Enactment of H.R. 5186

EXTENSION OF REMARKS
OF
HON. WILLIAM C. CRAMER
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 5, 1959

Mr. CRAMER. Mr. Speaker, I am including in the RECORD a copy of a wire received from the Honorable Nick Nuccio, mayor of Tampa, in support of my bill to give the Justice Department and the FBI jurisdiction to punish the use of interstate commerce in the furtherance of conspiracies to commit terroristic crimes and activities of gangsters and hoodlums. His wire clarifies, and properly so, the present situation in Tampa.

I also include my reply to the mayor which clearly indicates that my remarks, consistent with the position of the mayor, as made on the floor of the House on March 3 was in reference to the previous record of unsolved murders which, in my opinion, in order to have been perpetrated, must have been conspired on an interstate basis.

I also include a copy of my letter to the Attorney General, written on March 4, in transmitting a copy of my bill for his consideration, which further amplifies on my remarks.

I firmly believe that legislation of the nature I have introduced is essential if the people of this Nation are to be protected—whether it be in Tampa or in another community—from the nefarious activities of national criminal and racketeering conspiracies. As will be noted from my letter to the Attorney General, even the sheriff of Hillsborough County, on August 12, 1953, requested such help and my bill will provide Federal assistance when the crimes committed are of an interstate nature. My bill would make avaliable to local law enforcement the very type help requested.

The above-mentioned follows:

TAMPA, FLA., *March 5, 1959.*

Hon. WILLIAM C. CRAMER,
New House Office Building,
Washington, D. C.:

I wish to congratulate you on introducing a bill in Congress yesterday to curb terroristic conspiracies. As we have discussed before in regard to your thinking on this matter this is a law which is vitally needed and I am sure that all good citizens in our county join me in urging you to push for speedy enactment of this bill during this session of Congress. However, I would like to call your attention to the fact that Tampa is not the criminal city it was several years ago. It has always been my belief that organized crime cannot exist without the blessing of law-enforcement officers. Since my election as mayor of the city of Tampa 2 years ago, I have waged a vigorous campaign against all types of criminal activity and will continue to do so. Because of this Tampa today is living down its past reputation as a center of organized crime. The only recent killing was found to have no gangland connection after thorough investigation by city, county, and State law-enforcement agencies. Again congratulations on the job you are doing in Washington for the people of the First District of Florida.

NICK NUCCIO,
Mayor.

MARCH 5, 1959.

Hon. NICK NUCCIO,
Mayor of the City of Tampa,
Tampa, Fla.:

I wish to express my appreciation for your wire supporting my bill to curb national gangster conspiracies. I am fully aware of your announced purpose to wage a vigorous campaign against all types of criminal activity.

I congratulate you in this effort.

I trust that neither you nor my respected constituents of Tampa misinterpret any of my remarks or actions as being critical of Tampa's present local law-enforcement efforts.

I have referred to the 19 unsolved murders in Tampa's past history, without reference to the most recent killing that I understood the grand jury had found was outside the scope of the type of killing my bill is directed toward, that is, of interstate character inspired by a national gangster conspiracy: but it is my considered opinion, buttressed by information provided by the FBI, the Bureau of Narcotics, and the Justice Department, that other killings in Tampa's past history have the earmarkings of being part of an interstate conspiracy. My bill aims at that type of conspiracy because of its interstate nature, which is beyond the reach of local law-enforcement officials, the area where Justice Department and FBI assistance is needed to assist in stamping out such outside influences on communities such as Tampa.

I am forwarding by airmail a copy of my letter to the Attorney General dated March 4 in which I transmitted my bill for consideration of justice which I think clearly states my position. I am making your wire and this reply together with my letter to the Attorney General a part of the CONGRESSIONAL RECORD as further amplification of my remarks of the third in order to avoid any misconstruction.

WILLIAM C. CRAMER,
Member of Congress.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., March 4, 1959.

In re H.R. 5186, a bill to establish the crime of conspiracies to commit terroristic crimes and activities when interstate commerce is used with the objective of stamping out national racketeering.

The Honorable WILLIAM P. ROGERS,
Attorney General of the United States,
U.S. Department of Justice,
Washington, D.C.

DEAR ATTORNEY GENERAL ROGERS: You will find enclosed herewith a copy of the bill above referred to which I introduced on March 3 and about which I made a speech on the floor of the House, a copy of which I have previously forwarded to you. I am herewith forwarding to you a copy of the bill for your consideration, anticipating that the bill will be officially forwarded to you by the Judiciary Committee for a report by your Department. Of course, I am hopeful that this bill will result in favorable consideration of some legislation that will accomplish the same objective.

To amplify on this matter, I am sure your files will indicate that some 4 years ago, subsequent to the occurrence of one of the murders which I referred to in my remarks as one of the "19 unsolved sawed-off shotgun gang murders," I directed a request to the Justice Department that the FBI and the Department act favorably upon the request of the local law enforcement officials and assist those officials in attempting to solve this murder by placing the Mafia on

the subversive list which would make it subject to Justice Department surveillance.

I stated at that time that it was my opinion that because this was a murder similar to those that had occurred in the past and which were also unsolved, apparently it was being done on the basis of the killer being shipped in and out rapidly in interstate commerce and that there was a connection between such killings and national gangsterism and possibly the Mafia or Murder, Inc. It was on this basis that I thought the FBI could accept this responsibility but I was advised that the Department of Justice had determined that it had no jurisdiction in the matter because no Federal crime was involved and that the Mafia did not come within the definition of subversive and thus could not be placed on your list pursuant to Executive Order 10450.

The purpose of my bill is obviously to plug up the loophole and in the future to make the FBI and the Justice Department available in similar instances with the presumption that interstate commerce is involved when this type of killing or other crime takes place.

I want it clearly understood that my remarks in the RECORD refer to the national activities of Murder, Inc., the Mafia, and other gangster conspiracies which prey upon cities such as Tampa, and I cite Tampa as an example that I think is one of the clearest indications that this nefarious outside influence is affecting the local community and that, because such influence is of an interstate nature, the local law enforcement officials have not been capable of coping with this problem. Such officials obviously are not equipped to cope with this problem when it is of an interstate nature as is clearly indicated by the request of Sheriff Ed Blackburn, Jr., of Hillsborough County, for the assistance of the FBI and the Department of Justice to place the Mafia on the subversive list pursuant to Executive Order 10450, his request having been made in the fall of 1953 and my request having been made to back him up. My predecessor, the Honorable Courtney Campbell, properly initiated the sheriff's request by forwarding it to your Department.

Since that time when we were advised that no Federal crime was involved and that the Mafia was construed not to come within the definition of subversive, you know, in that I have been in consultation with the Department on a number of occasions concerning it, that I have been in the process of considering legislation to make such interstate gangster activities a Federal crime and the enclosed bill is the consummation of those efforts.

I want to make certain that you understand that my citation of Tampa is for the purpose of indicating a concrete example of where, in my opinion, the outside influence of gangster conspiracies in the past has had a very telling effect beyond the power of the local law enforcement officials to cope with and my reference to the city's having one of the worst crime records of course refers specifically to the 19 unsolved murders in the past. It is obviously not in any way intended as a reflection upon the efforts of the local law enforcement officials to clean up the city. To the contrary, it is my opinion that in recent years much has been done within their jurisdiction to clean up Tampa but that this national conspiracy still poses as a threat to the future safety of the citizens of this community and communities throughout the country.

It is my hope that legislation of this nature will be enacted, first, in that it will be a deterrent to future national activities of gangsters having local effects similar to those that have happened in Tampa in the past, and, second, should crimes be committed of this nature in the future in Tampa or anywhere else, the Department of Justice will have jurisdiction to investigate the matter.

I believe this matter is of sufficient concern for you to give personal attention to it and that is the reason for my forwarding to you a copy of my remarks and a copy of my bill and for calling this to your attention again, it being a follow-up of my previous correspondence and discussions with the Department on this matter.

Thanking you for your attention to and consideration of this matter, and with kindest regards, I am,

Sincerely,

WILLIAM C. CRAMER,
Member of Congress.

Full Text of Senator Douglas' Article: "A Catholic Can Become President"

EXTENSION OF REMARKS
OF

HON. BARRATT O'HARA

OF ILLINOIS

IN THE SENATE OF THE UNITED STATES

Thursday, March 5, 1959

Mr. O'HARA of Illinois. Mr. Speaker, by unanimous consent, I am extending my remarks to include the following article by the senior Senator from Illinois, the Honorable PAUL H. DOUGLAS, in the current issue of Coronet:

A CATHOLIC CAN BECOME PRESIDENT

(By Senator PAUL H. DOUGLAS)

I think a Catholic can be elected President of the United States.

Given the right man, a Catholic should be elected President.

It saddens me that it should still be necessary in America today to document these beliefs. Yet the issue is clouded by so much confusion that both non-Catholic and Catholics can profit by its frank discussion. For the closer we move toward the 1960 political conventions, the greater the danger that, in the heat of debate, matters of principle may become further distorted by the cobwebs of myths and religious suspicion.

The chief argument advanced for the contention that a Catholic either cannot or should not become President are:

1. Gov. Alfred E. Smith, of New York, the only Catholic presidential candidate in U.S. history, lost disastrously in 1928 because of his religion—and the memory of his defeat remains too fresh.

2. The religious views of a Catholic President would necessarily conflict with his constitutional duties.

3. The electorate still is not sufficiently tolerant to elect a Catholic.

4. Even if the electorate might prove willing to elect a Catholic, the professional politicians would be too cautious to nominate him.

Let us examine each of these arguments.

There can be no question about the overwhelming extent of Al Smith's defeat. He lost to Herbert Hoover by more than 6 million votes. He failed to carry four States of the solid South. He even lost in his beloved native State of New York and wound up with just 87 electoral votes.

It is also true that the Democratic candidate's Catholicism was a long and bitterly discussed issue. Methodist Episcopal Bishop James Cannon, Jr., argued that "no subject of the Pope" should be President. The Republican national committeewoman from Virginia declared: "We must save the United States from being Romanized and rum-ridden, and the call is to the women to do so." A well-circulated cartoon depicted a kneeling Al Smith inviting his running mate, Senator Joseph Robinson, to kiss the Pope's bare toes. At the upper end of the intellectual scale, a noted attorney, Charles C. Marshall, addressed a 5,000-word open letter to Smith in The Atlantic Monthly, questioning the Governor's qualifications on the basis of the past pronouncements of various Catholic spokesmen. In reply, Smith issued a moving 4,000-word manifesto.

Nevertheless, historians now believe that the religious issue was only one of several that caused Al Smith's downfall. Quite probably it was not even the most important one. For Al Smith's America differed greatly from the America of the space age in one almost forgotten respect. Bishop Cannon also attacked Smith as the master henchman of evil forces representing the foreign-populated city called New York. William Allen White of Kansas' Emporia Gazette railed against him as the agent of saloon, prostitution, and gambling interests.

It is a little difficult not to smile at the notion today, but the fact is that in Al Smith's day much of rural America was in a state of undeclared war against its urban counterpart. To many voters in the rural South and Midwest the stereotype of the cigar-chewing machine politician from the East spelled government by city slickers, corruption, and foreigners. Happily, education, automobiles, television, and other unifying factors have pretty much wiped away these prejudices. Moreover, about 63 percent of the population now lives in urban areas.

Most difficult for Al Smith, perhaps, was the prohibition issue. Again, it may be hard for voters now in their 20's and 30's to picture how many people sincerely—and vehemently—opposed the legalized sale of liquor. Smith was an ardent wet and said so. After the votes were in, Prof. William F. Ogburn of the University of Chicago made a study of 173 counties and concluded that the prohibition sentiment was 3 times more decisive than the religious issue.

I am convinced, in view of this, that Al Smith's fate should not be too significant for any Catholic candidate of the future.

Since I am a Protestant, I feel I can discuss objectively the claim that the teachings of the Catholic Church would lead a Catholic President into inevitable conflict with our laws. Frankly, this so-called danger does not worry me.

It is, of course, possible to find some basis for conflict between church and state in the writings of the Catholic hierarchy of the past. This is particularly true of Pope Pius IX, who asserted in 1864: "To say in the case of conflicting laws enacted by the two powers, the civil law prevails, is error." The statements of Pius IX were, however, made primarily in reference to European conditions, and were issued a long time ago. I am convinced, however, that in our modern United States such areas of potential dispute would seem to exist chiefly in the realm of theory alone. Certainly Al Smith thought so when he answered Charles Marshall in the Atlantic Monthly:

"I believe in absolute separation of church and state * * * I believe in the support of the public school as one of the cornerstones of American liberty * * * I recognize no power in * * * my church to interfere with * * * the Constitution of the United States."

In other words, Catholicism is a matter of faith and morals for most members of the Catholic Church. Catholic officeholders have had no difficulty reconciling their faith with their politics in this country. As the militantly Protestant journal, Christian Century, pointed out during the 1928 campaign:

"Catholic political action in modern times has shown itself more modern than Catholic. France was overwhelmingly Catholic; it

threw off the yoke. Italy was overwhelmingly Catholic; it destroyed the temporal power of the papacy. Catholics do not act as a unit at the wave of the Pope's baton. In actual practice, American Catholics love their country as much as Protestants do."

To which I would add: just what could a Catholic President of the United States do—against the will of the non-Catholic majority—to aid the Pope? The Constitution provides ample checks against the usurpation of powers by the executive branch, so that we need not—and indeed we must not—deny to 36 million Americans the right to have a qualified member of their faith elected to the White House.

Not only do I think that a member of a minority religion would do nothing to offend the beliefs of the majority, I believe there is strong evidence that Catholic officeholders would bend over backwards to avoid charges of religious prejudices against themselves or their coreligionists.

There is, for example, no record that Catholic members of our highest tribunal, the Supreme Court, ever found themselves in conflict with the laws they were chosen to interpret. This is true of two Catholic chief justices, Roger Brooke Taney and Edward Douglass White, who presided over the Court about 40 years. More recently, another Catholic justice, the late Frank Murphy, voted in favor of the right of a Jehovah's Witnesses minister to set up a public address system in a municipal park and make anti-Catholic broadcasts on Sundays. Currently, Supreme Court Justice William J. Brennan, Jr., a Catholic, has also shown himself to be a stout defender of individual rights and civil liberties.

Looking over the ranks of my Catholic Democratic colleagues in the Senate, I must confess that the average quality of their performance seems to surpass the average performance of my fellow-Protestants.

There is Senator JOHN F. KENNEDY of Massachusetts, who is considered the frontrunner for the Democratic presidential nomination in 1960; Senator MIKE MANSFIELD of Montana, the Democratic assistant majority leader; such veterans as Senators JAMES MURRAY of Montana and JOSEPH O'MAHONEY of Wyoming; newer Members like Senator JOHN O. PASTORE of Rhode Island, FRANK LAUSCHE of Ohio and PAT MCNAMARA of Michigan; and newly elected Senators PHILIP A. HART of Michigan, EDMUND S. MUSKIE of Maine and STEPHEN M. YOUNG of Ohio. In addition, there are two other freshmen Senators who have served with distinction in the House of Representatives: EUGENE MCCARTHY of Minnesota, and THOMAS J. DODD of Connecticut. In the House, for the first time, there are nearly 100 Catholic Members.

I find these men remarkably free of prejudice and, as a group, less self-righteous than a large proportion of my fellow-Protestants. It may be that most Catholic legislators are above-average at their jobs because they had above-average obstacles to overcome in achieving election. Whatever the reason for their collective stature, I would like to see more such men in Congress.

If a Catholic is nominated for the presidency in 1960, or at any other time in the foreseeable future, I must admit that his religion would—regrettably—be held against him by some voters.

The Gallup poll has been asking a cross section of voters: "If your party nominated a generally well-qualified man for the presidency this year, and he happened to be a Catholic, would you vote for him?"

In 1955, 23 percent replied "No." In 1956, 22 percent. Last October, 25 percent.

To me, however, the more significant points established by these polls are:

1. Anti-Catholic voters are clearly in a minority.

2. Since a Catholic candidate almost certainly would be a Democrat, the majority of anti-Catholic votes in the public opinion polls were cast by Republicans who would not vote for him anyway.

3. The above figures compare with a "No" vote of 31 percent in the same poll taken in 1940.

4. The October 1958 Gallup poll also shows that anti-Catholic prejudice is significantly lower among younger voters and voters with a college education.

Clearly then, the trend is toward less religious prejudice in our voting habits. And it should be. Historically anti-Catholic feeling in this country has been an anti-immigrant prejudice against the stereotyped Irish cop, saloonkeeper or favor-peddling ward heeler. Catholics, Protestants, and Jews live in more or less separate social compartments. Nowadays, economic and social barriers are dropping rapidly. There is much more interfaith communication than ever before. We know and understand each other better than we ever did. The war and military service in a common cause melted away many hatreds. Few Americans still blindly believe that a man wears invisible horns because he worships the same God in a different church.

Recent election results bear this out. The electorate of Maine is only 26 percent Catholic and not noted for upsetting political apple carts. It was a State with a firmly fixed tradition that no man of immigrant stock and no Catholic could be elected to high office. Yet in 1954, Maine elected MUSKIE—a Catholic and the son of a Polish immigrant tailor—as the first Democratic Governor in 20 years. In 1956, it reelected him by the greatest majority ever given a Governor of either party. In 1958, it made him the first Democrat ever popularly elected U.S. Senator from Maine.

Analyses of the 1952 and 1956 election results also show that quite a few Catholic candidates for Congress ran substantially ahead of Adlai E. Stevenson. Among these were Representatives LEO W. O'BRIEN and JAMES J. DELANEY of New York (who ran 16 and 15 percent ahead of the national ticket, respectively); PETER W. RODINO of New Jersey (21 percent); Senator KENNEDY (12 percent); Senator PASTORE (12 percent); Senator LAUSCHE (26 percent); Representative CLEMENT J. ZABLOCKI of Wisconsin (33 percent); Representative (now Senator) EUGENE MCCARTHY (12 percent); and Senator MANSFIELD (21 percent).

Many of these front runners undoubtedly come from areas with relatively heavy Catholic populations. But I believe that most of their constituents voted for these men simply because they thought they would do a good job.

By the same token, I will concede that many southern delegates who jumped on the KENNEDY-for-Vice-President band wagon at the 1956 Democratic convention did so largely because of their distaste for the alternative choice, my friend ESTES KEFAUVER of Tennessee. But it was an historic change to see delegates from the South (where, according to Gallup, only 51 percent of the voters would accept any Catholic Presidential candidate) rally to the KENNEDY banner—even for the second place on the national ticket. It showed that the South was willing to live with a Catholic Vice President.

There is no question in my mind that the increased acceptance of Catholics in public office is also attributable to the efficiency and fairmindedness of most Catholic officeholders at the municipal level. Robert F. Wagner, Jr., in New York, Richard J. Daly in Chicago, John B. Hynes in Boston, deLesseps S. Morrison in New Orleans and David Lawrence in Pittsburgh have two characteristics in common. All are Catholics. All have been excellent mayors.

Because of his fine record, the voters last year elected Mayor Lawrence the first Catholic Governor of Pennsylvania. Three Catholics already were Governors of other States and making good records: Stephen L. R. McNichols of Colorado, Albert D. Rosellini of Washington, and Foster Furcolo of Massachusetts. Nor was Lawrence the only newly-elected Catholic Governor. Chosen in the last election were Christopher Del Sesto of Rhode Island, J. J. Hickey in Wyoming, Michael V. DiSalle in Ohio; and, most notably, Edmund G. (Pat) Brown in California. Brown defeated Senator William F. Knowland by 1,029,000 votes.

I think, therefore, that an impressive case can be made for the argument that the vast majority of today's voters look their candidates over for merit, not for religious beliefs. Now what about the politicians who nominate Presidents?

Here we are on more speculative ground. Politicians are worriers. Worriers are cautious. I am afraid there is evidence that a Catholic presidential candidate might aid, rather than hurt, the cause of the Democratic Party. At least this is the conclusion of a careful statistical study sponsored in 1956 by John Bailey, the Democratic State chairman of Connecticut. Its most intriguing findings were that Catholics tend to vote more diligently than do Protestants, and that their voting strength tends to be concentrated in 18 large cities of 12 key States. The study concludes:

"The Catholic voters in these cities can usually determine the size of the Democratic margin in these cities. The size of the Democratic margin in those cities usually determines whether these States go Democratic. Whether these States go Democratic usually determines whether the Democrats win the election."

This is a rather coldly clinical approach to the issue of religion in politics. But the men on the floor of our nominating conventions are clinicians who should be impressed by such statistics. They should also be impressed by the consistently spectacular showing made in the Gallup polls by Senator KENNEDY, whose Catholicism is not precisely a secret.

The second point I would raise with our over-cautious politicians is the same that I want to raise with all Americans: Hasn't the time come for us to quit thinking of our public officials in terms of their religious faith?

I think it has.

This is the 20th century, not the 18th or 19th century. We should not let the fears of the past dominate our thinking today. And surely it is essential that we cast aside all remnants of prejudice in a time when the whole world is watching to see whether we live democracy, or merely talk it. Personally, I believe that when the right candidate comes along—regardless of his religion—the American people will do the right thing. They usually do.

The REA and Trinity Power

EXTENSION OF REMARKS

OF

HON. THOMAS H. KUCHEL

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Thursday, March 5, 1959

Mr. KUCHEL. Mr. President, I ask unanimous consent that the text of a speech which I made before the 17th annual meeting of the National Rural Electric Cooperative Association on February 9, 1959, in Washington, D.C., be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE REA AND TRINITY POWER

(Address by U.S. Senator THOMAS H. KUCHEL, of California, before the general session, 17th NRECA annual meeting, Washington, D.C., February 9, 1959)

President George, Mr. Ellis, members of the National Rural Electric Cooperative Association, and friends, I am delighted with this opportunity to exchange views with the organization which has brought millions of Americans one of the means of better living: electricity.

Much as the pioneers did who put the plow to our broad and fertile land in order that there might be a plenitude of food for the people and an ample supply of fibers for their needs, the rural electric cooperatives have blazed a trail through the wilderness of technological maladjustment so that the American farmer and his family might receive the benefits of this convenient form of energy at prices tolerant to their income. Thanks to the cooperatives, 19 out of 20 farmhouses today can command the assistance of electricity at the flick of a switch. Clean incandescent and fluorescent lighting has literally eclipsed the kerosene lamp. The electric motor has accepted the strains of human toil in the house and the shop and barn. Even the human hunger for entertainment is filled in part by devices utilizing the magic of electrokinetics. Indeed, the farmer who is a member of his electric cooperative may have today all the conveniences of city living—plus the joys of living in the country.

The banding together by neighbors for the purpose of obtaining electrical service is clearly in consonance with the philosophy of government expressed 100 years ago by Abraham Lincoln. This greatest of Americans said, "The legitimate object of government is to do for a community of people whatever they need to have done, but cannot do at all, or cannot so well do for themselves in their separate and individual capacities."

Your meeting is being held in a historic setting. Washington has been the seat of American Government for 169 years. In the old Supreme Court room of the Capitol, a mile or two from this armory, one of the most useful applications of electricity was accomplished when Samuel F. B. Morse demonstrated the first telegraph, sending his message, "What God hath wrought," over the wires instantaneously from Washington to Baltimore.

Northward, a couple of hours from here by automobile, lies Philadelphia, where Benjamin Franklin interested himself, among many other subjects, in the phenomenon of electricity. Franklin was a practicing scientist of government. He perceived, as Lincoln did later, that the people have to do jointly many things which they cannot accomplish as individuals; for it was Ben Franklin who established the Post Office Department in order that the public might have a far better mail service than they could supply for themselves. He carried out a legitimate object of government.

About 23 years ago, the Congress of the United States concluded that if rural America were to receive electric service, this would have to become a "legitimate object of Government" through Federal assistance to local cooperatives. The undertaking has been successful. A tremendous amount of new business has been developed, which benefits the total American economy; for when thousands upon thousands of farm families buy electrical appliances, industry hums in Schenectady and Chicago and all around the land. The cooperatives have had a magnificent record of financial soundness. They have served a legitimate object of government.

But now it is proposed to emasculate the foundation of the rural electric cooperatives. Other speakers during this meeting will discuss the attempts to exact higher fees for the money which cooperatives must borrow. They will remind the public that the rate of interest paid on REA loans in most of these past 23 years has exceeded the interest rates paid by the Government in the money market. They will note that under the "area covenants" which a cooperative undertakes when it accepts Federal assistance, that cooperative must give service to any farmer in the territory even if the individual account may not be profitable. This, of course, the private utilities cannot be compelled to do; and until the idea of rural electric cooperatives was born, many such farmers had to endure a standard of living which reflected the lack of electrical service.

These financial policies, as I say, are not within the scope of my remarks; but they interest me very much. In this connection, I hope you will permit me also to remind you that I am a coauthor in the U.S. Senate with Senators AIKEN, HUMPHREY, SPARKMAN, KENNEDY, MILTON YOUNG, COOPER, MANSFIELD, HILL, HENNINGS, CURTIS, MURRAY, LANGER, and CLARK on the resolution to clarify the lending authority of the Rural Electrification Administration.

The aspersions upon REA interest and loan policies constitute a threat to the magnificently successful rural electrification program. I want to discuss another, equally serious threat—the attack upon the governmental policy of giving preference to publicly owned and operated agencies when it disposes of federally generated power. By definition those agencies include military installations, irrigation districts, municipalities, and rural electric cooperatives.

The present battleground in the war upon the preference policy is my own State of California. Hydroelectric power is a feature of Federal multipurpose reclamation projects. Great dams are built to impound quantities of water for irrigation. As these waters fall over the dam, or, rather, go through a penstock, they turn electric generators. You are far more familiar with the process than I.

Revenues from the power sales have contributed substantially to project construction costs. The reclamation projects of the United States are not built for profit. Their purpose is to serve the needs of the people. They incidentally—and importantly—assist in controlling floods and in controlling salinity. They provide new recreational opportunities. And, utilizing the inevitable hydro head, they produce power.

Whenever we study these governmental projects, it must be borne in mind that the size of the dams is governed not by the output of the powerplant, but by the needs of irrigation. Irrigation is the primary purpose. These are reclamation projects. They are power projects only incidentally. The ability of the Government to receive income from the power has, of course, helped to guarantee a dependable and economical supply of water for crops.

Moreover, if the dams had been built simply for power, they would be small. Their capacity for irrigation needs would be irrelevant. There is an excellent example of this in my State. There, on the great Feather River, the private utility has built a series of dams. Each produces a hundred thousand kilowatts or so of electrical energy. But they do not hold back much water for summer irrigation. Their flood control values are negligible. In the disastrous flood of 1954–55 in the Sacramento Valley, it was not the Sacramento River which caused the loss of 70 lives and wreaked tremendous property loss, but the Feather and other streams, upon which there are no reclamation dams at the present time. On the Sacramento, the mighty Shasta Dam, a reclamation project of the United States, holds back more than 4 million acre-feet of water; if it had only to serve the needs of power production, it could be of a capacity of a relatively few thousand acre-feet.

Reclamation was found—under the administration of a great Republican President, Theodore Roosevelt—to be a legitimate object of the U. S. Government. No individual could possibly cope with a reclamation undertaking costing hundreds of millions of dollars; but it was both possible and practicable for the community of people, the Government, to do so. And thus, in the best sense, it was in the Lincoln tradition.

The disposal of the water from these projects, and of the power, was dealt with on behalf of the community. A limitation was placed upon the number of acres an individual might own if he accepted the irrigation benefits; and, in order that its benefits might be shared by a maximum number of people without profit to any at the expense of the Government, the electric power was put at the disposal of Federal installations and public agencies.

This preference, with respect to power, constituted the forms of assistance which the Federal Government could make available for rural electric cooperatives. If the preference policy were to be eroded away, the Federal agencies would have to come to Congress for more money to cover the mounting costs of their power bills. The cities which have established municipal power distribution, and the electric cooperatives, would lose one of their principal means of helping to build America. With half of your systems directly dependent upon Federal projects for wholesale power, you have cause to be deeply concerned.

It is with respect to a great new Federal project in my State that such erosion is being attempted. If the private power industry succeeded in preventing the Government from making the electricity from the Trinity available to "preference" customers, I think it only logical to expect that a like attempt would be made with respect to all Federal reclamation projects, in being or in prospectus. The efforts of the community of people to accelerate the economy of rural America through electric cooperatives would suffer a disastrous reversal.

Congress authorized the Trinity division of the Central Valley project in July 1955. My former colleague, William F. Knowland, and I coauthored the bill in the Senate. I was proud to have the opportunity of successfully presenting the necessary legislation in committee, and in the Senate as a whole. As finally approved, the Trinity bill was the version passed earlier by the House of Representatives.

By reason of the lateness of the season, Representative CLAIR ENGLE requested the Senate to take up his House-approved bill. It was similar to the Senate version, except that it provided also for a continuance of studies and a report to Congress by the Secretary of the Interior on proposals for power development through the purchase of falling water at Trinity by a non-Federal agency, the result of proposals made by the Pacific Gas & Electric Co.

The Trinity project is unique. It will take a million acre-feet of water annually from the Trinity River on the west side of the coast range of mountains in northwestern California, and dump it into the upper reaches of the Sacramento River on the other side. The transfer will be accomplished through several tunnels through the mountains. As the waters descend, they will develop electricity at three powerplants in a total of 330,000 kilowatts of firm power.

When the water has reached its destination, it will supplement the Central Valley project, and stabilize the Sacramento River. It will provide some flood protection on the Trinity and Klamath Rivers. It will have recreational values. And this multipurpose project will generate power.

When they headed the administration of my State's government Earl Warren and Goodwin Knight both urged the Trinity project. Edmund Brown supported it as attorney general and since becoming Governor has stated his continuing approval for Federal construction of the power feature of the project. So in the Congress we have been carrying out the wishes of the State—which is as it should be.

In accordance with the reclamation laws, the power feature of the Trinity was included in the 1955 legislation. But as we worked for passage of the legislation, it became necessary in the House of Representatives to accept the amendment which I have described. This was the provision for a report by the Secretary of the Interior on the purchase of falling water at Trinity by a non-Federal agency. In plain English that would be the so-called "partnership" between the Government and the Pacific Gas & Electric Co.

I want to emphasize that Congress in authorizing Trinity was at great pains not to waive the national policy regarding public power and the preference principle. In fact, in reporting the Trinity bill, the Senate committee flatly declared it was its intention to preserve inviolate the preference clause sections of the reclamation laws. The committee went on to indicate that the study by the Interior Secretary was not to be interpreted as approving any departure from the traditional policy which goes back to Theodore Roosevelt's administration. That was certainly my intention in handling the bill. It was, I believe, the intention of the Senate in passing it.

The studies called for in the act were made by the Bureau of Reclamation. They were reported to Congress 2 years ago by the Secretary of the Interior, who recommended the so-called "partnership." The Commissioner of Reclamation said, in his report attached to the Secretary's recommendation, that:

"The all-Federal development assumes extending to the Trinity Division policies and reclamation law which provide for sale (1) of power to preference agencies, (2) at lowest rates to all customers consistent with the financial needs of the project.

Obviously, under the "partnership," public preference would be emasculated. The Commissioner himself stated that under the "partnership" the power available from the Central Valley project, into which the Trinity Division has been incorporated, would be curtailed. He calculated that 650,000 kilowatts would be available to nonprofit agencies under Federal development, contrasted with 400,000 kilowatts under private development. A later study by Samuel B. Morris, the distinguished Los Angeles engineer, found that the difference would be not 250,000 kilowatts, but 330,000 of firm power.

Using 250,000 kilowatts, the Secretary calculated that the excess cost to public agencies for their power needs would be $118 million, of which $71 million would be paid for by Federal installations, and $47 million by local preference customers. The report was sent to Congress on February 12, 1957. In June of the same year, after it had been discovered that the earlier figures were based on an obsolete rate schedule of the private utility, the Secretary revised his total figure upward to $150 million as increased costs to public agencies, including the proposed new San Luis Reservoir.

Mr. Morris calculated that with San Luis, the excess cost to preference customers would be $192 million—using the Secretary's figure of 250,000 kilowatts as the power output of the Trinity project. But Mr. Morris, as I have said, reckons the output at 330,000 kilowatts of firm power. He finds that the difference in cost to preference customers, if they bought the larger amounts from the private utility, would be $257 million over the 50-year payout period of the Trinity project.

While it is extremely difficult to make precise calculations on a problem so complicated as this one, everyone concerned clearly understands that the excess cost to preference agencies under the "partnership" proposal would run into millions of dollars. We know that the Federal installations which use Central Valley project power would find it necessary to budget for higher costs. Congress would have to provide the money for them. We would be selling the falling waters at Trinity at one level, and we would have to buy back the power at a higher level to pump water into the San Luis Reservoir, and for other Federal purposes.

Against the excess costs to Federal installations, municipalities, rural electric cooperatives, and irrigation districts would be the offset of the amount the private utility would pay for the falling waters at Trinity. But even if the offset were 100 percent—which it is not—this would be nothing more than robbing Peter to pay Paul.

Beyond the fact that the "partnership" proposal violates my understanding of economics, I subscribe to the principle that the people of a community have the right to determine for themselves the kind of electric power service they want. This they do for water service, and transportation, and a number of other public objectives. Is it not abundantly true, my friends, that in this Republic of ours, it is the people whose right it is to decide what they want for themselves?

One does not need to be doctrinaire on power policies in order to recognize the right of people to determine the kind of electric service they desire for their community or district, under preferences given to them by Federal law on Federal reclamation projects. It is illogical to urge that the Federal Government build a $225 million project only to compel its own agencies and local nonprofit agencies to pay private rates for the electric energy produced by the waters stored therein. Indeed, it would be illegal under the existing Trinity authorizing law.

Congress will not consider repealing the preference clause. That was my judgment 2 years ago, which I expressed during a speech in the U.S. Senate. It is my judgment now.

The recommendation of the Secretary of the Interior for private power development at Trinity is fraught with many perils. The theory of California water law is one of beneficial consumptive use. Our semiarid State cannot afford to waste water. In a Federal reclamation project, the Bureau of Reclamation must determine what is the most efficient use of the water in the storage reservoir for both domestic and agricultural use. That is the basis upon which it must discharge its responsibility of administering reclamation projects. Beneficial consumptive use must have complete priority over using the water for the generation of electricity. Under the Secretary's proposed contract, the single responsibility of the company would be to produce hydroelectric power in a manner most efficiently to supply the needs of its own customers. In the proper functioning of the Central Valley project, I visualize a deadly serious problem of the needs of water by the Central Valley were to conflict with the needs of electricity by the customers of the private utility under the "partnership" proposal.

There is room in our Nation for both public power and private power to meet the growing needs of our expanding economy. Where facilities have been created through an investment of public moneys, as in the Central Valley project and its Trinity division, I believe the power produced by them should be distributed to public agencies, as has been done so successfully for many years. The Central Valley project was built to satisfy an urgent need among our people for reclamation assistance. Its benefits should be distributed on as wide a range as possible.

My decision as to Federal construction of the Trinity division power feature has not been lightly taken. It was recommended by both the Warren and the Knight administrations. It is endorsed by the Brown administration. It is the way Congress passed the bill and the way President Eisenhower signed it. Never in my life have I been subject to such contemptible pressures to change my position. But never in my life have I found a decision more inescapable, more logical, more right, than this one, and I give you my assurance that Trinity will be completed as a multipurpose Federal project, and that this latest assault on the preference clause of Federal reclamation law will go down to its well-earned defeat.

In this 86th Congress I will fight with all my resources for an appropriation to build the powerplant at Trinity. I called on the Secretary of the Interior 2 years ago to include an item in his budget for planning the generating equipment. I repeated that urgent suggestion last fall, but the budget does not include the necessary funds. Indeed, the Under Secretary of the Interior has made speeches in California asserting the intention of his Department to continue a "rear guard action" for approval of the "partnership" scheme. I shall not attempt to characterize the speeches; but some in my State have likened this approach to blackmail. If the generators are not ordered soon, they cannot be ready when the Trinity Dam is finished. The benefits of power production will be lost until the generators start turning.

Ladies and gentlemen, the rural electric cooperatives, in California and all across the land, have brought modern living to the American farmer. They are part of American life, and Federal law makes them so. And, in precisely this same category, Federal law and policy, for over a half century, provide for multipurpose reclamation projects whose byproduct of electricity shall be sold, first, to nonprofit agencies—Federal, State, or local. Federal reclamation has helped materially to build the West. It has been assaulted and condemned by selfish people who want no yardstick, and who resent what they sneeringly call socialism.

If when a community of people elect to produce or distribute electric power, that constitutes socialism, then the great city of Los Angeles practices socialism—because, like your REA's, it produces and sells electricity to its people. If that is true, then my own home city of Anaheim must plead guilty, too.

A generation or so ago, these selfish people objected to the Federal Government building any great dams. They lost. The dams, like Hoover Dam, which serves almost all of southern California water and power, were built by the Federal Government to satisfy the people's needs. Now those same selfish people urge what they euphemistically call "partnership." And I say to you, in dead earnest: They will lose again. With your help, we'll see that they do.

Mrs. Roosevelt Discusses Need for a Food Stamp Plan

EXTENSION OF REMARKS

OF

HON. LEONOR K. SULLIVAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 5, 1959

Mrs. SULLIVAN. Mr. Speaker, all of the Members of the House who served here last year will remember the debate

and vote on my bill to establish a food stamp plan for the distribution of up to $1 billion worth of surplus food a year to needy Americans. That bill, numbered H.R. 13067, was before us on August 18, 1958, and the debate was printed partly in the RECORD of August 18 and the remainder in the RECORD of the following day. I urge new Members to look up the debate and vote in the RECORD for those days; I am sure they will find it informative and interesting.

The vote on H.R. 13067 was 196 yeas, 187 nays, 1 present, and 45 not voting. Although a majority of the Members approved the bill, it was called up under circumstances requiring a two-thirds vote, and so it did not pass.

It is worth noting, I believe, that many of the opponents of the bill last year are no longer Members of the House.

WILL SEEK EARLY CONSIDERATION

Mr. Speaker, I am planning to ask the chairman of the Committee on Agriculture to plan for early hearings on the same bill which a majority of the House voted for last year. This year, the bill is numbered H.R. 1359. It is identical with the bill we had before us last August. It is practically the same as the bill which I first introduced on this subject 5 years ago, and which has been the subject of widespread interest throughout the country ever since.

The point is that we have food in such abundance it is considered a national problem, whereas it could be a great blessing if it were properly used to help feed not only hungry people abroad but millions of our own Americans not now receiving an adequate diet.

HELPING TO BETTER THE LIVES OF PEOPLE AT HOME

Earlier this week, in her column in the St. Louis Post-Dispatch, Mrs. Franklin D. Roosevelt discussed the need for a food stamp plan in a manner which, I believe, makes convincing reading. I might say that when her article refers to the cost of storing our surplus food as being $1 million a year, it is either a typographical error or the result of misinformation, for this figure understates the actual cost rather widely. Actually, the cost of storing our farm surpluses is now 1,000 times $1 million a year—it is now $1 billion a year. It used to run $1 million a day, but the President has informed us that in the coming fiscal year it will be about three times that amount, or $1 billion a year.

Otherwise, I commend Mrs. Roosevelt's article and I hope all Members will read it. It speaks of the need to use our surpluses to help better the lives of our own people. Following her article, I submit for the RECORD the full text of H.R. 1359, so that the details of the bill will be available to all those interested in this matter.

First, Mrs. Roosevelt's column from the St. Louis Post-Dispatch of March 2, follows:

DISTRIBUTING SURPLUS FOOD

(By Eleanor Roosevelt)

REXBURG, IDAHO, March 2.—I have several letters in my mail about the question of our national food surpluses. People read about the great surpluses piling up in storage in this country and about the efforts made to send this food to foreign markets.

The reaction seems to be twofold. There is a willingness to share with other people in the world, but also a realization that sometimes, due to private situations which have brought about financial difficulties, there are many people here at home suffering from undernourishment. I quote from a letter of a Michigan correspondent. He writes:

"What is this so-called surplus? I think it is food, butter, beans, rice, flour, fruit, etc., that people in the lower brackets of income cannot afford to purchase.

"Millions of people, the aged, unemployed, those unable to work because of disability, etc., are unable to buy this much-needed surplus.

"Why not release this so-called surplus to more of the American people? They would soon reduce this vast hoard of food that our Government has purchased at a cost of billions of our tax dollars and is now paying $1,000,000 a year for its storage.

"Retired and handicapped people 65 or over living on social security checks could be presented with a card that would entitle the bearer to purchase some of this food for about the retail price.

"This would quickly reduce the surplus and help the Government to obtain a part of the cost of its expenditure."

I feel quite sure this could be done now: something like the stamp plan used during the depression might be inaugurated. But this does not mean that we should not make a careful study of what we can do for the world as a whole both by selling and by giving where it is necessary.

It is always said that anything of this kind should not be entered into lightly because it might upset the economies of areas elsewhere in the world. This is true, of course, and we should cooperate with Food and Agricultural Organization of the United Nations and get some of our best financial brains to study the problem of distribution.

It may well be that we will need to enlist our farmers, who are both intelligent and literate, in a real campaign to change the surpluses that we now grow. We have a great range of climate. We can produce more meat, if needed, by feeding cattle some of our surplus grain. We can process certain things and send them to distant areas of the world.

All of this will require study, ingenuity and determination to be really useful to our fellow men who are hungry in other parts of the world. But it does not in any way prevent us from looking at our own home situation. Wherever surpluses can be used for helping to better the lives of people at home, it certainly should be done.

Mr. Speaker, the text of H.R. 1359 now follows:

[86th Cong., 1st sess., in the House of Representatives, January 7, 1959. Mrs. SULLIVAN introduced the following bill; which was referred to the Committee on Agriculture]

H.R. 1359

A bill to provide for the establishment of a food stamp plan for the distribution of $1,000,000,000 worth of surplus food commodities a year to needy persons and families in the United States

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to promote the general welfare, raise the levels of health and of nourishment for persons whose incomes prevent them from enjoying adequate diets, and dispose in a beneficial manner of food commodities acquired by the Commodity Credit Corporation or the Department of Agriculture in carrying out price support operations or diverted from the normal channels of trade and commerce under section 32 of the Act of August 24, 1935, as amended, the Secretary of Agriculture (hereinafter referred to as the "Secretary") is hereby authorized and directed to promulgate and put into operation as quickly as possible, but not later than January 1, 1960, a program to distribute to needy persons in the United States through a food stamp system such surplus food commodities.

SEC. 2. In carrying out such program, the Secretary shall—

(1) distribute surplus food made available by the Secretary for distribution under this program only when requested to do so by a State or political subdivision thereof;

(2) issue, or cause to be issued, pursuant to section 3, food stamps redeemable by eligible needy persons for such types and quantities of surplus food as the Secretary shall determine;

(3) distribute surplus food in commercially packaged form, preferably through normal channels of trade;

(4) establish standards under which, pursuant to section 3, the welfare authorities of any State or political subdivision thereof may participate in the food stamp plan for the distribution of surplus foods to the needy;

(5) consult the Secretary of Health, Education, and Welfare, and the Secretary of Labor, in establishing standards for eligibility for surplus foods and in the conduct of the program generally to assure achievement of the goals outlined in the first section of this Act; and

(6) make such other rules and regulations as he may deem necessary to carry out the purpose of this Act.

SEC. 3. The Secretary shall issue, to each welfare department or equivalent agency of a State or political subdivision requesting the distribution of surplus food under section 2(1), food stamps for each kind of surplus food to be distributed, in amounts based on the total amount of surplus food to be distributed and on the total number of needy persons in the various States and political subdivisions eligible to receive such food. The food stamps shall be issued by each such welfare department or equivalent agency to needy persons receiving welfare assistance, or in need of welfare assistance but ineligible because of State or local law, and shall be redeemable by such needy persons at local distribution points to be determined by the Secretary under section 2(3).

SEC. 4. Surplus food distributed under this Act shall be in addition to, and not in place of, any welfare assistance (financial or otherwise) granted needy persons by a State or any political subdivision thereof.

SEC. 5. In any one calendar year the Secretary is authorized to distribute surplus food under this Act to a value of up to $1,000,000,000, based on the cost to the Federal Government of acquiring, storing, and handling such food.

SEC. 6. For the purposes of this Act, a needy person is anyone receiving welfare assistance (financial or otherwise) from the welfare department or equivalent agency of any State of political subdivision thereof, or who is, in the opinion of such agency or agencies, in need of welfare assistance but is ineligible to receive it because of State or local law.

SEC. 7. The Secretary of Agriculture, in consultation with the Secretary of Health, Education, and Welfare and the Secretary of Labor, shall make a study of, and shall report to Congress within six months after the date of enactment of this Act, on the feasibility of, the costs of, and the problems involved in, extending the scope of the food stamp plan established by this Act to include persons receiving unemployment compensation, receiving old-age and survivors

insurance (social security) pensions, and other low-income groups not eligible to receive food stamps under this Act by reason of section 6 of this Act.

SEC. 8. There are hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to carry out the purposes of this Act.

Legal Control of Outer Space

EXTENSION OF REMARKS
OF
HON. JAMES G. FULTON
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 5, 1959

Mr. FULTON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement by Senator KENNETH B. KEATING:

STATEMENT OF SENATOR KENNETH B. KEATING (REPUBLICAN, OF NEW YORK), FORMERLY RANKING MINORITY MEMBER ON THE HOUSE JUDICIARY COMMITTEE, BEFORE THE HOUSE COMMITTEE ON SCIENCE AND ASTRONAUTICS ON MARCH 5, 1959

The United States has made great scientific strides in the year and a half since Sputnik I began its historical orbit around the Earth. Within a few months we had our first satellite, Explorer I, circling the globe with an apogee of some 1,600 miles. This has been followed by about half a dozen other successful orbiters and two space probers which penetrated into space to distances of 71,300 and 63,580 miles, respectively. And just 2 days ago our first Sun rocket was successfully launched.

I am confident that within the next decade we shall place a man on Earth's own satellite—the Moon. Nothing should be spared to assure our eventual leadership in this new field of astronautics. A second-best position behind Russia in this space race could spell disaster for the whole free world.

Americans are fully aware of the scientific challenge with which we are confronted, and I have no doubt of this Nation's willingness to make whatever sacrifice is necessary to meet that challenge. But it would be a fatal mistake to approach the space era solely in terms of satellites and solar probes. While we must not slacken our great technological effort, it is of importance also that we develop an appropriate basis for meeting other vitally significant aspects of the space era.

I believe that there has not been enough emphasis on the necessity for adapting some of our earthbound concepts to the requirements of this new age. For that reason I am very gratified at this committee's initiative in centering attention in these hearings on one of the most pressing of all the new nonscientific problems raised by the space age—the need for new rules of law for the settlement of space controversies.

It may be, as many people claim, that it will be the scientists who will chart the future course of the world. Their spectacular achievements certainly have merited them unparalleled eminence. But the scientists cannot be counted upon or expected to keep our moral progress abreast of our scientific advances. This responsibility ultimately lies with the people, and they will properly expect their lawmakers to take the lead in proposing the new concepts and principles which are necessary. These hearings can serve a historic purpose if they result in even the most tentative first steps in the direction of devising a new legal code for the space age.

There are some who underestimate the serious consequences of any lag between legal and scientific developments. They recall with nostalgia the centuries required for the flowering of the common law, and fondly anticipate similar development of the new space law. I grant that law is shaped and nourished by experience—but I also insist that it is fundamentally based on necessity. The necessity for new laws and concepts in this case is overwhelming. There will be no time for legal craftsmanship and judicial speculation after rival claims are made to the moon or to space itself. Civilization has now reached a point at which a gap between our moral and technological tools could be fatal. The rule of law in the age of space is not a matter of philosophy, but a matter of survival.

The legal problem is not a new one. Down through the ages man has striven to attune his legal codes to progress in other fields. Constant change to insure maximum justice has been the hallmark of progressive and successful legal thought. History reveals that the physical sciences did not reach fruition until the proper moral climate had been achieved in civilized sectors of the world. This was brought about by the rise of mature religions and the promulgation and acceptance of legal standards by which man's conduct could be guided.

We have made some progress in dealing with this new dimension of our national existence, but much remains to be done. One of the important steps in the right direction was the enactment of legislation for a new National Astronautics and Space Agency. This legislation authorizes the agency to develop a comprehensive program of research and development in aeronautics and space science "and related matters."

I emphasize the phrase "and related matters"—which was added to the original bill by this committee. In my judgment these words were added among other reasons, to make it clear that the agency should consider the legal as well as scientific aspects of our space program. I hope that this committee will confirm my interpretation and reexpress the intention of Congress that the exploration and regulation of our interplanetary exploits must develop hand-in-hand.

I have also been very gratified by the proposals made by the United States to the United Nations for international cooperation in the exploration of outer space. This was concrete evidence of this Nation's determination to foster world peace and security. It revealed in a most dramatic and impressive manner our intention to do all we can to use the new discoveries from space exploration for the benefit of all mankind.

I have long advocated such a course by the United States. More than a year ago, I urged the following three-point program for international action: First, an immediate declaration that outer space was not subject to appropriation by any nation; second, an international agreement barring the use of outer space for any military purpose; and third, the creation or utilization of an international agency for the joint exploration of outer space.

Such a program is urgently needed to promote a universal dedication to the development of outer space for peaceful, scientific and humanitarian objectives.

We should all be gratified at the initiative taken by the United States to block the use of outer space for military purposes and to shower its benefits on all mankind. Our proposals in this field should have a profoundly favorable effect on world opinion. They are a most fitting response to the challenge of outer space by a nation dedicated to man's constant spiritual and material advancement.

These are the broad outlines of the Government's response to the nonscientific problems of outer space. I advocate two additional steps to complete our reorganization for the space age. First of all, I propose that there be established a Federal Department of Science and Research or its equivalent. Such a department could coordinate the efforts of agencies such as the NASA, the Atomic Energy Commission, the National Science Foundation, and the Bureau of Standards. It would consolidate under one roof all fields of scientific endeavor in which our Government has an interest. This would facilitate the coordination of all these activities and guarantee cabinet-level consideration of the Government's overall undertakings in this field.

My second proposal is that there be established a Joint Congressional Committee on Outer Space modeled after the Joint Committee on Atomic Energy. At present each House has its own separate committee on outer space. In addition, other committees in both Houses, such as the Armed Services and Foreign Affairs Committees, are continuing to exercise their jurisdiction over some of the problems in this area. This has meant that a great deal of valuable time of our top scientists and military experts is being spent on Capitol Hill instead of in the laboratories and on the proving grounds. While the testimony of these experts is, of course, essential to the work of Congress, the creation of a single joint committee would avoid duplication and greatly expedite matters.

These are problems primarily of Government organization. There are many, many more legal problems of direct practical concern. One of these is the question of who owns space—or even more fundamentally the problem of what is space. In "Coke on Littleton" we find the maxim: "To whomsoever the soil belongs, he owns also to the sky and to the depths. The owner of a piece of land owns everything above and below it to an indefinite extent." This maxim barely survived the age of aeronautics. It holds little promise for the age of astronautics.

In 1902, shortly after the Wright brothers' first flight, a convention was proposed under which the air would be free to commerce and travel just as is the sea. This proposal was rejected. During the First World War, each nation began to assert exclusive control of the airspace over its territory. After the war, the law of absolute sovereignty over airspace was formalized in the Paris Convention of 1919. This provided that "every power has complete and exclusive sovereignty over the airspace above its territory." This principle has since been consistently adhered to in domestic legislation as well as in international treaties.

Significantly, the term "airspace" has never been defined in any of these treaties. Scientists have now established that there is no fixed separation between airspace and outer space. It is apparent that law and science will have to join forces in arriving at an acceptable definition of these terms.

Suppose one were to attempt to apply the principles of established international law by extending the boundaries of each nation into outer space. Because of the curved face of the earth, the extension would produce an inverted cone which would grow bigger and bigger in relation to the country as it reached farther into space. At some point these cones would overlap and more than one state would be occupying the same airspace. Moreover, the continuous movement of the earth on its axis means that the relationship of particular areas on the surface of the earth to space beyond the atmosphere would be constantly changing.

These solar facts illustrate the impossibility of applying existing concepts of international law to the control of outer space. In my opinion, space beyond the atmosphere must remain the common property of all the nations, or, what is the same thing, the property of no nation.

Another legal problem is determining the rights of nations to terrestrial bodies. Here again it is doubtful that the present earthbound rules of discovery and occupation are suitable. I believe that only an early and firm assertion of international jurisdiction over such areas will avoid the kind of territorial conflicts in outer space which have plagued the earth for its entire history.

Looking ahead, it is apparent that we will also need new laws for the protection of persons, industries, and territories, from misguided missiles and plunging Pioneers. Rules will have to be devised with respect to liability for injury or damage from activities in outer space. What would you say as to the launching Nation's liability for damages if a satellite were to come crashing down on this room at this very moment?

I believe that an immediate start should be made in drafting a code for outer space which would cover such contingencies and numerous others. It could provide for such things as the filing of flight plans to prevent interstellar collisions and confusion; it could regulate spacecraft broadcast so as to avoid interference with present frequency allocations; it could set forth return-to-earth covenants, navigational guides, and the like. If we act in this field now, we can avoid the pitfalls which confront attempts to deal after the fact with comparable problems arising out of travel on the high seas and in the air and in the exploration of Antarctica.

Many legal scholars are pondering these problems. The American Bar Association has already organized a standing committee on space law. The International Astronautical Federation has become active in the field. Articles on the subject have been appearing in the legal periodicals. A report of the International Law Association deals extensively with these problems.

I have been very pleased to learn that these questions are being given serious consideration even by Soviet legal experts. A recent issue of a Russian legal periodical carried an article urging that no government be permitted to incorporate any portion of interplanetary space under its jurisdiction. The article suggests that a government's sovereignty over the space above its territory should be limited to a height sufficient to safeguard each nation from encroachments on its territory or from threats to its independence. In a more practical vein, the author urges that all satellites and other bodies sent into space be required to have identifying marks so that responsibility can be assigned for any damage caused by their falling back to earth. The article also recognizes the need for international agreement on assignment of radio frequencies for signaling apparatus sent into space. This is particularly interesting, since a complaint has been filed with the Federal Communications Commission protesting the Russian sputnik's use of radio frequencies in violation of international agreements for radio frequency allocation.

The official Russian line expressed by its representatives at the U.N. does not justify too much optimism about the adoption of needed international agreements for the legal control of space. Still we must not give up hope. A genuine international effort to define the rights of all nations in space is one of the world's compelling needs. Anarchy in space could be more dangerous than anarchy on earth. The United States should move ahead in this field with or without Soviet cooperation. If we succeed in promulgating a code which is reasonable and fair, world opinion might force its enactment as the law of the universe. Success in this effort, in the long run, may constitute our Nation's greatest contribution to the cause of peace and progress in this new era.

Fight To Save Reno From Freeway Destruction

EXTENSION OF REMARKS
OF
HON. WALTER S. BARING
OF NEVADA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 5, 1959

Mr. BARING. Mr. Speaker, under leave to extend my remarks in the RECORD, I should like to direct attention to a prepared statement of mine before the Special Investigating Subcommittee of the House Committee on Government Operations investigating the Federal Interstate Highway selection through Reno-Sparks-Verdi, Nev.:

BARING FIGHTS TO SAVE RENO FROM FREEWAY DESTRUCTION

Mr. Chairman, colleagues and citizens of Reno, we meet here today in defense of the city of Reno. We here constitute a vanguard to stave off a concrete onslaught upon the Biggest Little City in the World.

We are gathered to prevent a project that would wipe out every vestige of industry that Reno has today, and it would forevermore block a further advancement of industry in this city.

I intend to prove that the Third Street route is in violation of the Federal-Aid Highway Act of 1956, which in part reads that "Any State highway department which submits plans for a Federal-aid highway project involving the bypassing of, or going through, any city, town, or village, either incorporated or unincorporated, shall certify to the Commissioner of Public Roads that it has had public hearings, or has afforded the opportunity for such hearings, and has considered the economic effects of such a location."

I do not believe that any consideration has been given whatsoever to the economic effects of the Third Street location.

The situation we face today had its beginning back in 1955. The issue then played a very important part in the city elections of that year. Mr. Len Harris, who was a candidate for the important post of mayor of the city of Reno, declared that he would never tolerate a dual-lane highway through Reno.

Those aspiring to be city councilmen, with the exception of Mr. Mastriani, who was later appointed, stood firmly on their denunciation of a transcontinental highway bisecting this city.

I propose to introduce in evidence during this hearing newspaper advertisements to support these statements. After the elections were over things were different. When the time came to decide upon the routing of the freeway through or around Reno, the State highway department employed a firm of engineers to survey the several possible routes. The project cost the taxpayers $86,000, and their report rocked the people of our city like a supersonic blast.

Court Street had been recommended as the path of the interstate defense freeway.

You all remember what happened following that report. Many of you here in this room were up in arms. Some of you, who now belong to the Realistic Freeway Association, realized that your properties were endangered and you fought bitterly to prevent such a catastrophe. The result was a compromise. Raymond Smith, who decided to migrate to our city, recommended Third Street as such a measure. I cannot believe that he had any notion of what this would entail from an engineering standpoint. One bridge alone, in the form of a Y must diagonally cross the Truckee River at the city police department building at a cost of some $2½ to $3 million.

Eighty-six thousand dollars flew out the window, because the firm engaged by the State highway department did not even survey Third Street as a possibility.

During the events which led to the selection of Third Street, letters of protest began to flood my office. People of Reno pleaded with me to stop William Howard Smith, field engineer of the Bureau of Public Roads, from throwing his weight around, as they expressed it. They accused Smith and Houston Mills, our State engineer, of acting like a couple of dictators.

It is not uncommon for people to petition their Representative in Congress when things are not going well, and it was only in the line of duty that I responded to the voice of three-quarters of the population of Reno in their cry for help. I, too, am a taxpayer and a citizen of this city. As such, I opposed any routing of the freeway through town, and will fight to the end to prevent such a calamity, because once the freeway is built it is too late. The damage is done. Reno is fenced in and cannot expand. Its industry is knocked out. Homes are destroyed. Businesses are destroyed. Men are thrown out of jobs and many heartbroken citizens of Reno, who have worked hard all their lives to build the city will never again invest their money and their efforts to rebuild what they have lost.

Yes, I will fight, and fight hard, not only as your Congressman, but as a member of your community and my community to preserve our city against the onslaught of a concrete monstrosity.

However, beyond representing the will of some 17,000 of the people of Reno, there was another responsibility that I had to face. The Congress of the United States is charged with the responsibility of policing the expenditure of Federal funds. As you all know, the interstate freeway project is to a very large extent to be financed by our Federal Government. In the State of Nevada, some 95 percent of the cost of this freeway will be assumed by the Bureau of Public Roads in Washington. This money is appropriated by Congress, and I am a Member of that body. If I have been accused of interfering in a local matter the accusation is unfounded, and without the support of fact.

Realizing its importance to the defense of this country, the Congress of the United States appropriated a vast sum of money, which has now been raised to $27 billion, to build an interstate freeway system across the United States.

According to reports of the national chamber of commerce, the program has already bogged down because of local selfish interests. Some cities have attempted to exploit moneys appropriated to defend our country by diverting such funds to city improvements. Some city fathers have put their hands in the grab bag for local construction, because their city treasuries were exhausted. This happened right here in Reno. Certain city officials boasted that the only way to build railroad overpasses was with Federal funds. This greed has already taken a tremendous toll, both in loss of time and in increased costs.

To the north of Reno there is a natural bowl. The entire distance from Verdi to Vista can today be traveled by jeep. The inside rim of this bowl is referred to as the north rim route. It is approximately 17 or 18 blocks north of the post office in downtown Reno. It forms a natural line for the construction of a transcontinental defense highway.

Not only this, but the people of Reno want the freeway to skirt the city. I know this, because since I took up the fight some 3,500 people have written me commending me for the stand I have taken. These letters came from all over Washoe County, as well as other counties throughout the State—not just the people along the Third Street line.

As a child I fished the Truckee River from Lake Tahoe to Vista, and I do know every bend along the way, as many of you do. Also, as a college student, I took a course in geology, and I have prospected the greater part of Peavine Mountain. Two of my four years in college were in the department of engineering, and I certainly understand the topography of Reno. If the freeway, starting from the State line, followed a northeasterly course to skirt Verdi to the north, the entire route could be constructed without superstructures, and with the use of a couple of steam shovels and bulldozers the entire 19 miles could be made ready for concrete in short order, and the construction could be completed by snowfall of this year to service the winter Olympics.

There is no sane reason for following scheme J. That scheme crosses a deep ravine, and would require the construction of a trestle 125 feet high—as high as the Mapes Hotel—at a probable cost of $3 million.

There is no justification at all for the construction of an elevated freeway through Reno, at a cost of approximately $40 million, or $8 million per mile.

The Third Street line includes 13 turns, several bridges, and it has been said by an expert that, as designed, it would give a hotrodder a loop the loop, shoot the shoot, cheap thrill, driving 40 miles per hour.

To offset the destruction of the city, the destruction of industry, the destruction of homes, the destruction of established businesses, and I could go on, the Bureau of Public Roads has, in approving Third Street, relied entirely on what they term a cost-benefit factor. The benefit assigned to this factor is derived from a traffic study made back in 1955, and is nebulous at best. The cost is conservatively four times greater than the north rim routing.

It is amazing that such a nebulous benefit factor conceived 5 years ago can have the force to offset the expenditure of $30 million of taxpayers' money.

But how was the decision reached to follow scheme J and the Third Street line through Reno?

As you all know, the selection of scheme J was accomplished long before the so-called public hearings were held in Reno. Many Third Street advocates attended the Verdi hearings.

The board of county commissioners had rejected scheme J. It was not feasible. It would follow the sheltered side of the mountain, where snow drifts up to 20 feet. The cost would be prohibitive.

However, on August 5, 1957, Ferin, Bureau engineer from San Francisco, wired William Howard Smith, Bureau of Public Roads engineer stationed at Carson City, that no Federal funds would be made available except for scheme J.

This information was immediately communicated to Commissioner Peterson, and a special meeting of the board of county commissioners was held, at which meeting Peterson explained to the other board members that he had been notified that the Bureau of Public Roads would only support scheme J.

They then passed a resolution reversing their previous decision, and subsequently scheme J was submitted through the State highway department to the Bureau of Public Roads in Washington, requesting Federal approval. Third Street advocates were successful. They had gotten a foot in the door and had practically railroaded a downtown routing of the freeway through Reno.

Then followed the so-called public hearings at Reno. To say that inadequate notice was posted in the local papers is the understatement of the year. As was the case at Verdi, no mention whatever was made of any specific route. The papers did carry a notice that consideration of several proposed routes would be the subject of a public hearing 4 or 5 days later.

The meeting was a farce. Third Street supporters immediately stole the show. They were given every opportunity to speak their piece, and the mayor was booed off the stage for belying his campaign promises. As the day faded, the people became tired and restless, many having already left. Members of the United Freeway Association were finally recognized late that evening, but were given admonition to make their stories brief. Actually, in the presence of Bureau of Public Roads officials, the Chair explained that no routing outside of the city of Reno was under consideration, as the Bureau would not provide Federal funds, except for a selection through the city.

Furthermore, the transcript of the hearings included the startling information, evidenced by a statement made by Mr. Holcomb, assistant engineer, who was in charge of the hearings, that he did not know where the north rim route was.

The Third Street selection was dressed up like a Christmas tree in all its tinsel and spangles. The people were told that it included railroad overpasses, and, as a matter of fact, this was the biggest selling point. For years, north and south bound traffic has been held up by passing trains, sometimes by long and slow moving freight trains. At last Reno would be rid of this bottleneck. This was the big selling point, yet after the Bureau of Public Roads in Washington denied the Third Street routing as submitted and explained to Mr. Houston Mills, our former State engineer, that the Federal Government could not build railroad overpasses, Mills took the trimming off the tree and returned the Third Street proposal to Washington without the railroad overpasses, and deliberately omitted a new public hearing. This was a flagrant violation of the Federal law which requires that a public hearing be held and a study be made of the economic impact for each new proposal submitted. I have already quoted the law.

Even though the overpasses were used to bait the public, he claimed that the omission of these overpasses did not materially alter the original Third Street plan and that it was not necessary, therefore, to hold new hearings. This was typical of his insolent attitude and indifference toward the people of Reno.

He did, however, turn to the city council, the board of county commissioners and the State highway board for their approval, so he must have recognized that a new proposal existed.

The same Mr. Mills, who has consistently refused to survey the north rim route at the request of the people of Reno, stated publicly that he did not believe the Bureau of Public Roads was right in refusing to build railroad overpasses, but, in any event, he would find funds from other sources, such as primary and secondary funds, to build them with.

I maintain that the State highway department did not follow Federal law in resubmitting Third Street without a new public hearing, and that there have been irregularities throughout all of the events leading to the approval of the Third Street line.

I want to call it to the attention of this committee that the people of Reno are fighting mad. Many of these people are fighting for their very homes. They are fighting to protect their city against the small handful of men who have always dictated what shall be and what shall not be done.

Yes, for the first time in their lives, the people have stood up against the city fathers. This issue is bigger and hotter than any issue that has ever faced the people of Reno.

It was made an election issue. Two county commissioners, a Governor, a State controller, an attorney general, and one city councilman who sought a position in the State legislature, were defeated at the polls—this because they supported the Third Street routing, while at the same time my vote increased in Washoe County by some 8,500 votes, each of them a vote for the north rim route.

Had the freeway question been submitted to the people as a referendum, the Third Street issue would have then been resolved in triumph for the United Freeway Association, and the citizens of Reno.

Immediately after the election, with a new highway board, consisting of Governor Sawyer, Attorney General Foley, and Controller Keith Lee, I asked the Bureau of Public Roads to stop all further work and to freeze Federal funds until the new highway board could either affirm or disaffirm the decision of the old board.

Congressman BLATNIK, chairman of the Government Operations Subcommittee on Legal and Monetary Affairs, formally requested Mr. Turner of the Bureau of Public Roads to issue a stop order. When he refused, Congressman DAWSON, chairman of the full Committee on Government Operations, made a similar request. I will not say here, but I have a strong suspicion that it was not until a person even more influential than either of these two gentlemen interceded that Mr. Turner finally agreed to withhold Federal funds until this issue could be decided.

I had already asked for a congressional investigation of the whole mess, based on an excessive and unwarranted expenditure of Federal funds, as well as irregularities in the selection of the Third Street route. Nevertheless, Mr. Houston Mills, our former State engineer, stated publicly that he didn't care whether BARING had asked for a congressional investigation or not, he was going to build the Third Street Freeway, and went right ahead.

As a matter of fact, word has come to me from several different sources that the firm employed by the highway department is still surveying, driving stakes, and otherwise spending Federal funds, so in addition to other charges I have made, I must now charge that department with contempt of Congress.

Before closing I should like to leave with you a few thoughts. Picture, if you will, the Third Street Freeway come to fruition. There are two ammunition depots in the proximity of Reno. Ammunition trucks heavily laden with supplies and ammunition would rumble through the heart of town. Large tankers, transport trucks, and other vehicles practically bumper to bumper would roar their presence.

Elevated sound becomes more intense as it blankets the city. Many of the larger vehicles parallel the noise of our transport planes, and we all know the disturbance of a single plane flying over town. This noise

would render motels, rooming houses, and homes absolutely valueless, because people cannot sleep in the vicinity of an elevated freeway.

Yet the owners of this property have no redress at all under our statutes. Only property actually taken must be paid for.

Picture again what might happen should a gasoline truck explode—one did on the Los Angeles Freeway only several months ago—we would have a burning inferno in downtown Reno.

More than ever before, we recognize the need of a defense highway. The Congress recognized this need when it appropriated $27 billion for its construction. Ammunition must be transported. In the event of an emergency possibly the entire population of towns must be evacuated. Foodstuffs must be brought in. We need a transcontinental freeway, but we certainly don't need all of this in the middle of our city, and parallel to a transcontinental railroad. One bomb could knock out both.

I have received several letters, with documented statements of the American Medical Association, stating that noxious gases emitted from this tremendous trucking industry would be conducive to the occurrence of cancer. There is a far better opportunity for these gases to dissipate out of the city in the open spaces.

In summary, only $13 billion were originally appropriated to support the Federal highway program. This sum has already been advanced to $27 billion.

It is in instances like those we face today, asinine plans that involve expensive trestles, river crossings, unnecessary elevated sections and the acquisition of expensive real estate to clear rights of way, that costs pyramid.

The freeway has not yet been built through Reno, but there is one thing that is certain—when it is built it will be built with your money.

Are we as taxpayers going to be coerced into spending millions of dollars unnecessarily to serve the selfish interests of a few individuals?

I have been in this fight for a long time, and I can assure you I have been thoroughly castigated by the Reno press. For 10 months there wasn't a newspaper that didn't carry a headline, "Baring Blasted." I became the most blasted man in the county. Even the Bureau of Public Roads engineers called me a rabble rouser, and quite a few able and responsible citizens of Reno have also enjoyed the same treatment from the press.

I have also been accused by my opponents of using the freeway issue for political gain. If fulfillment of my oath of office is politics, then politics is the science of government, rather than the means of gaining political favor.

Ladies and gentlemen, and my colleagues, if this committee permits the Bureau of Public Roads to construct a freeway through Reno at the cost of $8 million a mile, and if this committee permits the Bureau of Public Roads to continue to whitewash every action on their part, be it in wisdom or in ignorance, then there will be a thousand Renos across the entire country, exploiting Federal funds to fulfill local selfish interests. Then the Congress will have to appropriate many more billions of dollars, because the Federal road system will reach astronomical proportions, and the $27 billion now appropriated will not begin to scratch the surface. It is up to this committee and the citizens of Reno to prevent this. It is up to us to lend fulfillment to the purposes for which the Federal road program was conceived, and it is up to this committee to insure the construction of a defense highway around Reno, rather than permit the destruction of the homes of those very people who must pay for it.

Bill Introduced To Improve and Extend Rural Mail Delivery

EXTENSION OF REMARKS
OF
HON. H. CARL ANDERSEN
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 5, 1959

Mr. ANDERSEN of Minnesota. Mr. Speaker, I am today introducing a bill designed to correct an inequity in our rural mail delivery service that has existed for many, many years.

The present Postmaster General has effected more improvements in rural mail service during his term in office than any other Postmaster General in my recollection. In my district alone, literally hundreds and hundreds of farm families have in the last few years seen desirable changes made in their mail delivery. These changes have included more expeditious handling of the mail in transit, greater efficiency in physical facilities of the post offices receiving and delivering mail, rural route extensions, and driveway delivery.

Having received my own mail on a rural route the better part of my life, I know how much good mail service means to farm people, and we are deeply grateful to Postmaster General Arthur E. Summerfield for the tremendous improvements he and his staff have made. We are also obtaining approval of house delivery in more and more of our towns and villages and that is a service long overdue in rural areas.

It will be recalled that one of the first improvements instituted by the present Postmaster General in behalf of farm people was the change in number of patrons required for rural route extensions from the previous rule of four to a mile to a more realistic three to a mile. Then, just last year, he announced that extensions would be approved on the basis of two families to a mile including retrace.

Regrettably, there are still many farm families who have to walk or drive long distances for their mail simply because they do not in their immediate area meet the test of two families to a mile of rural route. In some instances they fail to qualify by only a small fraction of a mile and it is inequitably unfair for them to have to go six-tenths of a mile or more for mail while a neighbor just one-tenth of a mile off the old route has his mail delivered to his driveway under the newly authorized extensions.

My bill proposes to correct most of these inequities and, at the same time, adhere to the Postmaster General's policy of providing rural mail delivery on routes averaging two families to a mile for the entire distance traveled. To illustrate the inequity I seek to correct, under present regulations a new route may be established or an extension approved if the new route or the extension will serve an average of two patrons per mile. However, where a route already exists extensions may be approved in only those instances in which the extension, by itself, will serve an average of two patrons per mile. This policy prevails regardless of the number of patrons per mile of the old, established route and regardless of the further fact that if a new route was being established it might gain approval with the proposed extension included on the basis of two patrons per mile of total length.

If approved, this bill would treat all families living in rural areas alike and I am advised that it would lead to extension of routes to serve virtually every farm family in a district like mine. All of us believe in the American principle that everyone be afforded equal treatment under the law and I propose such equality in this measure.

It seems elemental to me that a rural mail delivery policy of two families to a mile should be applied to old, established routes as well as to new ones. If it is the policy to approve an extension of a route on the basis of serving two patrons per mile of new route, then it should likewise be the policy to approve extensions where the total route, as extended, would serve an average of two per mile for its entire length. In simple terms, my bill extends to all farm people an equal opportunity for rural mail delivery on the basis of the present policy of the Post Office Department in approving proposed rural route extensions and the approval of new routes.

I hope the Committee on Post Office and Civil Service agrees on the merits of this proposal as it would be a wonderful thing for farm people to know that the Congress recognizes their entitlement to equal treatment in the delivery of their mail. American farmers have certainly not received equality of consideration in an economic sense and it seems to me the least we can do is to treat them fairly in the delivery of their mail.

The provisions of the bill are as follows:

A bill to extend rural mail delivery service

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That rural mail delivery shall be extended so as to serve, as nearly as practicable, the entire rural population of the United States. For the purposes of this section, it shall be considered practicable to establish a new rural mail delivery route or extend an existing route if the new route or the existing route as extended will serve an average of two families for each mile of its total length, including retraces.

Who Really Desires a U.S.-Latin American Rift?

EXTENSION OF REMARKS
OF
HON. VICTOR L. ANFUSO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 5, 1959

Mr. ANFUSO. Mr. Speaker, on May 26, 1958, I introduced a resolution in the House of Representatives, House Concurrent Resolution 335, to establish a Pan American Parliamentary Associa-

tion to be made up of parliamentary representatives of all the 21 nations of the Western Hemisphere. In my statement on the floor of the House at the time the resolution was introduced, I defined the purposes of the association as follows:

The purpose of this organization should be to create better understanding among the peoples of the hemisphere, expansion of educational and scientific exchange programs, closer cultural relations, improvement in trade relations, encouragement of large-scale tourism between North and South America, help to provide relief in times of disaster, seek means to dispose of surplus commodities in the various countries to help their economies, etc.

In that statement, I also pointed to the Communist efforts to obtain a foothold in Latin America and to discredit the United States. I stressed the urgent need for the United States to help Latin America achieve a higher standard of living, and I concluded thus:

We have taken the Latin Americans for granted, while pouring our aid to other parts of the world. A positive people-to-people approach in our dealings with our neighbors has been lacking. We must restore such relationship.

Subsequently, I made a trip to several Latin American countries in connection with my resolution and was received by heads of governments, as well as legislative leaders, with whom I discussed my proposals. The press of the countries I visited reported on my trip and the comments made by various leaders who hailed the purposes of the resolution as a great step in the right direction. For example, the chairman of the Foreign Affairs Committee of Argentina's Chamber of Deputies, Juan Lopez, was extremely enthusiastic about my plan, while the President of the Brazilian Chamber of Deputies, Ranieri Mazzilli, made a public statement in which he said about the proposed Pan American Parliamentary Association:

It could mean a new stage in the relations among our countries, a new era of good friendship.

From time to time thereafter, because of my interest in Latin American affairs, newspaper representatives visited me or called me on the telephone for an expression of my views whenever Latin American problems arose. I saw such a reporter on March 2, 1959, after it had been reported in various newspapers and magazines that trouble was brewing between Haiti, the Dominican Republic, and the new Government of Cuba, and that threats of invasion had been made against one or another of these countries.

On this particular occasion I was asked by the reporter, who represented the United Press International—certainly a most reputable news agency—whether I favored armed intervention on the part of the United States in the event of such invasion. I stated most emphatically that peace in the Western Hemisphere "should not be left up to the United States alone." Then I added as follows:

The whole idea of the Monroe Doctrine has been superseded by the Organization of American States. However, the United States has a large stake in maintaining peace and security at its backdoor and this certainly concerns such countries as Haiti, Cuba, and the Dominican Republic.

For this reason, I think if there is a serious threat that any one of these nations will start an armed invasion, then the United States should take the lead in calling upon the other 20 members of the OAS to establish a police action to prevent such an invasion.

The above is taken verbatim from the UPI story as it appeared on the UPI news ticker of March 2, 1959, and which was published in various newspapers here and abroad. On March 3, Radiodifusora at Caracas, Venezuela, broadcast a vitriolic attack on me which was intended as a reply. Following is the full text as reported by the Foreign Broadcast Information Service, in its daily report No. 42:

REPRESENTATIVE ANFUSO HELD WIDENING UNITED STATES-LATIN AMERICAN RIFT

Caracas, Radiodifusora Venezuela, in Spanish to the Americas, March 3, 1959, 0400 GMT—W.

The U.S. Democratic Representative VICTOR ANFUSO said today that the United States should ask the Organization of the American States to intervene to prevent the liberation of the Dominican Republic, Haiti, and Nicaragua. Such is the sense of a statement of another disciple of Foster Dulles. The Representative says that the OAS must prevent any invasion in the Caribbean by police action.

The impudence of this enemy of Latin America reached such extremes of cynicism that he added: "The United States should (play a bigger role?) in the maintenance of peace and security." And further on he said: "If a threat of an armed invasion presents itself"—naturally, he is referring to the Caribbean problem—"then the United States must take the initiative to call on the other 20 members of the Organization of American States to take police action to prevent such an invasion."

Such are the demagogic statements of Mr. VICTOR ANFUSO. Mr. VICTOR ANFUSO, Representative, Democrat, to the U.S. Congress, trying to (bring back?) a new intervention of the sadly famous marines, going back 40 years in history and (one word indistinct) to discredit even more, if it were possible, the foreign policy of the State Department. No wonder that the rift between the United States and our peoples is growing daily.

Mr. Speaker, when this attack and distortion of my words and aims was called to my attention, I was shocked and infuriated. The report of the Venezuelan radio appeared to be a deliberate attempt to create dissension and to discredit me as a friend of Latin America. No fairminded person could have so mutilated my statement, which a careful comparison between my words and the Venezuelan radio will readily prove.

I say, in all sincerity, that I profoundly regret this. If friends of Venezuela and of Latin America generally, people who are earnest in their efforts to create better understanding and mutual cooperation throughout the hemisphere are going to be thus berated, then I fear not only for the future of Venezuela but for the future of all of Latin America and of the whole world to survive in freedom and democracy. We are waging a great struggle against an evil power which seeks our enslavement and the eradication of every vestige of human freedom and human dignity. This is no time for bickering. We must stand united throughout the whole Western Hemisphere, if we seriously want to prevent this hemisphere from falling under the yoke of communism.

To deliberately distort my words to show that I am preaching armed intervention, when in reality I suggested that the United States call upon the other 20 members of the OAS to prevent such an invasion; to call me an enemy of Latin America, when actually I am advocating hemispheric unity and cooperation to achieve a higher standard of living for the people of Latin America and I am urging greater economic aid to the Latin American countries, to twist my words in this manner and to make them appear demagogic could have been done only by someone who is not serving the interests of Venezuela or of Latin America, but those of communism.

Only a person who is steeped in Communist methods of falsification and forgery, in Communist propaganda tactics and the perversion of ideas, could do something as vicious as that. That person is not interested in creating better United States-Latin American relations—his interest lies in creating a greater and a wider rift on which Communist elements could capitalize for their benefit.

I expect to communicate with the President of Venezuela in the very near future and to request an explanation of this vitriolic attack on me, who is behind it, and why I was singled out for this attack.

A Report to the Nation

EXTENSION OF REMARKS

OF

HON. JOHN E. FOGARTY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 5, 1959

Mr. FOGARTY. Mr. Speaker, as many Members of this House are aware, on Thursday, February 19, here in Washington, D.C., the National Heart Institute and the American Heart Association joined in presenting a report to the Nation on 10 years of progress against heart disease. This report was made by six of the most eminent physicians and medical scientists in the United States. I might add that it was at the suggestion of my colleague in the Senate, the Honorable LISTER HILL, of Alabama, and myself, that the Heart Association and the Heart Institute combined forces, as it were, to give the results of this 10-year war on diseases of the heart and blood vessels. Because this report was of such great significance and because it has proved to be a truly historic event, under unanimous consent, I include the entire report in the RECORD.

The report follows:

A REPORT TO THE NATION PRESENTED BY AMERICAN HEART ASSOCIATION AND NATIONAL HEART INSTITUTE ON "A DECADE OF PROGRESS AGAINST CARDIOVASCULAR DISEASE"

(Participants: The Honorable Lister Hill, U.S. Senator, Alabama; the Honorable John E. Fogarty, U.S. Representative, Rhode Island; Leroy E. Burney, M.D., Surgeon General, U.S. Public Health Service; Francis L. Chamberlain, M.D., president, American Heart Association; and James Watt, M.D., director, National Heart Institute. Panelists: Howard B. Sprague, M.D., meeting chairman and panel moderator; Paul Dudley White, M.D.; Irvine H. Page, M.D.; Robert W. Wilkins, M.D.; Michael E. DeBakey, M.D.; and Robert W. Berliner, M.D.)

Dr. SPRAGUE. Senator HILL, Representative FOGARTY, distinguished guests, this is a unique meeting. So far as I know, it is the first report to the Nation to be given to the people on the advances made possible through their magnificent support of medical and scientific research.

This is a unique meeting also because it could not be held anywhere else in the world. In no other country do we find so highly developed the institution known as the independent voluntary health agency, through which physicians, scientists and laymen combine their efforts to advance the national interest in so vital a field as health.

In no other country does the phenomenon exist of such a voluntary association working side by side and in closest harmony with an official governmental agency dedicated to the same objective. Simply stated, this objective is the reduction of death and disability from heart and blood vessel disease.

Too, this meeting is unusual in that it comes at the invitation and suggestion of two eminent statesmen who have personally played leading roles in the creation and growth of the National Institutes of Health, of which the National Heart Institute is a part.

I do not know, Senator HILL and Representative FOGARTY, whether you and the other Congressmen here today are aware of it, but all of you have helped to make American physicians and scientists the envy of our colleagues throughout the world.

I do not say this on my own authority but on that of the distinguished British medical publication, the Lancet. In an editorial last September, the Lancet declared:

"Those who visit American medical schools are impressed by the amount of money at their disposal for medical research. * * * In the United States, all avenues into medical research are wide open. * * * Congress is putting into research 20 times the budget of our Medical Research Council. Last year the grant from Federal funds alone was $186 million. By full deployment of talent and by the effort of great numbers, an immensely rich soil is being developed from which new research ideas can be harvested. By contrast, medical research in this country (Britain) is undergoing relative attrition despite an expanding economy."

Through this report to the Nation, we seek to make two points clear. One is that the past 10 years have been a period of extraordinary advance, producing new knowledge through which thousands of lives have already been saved, prolonged or enriched, and giving this Nation a position of world leadership in the field of cardiovascular medicine.

The other is that these advances have brought us to the threshold of even greater developments, of decisive breakthroughs that will make possible the large-scale prevention of these diseases that now cut down so many people in the best years of their lives.

The bounty of our efforts extends not only to the people of this Nation but to those of other nations as well. The new knowledge we have brought to fruition—thanks to the accelerated and intensified research programs—should prove to be an export commodity of great usefulness in winning friends and influencing people in behalf of freedom and democracy.

Research results cannot be produced by fiat or timetable. By the same token, it is usually impossible to assign research gains to any one specific year. As someone has said, "Great discoveries are not made, they grow." Like the jigsaw puzzle to which it is sometimes compared, research usually develops new knowledge through the putting together of many small pieces by many people working in many places. Once the puzzle has been filled, it must then undergo the never-ending test of application and experience. Therefore, it is all the more remarkable that we can ascribe so many specific accomplishments in the cardiovascular field to the past decade. And it should be noted, in passing, that this 10-year period coincides with the lifespan of both the American Heart Association and the National Heart Institute.

We have many advances to report. Yet, had there been no specific gains applicable to patients, the very fact that we have mounted a tremendous research effort would in itself deserve recognition as a major achievement. As we all know, the first need of any research effort is to mobilize human resources.

Today, there exists in the United States a corps of research workers in the cardiovascular field of unprecedented number and scientific capacity. Its creation has been very largely stimulated and nourished by the joint endeavor of the two agencies reporting here today: the American Heart Association and the National Heart Institute.

Here, in a sense, is the greatest accomplishment of all, for in the hands and minds of these research workers are the keys to the future—a future already bright with promise of decisive victory over the cardiovascular diseases.

It is appropriate that we open our forum today with remarks from one of its spiritual architects—a statesman whose profound concern for the health and welfare of the American people has found expression, over the years, in his stanch support of progressive health legislation. We are proud and honored to have with us today the Honorable LISTER HILL, U.S. Senator from Alabama. Senator HILL.

Senator HILL. Dr. Sprague, distinguished guests, and my friends, Congressman FOGARTY and I requested the American Heart Association and the National Heart Institute to have this meeting this morning that we might have reports on the progress that has been made in the attacks against cardiovascular diseases, diseases of the heart and of the blood vessels.

Due to the leadership of the American Heart Association, the National Heart Institute, we have here this morning distinguished, outstanding doctors and scientists in the field of the heart and the cardiovascular diseases—I don't think it would be possible to bring together a more distinguished panel than we have here this morning—who will make their report on the progress that has been made during the past 10 years.

It is just ten years ago that the American Heart Association was reorganized to become a great national voluntary association of doctors and laymen. It is just 10 years ago that the Congress of the United States brought into being the National Heart Institute; and so on this tenth anniversary of the Heart Association, of the National Heart Institute, we will have these reports. I'm sure they will be not only tremendously gratifying but tremendously challenging. It is most important that the people back home, the people throughout the country, realize the part they have played in the work that has brought about this progress—that they have made many necessary and vital contributions in their support of the American Heart Association, in their support of congressional appropriations for the National Heart Institute.

The last 10 years has witnessed great progress in the battle against these diseases. With the support of the people, under the leadership of brilliant and distinguished men such as we have here today who give of themselves and of their services in this never-ending battle, the next 10 years should be the most momentous in all the history of medicine.

As we hear these reports today, I hope you'll not only be stimulated and challenged but we may go forth with resolution in our hearts that we'll give our most active support, our best support, to the men in the Heart Association, to the National Heart Institute, in the cause of better health and a longer life for all our people. [Applause.]

Dr. SPRAGUE. Thank you, Senator HILL.

Old presidents of the American Heart Association seem to have a remarkable talent for health and longevity. Not only do they refuse to die; they also refuse to fade away—as witness the presence of so many of us here on this platform today. This would seem to foreshadow many more years of activity for our next speaker, who is to present a brief accounting of the vital part played by the American Heart Association in the decade of progress being reported today.

It is my privilege to present Dr. Francis L. Chamberlain, of San Francisco, president of the American Heart Association. Dr. Chamberlain. [Applause.]

Dr. CHAMBERLAIN. Dr. Sprague, Senator Hill, Representative Fogarty, distinguished guests:

My colleagues who have been presidents of the American Heart Association will soon report to you in their capacities as world authorities on various aspects of cardiovascular medicine and research. To me is reserved the privilege of speaking as president of the American Heart Association.

In this capacity one ceases to act as an individual physician, scientist, or teacher. He becomes instead the spokesman for a vast partnership of American laymen and physicians who, realizing that 54 percent of Americans are suffering from some form of circulatory or heart disease, have voluntarily banded together to reduce death and disability from cardiovascular disease. It is this citizens' army that reinforces and sustains our research scientists, and that invests with greater meaning the efforts of the practicing physicians through whom the benefits of research flow to the people.

The initiative in creating this magnificent partnership came from a small group of physicians who, in 1948, transformed the American Heart Association from a professional society into a voluntary health agency, and thus set in motion a force of singular effectiveness.

One of the first endeavors of this newly formed agency was to spur the establishment of the National Heart Institute and to participate actively in the evolution of the policies and program.

Drawing its vigor from the grassroots of America, with dedicated leadership supplied by outstanding physicians and laymen, the American Heart Association immediately became the catalyst which gave strength, purpose, and direction to the struggle against cardiovascular disease.

As this new force gained momentum, programs were developed not only for the acquisition of new knowledge through research but also for its application through community service programs reaching into every State of the Union. Widespread professional educational activity has been paralleled by an intensive program of lay education through which a remarkable transformation

is being wrought in the popular attitude toward cardiovascular diseases. A new climate of hope and confidence is being created—in itself one of the most important achievements of the past decade.

Let me conclude by saying it is especially appropriate that today's meeting is being held during the month of the Heart Fund campaign, which is the time of year when 50 million Americans are expected to show their support of the American Heart Association through their voluntary contributions of time, effort, and funds. Since 1948, this support has increased more than eightfold. It is a convincing reaffirmation of public confidence in the Heart Association program and an eloquent expression of the people's determination to conquer cardiovascular disease. [Applause.]

Dr. SPRAGUE. Thank you, Dr. Chamberlain.

The close working relationship between the American Heart Association and the National Heart Institute is effectively illustrated by the activities of our next speaker. Having spent the major part of his professional life in the conduct and administration of medical research and public health, he has served as Director of the National Heart Institute since 1952. He is a member of the editorial board of Circulation, the American Heart Association's official journal, and he has served on numerous Heart Association committees during the past several years. It is my privilege to present Dr. James Watt. Dr. Watt. [Applause.]

Dr. WATT. Dr. Sprague, Senator Hill, Congressman Fogarty, guests, friends: We shall, in the next half hour or so, hear what Dr. Sprague has so aptly called a unique report. It is, indeed, so far as I know, the first time that such a message has been conveyed to the American people in this way. I am delighted that Senator HILL and Mr. FOGARTY asked the Heart Institute to join with the Heart Association in putting together this story of 10 years of progress against heart disease. As we shall soon hear, it is a dramatic story—a story of service and solid achievement.

I think, too, that all of us here owe a debt of gratitude to the two distinguished legislators sharing the platform this morning. It is, of course, to the Congress that the Heart Institute owes its existence; for in 1948 it was the 80th Congress that created this research arm of the Public Health Service, with the pasasge of the National Heart Act.

Since that time we have come a long way. We now have a substantial research establishment at Bethesda where a unique combination of resources enables us to pursue both basic and clinical studies under one roof. Research workers in these laboratories have made many outstanding advances. When these achievements are added to those of our grantees throughout the country, a picture of progress emerges that has few parallels in the history of medical research. Though an uncharted wilderness still remains to be explored, we have blazed a long trail toward heart disease prevention and cure. In our 10-year journey, dramatic milestones in heart surgery and drug therapy have followed close upon one another. New diagnostic methods are facilitating tremendously the work of our cardiovascular surgeons. With the combined efforts of the American Heart Association and the National Heart Institute lending an ever-brightening prospect to the hopes of heart patients, who can say whether the next 10 years may not reveal a means of prevention or cure for arteriosclerosis or high blood pressure?

With so much of our national substance going into the awesome but indispensable weapons of defense, it is easy to lose sight of the need for stocking medicine's arsenal. I am reminded of a remark my predecessor, Dr. C. J. Van Slyke, the first director of the Heart Institute, made some years ago. Commenting on the need for increased support of medical research, he said, "* * * there is no phase of Government spending in which there is a greater return to all of our citizens. It is an investment in which the balance sheet of the future will show returns in human lives as well as dollars."

We are now privileged, I think, to witness this prophetic statement nearing fulfillment. [Applause.]

Dr. SPRAGUE. Thank you, Dr. Watt.

We come now to our report to the Nation on "A Decade of Progress Against Cardiovascular Disease." Each of our six panelists has been assigned a specific area for discussion and has been requested to restrict his presentation to 5 minutes. One of our panelists will discuss prevention, one diagnosis; three will discuss advances in treatment, with one each being assigned to the specific areas of arteriosclerosis, hypertension, and cardiovascular surgery. Our final panelist will discuss basic research in its many applications.

The 5-minute restriction imposes a severe handicap. We know you can summarize the story of creation in less than 10 words: "In the beginning, God created heaven and earth."

I mention this because it would be difficult for any of our doctors to report on progress in their respective areas within the time allotted. Indeed, it might even be said that the telescoping of so much progress in 5 minutes is in itself a major achievement.

Before we begin our progress reports, I want to direct your special attention to the cards which have been distributed with your programs. If you will write your inquiries on each of the cards, they will be collected later and the doctors will attempt to answer them in this question-and-answer period.

I wish to draw to your attention that this question-and-answer period has been moved to the very end of the program.

My assignment today involves three special roads: those of chairman, moderator, and panelist. Having undertaken assignments one and two, I now turn to the third: a discussion of what has happened in the past 10 years in the field of diagnosis.

Fortunately for all of us, diseases of the heart can usually be discovered by a physician using his ears, eyes, and sense of touch, with the help of simple instruments, such as the stethoscope; but the impressive advances in treatment of heart ailments in the past 10 years, particularly in surgery, have made the simple description of the kind of heart disease not adequate in those cases in which special treatment is now available.

The detailed diagnosis of the damage to a heart valve by rheumatic fever, the exact nature of complex congenital defects in the heart, the remediable kinds of high blood pressure, and the extent of coronary artery blocking remain the major challenges for diagnostic study.

The past decade has supplied tools for such study. The vast and growing fields of radioactivity and electronics are rapidly adding instruments of amazing utility in the area of heart diagnosis, and the contributions of the American Heart Association, and of the National Heart Institute, have made these tools and techniques more widely and quickly available than in any other way.

While X-ray science is 63 years old and was early used to delineate the heart, it has developed recently the ability to photograph in rapid sequence a series of views of the heart as an opaque liquid passes through it, showing its course and the time elapsing for the substance to flow into the arteries of the lungs and the rest of the body. A very new device, the image intensifier, which gives a brilliant view of the heart on the fluorescent screen, with considerably less exposure of the patient to the X-rays, permits not only motion pictures to be made, but the transmission of the living image to a television screen in another room, where a large group of physicians can study it.

The cardiac catheter, first threaded into a vein and thence into his own heart by an intrepid German, Forssmann, in 1924, has turned to tremendous advantage in heart studies by Cournand and others in this country. Now it is possible to pass it directly through the chest into the left side of the heart and to measure the pressures behind and ahead of the two valves most commonly affected by rheumatic fever. The catheter is actually exploring the coronary arteries and, cooperating always with the X-ray, it is discovering the regions of blocking of those arteries by outlining them with a readily absorbed gas, carbon dioxide. By the catheter method, also, electrocardiograms and records of heart sounds can be led from inside the heart itself to instruments at a distance from the patient.

The electrocardiograph has developed from an instrument which, in a sense, looks at the heart electrically with one eye into a new electronic device, the vectorcardiograph, which traces on a fluorescent screen the actual course of the electrical energy of the heart. This can be photographed in stills or movies and transformed into a stereoscopic view with three dimensions.

Radioactive tracer material is widely used in cardiovascular research but in clinical diagnosis chiefly in discovering disturbance of thyroid function, which can upset the heart's action.

The striking expansion of chemical knowledge leads the physician daily to the chemical laboratory for information about the subtle diagnostic changes in the blood, urine, and tissues of his patients. The discovery of alterations in salts, fats, enzymes, and the multitude of chemical components of our bodies guides the treatment of all forms of heart disease. Sensitive chemical or biological detectors can show us the presence of a special tumor of the adrenal gland which, if removed, will cure a type of high blood pressure; or the amount of sodium coming from one kidney may reveal a disturbance which, if relieved, may cure another type.

The ultracentrifuge with a force 300,000 times that of gravity; the electron microscope with a magnifying power almost a hundred times as great as that of the ordinary microscope, are discovering diagnostic elements in human tissues.

The "electric eye" oximeter measures the oxygen in the blood, the gas phase chromatograph tells us the elements of complex fats in food and body substances.

Chemical analyses which have always been extremely time-consuming are now performed by electrical instruments of superhuman ability, and electronic computers give us data at unbelievable speed.

Cardiovascular diagnosis of the present day looks forward to a future when these new methods can signal dangers which, hopefully, new methods of treatment can combat in the wholesale prevention of heart disease. Based on the advances made during the past 10 years, and the assumption that cardiovascular research will be highly accelerated and intensified, I would prophesy that we can look forward to markedly reduced heart disease in young and middle-aged people.

It was not many years after the turn of the century that our next speaker informed his friends he planned to specialize in cardiovascular medicine. Since so very little was then known about the heart and its disorders, they greeted this annoucement with astonishment and disbelief. Yet time has

amply demonstrated the rightness of his decision. He has achieved a high measure of eminence among the world's cardiologists, many of whom affectionately regard him as a sort of living legend. A founder and former president of the American Heart Association, a former member of the National Advisory Heart Council of the National Institutes of Health, now president of the International Society of Cardiology Foundation, and emeritus professor of medicine of Harvard University, he is, of course, Dr. Paul Dudley White, who will summarize the past decade's progress in the area of prevention. Dr. White. [Applause.]

Dr. WHITE. Dr. Sprague, ladies and gentlemen, when I was a child, a medical student, a young doctor in the hospital, they said it couldn't be done. What couldn't be done? A lot of things that threatened the lives of all of us. I shall name a few. First there was still a high infant mortality. My earliest days as an intern were spent in a pediatric ward where babies died like flies, mostly of dysentery before the days of the routine pasteurization of milk. This was the will of God. The next year I had under my wing adult wards which were overcrowded every fall with patients severely and often fatally ill with typhoid fever and at other times of the year with pneumonia, empyema, meningitis, rheumatic fever, and malignant endocarditis. There was no room for cardiovascular patients even if we had been interested in them. Tuberculosis was still a great menace and syphilis and diphtheria quite common. Deformities of the heart and great arteries were strictly untouchable. And sudden deaths were acts of God. Often the good died young, no matter what their social or economic status. Only a small minority of Americans survived 70 and you were growing old at 50. There was only one threat to life in those days, that is, before 1920, that was infinitesimal compared to its huge size today and that was the toll from the automobile on the Nation's highways. Incidently I have personally come to believe that even more as a hazard to life and limb from acute injury, the automobile has become a symbol of the soft life unnecessarily engendered among our fellow citizens by our slavery to automotive devices and to the rusting effect of our enriched diets; even our everyday breads are no longer what they used to be. I shall not, however, belabor these points further except to appeal for the maximal amount of intensive and extensive research to answer for once and for all the questions on every tongue and in every news sheet and TV program today.

And what remains? Still enough rheumatic heart disease, acute and chronic, to keep us busy in its treatment and control for another generation, following the excellent program set up by the American Heart Association during the last 10 years. But the toughest problems are still unsolved. The three which demand the highest priority in cardiovascular research are in the order of their prevalence: (1) A serious degree of atherosclerosis of the arteries supplying blood to heart muscle, brain, viscera, including the kidneys, and the legs; (2) high blood pressure of the so-called essential (especially the malignant) type with serious effect on the heart and arteries; and (3) congenital defects of the heart and blood vessels of almost infinite variety. There is no reason to doubt, based on our experience of the past, that we can protect our young and middle-aged males by diet, exercise, medicines, and other measures from the ever-increasing threat of coronary heart disease, provided we support to the full medical and other scientific investigators working hard on this disease entity. I am sure it can be done, but we must maintain a well-organized and vigorous offensive to guarantee victory in our time. Although high blood pressure is a less dramatic problem, it too needs much patient study to render it not only controllable as it is already in some cases, but, much more importantly, preventable. A harder nut to crack because of its complexity and infinite diversity is that of congenital heart and blood-vessel disease secondary to injury during fetal life or to defects in the germ plasm or to both. But even here too, if we go at it in the proper way, we should be able to accomplish much within a generation.

It has been a source of the greatest satisfaction to me to have had the privilege and opportunity to have served both the American Heart Association in its early development and in recent days in its annual heart drives, and simultaneously, to have served as a member of the first National Advisory Heart Council under the U.S. Public Health Service after the passage of the National Heart Act which in June 1948 established the National Heart Institute. I would like to express to my colleagues and friends (both of the staff and among the consultants), who have given me such a wonderful 10 years, my deepest appreciation and affectionate regards. Also a word of gratitude to you gentlemen of the Congress serving on the committees of the House and Senate; I thank you from the bottom of my heart. I am sure that what has been started in the last decade in this country can now develop throughout the world as I have already seen some of its beginnings in other countries like Finland, Canada, and Australia. Thank you. [Applause.]

Dr. SPRAGUE. Thank you, Dr. White.

We now leave the area of prevention and turn to the field of treatment, where cardiovascular medicine has scored some of its most dramatic advances over the past 10 years.

Our exploration will get under way with a summation devoted to treatment within the broad framework of atherosclerosis. For this presentation, we are indeed fortunate to have with us one of the Nation's foremost medical scientists, Dr. Irvine H. Page of Cleveland.

Dr. Page, a past president of the American Heart Association, and formerly a member of the National Advisory Heart Council of the National Institutes of Health, has been director of research of the Cleveland Clinic Foundation since 1945. Dr. Page. [Applause.]

Dr. PAGE. Dr. Sprague, ladies and gentlemen, I doubt that 5 minutes is too long to talk about a disease described 5,000 years ago that kills about 500,000 Americans a year.

The problem of the prevention and treatment of arteriosclerosis, whether in the brain or the coronary vessels of the heart, differs from the prevention and treatment of infectious diseases where a single microorganism can be the cause of the trouble. It was during the past decade that medical science crystallized a profoundly important conclusion; namely, that arteriosclerosis is not just a degenerative disease and an inevitable concomitant of the aging process. On the contrary, we now know that arteriosclerosis affects all age groups and may well be reversible. Furthermore, it has many facets, the importance of each varying greatly in different people. Thus it has:

One, a strong hereditary factor. Formerly, this meant that nothing could be done about it but to make more careful selection of your parents, but the more modern "blue gene" age now has it within its power to change the hereditary mechanism. All that remains is to decide what it wants.

Now, the second factor is a hypertensive one. Elevation in blood pressure, even a small one, increases the amount of arteriosclerosis. Fortunately, treatment for hypertension has advanced rapidly in the past 10 years; hence, this factor is, in large measure, controllable.

Third, an exercise factor. Exercise seems to have several mechanisms by which it reduces the tendency to develop arteriosclerosis. We are a generation who seems about to give up the use of legs. As far as I can see, women are the only ones smart enough to find a use for them. [Laughter.]

Fourth is the stress factor. This seems to me to be overstressed. It may be that extreme stress might be more concerned with the development of a clot in the vessels of the heart or brain, rather than of arteriosclerosis itself. Children and Russians being what they are, it is hard to see how stress can, in turn, be much reduced. [Laughter.]

Smoking and alcohol are considered stress factors by some. This all depends on who is doing the smoking and/or drinking. I'd like to point out that 76 percent of the body is composed of water and some of my friends might like to keep it so. [Laughter.]

Now, fifth, there is a sex factor. This factor does not seem to have been invented primarily with the intent of preventing women from developing arteriosclerosis, but in practice it seems to be working out this way. Femaleness seems to be much more than sex, as many of the richer males are finding out. [Laughter.]

Femaleness seems to assure that women will inherit this earth, at least. [Laughter.]

Sixth, a diet factor. Obesity has long been believed a factor hastening development of atherosclerosis and overeating of certain kinds of fat in the diet as well. What constitutes the proper amount and kind of fat has been the subject of much talk and less investigation. There is growing evidence that saturated or animal fats in too great quantities are detrimental and that unsaturated or liquid fats are less so. The Bantu of South Africa has been the center of this controversy, although it is doubtful if he realizes it. [Laughter.]

It is possible that the low fat content of his diet protects him against coronary arteriosclerosis; unfortunately, there is much to suggest that being an American is more fun than being a Bantu. [Laughter.]

Diet is a facet of arteriosclerosis most likely to be investigated on large numbers of people to determine whether changes will reduce the incidence of heart attacks and strokes. This is now a practical possibility, in my opinion.

Thus I can summarize by making several relatively commonsense suggestions for the prevention and treatment of arteriosclerosis.

1. Reduce weight if obese. Eat less in the hope you will live longer to eat more.

2. If heredity is poor and blood cholesterol level is high, see your doctor and try to reduce the level by changes in dietary habits.

3. Reduce blood pressure if it is elevated.

4. Reduce the proportion of solid animal fats to the liquid vegetable fats and reduce the quantity of both. A balanced diet is important and extremes of all sorts should be avoided.

5. Increase the amount of regular exercise.

6. Avoid excesses of all kinds, but don't miss anything. [Laughter.]

7. Accept life's challenges. Come to terms with the inevitable and live as though you would live forever, and in spirit you will.

Thank you. [Laughter and applause.]

Dr. SPRAGUE. Thank you, Dr. Page. I can assure the audience from my long knowledge of Dr. Page's habits that he lives by his own precepts. [Laughter.]

For a summary of advances in treatment, with special reference to hypertension, I now turn to a colleague who has a distinguished record as a clinician, teacher and medical scientist. A former president of the American Heart Association and a pioneer in the use and development of drugs to control hypertension, he is Dr. Robert W. Wilkins, professor of medicine at the Boston University School of Medicine. Dr. Wilkins. [Applause.]

Dr. WILKINS. Dr. Sprague, friends, since 1950, a number of new drugs have come into use for the treatment of high blood pressure and, considered together, they represent one of the great advances of medical science during the period of our report. These drugs have changed not only our treatment of hypertension, but also our concepts of the nature of this disease. Except in a few rarer forms, the cause of high blood pressure is unknown. None of the new drugs used in treatment, therefore, was designed to get at the cause. Rather, they were designed primarily to relieve the result; namely, the elevation of blood pressure, whatever its cause might be. However, the action of these drugs in lowering blood pressure has provided new information on the nature of hypertension and has brought us closer to a true concept of the cause or causes of this condition.

There are five main categories of drugs now in use for high blood pressure. These are (1) rauwolfia, or Indian snake root, and its derivatives; for example, reserpine; (2) hydralazine or apresoline; (3) veratrum viride and its derivatives; (4) the nerve-blocking agents, such as hexamethonium; (5) (and probably most important) chlorothiazide and similar diuretics that stimulate the kidney to excrete salt.

Each of these agents acts to lower blood pressure, but each acts in a different way. Rauwolfa has a tranquilizing action on the brain and lessens nervous tension. Hydralazine dilates the blood vessels directly, especially those in the kidneys. Veratrum also dilates blood vessels but reflexly through the autonomic nervous system. The nerve-blocking drugs, on the other hand, prevent reflex constriction of blood vessels by blocking excessive nervous reactions. Chlorothiazide and the other diuretic drugs seem to change the body's content or its distribution of sodium chloride and other salts, lessening the blood vessels' constrictive reactivity and the resultant elevation of blood pressure.

Thus, the doctor today has in his bag new chemical tools for lowering blood pressure, and he has a variety of them. One of the most interesting findings has been that these chemical tools are more effective when used together than when given singly, even in increasingly large doses. This is an old trick in treatment, familiar to everyone in the use of different drugs together for pain; for example, aspirin, phenacetin, caffeine, and codeine for severe headaches. The trick is that when the drugs, each in a small dose, are used together against a single undesirable effect, they "gang up," as it were, on that effect, whereas their own bad side effects are so dispersed that they produce no unpleasant symptoms. Thus, the doctor has learned that when rauwolfia, the mildest agent, is not effective alone in a hypersensitive patient, he must add apresoline or chlorothiazide, or both. He may then achieve a very satisfactory result which he could not obtain with any one of the drugs used alone.

The results of treatment of high blood pressure with drugs are most dramatic when the disease itself is so severe or malignant that without such treatment it would be quickly fatal. In less severe cases of hypertension, drug treatment may be as dramatic in lowering the blood pressure; but since many of these patients have not as yet been incapacitated by the disease, their symptomatic improvement is not as striking as in the malignant cases. Nevertheless, all observers are in agreement that treatment of all such cases is most worth while. The area of disagreement is now restricted to the question of whether the very mildest or earliest of cases should be treated with drugs in a preventive way, before strains develop in the heart and blood vessels and especially in the kidneys.

It would appear that in patients with a strong family history of serious high blood pressure this may also be worth while, since it is now clear that high blood pressure is definitely a familial disease that tends to progress with age. Finally, the newer diuretic drugs, by shedding light on the handling of salt by the body, have tended to reemphasize the important role of the kidney in hypertension, and of salt excretion, which normally is under the control of the adrenal glands. Thus, one can say that drug treatment is not only helping people who already have high blood pressure, but is also teaching us more about the nature of the disease, and how to prevent it, or at least how to prevent its more serious effects.

Thank you. [Applause.]

Dr. SPRAGUE. Thank you, Dr. Wilkins.

Our summation of advances in treatment—this time with special consideration of heart and blood vessel surgery—continues with a report by an outstandingly eminent authority in this area. Winner of the 1954 Matas award for work in vascular surgery, cochairman of the committee on medicine and surgery of the National Research Council, member of the National Advisory Heart Council of the National Institutes of Health, and chairman of the Department of Surgery at Baylor University's College of Medicine, he is Dr. Michael E. DeBakey of Houston. Dr. DeBakey. [Applause.]

Dr. DEBAKEY. Dr. Sprague, ladies, and gentlemen, few areas in medicine have exhibited the phenomenal progress that has taken place in the field of cardiovascular surgery during the past decade. Indeed, the advancement made during this period far surpass all previous efforts in this field of surgery. Among the most striking features of these advancements, and undoubtedly important factors underlying their attainment, have been the increasing intensity of research endeavors and the bold ingenuity and aggressive approach characterizing the surgical attack on these grave diseases. As a consequence, many conditions which only a few years ago were considered hopeless are now amenable to effective therapy. No less important has been the fact that these surgical investigations have contributed significantly to greater knowledge and better understanding of the underlying fundamental factors involved in the pathologic, physiologic, and biochemical disturbances of cardiovascular diseases.

This is well illustrated by the progress which has been made in recent years in the surgical treatment of acquired diseases of the aorta—the main artery of the heart—and major peripheral arteries, particularly aneurysms and occlusive lesions. An aneurysm is a ballooning out and thinning of the wall of an artery.

Aneurysms of the aorta, for example, have challenged physicians for centuries; and although various methods of treatment were devised and attempted, none were effective. Within the past decade, however, curative therapy has been accomplished by the development of the surgical principle of extirpation of the lesion with restoration of normal function. The successful application of this method of treatment and development of these principles is dependent upon a number of factors, among the most important of which are the principles of blood vessel suture and arterial graft replacement.

The development and refinement of these principles were brought to full clinical fruition in the research laboratory. More recently, and as a result of these investigations, the problem of replacement of diseased arteries has been effectively solved through the development of substitute arteries made of such plastic materials as nylon, Dacron, and teflon; and these are now as readily available in the operating room as suture material.

Surgery to replace diseased arteries has become a complete reality. Deadly lesions which were formerly considered hopeless are now amenable to curative treatment.

Equally striking has been the progress made in the treatment of arteriosclerotic occlusive disease, the gravity of which has long been recognized. In arteriosclerotic occlusive disease, the thickening of the wall of the artery gradually narrows and ultimately blocks the opening in the artery.

Owing to its predilection to involving and blocking of such vital arteries as the aorta and those which supply blood to the brain and heart, it is by far the most common cause of death and disability among vascular lesions. As a consequence of intensive research and clinical investigations during the past decade, an important concept of the disease has been evolved which has led to the application of highly effective methods of surgical treatment. This concept is based upon the demonstration that in many forms of this disease the atherosclerotic occlusive lesion is well localized and segmental in nature with relatively normal arteries proximal and distal to the diseased segment of the vessel. From this fundamental knowledge, methods of surgical treatment were developed to restore normal circulation by removal of the occlusive lesion or by its replacement with a substitute artery. Within the past few years, sufficient experience has accumulated with these methods of treatment to establish their efficacy; and it can be stated that a high proportion of patients who formerly would have died or been seriously disabled from gangrene of the lower extremities, strokes, and high blood pressure due to arteriosclerosis, may now be completely relieved.

Equally significant are the brilliant advances made in surgery of the heart. Although pioneering efforts in cardiac surgery were made at the turn of the century, most of the important developments have occurred during the past decade. During this short period, intracardiac surgery was introduced. Although at first the scope of operative procedures on the valves and septum was limited by the fact that maintenance of cardiac function was vital during intracardiac manipulations, the efforts and contributions of the era of closed heart surgery were truly impressive.

Recently a major obstacle in heart surgery was overcome with the introduction of methods for open heart surgery. This problem was solved by the development of mechanical devices to substitute temporarily for the function of the heart and lungs, such as the pump oxygenator—or mechanical heart lung, as it is generally known—which is now in widespread use. Whereas less than 10 years ago only a selected few cases of congenital cardiac disease were amenable to surgical correction, today the majority of cardiac anomalies are completely correctible.

As outlined in this brief account, the tremendous strides that have been made during the past decade clearly reflect the vigor and intense activity characterizing the current status of cardiovascular surgery and portend other advances of even greater importance. With continuing generous support of these research endeavors, only the limits of imagination should restrict their progress.

One thing is certain: The future of cardiovascular surgery is brighter than ever. [Applause.]

Dr. SPRAGUE. Thank you, Dr. DeBakey.

Up to now, our discussions have largely concerned the clinical aspects of cardiovascular research. Our final panelist opens a new and vital area of exploration. He is to discuss the role of basic research in making possible the achievements already described and those we fervently hope will be forthcoming. One of the world's foremost authorities on renal function and electrolyte metabolism, he came to the National Heart Institute in 1950 and has been its associate director in charge of research since 1954. It is my privilege to present Dr.

Robert W. Berliner. Dr. Berliner. [Applause.]

Dr. BERLINER. The tremendous stimulation of research which has occurred through the efforts of the American Heart Association and the National Heart Institute has already been cited to you by our chairman as a major achievement of the past 10 years. Much of this research is basic research. Thus the greatest portion of the research supported by the American Heart Association's national program falls into the category of basic research or has basic implications. Similarly, the philosophy that guides the research appropriations of the National Heart Institute also recognizes the vital importance of fundamental studies.

It is characteristic of basic research that its advances have the immediate purpose only of increasing our fundamental knowledge of ourselves and the world in which we live. In what way some specific bit of information will eventually serve its useful purpose is very difficult to predict. The basic research worker, however, does not concern himself with the application of his contributions, since experience has shown that it is upon such fundamental knowledge that the advances in applied science are built. Rather than attempt to guess which of the many major and lesser basic scientific discoveries of the last 10 years will eventually find important application in the control of cardiovascular disease, I would like to start with the other end and fill in the background of one of the more important practical achievements of recent years. In doing so, I hope to illustrate the practical results of scientific research done originally only out of scientific curiosity.

Dr. Wilkins has already mentioned the important advance made in the development of chlorothiazide. This drug has not only markedly improved the management of hypertension but, because of its capacity to cause loss of salt in the urine, has greatly facilitated the treatment of heart failure. It has reduced the need for rigid and onerous low-salt diets and practically abolished the need for repeated hypodermic injections in the management of cardiac patients. I would like to recount the development of chlorothiazide.

The story begins nearly 40 years ago. At that time, biochemistry was in its infancy as a science. One of the substances which quite naturally came under study was carbon dioxide, the main waste product of the burning of foods in the body. We eliminate it when we exhale. It was found that the blood can carry carbon dioxide, a gas, to the lungs because the carbon dioxide can react with water to produce carbonic acid. In the lung blood vessels, this is converted back to gas and excreted as we breathe out. However, when the rate of this conversion was studied, it was found to be quite slow. The question arose as to how the conversion could possibly occur fast enough so that the blood could give up its carbon dioxide during the very few seconds it spends in the lung blood vessels. It was concluded that there must be a substance in the blood which speeds up the reaction. Studies to find the substance resulted in an enzyme known as carbonic anhydrase. Subsequent studies showed that the enzyme was present in a number of tissues, although the nature of its function in these tissues was not clear.

Perhaps 20 years later we pick up the next thread of the story of chlorothiazide—and in an entirely separate context. It begins with the discovery in the late thirties that sulfanilamide was effective in the treatment of bacterial infections. As an unfortunate side effect, it was noted that patients treated with sulfanilamide developed a disturbance known as acidosis; but sulfanilamide was soon supplanted by other closely related drugs which did not have this side effect.

Nevertheless, some basic research workers remained interested in this property of the now obsolete sulfanilamide. It was finally shown that sulfanilamide was an inhibitor of carbonic anhydrase, the enzyme discovered some years earlier. The production of acidosis was attributable to this blocking action of the sulfanilamide on the substance that speeded up the elimination of carbon dioxide.

In the next few years, studies of the mechanisms of urine formation showed that carbonic anhydrase also had an important function in the kidney. When it was inhibited, not only was acidosis produced, but sodium was lost in the urine.

Now, since producing sodium, or salt, loss in the urine is one effective way of treating heart failure, it was suggested that sulfanilamide might be useful for this purpose. It was tried and found to have some favorable effect, but again its toxic effects were too numerous. Nevertheless, this led to the synthesis and trial of a large number of other carbonic anhydrase inhibitors; and finally one called diamox was found, which, although only moderately effective, found a considerable place in the treatment of heart failure.

Now, the search began for a more effective carbonic anhydrase inhibitor. One was found that proved to be far more effective than any other. This was chlorothiazide.

My story could end here but it doesn't, for a new twist has been added with the discovery that although chlorothiazide was synthesized, tested, and started on clinical trial because of its capacity to inhibit the enzyme carbonic anhydrase, it actually turns out to owe its effectiveness to a new and as yet unexplained activity.

Now investigators are following this trail back into pharmacology, physiology, and biochemistry. By the time they explain how chlorothiazide really works, which enzyme it inhibits and what that enzyme does in the body, who knows where and in what form it will turn up again in clinical medicine?

Chlorothiazide's story is, of course, but one example of the practical results that eventually grow out of basic research, chosen because it relates to one of the major advances of the period reported on here today—the control of hypertension. But of equal importance is the fact that the past decade has witnessed a great accumulation of basic new knowledge about the most fundamental processes involved in life itself—knowledge we need to break down the barriers of ignorance that nature has placed in our path.

As someone has said, "Basic research is a way of making nature talk." Before too long, I am confident, her voice will be loud enough in the land to show us the road to victory over the most pressing problems of cardiovascular disease.

To quote the recent report of a committee of consultants by Dr. Bayne-Jones to the Secretary of Health, Education, and Welfare, "Pressures of the practical results cannot be allowed to supersede the kind of fundamental studies which, in the long run, result in revolutions rather than mere improvement in health standards." [Applause.]

Dr. SPRAGUE. Thank you, Dr. Berliner.

May I ask you now that any of you who have filled in cards, pass them to the right and left, not the center aisle, where they can be collected.

A report to the Nation, which necessarily focuses on past achievements would be incomplete without inclusion of a statement regarding the future needs and aspirations of cardiovascular medicine. For this summary, we are privileged to have with us today Dr. LeRoy E. Burney, Surgeon General of the Public Health Service, Department of Health, Education, and Welfare. Dr. Burney. [Applause.]

Dr. BURNEY. Dr. Sprague, Senator Hill, Congressman Fogarty, and distinguished Members of Congress and guests, I think one has an advantage in appearing at this part of the program because all of the worthwhile things have already been said and one doesn't expect too much. [Laughter.]

I'm sure all of you have been impressed with the complexity of the problem of the cardiovascular diseases; and if one only takes a look at the various gentlemen here on this platform and whom they represent, I think one would even be more impressed with all of the forces we have used in our country to combat this No. 1 cause of death.

You have heard representatives of the American Heart Association, representing the thousands of volunteer workers throughout the United States, who give not only of their dollars but of themselves, unselfishly, enthusiastically, to this program of education, of research and of service.

You have heard one of your fellow Congressmen here, Senator HILL, and you will hear from another one who represents the very interested and understanding and, I should say, very generous support that the Public Health Service through the National Heart Institute has received for funds for research training, for research projects, and for the construction of research facilities in which this research should be done; and I think I can say without contradiction that nowhere in the world have we had a legislative body that has been so interested and so generous in the support of research as we have in these United States; and through the very fine leadership of our leaders in Congress and through Senator HILL and Congressman FOGARTY who are here before you today, I think we can be very proud of this contribution.

Then we see all the doctors here on this platform representing medical schools, universities, and laboratories that are doing clinical and basic research and we see Dr. Watt, the administrator of the National Heart Institute—all of whom are important contributors to this very great problem—if this does nothing more than to impress upon you that there is a complex problem; that it is not the isolated issue of any one group, whether it is official or voluntary or research or public.

I think of the vast cooperative enterprise so characteristically American which has brought us so far within a period of 10 years and which undoubtedly will carry us to new heights a decade from now. We in the Public Health Service are proud of the part we have played in this aspiring story of achievement. The report we have heard this morning is one of great hope for the future. The advances we have heard about represent not just dollars, not just research, but they represent human lives that have been saved; and we cannot overestimate the progress so meaningful to humanity.

In looking ahead, however, we must soberly evaluate the vastness of cardiovascular diseases as a national health problem, even an international or world health problem. We are, in fact, just beginning to realize the magnitude and complexity of this problem. I submit that even this realization is a measure of our progress. It is a measure of progress because it points to an intensification of two trends, now already discernible, which will chart our direction against heart disease in the next 10 years. The first is a strengthening of basic research, whose great promise has been so ably presented this morning; and, of course, necessary for that is the continued emphasis on training of research manpower and the facilities in which research people can perform their research work. The second is the speedy application of research findings to the lives of human beings. It isn't enough just to have the knowledge,

unless that knowledge is speedily applied to the people who need it.

Now, as you can well understand, this calls for a comprehensive attack. It calls for a total involvement of all groups, all agencies, all the individuals who can contribute to our forward progress; and, as Disraeli once said, "The health of the people is really the foundation upon which all of their happiness and on which all of their power as a state depends."

Thank you. [Applause.]

Dr. SPRAGUE. Thank you, Dr. Burney.

When I opened this meeting, I referred to Senator HILL as one of its spiritual architects. Before turning to the question-and-answer period, it is fitting that we bring our formal part of the program to a close with remarks by the Representative in Congress who joined Senator HILL in requesting this meeting. He is well known to all of us for his stanch support of medical research and related programs. I refer, of course, to the distinguished Representative from Rhode Island, the Honorable JOHN E. FOGARTY. [Applause.]

Representative FOGARTY. Mr. Chairman, my distinguished colleague of the Senate, Senator HILL, distinguished guests, and ladies and gentlemen, the American Heart Association epitomizes the present urge of the American people to achieve better health through voluntary collaborative effort. It is one reason why medical research, in contrast with most other fields of research endeavor, finds as much support from private as it does from public sources. There is lasting strength in such diversity, and I am confident that a balanced pattern of support will be maintained in the years ahead.

The Public Health Service's National Heart Institute, Federal partner of the Heart Association, mounts its programs through tax funds—your tax dollars and mine. As a legislator with some responsibility for the activity of the Federal Government in medical research, I think I have some evidence that the people of our country unequivocally support the use of tax funds for medical research.

In a sense then, since Federal funds are and must be used in a way that is responsible to public forces, its funds too are volunteered by the people for the purpose of bringing heart disease under control.

As I have listened to these reports of progress that have been made against heart disease, I feel its impact primarily in human terms. Broad statistics are, of course, important in appraising all or a segment of the national health and medical research scene. We must never forget that 54 percent of all deaths in the United States are caused by some form of cardiovascular disease, that this means about 900,000 deaths from heart disease last year and that the total number of deaths from the more than 20 disorders of the heart and blood vessels about which so little is known can be expected to increase, I am told; but one must never forget that behind all these statistics are people, human beings—their families and their friends and their community of which they are a living part.

When premature and tragic death strikes, deaths which would be unnecessary if man knew as much as he should about his life processes, it is a hundred percent failure for medical science as far as the individual and his loved ones are concerned.

The decade of progress that has been summarized today has permitted the percentage, in the case of many people that you and I know, to be, on the other hand, a 100-percent success. For example, I know a child who suffered an acute attack of rheumatic fever which led to heart disease. Once she would undoubtedly have been stricken again and again with increasing damage to the heart and early death; but today, because of research and because of the discovery of antibiotics, with antibiotic prophylaxis and sound medical care she can avoid increments of damage to her heart and predictably can live a normal, healthy, and happy life.

I know a man in his early forties, a man with average income and a family of three young children, who was afflicted with severe hypertension. Again, with a combination of sound medical care and therapy, with blood pressure lowering agents that have been recently developed, he is living a normal productive life as a father and a breadwinner; and, as now defined, not only can he keep the hypertension under control but it will become less difficult to control as time goes on.

I know a child, a boy of 3, born with a congenital heart defect—a large hole in the wall of one of the chambers of the heart. Just a few years ago, that defect could not have been repaired and the child would have been doomed to a few years of half living and premature death before his teens. Today the defect has been located and measured. New surgical techniques have been developed, making it possible for the opening to be closed. The child and his parents are now awaiting the time when the doctors think it best for the operation to be performed; but, as Dr. White has said a while ago, there is of course no absolute guarantee of success, but I am told the chances are well worth taking and the parents will be eternally grateful to medical science because today they have hope instead of the hopelessness of a few years ago.

These are just three among many people I know and you know who measure the past decade of progress against heart disease in the most meaningful terms of all, but the long tortuous road to better understanding and to better ability to control the diseases of man stretches out ahead. We cannot know its lengths or its turns or the lanes that lead off into a network of pathways that may or may not lead back into the main route again; but we can do two things, I think. First, we can express and demonstrate our confidence in the scientists and doctors and research institutions—professional societies and the American Heart Association and other health agencies—that lead in the support of and search for new knowledge and the means for its application to better health; and, second, I think that we can assure the people that we will not impede progress against disease by failing to provide adequately through our contributions and our appropriations for the support of health and medical research activities today and for the increased resources required, if the health challenges of tomorrow are to be met.

I join with you wholeheartedly and pledge that I shall continue to do everything in my power to see that these needs are met.

In recent days I have had the opportunity to study the appropriation requests for medical research that we are studying this week. The appropriation hearings have just started in the House of Representatives before the committee, of which I am chairman; but I am very sorry to report to you this morning that apparently the Bureau of the Budget feels it must go backward instead of moving ahead, if one can judge by the appropriation requests for medical research that have been placed before our committee for the coming fiscal year.

As a Member of Congress, I share a responsibility to create and maintain an efficient and responsible Federal Government. As a Member of Congress, I also have a responsibility to see that basic human needs are going to be met. I deeply believe that in the interests of efficient and responsible Government, its health programs must advance—not stand still or fall back—notwithstanding any action of the Bureau of the Budget to the contrary. [Applause.]

From the record of Congress in the past, from the sentiment I sense in Congress today, and from my personal knowledge of the convictions of many of its Members—and may I say at this point that in the 13 years I have had the privilege of serving on this particular committee, we have had occasion to disagree on many items in our appropriation bill; but when it comes to appropriating funds for medical research, I can say, without fear of contradiction, that politics was swept aside, there is no middle aisle, that men and women on both sides have cooperated fully and selflessly. I think that is a wonderful record for the Congress of the United States; and I would like to include many who are here in our audience today—leaders of our Federal Government, leaders in our House and in the U.S. Senate.

I am happy to see my counterpart on this committee, Mr. LAIRD, from Wisconsin, and the chairman of the full committee, Mr. CANNON, from Missouri, both of whom have shown keen interest in research in the medical program; and I think I can assure medical people that because of their support of medicine in the past that their Congress will continue to act for their better health as long as we have the manpower and the facilities and the will to solve these problems.

To me the words "better health" mean more than the words "balanced budget"; and in this matter, I don't believe we could have a stronger ally than one of the most stimulating, energetic, able leaders in the field of medical research and one of our truly great Senators—my colleague on the other side of the Capitol, the Honorable LISTER HILL, from that great State of Alabama. [Applause.]

Dr. SPRAGUE. Thank you, Representative FOGARTY.

We now end the formal part of this report to the Nation and go on to the question-and-answer period.

I have a few questions here; and from looking at the early ones, I can see that the gentlemen who are going to answer them can either spend an hour with each question or they can say, "I don't know." [Laughter.]

I think we had better take a compromise position.

Dr. White:

"You are a noted advocate of snowshoveling. When you hand a man over 50 a shovel, how do you know what the condition of his arteries may be?"

Dr. WHITE. I don't hand a snowshovel over to such a person unless I know he is used to vigorous exercise and is in good condition; and I think one of the great faults of today is that at about the age of 25, especially with our men, we begin to lead soft lives, and for the next 20 years they accumulate trouble and at 45 it may prevent one shoveling adequately. I think we've got to have a campaign to keep active, especially our men; and then I think they can shovel snow right through till they are a hundred years old. [Applause.]

Dr. SPRAGUE. Thank you.

Dr. Wilkins:

"How close are we getting to discovery of the underlying causes of essential hypertension?"

Dr. WILKINS. I'll also have to say, "I don't know." As I tried to indicate in my report, I think we're getting closer and closer to it.

Dr. Page on my left is very fond of saying that the causes of hypertension are mosaic, they are not simple, and they are probably not single; and, incidentally, this is the phase of health and disease work that we're in now.

I think it's perhaps a little naive to expect that we're going to find—from here on, at least—many diseases for which there is a single cause; but the mechanisms and the causes combine to give different people—perhaps different mechanisms in different people—hypertension.

We're coming closer and closer to understanding, and I think perhaps the next 10 years will see that pretty well delineated—perhaps not completely.

Dr. SPRAGUE. Thank you.

Dr. DeBakey, we have one for you:

"From time to time we hear conjectures about the transplanting of human hearts. What are the chances of this happening in the foreseeable future?"

Dr. DEBAKEY. Well, this is dependent upon further basic knowledge about the transplantation of tissues from one person to another.

So far as the technical aspect of transplanting a human heart is concerned, this I think has been solved and can be done now, but there is a basic factor involved in the transplantation of tissues, and that is what we call the rejection phenomenon.

Now, there is much work being done in this field and, of course, this opens up a whole new vista of surgery if we solve this problem of the transplantation of tissue. Now, whether it will come in 5 years or 10 years is something I can't say yet.

Dr. SPRAGUE. Dr. Page—listen very carefully [laughter]: "Would you advocate a 'crash' program against heart and blood-vessel diseases—something comparable to what we did in producing the A-bomb and are now trying to do with ICBM's?"

Dr. PAGE. No. [Laughter.]

Dr. SPRAGUE. May I ask why you said "No"?

Dr. PAGE. Yes; because I think you can buy research up to a certain point and after that point you begin to just multiply a spinning of the wheels. I think what you don't get is creativity—that is, new ideas.

In other words, I would advocate a maximal efficiency in the spending of money but realizing full well that this goes only up to a certain point and then you don't go any faster than that because you don't have the creativity which is necessary to do this.

I think that there are many ways that we can improve the efficiency of research today.

Please don't misunderstand me on that score; nevertheless, I think there is an upper limit.

Dr. SPRAGUE. Dr. Berliner:

"How can we get more well-qualified medical scientists interested in doing basic research?"

Dr. BERLINER. Well, I would think that the most important factor in getting more qualified people into basic research and more people qualified to do basic research is to try to increase the understanding of what basic research really is and what its eventual products are so that the scientist gets a little more of the credit and a little more of the understanding from people for his achievements.

Dr. SPRAGUE. I think that this audience might be interested to realize at this time that the term "basic research" is often a matter of semantics. A discussion of this appears this week in Science wherein it is pointed out that universities, when they are asked, "How much do you think is given by the Federal Government to basic research?" come out with a figure which is twice as much as the amount which those who distribute the money think is given for basic research.

In other words, the motivation which occurs in the recipients, themselves—determines the basic nature of the use of this money; so we shouldn't be too confused by a statistical approach in relation to this term "basic research."

Now, I can't avoid answering a question addressed to me:

"Why do some people die suddenly of heart attacks after the doctor has given them a clean bill of health?" [Laughter.]

I have a standard reply to this. I say, "If I knew the answer to this, I would be working for the life insurance companies only." [Laughter.]

Actually, there are some types of heart disease that can be readily diagnosed; but in the case of coronary artery disease, which is the type which causes sudden death in most instances, diagnosis may be very difficult—particularly if the patient has no symptoms and there are no changes in the electrocardiogram.

An answer to this might be one suggested by my friend, Dr. William Castle, some years ago; and that is that each one of us should engage every day in what he calls "sublethal exercise"—that is, we should exercise to the point where we don't drop dead. [Laughter.]

And that would help to build up, as Dr. White pointed out, sound coronary blood vessels.

Now, Dr. DeBakey, I have a question for you which says:

"I saw a story recently which said, in effect, that an impending stroke might be detected by X-ray and that if this were so, perhaps the surgeon could actually go in, make certain repairs, and thus prevent a stroke. Is this possible?"

Dr. DEBAKEY. Yes; definitely. Now, some strokes are due to an atherosclerotic process partially blocking and then finally blocking part of the arteries which supply blood to the brain. Now, usually these can be diagnosed precisely by opaque substances injected into the arteries and they can now be operated on successfully to restore the normal opening in the artery and thus prevent the artery from becoming blocked.

Dr. SPRAGUE. Thank you.

Dr. White:

"During the past 10 years, what, in your opinion, has been the most beneficial discovery in the field of heart disease?"

Dr. WHITE. Well, research teaching and practice is the fundamental reason for the great advances that have been made; and then 10 years ago came this united effort—private and public enterprise hand in hand—the recognition of the need of that and of going along with these heart drives. We can't submerge them into community heart drives; the time is not ripe for that yet.

I think the realization that all research must be supported—I think that's possibly the most important advance. We know of many detailed advances which would be equally beneficial.

Dr. SPRAGUE. Also Dr. White:

"Are we keeping pace with the Soviet Union in heart disease research?"

Dr. WHITE. Well, I think so. I think we are ahead of them, actually. They are just planning to start a Russian heart association. It wasn't in operation last September, I know, but they said they were going to establish one and join the International Society of Cardiology.

Well, I think that's about the way we were a good many years ago.

Dr. SPRAGUE. Dr. Watt, there is a question that says:

"We haven't heard very much this morning about the so-called epidemiological approach to heart disease. Do you think that this approach has received sufficient emphasis in the past decade?"

Dr. WATT. I think it's one of the really neglected areas and yet one that has seen quite a lot of development in plans and in activity within the last—oh—2 to 3 years. I would add that this is going to be shortly accelerated with a National Conference on Epidemiology, planned by the Heart Association, and the Heart Institute to be held within the next 2 months. Work on planning that meeting is already actively under way.

Dr. SPRAGUE. This question is for Dr. Wilkins:

"You told us how high blood pressure is being controlled. Can it ever be cured?"

Dr. WILKINS. I think it's conceivable that we may be able to cure hypertension if we really find enough causes in individual cases that we can remove. Actually, we cure hypertension now—as I may have wished to indicate in my report—and they are the rarer forms. There are very severe cases of hypertension due, let's say, to a removable cause, a single removable cause, such as one bad kidney or a tumor of the adrenal gland. These can be removed, and the hypertension is cured.

I'm glad you asked that question because many times patients or the lay people misunderstand the word "treatment." They think of that as being synonymous with "cure" but it isn't. The treatment you must continue in order for it to be effective, at least at some level.

"Cure" means you give the treatment, the patient is cured, and you can stop the treatment and he stays well. We are not at that stage yet, but I believe that it may be possible that we will achieve it in time.

Dr. SPRAGUE. Dr. Page:

"We hear much about fats being a possible factor in developing heart disease. Does the present body of knowledge indicate that we should now recommend any significant changes in the dietary habits of Americans?"

Dr. PAGE. That's a loaded question. [Laughter.]

Dr. SPRAGUE. The intention is so. [Laughter.]

Dr. PAGE. Well, I think that you have to divide the problem really into two sections: one, the question of treating sick people—and if you say then that they should change—rather, people with heart disease or arteriosclerotic heart disease—if you want to lower the fat content of their diet I think it would be desirable, particularly if their blood cholesterols are elevated. There is another group of people who have a high hereditary factor in the thing with high blood cholesterols, and I think those people might well be prone.

Now, when you talk about the problem of changing the fat content of the diet of the entire American public, I think you're talking about something else again because you're dealing with problems of youngsters, problems of old age; and I think the whole problem simply deserves more careful consideration rather than any wholesale recommendation at the present time. I think it has to be individualized.

Dr. SPRAGUE. There is a question addressed to me:

"What, in your opinion, will be the next important advance in the diagnosis of heart disease?"

As I indicated earlier, I think the diagnosis of latent or incipient coronary disease is most difficult, and perhaps we may be able to find a coronary-prone individual for whom we should do more, perhaps, than for the general population.

Dr. Page has told you about the hereditary factors in coronary heart disease and it does seem that—at least in early life—under the age of 40, certainly, it is common in males and it is extremely uncommon in females. There is one coronary differentiation, and it does seem, perhaps, as if coronary disease is more common in muscular individuals who put on weight after the age of 25, but it's very difficult to be sure of a true coronary type.

Dr. Watt:

"In testing new cardiovascular drugs, what are the immediate needs—where are the critical gap areas?"

Dr. WATT. The immediate needs and the critical gap areas can be summed up in a few short words—the current shortage of trained clinical investigators to test and evaluate these new cardiovascular drugs. Just the other day I heard that something like 6,000 compounds were developed during the past year alone. To test these compounds adequately and to make them available readily, means that we literally have to have more trained people to be effective in carrying out studies to determine the safety and effectiveness of these drugs.

Dr. SPRAGUE. We have about 3 minutes. We started 5 minutes late and I'm going to end this at the proper time.

I'm going to ask Dr. White a question and Dr. Page a question.

Dr. White:

"You mentioned nothing about anticlotting drugs in preventing recurrences of heart attacks and strokes. Don't these drugs deserve listing as a major achievement?"

Dr. WHITE. Some of us used to be skeptical, and I think rightly so, until we had more proof; and now there seems to be more proof that anticoagulants, properly administered and carefully controlled, can help a good deal in persons who already have had evidence of thrombosis or embolism in the past or perhaps in those who in the past have had insidious symptoms of angina pectoris; so there is a place and this has been an important advance, without doubt.

Dr. SPRAGUE. I will address this final question to Dr. Page. There are several that come in this same category and they have to do with this rather popular notion at the present time that the emotional stress of our lives has something to do with the development of atherosclerosis of the coronary arteries.

Well, how do you feel about this, Dr. Page?

Dr. PAGE. Well, I feel I have answered the question many times before. I think that this problem is one that suffers from lack of objective definitions.

What do we mean by "stress"? It's always been with us. For instance, children have been defined by the agony of their illness and by the exhaustion of their well-being. [Laughter.]

And yet we have to have them, I am told. [Laughter.]

Now, I think that, again, stress has been in every generation. Every generation thinks they have more stress than the others. I am sure that building pyramids must have been a great stress for the people. It must be of some satisfaction now to know that the pyramids are holding down the Pharaohs. [Laughter.]

Now, I think that, lastly, this problem is a peculiarly human one in the sense that man is the only individual who really meets a challenge. Challenge is the one way we strive for success in the world. If there is a purpose in the world—and I believe there is one—then that is defined in terms of challenge; and if people can't meet challenge, they are something less than human in my book. Therefore, I would say that let's meet the challenges of the world as best we can because that is our purpose; and then let's not worry about the consequences of it.

We'll live the best we can; we'll take things as inevitably as we can; but let's still remain human beings.

Thank you.

Dr. SPRAGUE. I would like to end by saying that I agree with what Dr. Page says. If we let our citizens become so soft and fearful that the normal challenges of living may be harmful, then there is great danger that a less timorous and less pampered nation may well take us over; and I think that if stress were the important thing in the production of coronary disease, all these members here on the panel would go home and have a coronary thrombosis; and I don't think they are going to.

Thank you very much. [Applause.]

SENATE

MONDAY, MARCH 9, 1959

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

Our Father God, above all the babel of strident voices assailing our ears in these hectic days of angry contentions, we would turn to Thy changeless concern for Thy earthly children and rest in the comforting promise, "I will keep that man in perfect peace whose mind is stayed on Me."

"Father in Thy name we pray—
Let us know Thy will today.
With Thee we are unafraid.
For on Thee our minds are stayed;
Though a thousand foes surround
Safe in Thee we shall be found."

In all the problems of governance which center in this Chamber of the people's will, we would ever be conscious that this dear land of our hopes and prayers is rooted in a compelling faith in spiritual verities without which life itself is devoid of valid meaning.

In the sacred pilgrimage of these weeks of the passion, with the steadfast countenance of "Man's best Man" ever before us, grant us the grace to turn from all that hides Thy face.

We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, March 5, 1959, was dispensed with.

STATE OF THE NATION'S PREPAREDNESS

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that three articles published in today's New York Times be inserted in the RECORD.

The first article is entitled "Four Military Chiefs List Objections to Budget Limits."

The next article is a text of the military chiefs' memorandums giving their views on the budget. This was published on page 14 of today's New York Times.

The third article is entitled "McElroy Reports on Berlin Plans."

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

FOUR MILITARY CHIEFS LIST OBJECTIONS TO BUDGET LIMITS—VIEWS DETAILED IN NOTES TO SENATE INQUIRY—CUTS IN ARMY PERTURB TAYLOR

(By Jack Raymond)

WASHINGTON, March 8.—The chiefs of the Army, Navy, Air Force and Marines have presented to Congress in detail the reservations they have about President Eisenhower's $40,945 million defense spending budget. They endorsed the proposed budget 2 months ago.

Gen. Maxwell D. Taylor, the Army's Chief of Staff, was most vehement in his comments. He said that in his opinion and in the opinion of his principal Army commanders, "their personnel resources" were "inadequate to meet in full the requirements of their assigned missions."

He called attention to the Army's recruiting of foreign nationals not only in Korea, but also in Europe, as well for combat and support units—"thus incurring a heavy dependence upon foreign personnel which might have serious consequences in an emergency."

SUBMITTED IN WRITING

The service Chiefs expressed their reservations about the budget in memorandums to the Senate Preparedness Subcommittee. Their comments will be included in the printed record, expected to be issued in a few days, of the subcommittee's recent hearings.

The Chiefs' memorandums, taken collectively, represented a strong reinforcement of congressional differences with President Eisenhower over the adequacy of the country's defenses.

In the special meetings with congressional leaders on Friday President Eisenhower asserted that the United States had sufficient atomic and conventional forces to carry out political commitments to defend Berlin.

There were indications that congressional critics of the President's stand would now cite the views of General Taylor and the other Chiefs, although these views were not based on the Berlin situation.

Gen. Thomas D. White, Chief of Staff of the Air Force, expressed concern in his memorandum about marginal military construction, slow replacement of the Strategic Air Command's B–47 bombers, and the rejection of plans to proceed with building a nuclear-powered airplane.

Adm. Arleigh A. Burke, Chief of Naval Operations, cited five reservations. These dealt with maintenance and modernization of ships and aircraft, procurement of new weapons, acceleration of antisubmarine warfare defenses, progress of the Polaris missile-firing submarine plan, and increased research and development.

Gen. Randolph McC. Pate, Commandant of the Marine Corps, singled out personnel reductions as paramount, but he mentioned also ships, aircraft and construction of facilities.

The subcommittee to which the Chiefs' communications were submitted has scheduled new closed hearings on defense to start on Wednesday. The hearings will concern the Berlin crisis.

In announcing the new hearings, Senator LYNDON B. JOHNSON, of Texas, the subcommittee chairman, called attention to the reservations the service Chiefs had voiced when they endorsed the budget.

Mr. JOHNSON, the Democrats' Senate leader, referred to a statement made by Neil H. McElroy, Secretary of Defense, when he testified before the committee that the Chiefs supported the budget. In part, Mr. McElroy said that the Chiefs "find no serious gaps in the key elements of the budget in its present form, but all have reservations with respect to the funding of some segments of their respective service programs."

The memorandum that endorsed the budget was dated January 19 and was signed by the service Chiefs and Gen. Nathan F. Twining, chairman of the Joint Chiefs of Staff.

In the subsequent hearings the Chiefs were asked to comment upon their reservations. They did so, but Senator JOHNSON also requested that they put their opinions in writing. The memorandums were sent to the committee after the hearings had been adjourned early in February.

Before being sent to the committee, the Chiefs' statements were cleared with the office of the Secretary of Defense. It is understood that in the forthcoming hearings the Chiefs may be asked whether any changes had been made in the statements.

GETTING DOWN TO CASES

In announcing that he would call Secretary McElroy and the members of the Joint Chiefs for a discussion of service needs in the light of the Berlin crisis, Senator JOHNSON said:

"We are going to try to get down to cases."

In their memorandums to the subcommittee, all four Chiefs expressed fears about the possible lack of an adequate surface-to-air missile defenses.

While discussing the antimissile program, General Taylor said that adequate appropriations had been requested for research for the Nike-Zeus. But no funds, he said, were allocated to initial production of tactical equipment for the weapon now under development that would be capable of defending retaliatory forces and vital centers against intercontinental and submarine-launched ballistic missiles.

"My reservation in this area arises from the unopposed ICBM threat and my conviction that the importance of obtaining this unique antimissile weapon at the earliest possible date outweighs the possible financial risks in initiating selective production now," said General Taylor.

In commenting on personnel reduction, General Taylor called attention to his own recommendation last year that the Army be maintained at 925,000, while the new budget called for a reduction to 870,000.

TEXT OF MILITARY CHIEFS' MEMORANDUMS GIVING VIEWS ON BUDGET

WASHINGTON, March 8.—Following are the texts of the memorandums by the service Chiefs prepared for the Senate Preparedness Subcommittee:

GEN. MAXWELL D. TAYLOR

"On January 19, 1959, the Joint Chiefs of Staff submitted a memorandum to the Secretary of Defense, subject JCS position on the fiscal year 1960 budget. The following statement is to clarify my position as requested by the chairman of the Senate Preparedness Investigating Subcommittee, with regard to my reservations with respect to certain Army programs, mentioned in the January 19 memorandum.

"The reservations which I had in mind pertain specifically to four major Army programs. These are (1) Army modernization, (2) the anti-missile-missile (Nike-Zeus) program, (3) the personnel strength of the Active Army and Reserve forces, and (4) the Army surface-to-air missile program.

"Modernization

"The Army's modernization program is designed to achieve both modernization of the existing inventory and a gradual increase in quantity of inventory to meet the estimated combat and training requirements of the early months of mobilization and of war. The first step each year is to seek funds to replace the average annual inventory loss due to consumption, wear-out and obsolescence. Experience indicates the need to replace annually for these causes about 10 percent of the current equipment inventory. As the value of the Army inventory is approaching $14 billion, the annual sum required for replacement is about $1,400 million.

"A second requirement is to increase gradually the Army's inventory level from $14 billion to a level of $20 billion, the quantity of equipment which is needed in our supply system to meet the early requirements of mobilization and combat. This level constitutes the Army material objective which we wish to attain in a 5-year period. Thus, in addition to the $1.4 billion for replacement, the Army seeks another $1.2 billion as an annual increment of a 5-year plan to increase the inventory to meet the material objective mentioned above, and about $200 million for industrial mobilization and transportation. Therefore, a procurement appropriation of approximately $2.8 billion per year (exclusive of Nike-Zeus) over a 5-year period is needed to support this phased program to provide the Army with ample modern equipment. Against this requirement of $2.8 billion, the fiscal year 1960 budget will make available $1.19 billion for procurement and $176 million for industrial mobilization and transportation. The $1.19 billion amount is about $200 million less than the amount required to offset the annual drawdown in inventory due to consumption, wear-out, and obsolescence and makes no provision for building up our present inventory from $14 billion to $20 billion.

"My reservation with regard to this program arises from concern over the inability under the fiscal year 1960 budget to make the desired progress in modernizing the present equipment of the Army and in acquiring the necessary additional quantity of material.

"The antimissile missile (Nike-Zeus)

"Nike-Zeus is provided sufficient funds in the fiscal year 1960 budget to continue research and development at an optimum rate. It is the only system currently under development which will be capable of defending our retaliatory forces and our vital centers against intercontinental and submarine launched ballistic missiles. No funds are provided to initiate production of tactical equipment and missiles.

"My reservation in this area arises from the unopposed ICBM threat and my conviction that the importance of obtaining this unique antimissile weapon at the earliest possible date outweighs the possible financial risks inherent in initiating selective production now.

"Personnel strength

"During the development of both the fiscal year 1959 and fiscal year 1960 budgets, I recommended that the active Army be maintained at a strength of 925,000, 15 divisions and the Reserve components at a paid drill strength of 700,000. The fiscal year 1960 budget will provide an Active Army strength of 870,000, 14 divisions and a paid drill strength of 630,000 for the Reserve components.

"My reservation with regard to the personnel situation in the Active Army is based upon the results of reports and of my personal visits to the principal Army commanders abroad and in the United States, all of whom consider their personnel resources as inadequate to meet the full requirements of their assigned missions. In order to compensate for the shortage of American personnel, Army commanders in Europe and Korea have been obliged to incorporate large numbers of foreign nationals into combat and support units, thus incurring a heavy dependence upon foreign personnel which might have serious consequences in an emergency.

"With regard to the reduction in the paid drill strength of the Reserve components, my concern is over the adverse effect on the reorganization of the National Guard structure currently under negotiation with State governors and the adverse impact of the reduction on the readiness of many National Guard and USAR units to meet the desired mobilization time schedule.

"Surface-to-air missiles

"Army objectives in numbers of surface-to-air missile units for the continental air defense and for air defense in overseas theaters are determined by the Joint Chiefs of Staff after consideration of the recommendations of the commander in chief, Continental Air Defense Command, and the commanders of unified commands. The funds for Army surface-to-air missiles in the fiscal year 1960 budget fall substantially short of those needed to reach the goals recommended by the Joint Chiefs of Staff.

"My reservation in this field is over the failure to make sufficient provision for these air defense weapons which will be needed for the indefinite future to cope with the high and low altitude threat of the manned bomber and the air-to-surface missile."

GEN. THOMAS D. WHITE

"This statement is in reply to the direct request of the chairman, Senate Preparedness Committee. It confirms oral examples given to the committee at the time of questioning and completes my recital of reservations concerning the Air Force fiscal year 1960 budget.

"The present Air Force fiscal year 1960 budget does not permit the replacement of B–47's as rapidly as requested. While certain scientific advisers do not feel that we are ready to start building a nuclear powered aircraft, I consider that our aircraft nuclear powered program (ANP) is sufficiently advanced so that we should proceed with construction of the prototype development airframe and should accelerate the propulsion phase of the program. The density of coverage that will result from the Bomarc procurement proposed in this budget is substantially less than the Air Force initially submitted.

"The Air Force military construction program is marginal in terms of support type of facilities and does not provide for the cumulative and growing deficit in many equally important areas. In fiscal 1960 the Air Force operations and maintenance funding is minimal and will require deferral of certain programs which it would be desirable, and in some cases more economical to accomplish with fiscal year 1960 funds."

ADMIRAL ARLEIGH A. BURKE

"1. As Chief of Naval Operations my concern is to keep Navy capabilities up to the level where the Navy can do what it will be required to do, now and in the future. We must strike a balance, within the resources made available to the Navy, between immediate readiness and future capability.

"2. In response to questions by this committee, I stated I had certain reservations with regard to this budget, which reservations related to Navy capabilities to respond to unforeseen demands of national policy and to provide the quality of Navy which will be required in the future.

"The budget areas in which I have reservations are these:

"(a) Maintenance and modernization of ships and aircraft.

"(b) Procurement of new ships, new aircraft, guided missiles, and their associated electronic equipment.

"(c) Acceleration of ASW (antisubmarine warfare) progress.

"(d) Rate of procurement of FBM (fleet ballistic missile) weapon systems.

"(e) Increased research and development effort."

GEN. RANDOLPH M'C. PATE

"My reservations respecting the funding in the 1960 budget as related to Marine Corps requirements, which I am now presenting in response to committee invitation, involve four categories: Personnel, ships, aircraft, and maintenance of facilities. Of these, I regard the first, personnel, as paramount.

"With respect to personnel, it has been and is my firm conviction that to carry out its assigned missions, the Marine Corps requires personnel to adequately man three divisions and three aircraft wings. My initial budget calculations were based on 200,000 marines. The 1960 budget as submitted to the Congress provides for 175,000 marines.

"Thus my first reservation results from the level of manpower under which the Marine Corps will operate in fiscal year 1960.

"With respect to the Navy construction program for amphibious assault ships

(LPH's) there has been progressive slippage starting from its inception. The 1960 new construction provides for but one LPH, which added to the two on which construction has been started will result by fiscal year 1963 in only three modern helicopter assault troop carriers.

"Thus, my second reservation is that new ship construction provided by this budget will fall short in effecting the transition to modern amphibious techniques.

"In the aviation area, I must relate Marine Corps requirements to the overall framework of naval aviation. Aircraft procurement in this budget, as stated by Admiral Burke to the committee on January 29, 1959, does not meet the requirement of aircraft arising merely from predicted attrition. We are thus faced with the inevitable prospect of declining inventory of aircraft with all that means in terms of exploitation of seapower.

"Thus my third reservation involves the decline in naval air strength which will surely result.

"With respect to maintenance and construction of facilities, the Marine Corps at the start of the budget cycle stated its requirements at approximately $45 million. The budget under consideration will provide $9 million of that amount.

"Thus my fourth reservation concerns the continued deterioration of facilities and the slippage of new construction which has characterized our supporting establishment during the entire postwar era.

"The foregoing statement of reservations, it should be remembered, are made from my vantage point as chief of service. While to me they involve matters of personal conviction, it is patent that other considerations additional to those available to me as a military man, must be and have been applied to the problem areas in which I entertain the foregoing reservations."

McELROY REPORTS ON BERLIN PLANS—SAYS WEST IS DEVISING WAYS TO MEET BLOCKADE—SOVIET CHIEF IN PEACE APPEAL

WASHINGTON, March 8.—Secretary of Defense Neil H. McElroy said today that the United States and its allies were working out a variety of combinations of air and ground access to Berlin to be used in the event of a Communist blockade.

The Secretary said these combinations were a part of very real and definite military planning by the United States, Britain, France, and West Germany. This is designed to meet the threat posed by Premier Nikita S. Khrushchev's announced determination to turn over control of Allied access routes to West Berlin to the East German Communist Government if the West refuses to sign a German peace treaty and withdraw from the city.

Mr. McElroy said the things that are being done are the right things to be doing at this stage.

He added that he thought the chances of settling the Berlin crisis by negotiation were a much more real possibility at this stage than was the possibility of war.

[Speaking at an East Berlin reception, Mr. Khrushchev pledged to work to end the cold war if the Western Powers would agree to withdraw from Berlin, the Associated Press reported. The Soviet leader will confer with Erich Ollenhauer, West German Socialist chief.]

Secretary McElroy's assertion, delivered on "Meet the Press," National Broadcasting Co. television program, came amid a rising chorus of demands by Democratic lawmakers that the Eisenhower administration move faster to match the quickening tempo of events in Germany.

Senator LYNDON B. JOHNSON of Texas, Democratic leader of the Senate, urged in a broadcast to his constituents that the administration get on with the job of preparing the Nation militarily, morally, and economically to meet the crisis.

Senator J. W. FULBRIGHT, Democrat of Arkansas, chairman of the Senate Foreign Relations Committee, voiced opposition to the administration's planned cuts in Armed Forces strength. He also said the United States should move promptly to seize the diplomatic initiative from the Soviet Union.

Secretary McElroy defended the planned reductions in the Army and the Marine Corps on the basis that the United States was relying on the ground forces of our allies as well as upon the nuclear striking power of the Strategic Air Command. He refused to say whether Allied troops or U.S. troops might be called upon to break a Berlin blockade imposed by East Germany.

The Secretary repeated that it would be very difficult to keep any hostilities over Berlin restricted to a so-called limited war.

His confidence in the possibility of a negotiated settlement was supported by the Speaker of the House, SAM RAYBURN. The Texas Democrat said he hoped and believed that there was a better than 50–50 chance that there can be a compromise on both sides.

Senators JOHNSON and FULBRIGHT and Mr. RAYBURN, with other Members of the congressional leadership and of the Senate and House Foreign and Armed Services Committees, attended discussions on Berlin held by the President Friday. Subsequent reports indicated deep Democratic concern over the President's insistence on placing a balanced budget ahead of more defense. In formal statements at the White House the congressional leaders had announced their united support for the administration's plans and procedures.

Senator JOHNSON told his constituents that the countdown had begun at Berlin and that the United States "must move now to insure for ourselves the greatest possible strength for the day when the showdown comes."

"We can no longer sit by and see our strength—military, moral or economic—decimated by delay, defeat or retreat," he said. "Words are useless. Criticism is wasteful. Delay is unthinkable. Let us together get on with the job which lies ahead."

Senator FULBRIGHT agreed with the President's contention that there was no need for general mobilization. But he said planned cuts in the Armed Forces and announcements of a cut of $400 million or $300 million were very bad psychology.

"It tempts the Russians to be more aggressive than they otherwise would be," he said.

Secretary McElroy, defending administration concentration upon building up nuclear striking forces at the expense of conventional forces, said he was confident the United States would have adequate radar defenses against a Soviet missile attack by the time the Russians were able to launch a sizable attack. He said the Soviet Union did not have the capability for such an attack now.

BOMBERS COULD BE ALERTED

He said he doubted that even an attack by 200 Soviet missiles would be adequate to knock out this country, although some experts have estimated that the 50 largest military bases could be wiped out by such an attack.

He said that although Strategic Air Command bombers were not now in a condition of air alert, with planes actually flying, we will go to it any time we feel we need it.

Mr. McElroy said he thought Atlantic alliance forces in Europe were adequate to contest what he said might be an almost accidental incursion into European territory by Communist forces.

The Secretary said the Berlin situation was the sort of crisis that might persuade him to change his announced plans to resign in the autumn. If the President felt his continuance in office was necessary to the national security, he said, "then I would stay."

In a separate interview, Secretary of the Army Wilber M. Brucker echoed the President's assertion that mobilization was not needed at present. He said, too, that military plans had been completed to meet any conceivable situation arising from the Berlin situation.

Mr. JOHNSON of Texas. Mr. President, the Preparedness Investigating Subcommittee of the Senate Armed Services Committee will continue its hearings on the state of the Nation's preparedness program, with special emphasis on the Berlin situation, starting next Wednesday.

During our hearings in February it was brought out that each member of the Joint Chiefs had signed a letter supporting this year's military budget, with certain reservations. The committee asked that it be furnished copies of these reservations. The committee has now been furnished the detailed lists, and they will be contained in the printed record of the original hearings, which will be released within the next day or so. I commend them to the attention of all Members of the Senate.

At the time of their original testimony, Generals Taylor, White, and Pate and Admiral Burke indicated that while they considered this year's budget "adequate," they had certain reservations. The term "adequate" is still subject to further definition.

The Berlin situation places a new light on the subject.

General Taylor, since appearing before the committee, has said that in his opinion the Army's personnel resources are inadequate to meet the full requirements of its assigned missions. Mr. McElroy is quoted as saying, "The things that are being done are the right things to be done at this stage."

It will be the purpose of the pending hearings to get down to cases, and to try to get the truth with the bark off.

The "countdown" has begun with the Berlin situation, and we must insure that we have adequate strength. And—more than that—the American people must be informed as to what the military, moral, and economic requirements are.

Mr. President, the hour is late. There can be no question that all Americans will stand together and firmly support the principles to which we are committed. But now is the time for us to realistically appraise the situation. We cannot afford to indulge in wishful thinking, but rather must appraise the facts as they exist and steadfastly face the issue squarely.

Mr. President, I ask unanimous consent that there be printed in the RECORD at this point a statement I made to a press conference following the White House conference on March 6.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATE MAJORITY LEADER LYNDON B. JOHNSON, MARCH 6, 1959

This morning I attended a meeting at the White House on the Berlin situation—one of the most serious developments this country has faced in several years. There is no easy solution to a very hard and thorny problem.

Of one thing we can be certain. The country will stand united. It must stand united behind our President because the situation calls for strength, resolute firmness, and unity.

There can be no question but that Americans will exhibit those qualities.

The point that presses upon us most strongly is not whether we will stand firm in May—or whatever date or wherever a showdown comes—but what we will do now to gather our strength, as much as necessary as soon as necessary.

Some of us are deeply disturbed by the fact that at this point we are still whittling away the strength of our Army, our Navy, our Marine Corps, and our Air Force.

The Joint Chiefs of Staff appeared before our Preparedness Committee. We asked them to give us all the facts with the bark off. Each one stated that the budget as a whole was adequate, but expressed reservations as to its effect upon his own service. At the time, it seemed to me that this was very much in the class of saying: "This is all right with me, but don't blame me if things go wrong."

The Berlin crisis puts a different focus on the situation. It sharpens the necessity for maintaining our strength. We must determine whether the military policies of our country are being written by military officers through the judgment of our Joint Chiefs or a budget officer.

The Preparedness Committee will resume open and closed hearings early next week. We will call the Joint Chiefs of Staff and we will invite the Budget Director and get right down to cases.

Our Nation is facing a period of trial. We must be certain that we approach the ordeal not only with courage but with all the strength that is at our command. And finally, when we have explored all possible courses and made our decisions, we present to the world a unified front.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. ELLENDER. I am very much interested in what the distinguished Senator from Texas just said about the size of our Army. The Senator is aware of the fact, no doubt, that last year the Appropriations Committees of both Houses provided sufficient funds for an Army of 900,000 men. If I may refresh the memories of Senators, last year the House Appropriations Committee approved the administration measure which provided funds for an Army of 870,000 men. Congressman SIKES, of Florida, amended the measure on the floor of the House so that funds sufficient for the maintenance of a 900,000-man Army were available.

The Senate Appropriations Committee approved the measure and on the floor of the Senate an amendment offered by the distinguished Senator from South Carolina [Mr. THURMOND] to set a mandatory level of 900,000 men for the Army was unanimously approved. In that form the entire bill was passed by the Senate.

When the measure went to conference, House conferees objected to the mandatory Army limit being included in an appropriations bill. The Senate conferees receded and instead, the mandatory limit was included in the conference report.

In my judgment the intent of Congress is very clear on this point—that there should be a minimum of 900,000 men in our Army. Apparently, however, the Defense Department is determined to flaunt the will of the Congress and intends to cut the Army down to 870,000 men by the end of this fiscal year, the Congress notwithstanding.

Mr. JOHNSON of Texas. General Taylor, the Chief of Staff of the United States Army, states in his letter to the committee that:

> During the development of both the fiscal year 1959 and fiscal year 1960 budgets, I recommended that the Active Army be maintained at a strength of 925,000, fifteen divisions and the Reserve components at a paid drill strength of 700,000. The fiscal year 1960 budget will provide an Active Army strength of 870,000.

Which is 55,000 less than recommended.

> Fourteen divisions and a paid drill strength of 630,000 for the Reserve components.

Mr. ELLENDER. It was on the basis of such testimony as the Senator is now quoting that the Congress provided sufficient funds for a 900,000-man Army. That is why I say now that steps should be taken to make the Defense Department follow the dictates of the Congress.

Mr. JOHNSON of Texas. Mr. President, I am sure the committee is concerned with two things, as Americans, and not as representatives of any party. First, do we have adequate plans to deal with the security of this country at all times? Second, if we have adequate plans, do we have the necessary strength to implement and carry out those plans? The committee is attempting, in as objective, energetic, and diligent a manner as it can, to obtain answers to those questions.

Mr. LONG. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Mr. President, I do not want to occupy the floor too long, but I do not want to refuse to yield. I ask unanimous consent that I may yield to the Senator, since the Senator would be entitled to 3 minutes.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

Mr. LONG. Mr. President, the Constitution provides in article I, section 8, that Congress shall have the power to raise and support armies. This power is in addition to the power the Congress has to appropriate money.

I saw the Secretary of Defense on television yesterday. The Secretary considered the appropriations of the Congress, as mere invitations to raise armies over and beyond the armies which the administration thinks advisable. I should like to submit to the Senator that Congress has not discharged its responsibility to raise and support the armies necessary for the defense of this country by merely inviting the Secretary of Defense and the President to expend funds for that purpose. If we believe our defenses are inadequate Congress should go further than merely to appropriate money as an invitation to the Executive to provide strength.

Mr. JOHNSON of Texas. I wholeheartedly concur in the wise admonition of the Senator from Louisiana. One can lead a horse to water, but cannot make him drink. We appropriated, I am informed, in the defense budget for last year, more than a billion dollars which has been impounded. I deeply regret that the time has come when an appropriation bill of the Congress can be nullified and the unanimous action of both Houses of Congress can be nullified by the action of a budget clerk. I hope the defenses of this Nation will be built upon the advice and recommendations of the best military men we have, instead of some civilian Budget Director.

The committee is now attempting to ascertain, in an objective and prudent manner, what are the facts. I am not willing to reach conclusions which might be calculated to frighten the people, but I know that money we appropriated last year has not been expended, and the action has been negated and has been nullified. The money has been impounded. The strength we thought we should have, and for which in performing our duty under the Constitution we provided, is not in existence because individuals nullified the action by impounding the funds.

This has been true with respect to other administrations. I regret to say that not many years ago a Democratic President took the same action. I opposed the action then. I think that if the President is not going to use the funds he ought to veto the bill and send a message back to the Congress.

I do not think the time has come when a Budget Director should have more power, first, than the military men, and, second, than the Congress itself; but we are living in such a day, I will say, because I am informed that word was received by the Chiefs of Staff from sources on high to review this memorandum, and each one of them said, "While I have reservations concerning my own agency, I will agree to the general overall amount." What they meant, to me, was that they were saying, "Well, I am going to approve it, but don't blame me if something happens." That is what we are trying to develop in the hearings, and we will find out what the situation is.

Mr. LONG. Congress has a duty, in this connection, beyond the mere power to appropriate money. It has the power and duty to require that the Armies and defenses be sufficient for our needs.

Mr. JOHNSON of Texas. I wholeheartedly agree with the Senator.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that I may yield to the Senator from Illinois, who would be entitled to 3 minutes of his own time.

The PRESIDING OFFICER (Mr. DODD in the chair). Without objection, it is so ordered.

Mr. DOUGLAS. I am very glad the Senator from Texas has made the point which he has made with respect to the appropriations which Congress made last year. As I understand, we appropriated $1 billion additional for missiles, and ap-

proximately $150 million to keep the Army strength at 900,000, to prevent the Marine Corps from being reduced to 175,000 men, and to make it possible to increase its strength to 200,000.

It was specifically stated in the report which the Senate Appropriations Committee made that it was the intent of Congress that the land forces should be raised to 900,000 and 200,000, respectively.

As the Senator from Texas has said, this mandate was not carried out; and as a result the Army is being reduced from 15 divisions to 14 divisions, and the Marine Corps units are being made seriously understrength, at a time when the Berlin crisis has been boiling up.

I very much hope that the Senator from Texas, for whose great ability I have profound respect, and other Members of the Senate will make this point crystal clear, because at a time when there is real danger of limited war, our capacity to defend ourselves in a limited war is being reduced by the administration, against the specifically declared will and purpose of Congress.

Mr. JOHNSON of Texas. I appreciate what the Senator has said. At every opportunity I have had, I have asked the highest authorities two questions: "First, do we have adequate plans to deal with any eventuality? Second, in your opinion have we the strength necessary to carry out those plans?"

I have received assurance that, in the opinion of those high in authority, the answer to both questions is in the affirmative.

I hope that each Member of the Senate, as a part of his homework tomorrow, will read the rather clear and concise statement of each member of the Joint Chiefs of Staff, so that Senators may know what the best military minds of the Nation think should be done. It may be that those in the Bureau of the Budget know more about the subject than do the Joint Chiefs of Staff—Admiral Burke, General White, and General Pate. But if they do, we have been wasting money on West Point for a long time.

Mr. DIRKSEN. Mr. President, I concur in the restraint exercised by the majority leader in dealing with the question of military preparations, and the question as to whether or not we have what would be required under any circumstances. However, I wish to reemphasize what I said informally last week, that I hope there will be careful and necessary restraint. The reason I make that statement is that a certain speech was made on this floor last week. I read two paragraphs from the copy which came to me——

Mr. JOHNSON of Texas. Mr. President, will the Senator yield at that point?

Mr. DIRKSEN. I am glad to yield.

Mr. JOHNSON of Texas. I hope the Senator does not imply that I was guilty of any lack of restraint or prudence.

Mr. DIRKSEN. No; I have just indicated that I concurred fully in the Senator's restraint

Mr. JOHNSON of Texas. I thank the Senator.

Mr. DIRKSEN. I should like to read two paragraphs:

> All the evidence suggests that if war were to come—as it might in May over Berlin—Russian submarines would not only control the sea lanes but could, at their leisure, lob nuclear bombs on the great cities of our coast.

Mr. President, it seems to me that it goes pretty far for a nonmilitary man to make that kind of statement. While I very much dislike to reveal the name of the person who made that speech, I must say that it was made by the Senator from Pennsylvania [Mr. CLARK]. He made it on the floor of the Senate last week. He said, further:

> And as for limited war, we just do not have in being adequate mobile forces capable of dealing with localized attacks on our allies, particularly if crises should occur simultaneously in far-removed locations.

Mr. President, that is a very unfelicitous statement to make from the floor of the Senate, in my judgment.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DIRKSEN. I shall be glad to yield when I have completed my statement. I believe that every Senator is entitled to be heard on the floor of the Senate. Nevertheless, I should like to refer to what has been said by Admiral Burke. He is an eminent military authority. He was in command of a destroyer squadron in World War II in the Pacific area. He also served in the Atlantic area, and later he served in Korea. He is a great military man. He now serves as our Chief of Naval Operations.

On February 25 of this year he made a speech at the Treasury Conference of Industrial Leaders in Washington. At that time he said:

> If an attack is launched against the United States, our forces will provide a wide mix of weapons strategically positioned and designed to react from different sectors. In the period 1959 to 1962 these will include ICBM's and manned bombers from the United States; manned bombers from overseas bases; deployed tactical missiles of our Army, Navy, and Air Force; missiles from our submarines at sea; and a contribution to be made by our atomic-capable Tactical Air Force units and attack carrier striking forces deployed in strategic areas.

I could ask to have the remainder of the speech printed in the RECORD. However, I allude to it only for one reason.

Yesterday I had a moment to read a little of the life of Edwin M. Stanton, Secretary of War under Abraham Lincoln. At that time there was in existence a congressional committee on the conduct of the war. It was one of the greatest nuisances of that day that could possibly be imagined.

We are entitled to ventilate our views. Nevertheless I hope that in doing so we will be careful not to undertake to initiate from the floor of the Senate somewhat pontifical statements about strategy and tactics; as to what we have and what we do not have.

I commend the majority leader for his restraint in this matter. He said we should let the facts speak for themselves. I agree. I believe also that we should be careful not to express an attitude with regard to military matters which would indicate that we are speaking as military experts. After all, it is on the military leaders that we must rely.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. LONG. The Senator has referred to Admiral Burke.

Mr. DIRKSEN. I regard him as one of our military experts.

Mr. LONG. The Senator has referred to Admiral Burke, the Chief of Naval Operations. Admiral Burke has testified on the same subject and along the same line taken by the Senator from Pennsylvania [Mr. CLARK] in his remarks on the floor of the Senate the other day. Admiral Burke himself admitted that the Navy did not have the strength to prevent a submarine from launching atomic missiles from either below the surface or from a submarine firing missiles on the surface.

Such missiles could be launched from submarines lying off our coasts. I heard the Admiral testify to that effect before the Subcommittee on Disarmament. I believe Admiral Burke is a great military authority, as the Senator from Illinois has said.

Mr. DIRKSEN. Mr. President, at this point I ask unanimous consent to have the complete text of Admiral Burke's remarks at the Treasury Conference of Industrial Leaders printed in the RECORD.

There being no objection, the text of the remarks was ordered to be printed in the RECORD, as follows:

ADMIRAL BURKE ASSAYS U.S. MILITARY POSTURE

"It is not probable that any nation possesses the ability to destroy us, or to attack us, without receiving unacceptable damage in return, today or in the foreseeable future," Adm. Arleigh A. Burke, Chief of Naval Operations, told the Treasury Conference of Industrial Leaders in Washington, D.C., February 25.

After outlining the number of Soviet and U.S. military forces, Admiral Burke pointed out:

"We should measure the adequacy of the number of those forces solely by whether they are sufficient to satisfy the needs of the nation concerned."

He then gave the following comparison of Soviet and U.S. forces.

COMPARISON OF MILITARY FORCES

1. Ground forces: "With respect to ground forces, the Soviet Union clearly outnumbers the United States, but there is a wide difference in requirements. The Soviet Union needs large ground forces to maintain internal security within the Soviet bloc and to man their long frontiers. We have no such requirements. Therefore, our tactical forces in the Army, Navy, Marine Corps, and the Air Force, together with the substantial forces contributed by our free world allies, are available to deal with limited war situations and to carry out essential tasks in a general war."

2. Seapower: "Our seapower is clearly superior to that of the Soviet Union, even though they have made substantial improvements since World War II and have large numbers of submarines in operation. We have different aims and policies. We need to be able to maintain freedom of the seas and to project our seapower overseas. In the event of war this requires ships and aircraft to control overseas areas—in

the air, on the land, and under the sea. We need some submarines for this purpose, but not as many as the Soviets need to try to dispute our ability to control the sea.

"You are probably aware that the Soviet Union has no aircraft carriers while the United States is in a position to deploy both in the Mediterranean and the Far Pacific powerful task forces built around aircraft carriers. These carrier task forces in general war together with Polaris submarines constitute a retaliatory capability unique to the United States."

3. Airpower: "Our airpower is clearly superior to that of the Soviet Union.

"The manned bomber will for some time constitute the primary means of delivery of strategic weapons in volume and with the degree of accuracy required.

"Our primary nuclear capability rests today in our manned bombers and the same is true of the Soviet Union. The United States outnumbers the U.S.S.R. in intercontinental jet bombers and in medium bombers. Our bombers are manned by the most highly trained and experienced crews in the world. They are ready now.

"Our air defense system is capable of doing the job that it is required to do. No air defense system can guarantee 100 percent protection."

4. Missiles: "As to missiles, we do not know with positive assurance exactly what the Soviet Union is producing. We can estimate their capability to design, build, test, produce, and deploy missiles, and we employ these estimates in our planning. This does not mean that they will definitely produce the number which we have estimated they could produce in our estimates of their initial operational capabilities. Nevertheless, we must assume in advance that over any given period they are going to use available capacity and resources. * * *

"While it is true that our intelligence estimates indicate that the Soviet Union could produce more ICBM's than we are planning to produce in the years 1959 to 1962, a comparison of any single weapon inventory is not a measure of the relative striking force of two nations."

TOTAL U.S. MILITARY POSTURE

Taking such factors into account, Admiral Burke then gave the following picture of total U.S. posture:

"If an attack is launched against the United States, our forces will provide a wide mix of weapons strategically positioned and designed to react from different sectors. In the period 1959 to 1962 these will include ICBM's and manned bombers from the United States; manned bombers from overseas bases; deployed tactical missiles of our Army, Navy, and Air Force; missiles from our submarines at sea; and the contribution to be made by our atomic-capable tactical Air Force units and attack carrier striking forces deployed in strategic areas. * * *

"On the basis of all the information available, and in view of the mix and strategic locations of our retaliatory weapons systems, it is not probable that any nation possesses the ability to destroy us, or to attack us, without receiving unacceptable damage in return, today or in the foreseeable future. This is true in spite of the fact that the Soviet Union could test, produce, and deploy more ICBM's in the period 1959–62 than we plan now to produce in the same time period.

WEAPONS ONLY A PART OF NATIONAL DEFENSE

Admiral Burke emphasized in his conclusion that "weapons are only one part of our national defense effort."

He said, "We cannot afford to win an arms race and to lose the battle for men's minds. It is in this area that the Communists will make their major offensive. To defeat them we must be morally and spiritually strong—politically wise—financially and economically stable—sure of our cause. * * *

"The sound economic strength of this country," he asserted, "is the base on which our armed might is built."

Mr. LONG subsequently said: Mr. President, during the morning hour today, the minority leader, the distinguished Senator from Illinois [Mr. DIRKSEN], referred to the views of Admiral Burke. It seemed to me that he was perhaps overlooking the dangers of missiles fired from submarines, or at least was not giving full weight to that factor. That was the basis upon which I interrupted him this morning. I am not sure that our views are different at all.

However, to make the record more complete, I should like to place in the RECORD a portion of the hearings before the Subcommittee on Disarmament of the Committee on Foreign Relations, in which Admiral Burke indicated that we have no way to be sure that such missiles cannot be launched against our bases, and that the Navy is not in a position to assure us that Russian attacks with such missiles would not be successful.

I ask unanimous consent that the portion of the testimony to which I refer be printed at the point where the colloquy occurred during the morning hour.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

SUNRISE ATTACK BY SUBMARINES

Senator LONG. I want to ask a question in that connection, Admiral Burke.

There was a very good Air Force base commander who told me that while he was in the Far East he felt he was in position to pick up radar warning in the event of air attack, but he never was confident that his counterpart in the Navy was in any position to protect him against sub-launched missiles. In other words, he felt he was a sitting duck for that weapon.

What is your reaction to that type of situation? You have a naval base in Puerto Rico, and you have some Far Eastern bases right on the sea.

Admiral BURKE. Yes, sir. There will be no way that you can absoltuely guarantee that an attack will not get through. If they would concentrate on such type of an attack some of it would get through.

Senator LONG. The point is that you just do not have any way of being sure that that type of an attack cannot be made.

Admiral BURKE. No, sir. There are thousands and thousands of square miles of ocean, and looking over the ocean you can only cover a very small area at any one particular time. There is no equipment that can guarantee that there is not a submarine at a particular spot in the ocean, except in a very small area, and even then you cannot guarantee that you have got it.

Senator LONG. That is a lot of area, and the Soviets can have a missile with an accurate range from, say, 300 miles away, too; is that not possible?

Admiral BURKE. Yes, sir. That is for the same reason the Russians are in a tough spot on that. There is no way that they can search all the oceans either. There is no way of doing it, and it is more true for submarines, but it is equally true for surface ships. There is a tremendous area that has to be searched all the time.

Senator HUMPHREY. The thing that worries me about this, Admiral, is that we are much more of a maritime nation than the Soviet Union. We are much more vulnerable to attack because of the miles of coastline that we have as compared to the Soviet Union.

The Soviet Union has no coastline except the Pacific; that is Siberia and Vladivostok.

They use that area for missile testing sites, for maneuvers, and war games activity, all the way up to the Pacific side.

Of course there is development of the seacoast as such. But submarines would have a rather difficult time making much of a missile attack on the Soviet Union. [Deleted.]

Admiral BURKE. It would depend upon the number of submarines we wanted to place and where we wanted to place them. [Deleted.] The Arctic Ocean is a very good place because there are holes in the Arctic ice, and you can put a submarine into the holes and it launches through them or it can come up next to the coastline and it is very difficult to detect.

Mr. COOPER. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The time of the Senator from Illinois has expired.

Mr. COOPER. Mr. President, I am sure that all of us are tremendously concerned about the situation in Berlin. It is so serious that many of us believe we should not speak unless there is good reason and purpose for doing so. I should like to say, however, that the speeches of the Senator from Montana [Mr. MANSFIELD], the Senator from New York [Mr. JAVITS], the Senator from Connecticut [Mr. DODD], and the Senator from Arkansas [Mr. FULBRIGHT], the chairman of the Committee on Foreign Relations, have been valuable and helpful to the executive branch of our Government.

I speak as a Member of the Senate who is not a member of the Committee on Foreign Relations or of the Committee on Armed Services. I believe there is a very narrow line between the type of speeches which could be helpful to the executive branch of the Government and to the people of the United States, and speeches which can be construed as being political.

I dislike saying this. However, I read during the week of the promises of unity and cooperation—and such promises are made by Members of the Senate and the leadership when they visit the White House to speak to the President. Then on Monday morning, I read stories of television and radio programs, and quotations from those programs, which seem to me to go over the political line. They are far from the kind of speeches which are helpful either to the Senate or to the country, and, as I have said, seem more political. I know the line between the two is narrow, and, of course, the truth must be given, whether it is political or nonpolitical. I realize that is a responsibility and right of Members.

I should like to make one suggestion. I made it several weeks ago to the distinguished majority leader, whom I regard as a great patriot. There is constant talk about the inadequacy of our defenses. The only way in which we can finally reach satisfactory conclusions about the state of our defenses is through the committees of Congress, who are charged with the duty of completing their investigations and, after executive discussion of the subject, of reporting their conclusions to the Senate. That

is the proper way to get the best judgment of our colleagues.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. COOPER. In a moment I shall be happy to yield. There are several committees working on defense problems. The situation in Berlin being what it is—a dangerous situation and one of concern to all of us and to the Nation—I would hope that our leadership on both sides of the aisle, and particularly the majority, will regard the investigations by these committees as the first work to be done for the benefit of Congress and the country. Then the committees should come to the Senate with their conclusions as quickly as possible. Those conclusions should be based upon all the facts, and should represent the mature judgment of the members of the particular committees charged with responsibility.

Mr. JOHNSON of Texas. The Senator from Kentucky mentioned my name. Will he yield to me?

Mr. COOPER. I yield.

Mr. JOHNSON of Texas. I merely wish to say that last year we took 7,000 pages of testimony on this subject, and we did exactly what the Senator believes should be done. We made 17 recommendations. I hold in my hand those recommendations. Many of them have never been carried out. I say to the Senator from Kentucky those recommendations were unanimous recommendations. They were the unanimous recommendations not only of the Preparedness Subcommittee, but of every member of the Committee on Armed Services who desired to join us in the hearings. We gave every member who joined us an equal opportunity with us to participate and to cast his vote.

We pointed up the necessity of urgency in many fields, specifically the missile field. We have had rather extended hearings this year. We have not filed a report this year because we wished to hear from the CIA, and we also wished to get detailed recommendations from the Joint Chiefs of Staff, which have just been presented to us. I have no doubt that we will make further recommendations in this field. However, I should like to have carried out some of those recommendations which we have already made.

Mr. President, I ask unanimous consent that there be printed in the RECORD at this point the 17 recommendations to which I have referred. They deal with the relative strength as between ourselves and the Soviet Union. The recommendations were included in the subcommittee's report of January 23, 1958.

There being no objection, the recommendations were ordered to be printed in the RECORD, as follows:

The committee has received many urgent recommendations. The principal areas covered, though not necessarily in the following order of priority, upon which decisive action must be taken are:

1. Modernize and strengthen the Strategic Air Force.
2. Step up the dispersal of SAC bases.
3. Put more effort into developing antimissile missiles.
4. Improve our early warning system for manned aircraft and accelerate the development of an early warning detection system for ballistics missiles.
5. Modernize and strengthen ground and naval forces.
6. Provide an adequate airlift for ground troops.
7. Pour more effort into our antisubmarine program.
8. Step up production schedules of Atlas, Thor, Jupiter, and accelerate the development of Titan.
9. Reduce lead time in the development of weapon systems by cutting down on decision time and by simplifying procurement procedures.
10. Provide for a freer exchange of scientific and technical information between the nations of the free world.
11. Start work at once on the development of a rocket motor with a million pounds thrust.
12. Give serious attention to the question of shelters and stockpiles for civil defense.
13. Reorganize the structure of the Defense Establishment.
14. Provide increased incentives for the retention of trained personnel in the military services.
15. Accelerate and expand research and development programs, provide funding on a long-term basis, and improve control and administration within the Department of Defense or through the establishment of an independent agency.
16. Put more effort in the development of manned missiles.
17. Accelerate the development of the Polaris missile system.

Mr. COOPER. I am well aware, of course, of the recommendations. What I am urging is in the interest of the Senate and the Congress and the country. It is that we make the issue of defense the first issue before Congress, and that we have the judgment of the members of the committees charged with responsibility. This is better than statements of Members on the floor of the Senate who read from newspapers and from parts of defense testimony—statements which in many cases are taken out of context.

It the situation in Berlin is as serious as we say—and it is—then our first duty, our first order of business, is to determine exactly the condition of our defenses.

I make a second suggestion. It is true that we who are not members of the Committees on Foreign Relations and Armed Services do not have access to the evidence which their members have. After the committees have done their work—the situation being as serious as it is—perhaps the leaders on both sides could devise a way in which full information obtained in the various committee meetings could be given to the other Members of the Senate before we debate and vote upon the issue. Because we, too, have our great responsibility at this time, one as great as members of the committees.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. JOHNSON of Texas. Every member of the Committee on Armed Services is ex officio a member of the investigating subcommittee, and a good many members of the Committee on Armed Services have attended most of the meetings of the subcommittee. Every Member of the U.S. Senate is welcome at those meetings at any time, and many Senators have attended the hearings. I again extend a welcome to each Member of the Senate to attend whenever we take further testimony.

Mr. COOPER. I understand that. I suggest that the Senate, and Congress as a whole, indicate to the people of the country its own self-discipline, and perform its own task first, before engaging in off-the-cuff remarks and statements out of context—statements about our defenses which give a wrong impression to the people of the country.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. SALTONSTALL. I should like to have the attention of the majority leader for a moment. I am confident that he made one statement which perhaps was broader than he intended it to be. He said that some of the 17 recommendations had never been carried out. I hope he will agree with me that a report on them has not been made to Congress since the first of the year.

Mr. JOHNSON of Texas. I will not agree at all with the Senator on that point. The committee has had the Secretary of Defense come before it at frequent intervals and has asked him to state the progress which has been made. He has said that progress is being made on this point or that; but I say there are substantial items in those recommendations which have not been completed.

Mr. SALTONSTALL. But we have not had an answer from the Secretary on all 17 points.

Mr. JOHNSON of Texas. Oh, I beg the Senator's pardon. We have called the Secretary to attend many meetings. We have held hearings in the hearing room of the Committee on Banking and Currency. The Secretary took up the recommendations point by point and told us what he had done about them.

Mr. SALTONSTALL. Since the first of this year?

Mr. JOHNSON of Texas. Oh, no.

Mr. SALTONSTALL. That is my point. I am hoping that we will have the Secretary make such a report.

Mr. JOHNSON of Texas. One of the first witnesses called was the Secretary of Defense. He gave us his opinion relative to the overall military strength of the Nation. I think I am fair in saying that the Secretary of Defense feels that the amount of money provided in the President's budget is sufficiently adequate to take care of any eventuality which he contemplates. I think it is fair to say that the President of the United States feels the same way.

I certainly have no desire to frighten the people, or to try to scare the people into thinking that we are not prepared, because the President and the Secretary of Defense have stated that the amount they mention is what they think they need. But I do think it is only fair, reasonable, right, and a part of our duty, that the committee hear from the Joint Chiefs of Staff. We have heard from

them, and have placed their information in the RECORD.

Mr. SALTONSTALL. I want to hear from the Secretary of Defense on those 17 points when the committee meets this year, because I am confident that substantial progress has been made.

Mr. JOHNSON of Texas. I am sure, as the Senator has indicated, that if he wants to hear from the Secretary of Defense on any point, the Secretary of Defense will accommodate him. I know of no one who is closer to the Secretary of Defense than is the senior Senator from Massachusetts.

Mr. RUSSELL. Mr. President, I do not desire to prolong the discussion. I simply wish to say that it would be highly regrettable if any Member of Congress in this very critical period of our history were to seize on the discussion of the military strength of the Nation for purely political purposes. I doubt very much that that would be done. I hope, however, that the gravity of the situation will not deter any Member of Congress from fully and freely expressing his views on the military situation or on our military strength, because Congress has a constitutional responsibility in that area, and we are not to be absolved by any desire to avoid the appearance of partisanship.

The Senator from Kentucky said he hoped we would make statements only after careful hearings and after the committees had had an opportunity to consider the subject matter of the discussion. I point out that last year not only did the Committee on Armed Services and its subcommittees hold lengthy hearings in this field, but also the Committee on Appropriations had extensive hearings relating to the national defense. So far as I recall now, no question was raised on the floor of the Senate, when the Senate in the discharge of its constitutional responsibility recommended that the strength of the Army be maintained at 900,000 men and the Marine Corps, for example, be maintained at a strength of 200,000 men. A number of other factors are involved, but the number of personnel is something which everybody understands. Therefore, I shall confine my remarks to that subject.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. COOPER. I should like to correct one statement. If the Senator from Georgia understood me to say that I thought no comments or speeches should be made on the floor of the Senate on the subject of defense until the committees had reported, I must say that I did not mean that, and I do not think the RECORD will show that I said it. I simply said that, considering the danger we face in Berlin, I should like to see the Senate and its leaders meet its responsibility, prosecute its investigations through committee hearings, and receive their full recommendations regarding our defenses. Then we can do our duty. I think that would be more valuable than Monday speeches following television programs over the weekend. I recognize the ability, restraint, and patriotism of the chairman of the Committee on Armed Services, Mr. RUSSELL.

Mr. RUSSELL. I thank the Senator from Kentucky for his kind statement. I trust I have not misrepresented him. I had understood that he had rather expressed the opinion that it would be well to put the brakes on this type of discussion. If the discussion is for political reasons, I agree. But if it is for the purpose of alerting the people of the Nation to an understanding that we must have adequate means to preserve the country, I disagree. I think every Member of Congress has a responsibility for expressing his views. Congress is an equal and coordinate branch of the Government. We provide the means, and we have the constitutional responsibility for maintaining the national defense.

In accord with that responsibility, we last year fixed the strength of the Army and the Marine Corps. I use those services, because they offer the simplest illustration; everybody can understand what was done.

We find now that the strength we fixed is not being utilized. Even today, I notice in the memorandum from General Taylor, as well as the memorandum from General Pate, of the Marine Corps, which deal with their reservations as to the adequacy of the present budget, references to that area of the personnel.

General Taylor, perhaps in consideration of the fact that the worsening situation in Berlin might first develop into a clash between so-called conventional forces of East Germany and the United States, recommends an increase of strength in the Army.

Certainly I do not think anyone would advise the launching of an atomic war against East German forces. If we did, we would be on unfavorable ground at the beginning. I would be more apprehensive of some such limited clash than I would be of all-out atomic war.

In the memorandum, which I believe appeared today in the New York Times, General Taylor says, that he had recommended a strength of 925,000 men, or an increase of 25,000 over the number last year—possibly in view of the very alarming developments in Berlin—and that he had advocated full maintenance of the drill strength of the Reserves, which is higher than the budget, as finally submitted to us, provides. General Pate said his official budget calculations were based on 200,000 marines. The 1960 budget, as submitted to the Congress, provides for 175,000 marines.

Last year we went through all of these matters, and no one raised any question about them here on the floor of the Senate when the appropriations were made; and that is the way we fixed the strength of the Armed Forces. But we we have had great difficulty in seeing to it that the will of the Congress in that area was carried out.

I do not say this in any critical sense, Mr. President, and certainly my statement is not prompted by any political considerations. I say this because when the question is one of faith in judgment, I have as much faith in General Taylor's judgment—he is the one who will be directly responsible on the ground, in Berlin—and in General Pate's judgment as I do in that of any other military man.

For that reason, so far as I can now see—although I have not closed my mind, and I am going to listen to all the testimony before the Appropriations Committee—I shall endeavor to see to it that the constitutional responsibilities of the Congress of the United States to the people of this country for its defense and protection are fully met when we consider the appropriation bills and the President's budget for this year. Unless new evidence is presented, I do not believe we shall meet it by reducing our ground forces in this very critical period.

Mr. DOUGLAS. Mr. President, will the Senator from Georgia yield for a question?

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Illinois?

Mr. RUSSELL. I yield.

Mr. DOUGLAS. First, I wish to commend the Senator from Georgia for his very partiotic statement, which is thoroughly in keeping with his attitude on all these matters.

The Senator from Georgia has touched on a question of crucial significance, namely, that as dangers multiply, we are reducing our capacity to fight limited war.

Would not it be very easy for the administration to reverse itself by merely stopping the reductions in strength? The numbers have not yet gone down, as I understand them, to 870,000 for the Army and 175,000 for the Marine Corps. By stopping their reduction, and by accepting volunteers in the Marine Corps and either volunteers or drafted men in the Army, within the space of 2 months their strength could be increased to 900,000 and 200,000, respectively, and thus an additional Army division could be saved and we would have the 3 Marine divisions at full strength. That could be done easily by administrative order.

May not discussions of this type on the floor of the Senate and on the floor of the House of Representatives be extremely constructive in pointing out our deep concern over what is happening, and may not they serve as a prod to the administration to act?

Mr. RUSSELL. Mr. President, I do not know that I could go quite that far with the Senator from Illinois, because Congress has made its position perfectly clear. But, despite that, these reductions have been proposed.

But certainly we pointed out to the American people that this coordinate branch of the Government, which has the responsibility of providing the sinews of war, thought it was necessary to provide for 900,000 men in the Army and 200,000 in the Marine Corps. In order to dispel any lingering thought that any would-be aggressor might have as to our lack of firmness or as to our lack of intention to meet our obligations all over the world, I earnestly hope that the administration will see fit to withdraw this stop order, will let the provision made by Congress take effect, and will provide for the 900,000 men in the Army and the 200,000 men in the Marine Corps.

Mr. JAVITS. Mr. President, will the Senator from Georgia yield?

Mr. RUSSELL. Yes.

Mr. MUNDT. Mr. President, is the Senate now proceeding in the morning hour? Or is a bill being debated?

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). The Senate is still in the morning hour.

Mr. JAVITS. Mr. President, a moment ago I asked the Senator from Georgia to yield, because I wished to confer with the Senator from Kentucky [Mr. COOPER].

I believe that what the Senator has been pointing out, and what we should be very clear about, is not that the Appropriations Committee should not act or that the Congress should not discharge its responsibility; but, as all of us know, the Senator's point is that the chief of a service never has enough men or enough equipment, nor did any general who ever fought a battle, nor did I when I was a staff officer in a particular branch of the armed services during World War II.

What the Senator has said—and I thoroughly agree with him—is that we are entitled to have the staff work done by the congressional committees involved. The work of the staff is to develop findings of fact on which we may comment and speculate, and which we may disclose to the country.

However, Mr. President, at this time the matter of high priority is that we not wait for the normal action, because we cannot. No one appreciates more than I do the patriotism and leadership of the distinguished senior Senator from Georgia [Mr. RUSSELL], the chairman of the Armed Services Committee; and normally this matter would fall within the purview of his committee. But we are appealing for some findings of fact—similar to the ones a court would make—upon all these conflicting claims. We need findings of fact which, when we speak on the conflicting views in regard to Berlin—as I have and as other Members of Congress have—will give us some assurance regarding the ground on which we stand. Without such findings of fact, not only do we have to speculate upon the policy involved—which is hard enough to do—but we also have to speculate on the defense posture of the country.

I do not say that all of us will agree when such findings of fact are presented to us; but at least they will be screened and authoritative, and will not be on a hit-and-run basis.

Therefore, simply to crystallize my thoughts on the matter, I state that I believe we should give this matter the highest priority. Regardless of whether in the case of the hearings of the Preparedness Subcommittee, which our distinguished friend, the majority leader, is heading, or whether we are to proceed in some other way, let us place the highest priority right now—not later—on findings of fact as to our posture of military preparedness to face various crises, particularly the present Berlin crisis. That is as specific as one can make the matter.

Mr. RUSSELL. Mr. President, I wish to express my appreciation for the very complimentary references made by the senior Senator from New York.

However, I was referring to the fact that the committees had already, last year, for the current fiscal year arrived at these figures, but the figures have not been observed in all instances.

No one knows better than I do that all these questions of military strength are, in the last analysis, opinions on the part of someone, somewhere. There are those who think we should have a relatively small Military Establishment. Others would, as the old saying goes, fortify the moon; and that saying may come to have a present-day meaning and significance if the space efforts are completely successful.

But I was really pointing out that, so far, we have had these findings, and they are in effect. But they have not been completely coordinated as between the coordinate branches of the Government.

Mr. JAVITS. Let me say to the Senator from Georgia that, the way of the world being what it is, the reports and recommendations made last year are no longer sound currency, in terms of the country, in the face of the crisis which confronts us today. They may be sound as they can be on the facts and the merits of the question. I am not arguing that at all. But in terms of our needs and the crisis, they are not greater than what our country can meet. Therefore, I join the Senator from Kentucky in suggesting that this be done now, even if it means taking the same recommendations and making them over, but at least so we can understand the defense posture of the country today in the face of this crisis. I, for one, having spoken to this crisis, have the feeling that if we had such an appraisal, I would know more of what I was talking about.

I yield now to the Senator from Illinois.

Mr. DOUGLAS. Mr. President, I know the intentions of the Senator from New York are good; but if the findings of last year were accurate, the need for additional ground forces is even greater now. In view of the Russian threats to turn over West Berlin and access to West Berlin to the East Germans, the dangers are even greater now. So if we needed those 50,000 troops last year, we need them even more now.

I would remind my friend that anyone who reads the New York Times with any care, or anyone who reads the British or continental newspapers, knows there has been a serious reduction in the ground forces of our allies, that 2 years ago Great Britain began to decrease the strength of its army, and to put its strength in limited warfare, and withdrew battalion after battalion; that the French, for a considerable period of time, sent more and more forces to Algeria and weakened her troops on the western front; that Denmark is reducing its troops from 16,000 to 13,000; that Belgium is decreasing the period of compulsory service from 15 to 12 months. So amongst the whole Western alliance we find a tendency to reduce our land forces at a time when the danger is increasing.

While I deeply respect the Senator from New York and the Senator from Connecticut, it seems to me, without the slightest bit of hysteria, it is the duty of every Member of the Senate who knows these common facts to speak up and protect the country, and indeed, the administration, from this policy of decreasing our forces when the need has increased.

The PRESIDING OFFICER. The time of the Senator from New York has expired.

Mr. KEFAUVER subsequently said: Mr. President, I wish to associate myself with the remarks of the distinguished majority leader, the Senator from Georgia, and the Senator from Illinois [Mr. DOUGLAS] on the constitutional duty of Congress in connection with the defense of our country at this and every other time.

Of course, we do not want to make politics of our defense effort, particularly at a crucial time such as this, before the Berlin crisis is reached in May. However, I do believe that we must point out what the committees have recommended, and that we have a duty to state the facts. The facts are that in the face of congressional recommendations that we strengthen ground forces, we are actually demobilizing them to some extent. Plants are being closed down, as well as installations, in many parts of our country.

Perhaps the recommendations with respect to demobilizing and cutting down our ground forces will change; but certainly this is no time for feeling that everything is all right and that we can reduce our ground forces. I remember that in the House of Representatives not too long ago we almost demobilized right before World War II. I remember that the vote on extending the draft was 210 to 211. I was happy indeed to hear the Speaker announce that the motion to send the bill back to committee had lost. I have criticized my own party for demobilizing after World War II. That brought on Korea. I certainly do not want the same thing to happen at this time. We cannot afford to have it happen again.

Mr. SYMINGTON. Mr. President, I was much interested in the debate in regard to our defenses, which occurred today on the floor of the Senate. Such debate is, in my opinion, healthy and constructive. We should have more of it.

Increasing concern about our defense capabilities is now being expressed by many people, through many information media.

Everybody appears to favor standing firm in Berlin.

What is becoming hard to understand is "how?" and "with what?"

The President says we will not give an inch, a position in which he has full support of the American people.

The Secretary of Defense states the administration is going ahead with its plans to cut the manpower strength of the Army and Marine Corps; and at

times he asserts he supports those reductions.

But when asked why the manpower cuts were delayed last summer, in view of the Quemoy and Lebanon crises, and why they were now going ahead, despite the Berlin crisis, the Secretary of Defense replied:

> Any rationalization I could give you isn't one I could regard with any respect myself.

This is an honest statement from an honorable man, and gives but additional proof that despite the growing world crisis, budget considerations continue to dominate defense planning.

Several weeks ago, the Secretary of Defense admitted the Russians were being allowed to attain a three-to-one lead over the United States in intercontinental ballistic missiles.

A few days ago, however, when House Majority Leader JOHN MCCORMACK observed to Secretary McElroy, "You have also stated that within a year or two you expect the Soviet Union to be considerably ahead of us in intercontinental ballistic missiles," the Secretary of Defense replied, "I do not expect they will."

There is more of this confusion.

On January 29, the head of the Strategic Air Command—SAC—General Power, testified before the Senate committee, "We do not have any air alert." General Power added that we should "get one going just as soon as we can. We have the capability, have proven the feasibility of an airborne alert."

In his press conference last week, however, President Eisenhower stated that an air alert would be really worse than useless.

Last week the press reported that Secretary McElroy told his press conference:

> We do have about one-third of our medium and heavy bombers on ground alert. That is what is regarded as the military requirement at this time.

But, according to the press, other officials in the Pentagon promptly denied this assertion by the Secretary. These officials stated that the goal of one-third SAC readiness will not be achieved for about 1 year.

Apparently in an effort to justify our current lack of readiness, the Secretary stated that a surprise nuclear attack would be virtually impossible in the foreseeable future.

The press promptly noted that this appeared to undercut President Eisenhower's frequently voiced concern about a surprise attack.

There is more of this confusion—much more of it.

In a speech several weeks ago, at Charleston, S.C., Admiral Burke added to the confusion by announcing:

> Whether the U.S.S.R. has several times as many missiles as the United States is academic.

But on January 29, the head of the Air Force Ballistic Missile Division, Gen. Bernard Schriever, stated:

> In view of the very dangerous situation with respect to a ballistic missile threat, I think we should build greater ballistic missile forces [ICBM].

In further reference to the Charleston talk, Admiral Burke stated:

> The probability of a nuclear attack is remote.

But on the television program "Meet the Press," only yesterday, the Secretary of Defense stated that in all probability any possible war over Berlin would be a nuclear war.

It would appear, therefore, that we, our allies, and the Sino-Soviet imperialists know today that—

Despite world conditions and our announced intentions not to give an inch, we plan to continue with the reduction of our conventional forces.

Despite the sworn testimony of the head of SAC, we plan to continue without an air alert.

There is a difference of opinion about the current status of our ground alert.

There is a difference of opinion between the President and his Secretary of Defense as to the danger of a surprise attack.

There is a difference of opinion between the Chief of Naval Operations and the Air Force Ballistic Missile Division head about the dangers arising from our current plan to let the Russians get a long lead in intercontinental missiles.

There is a difference of opinion between the Secretary of Defense and the Chief of Naval Operations as to whether, if an unacceptable block is thrown on us in Berlin, the result will be a conventional war or a nuclear war.

On some occasions the Secretary of Defense has approved further reductions in our Army and Marine Corps. But at other times he has questioned such action.

The Army Chief of Staff has made clear that he does not believe the present size and modernity of our Army is adequate to meet its oversea commitments.

In an article, by Mr. James Reston, published yesterday in the New York Times, the President's meeting of Friday with leading Members of Congress was reported in considerable detail. Included in that report were details about the strength of our forces now in Europe, with their families, as against the strength of the Communist forces.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD an excerpt from the article; the excerpt has to do with information about those forces.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

> In the meeting that followed, the President asked Allen Dulles to give an intelligence report on Berlin. Mr. Dulles had a large map of the area on which were written the Soviet and East German Communist force levels in the area: 315,000 Soviet troops in East Germany and 15,000 Soviet policemen; 75,000 East German troops and 45,000 East German policemen.
>
> The map did not show the Western forces in Berlin and Western Europe, but there are 4,000 United States troops in Berlin and an additional 7,000 from Britain and France.
>
> In addition, there are five U.S. divisions in the rest of Western Europe: three pentomic divisions and two armored divisions, which are equipped with M–48 Patton tanks, atomic cannon and Honest John and Redstone missiles.
>
> Officials here talk about a maximum of 21 North Atlantic Treaty divisions in Western Europe, compared with 175 Soviet divisions in Eastern Europe, but even the 21 in the West are either dispersed, as are the French in North Africa, or undermanned. This compares with the 96 divisions the Allies agreed to provide to the North Atlantic Treaty area (excluding Greek and Turkish forces) in February 1952, 7 years ago.

Mr. SYMINGTON. Mr. President, the world now knows that President Eisenhower intends to go ahead with these heavy reductions in our military forces; that "he was not going to halt the present program in any way, and he was definitely not convinced that it was necessary to increase the military program."

Mr. President, in order to bring out the degree of the President's insistence on further reduction in our military strength at the same time that he asserts we will not "give an inch," I ask unanimous consent that another excerpt from the New York Times article of March 9, by Mr. Reston, be printed at this point in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

> After Mr. Dulles had given the report on Berlin, the questioning started with Mr. VINSON, a 75-year-old Georgian who has been in the House since 1914, addressing the President.
>
> Was it not inconsistent, he asked, to go forward with the administration's cuts in the manpower of the Armed Forces in the light of the disturbing report just given to the group by Mr. Dulles?
>
> The President said it was not. He expressed confidence that, while the Berlin crisis was serious, the United States had enough atomic and conventional forces to deal with it.
>
> Senator FULBRIGHT asked whether, even if the President was satisfied that he had enough forces, it was good psychology to cut the United States ground forces just at the point when Washington was telling Moscow that we would not "give one inch" on our rights in that city and were prepared to fight, if necessary, to preserve our rights?
>
> OPPOSED EMERGENCY ACTION
>
> The President said he appreciated the psychological problem but was nevertheless determined to go right on with his plans to cut the ground forces as outlined early this year.
>
> Moreover, he added, he did not think it was wise to give an impression of emergency action. He did not think it was wise to stir up the country too much. He was not going to evacuate any Americans from any posts overseas; he was not going to halt the present program in any way and he was definitely not convinced that it was necessary to increase the missile program.
>
> Time and again General Eisenhower was reported to have come back to the thesis that the Russians were working on a strategy of "spending the United States into bankruptcy."
>
> Whenever it was suggested that the Nation should step up its missile program or, particularly, that it increase its conventional Armed Forces to be able to deal with any military outbreak around Berlin without using atomic weapons, he returned to the thesis about not getting caught in the

Communist strategy of trying to spend us broke.

Thus there developed in the conversation at the White House a central question: What was the first priority? Was it to keep the forces in balance to be able to deal with Soviet conventional military threats without using atomic weapons? Or was it to keep expenditures for both missiles and conventional forces down so we could balance the budget?

Mr. SYMINGTON. Mr. President, these actions, admittedly in the interest of a balanced budget, are obviously becoming a matter of increasing apprehension, to all free people.

The reaction on our allies is well described in a paragraph of an article by Dr. Henry A. Kissinger, published in yesterday's magazine section of the New York Times. Dr. Kissinger is associate director of the Center for International Affairs at Harvard University, the author of the now famous book, "Nuclear Weapons and Foreign Policy," and executive director of the Rockefeller report on our relative military position. In his article, Dr. Kissinger states:

Because many Europeans doubt our steadiness and reliability, the repeated declarations that the United States will stand firm on Berlin have proved relatively ineffective, all the more so as our deeds are so inconsistent with our words.

It is difficult to convey determination while reducing our armed forces and focusing the national attention on a balanced budget.

That is the way these actions impress our allies.

Should we not consider also how they impress the Communists, as the latter continue their push against the walls of freedom.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD an editorial entitled "Missiles and Diplomacy," from the current issue of Life magazine. I hope my colleagues will read the outstanding article by James Shepley to which the editorial refers. The article is published in the same issue of Life magazine.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

MISSILES AND DIPLOMACY

Turning from the immediate crisis to a longer term problem: Is the President's defense budget too small? There is a strong argument, made on page 117, that it should be reopened and enlarged to offset the "missile gap" of 1961–65, during which critical years the Russians will otherwise enjoy a 3-to-1 edge in installed ICBM capacity. By doubling our Atlas orders for those years at a cost of some $600 million a year, we could reduce the chances that Russia might get the drop on us.

The arguments are not all on one side. Since our present nuclear delivery systems are enough to destroy everything in Russia, why pay more? Filling the gap would be to indulge in what is gruesomely known as overkill. The argument proceeds to technical questions of launching times, warning margins, and accuracy probabilities, which we shall not pursue here.

But two observations we will make. First, budgetary considerations should not be allowed to decide the issue. Second, there are political reasons for filling the gap that the President and Secretary McElroy may have underestimated.

As to the budget, we wholeheartedly support the President's determination to balance it—and as close to his $77 billion estimate as possible. But the defense component of that budget ($40.9 billion) was set before the case for more Atlas squadrons had been thoroughly made inside the Pentagon. It should therefore be reopened on its own merits. If 200 more Atlases are a good insurance buy, the annual $600 million premium can certainly be found. If it cannot be found elsewhere in the present military budget, then it can be found in the $36 billion scheduled for civilian spending. The farm program alone is budgeted at $6 billion. Farmers, like most Americans, would presumably accept a 10-percent cut for the sake of survival.

The budget ceiling must remain at a Caesar's-wife distance from any suspicion that it is controlling in a major defense policy decision. We can afford what we need—and without unbalancing the critical 1960 budget.

Our second observation is that the physical security of the continental United States is not the only thing at stake here. Regardless of any security risk, there is also a grave political risk in accepting a second-class role in the missile race.

"Atomic missile blackmail" is a new and dangerous variable in the equations of the cold war. The United States, we trust and predict, will not succumb to it so long as we have any retaliatory power at all. But unlike the peace we are trying to keep, the courage of an alliance is not indivisible.

For all its NATO installations, Europe as a whole could no more defend itself against an all-out Soviet assault than could the city of Berlin. Its security and self-confidence depend on the commitment to NATO of U.S. policy and U.S. arms—in short, on SAC. Every politician in Europe knows this whether he admits it or not. Thus the U.S. defense budget is an international issue. A marked Soviet superiority in missiles might or might not endanger the continental United States, but it certainly could mean a marked deterioration in the political morale of NATO's weaker links. Already there is an alarming reluctance (except in Britain) to accept ICBM's lest they make Europe too conspicuous as a Soviet target.

No doubt the Russians are as reluctant as we are to fire an ICBM in anger. But they are ready enough to brandish them for political effect. When Marshal Malinovsky recently boasted, "Your arms are to short"—meaning our ICBM's—he was speaking not as a military tactician but as a Communist propagandist. If we are going to play in the missile league, neither a hedgehog nor a poormouth stance is appropriate. The size, range, and numbers of our weapons are part of the strength of our diplomacy, essential to keeping followers of a strong American dipomatic lead. If our allies should suspect us of their own worst failing in NATO, namely, military cheese-paring for the sake of domestic politics, their confidence in the alliance would sink to the level of their confidence in themselves.

Mr. SYMINGTON. Mr. President, it woud now appear to some that the President is giving a higher priority to balancing the budget than he is to meeting the growing threat of the Communist conspiracy.

In this connection, it is interesting to note a statement in a thought-provoking speech made last February 14 by the senior Senator from Vermont. He said:

Abraham Lincoln had to choose between conflicting values, and he chose the greater ones.

He could have balanced the budget, and lost the Union.

He could have held down the national debt, and perpetuated slavery.

And no doubt had he chosen the latter course, he would have been applauded by many solid citizens of that day.

People are beginning to realize, as was stated editorially yesterday in the Washington Star, that the accuracy of many predictions, made after sputnik, that the balance-of-power in the military sense had shifted to the Communist bloc has become evident; because, as the Star states, "the Soviet Union is acting with a cool confidence and single-mindedness that did not prevail on earlier occasions."

If President Eisenhower is attempting to justify further the reduction of our conventional forces on the ground of the need for economy, then why does he not take those steps toward the further service unification which he himself advocated some 15 years ago—and in that way modernize the structure and functioning of our Defense Department on the basis of progress, instead of continuing to let it operate on the basis of tradition?

Mr. President, some of us have more confidence in the basic strength of our private enterprise system than apparently do those who fear that an adequate defense program will spell bankruptcy.

Some of us believe that a more effective use of our productive capacity would go further toward balancing the budget than will the current policy of retrenchment backed by this administration.

What faces us now, however, is what we plan to do in the few weeks remaining before May 27, or June 27, or July 27, as pointed out so ably on this floor on February 26 by the junior Senator from Connecticut [Mr. DODD].

As the people of the world hear and read all these contradictory statements, are not they justified in asking what has happened to the wise policy of the late great Theodore Roosevelt, who said, "Speak softly but carry a big stick."

At this point I ask unanimous consent that there be inserted in the RECORD two articles from the St. Louis Post-Dispatch of February 6 and March 7, by Gen. Thomas Phillips, one entitled "McElroy Has Admitted that United States will have 200 ICBM's in 1962 Against 600 for Russia," and the other "Conflict Over Berlin Could Not Be Limited, McElroy Says"; and also an article by Jack Raymond from the March 7 New York Times on the subject of air alert.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the St. Louis Post-Dispatch, Feb. 6, 1959]

MCELROY HAS ADMITTED THAT UNITED STATES WILL HAVE 200 ICBM'S IN 1962 AGAINST 600 FOR RUSSIA—BUT PLANNERS NOTING OUR FAILURE TO THINK AS FAST AS TECHNOLOGICAL REVOLUTION DEMANDS FEAR SOVIET WILL HOLD UNBEATABLE MARGIN BY 1964

(By Brig. Gen. Thomas R. Phillips, U.S.A. (retired)

WASHINGTON, February 6.—Secretary of Defense Neil H. McElroy privately, and in executive testimony before the Senate Armed

Services Committee, has admitted that the United States will have 200 intercontinental ballistic missiles in 1962, while Russia will have 600. He believes that our diversified arsenal of other weapons, including our strategic bombing force, will make up for this particular missile lag.

His estimates for the United States include 90 Atlas ICBM's and 110 Titans, 9 and 11 squadrons respectively. Atlas development is proceeding satisfactorily. The 90 Atlases can be expected to be ready, although the first fully operational squadron will not be ready, according to industry sources, by the first part of 1960 as McElroy has asserted. The first fully operational squadron will be ready, if all goes according to plan, in the fall of 1960.

The Titan ICBM, being developed by Martin Aircraft, was originally on a schedule about 1 year behind Atlas. This has slipped to 18 months behind. All attempted live tests have failed to date.

INDICATION OF ERROR

If the slippage is not made up, the first Titan operational squadron will not be in readiness until early in 1962. This indicates, obviously, that the McElroy schedule of having 11 Titan squadrons operational in 1962 will not be met.

In contrast the McElroy estimate of 600 Soviet ICBM's at that time is on the low side. Such estimates, where the other person's plans and intentions are not known, are usually made with considerable latitude, with a bottom floor and a top ceiling. This estimate appears to be a bottom, rather than a median or top estimate.

A great many officers in the Air Force, as well as planners from other services, are not at all satisfied that the diversified U.S. arsenal of other weapons can make good the missile lag. It is their opinion that the significance of the military revolution made by ballistic missiles has not penetrated the thinking of the average officer.

Maj. Gen. Bernard A. Schriever, commanding the ballistic missile division of the Air Force, is one such. Before the Senate Preparedness and Space Subcommittees, he was the lone official to question the adequacy of the U.S. missile program.

CITES GREAT DANGER

"In view of the very great danger," he told the subcommittee, "we should be building larger ICBM forces."

One scientist, speaking of the lag in understanding the importance of long-range ballistic missiles, said that we are sociologically backward in the midst of an exploding technological revolution. The minds of the users of the new weapons, in other words, have not kept pace with the possibilities of the weapons.

In contrast, Soviet military men seem to have retired into their ivory tower in the early phases of missile development and to have thought through the implications and possibilities of the missile revolution in war.

If the assumption is accepted that the United States should proceed to manufacture more ICBM's on an urgent basis and as early as possible, it will be necessary to increase the orders for Atlas.

When the Titan project was initiated 1 year after the Atlas was given the green light, it was thought that Titan was a more sophisticated approach and would have considerable advantages in range and payload. As Atlas has been improved during development, most of its disadvantages in comparison to Titan have disappeared.

PERFORMANCE RATING

Atlas will have performance within 2 percent or 3 percent of Titan. Both missiles use some Rocketdyne engines clustered two together in the first stage. The Atlas has a sustainer engine of 60,000 pounds of thrust clustered with the other two engines. The Titan has a second stage rocket with 60,000 pounds of thrust.

The Titan was planned to use inertial guidance, whereas Atlas has a combination of inertial and external radio guidance. The external, or redundant, guidance of the Atlas makes it difficult to put it in underground protected launching pads.

Atlas, however, after the first four squadrons have been built, will be changed to all inertial guidance and can then be placed underground as easily as any other missile.

It is, therefore, feasible to increase the production of Atlas. In view of the minor advantages still to be expected from Titan, the question has been raised whether it would not now be better to go all out for Atlas and to stop further development of Titan.

If heavier loads are desirable, and Soviet missiles do carry warheads of three times the explosive force of U.S. intercontinental ballistic missiles, a second stage can be placed on Atlas. This is already under way in plans to use the Atlas as a first-stage booster with a second-stage rocket for space probes by the National Aeronautics and Space Administration.

APPARENT ADVANCE FADES

Three and one-half years ago, when the decision to build Titan in addition to Atlas was made, its design seemed to be much more sophisticated, a definite step forward. With the greater knowledge and experience of today, it no longer appears to be a material advance.

Real advances can be made only when a family of rocket boosters of various thrusts has been developed. Except for second-stage engines and the million-pound-thrust engine being developed by NASA, no family of boosters is under way.

Instead, the United States is pinning all its hopes on the solid-propellent Minuteman missile. This is the magic bird-in-the-bush that is keeping us from doing all possible with Atlas, which is the bird-in-the-hand. Planners who look at our hesitation on missiles, our failure to think as fast as the technological revolution demands, state their misgivings that by 1964 the U.S.S.R. will have a military advantage of such proportions that we never can overcome it.

[From the St. Louis Post-Dispatch, Mar. 7, 1959]

CONFLICT OVER BERLIN COULD NOT BE LIMITED, MCELROY SAYS—RUSSIA WOULD ALMOST INEVITABLY BE INVOLVED, HE ASSERTS—U.S. PLANS IN EUROPE BASED ON MAJOR WAR

(By Brig. Gen. Thomas R. Phillips, U.S.A. (retired)

WASHINGTON, March 6.—Secretary of Defense Neil H. McElroy warned yesterday that if the Berlin crisis leads to conflict, the Soviet Union will almost inevitably be involved.

"I do not see how such a conflict in Europe would be kept to limited war," he said at his press conference. Our plans for war in Europe, he said, have always been based on the requirements for a major war.

If we mobilize, McElroy declared, it will be for more than fighting a limited war in East Germany over Berlin.

McElroy refused to discuss any Pentagon plans, declaring that it obviously would be improper to do so. He said that various contingencies are being considered now on the staff level.

Asked about air alert for the Strategic Air Command, the Secretary of Defense declared that the Joint Chiefs of Staff have considered it, but do not regard it as necessary at this time.

About one-third of SAC's bombers are on 15-minute ground alert now, he added, and an air alert can be ordered at any time it appears to be necessary.

SECURITY COUNCIL SESSION

A few hours before his press conference McElroy had attended a special meeting of the National Security Council, which had dealt with the Berlin crisis, and the unusual step had been taken to announce the subject of the meeting. Coming after his meeting with the President and other members of the NSC, McElroy's statements were given substantial weight as an indication of U.S. policy and outlook.

McElroy said that at this stage the Berlin crisis is no more serious than were the Quemoy and Lebanon crises last year.

"All of them have been potentially inflammatory," he said, "and so is this one." That is the exact reason for the executive branch of the Government to move with great deliberation, but with firmness.

McElroy said in reference to a possible Berlin blockade that it was not a situation where it appeared a solution could be worked out with ground forces. He declared, however, that no plans had been made for an airlift at this time. The solution, in case of a blockade, he said, might be a combination of air and ground or either singly.

NUCLEAR WEAPONS

Asked about the use of tactical nuclear weapons, the Secretary said that nuclear weapons of all kinds will be used as required for military purposes.

But, he added, "There is reluctance to use them unless large action is indicated, but we shall continue to feel free to use them—always only by authorization of the President—but I hope we won't reach the action where that kind of weapon is required."

Asked whether the United States had given West Germany nuclear-capable weapons, that is, the delivery systems for nuclear weapons, McElroy said we had not. He admitted, however, that West Germany had bought the Matador, a winged missile that can carry a nuclear warhead 600 miles, and Nike air defense missiles.

The latter, while built primarily for use as air defense weapons, can be armed with nuclear warheads and used against ground targets.

The Russians have objected to the Nike-Hercules air defense missile just as strongly as they have to supplying Germany with surface-to-surface ballistic missiles.

DISCOUNTS SURPRISE ATTACK

The Secretary discounted the capability of the Russians to launch a surprise attack on the United States. To coordinate such an attack, he said, would require a large amount of radio communications, which can be monitored, and considerable movements of troops and aircraft.

He believes, with missile launching sites dispersed as greatly as they must be, together with all the other requirements of preparation for war, that a surprise attack is unlikely. The Russians appear genuinely interested, he said, in reaching an agreement that will eliminate the possibility of a surprise attack.

If the Russians were making obvious military preparations, McElroy said, the situation would "pose a very serious problem for the President." The choice whether to strike the first blow, if to all appearances a potential enemy was making preparations for a surprise attack, would be "very, very rough," he said.

NOT RECALLABLE

McElroy said one bad thing about missiles was that they are not recallable once they have been launched. In contrast, bombers can be alerted and started on their way and still be brought back up to the last minute.

McElroy failed to clarify his remark made Monday on Capitol Hill that while this country's policy is that it will not strike the first blow in a war, this might not always be true.

Plans to reduce the Army and Marine Corps strength to 870,000 and 175,000 respectively have not been changed, McElroy stated. These levels to be reached June 30, will require a further reduction in the Army of 20,000 men and a lesser number in the Marine Corps.

He admitted that this will require the elimination of one division from the Strategic Army Corps. Although the Secretary did not say so, the division to be eliminated is ineffective as a part of the STRAC force, because it is exclusively engaged in training and rotating troops to overseas units.

Queried about his personal plans for the future, McElroy said that he planned to remain as Secretary of Defense for most of the current year and until the 1961 budget had been established in its major outlines. If there were an emergency, however, and the President asked him to continue as Secretary of Defense, he would do so, McElroy said.

[From the New York Times, Mar. 7, 1959]

AIR ALERT GOAL STILL YEAR AWAY—PLAN FOR 600 U.S. BOMBERS TO BE READY IN 15 MINUTES LINKED TO BASE BUILDING

(By Jack Raymond)

WASHINGTON, March 6.—A defense system that will permit at least 600 bombers, one-third of the Strategic Air Command's striking force, to be ready for takeoff in 15 minutes is expected to be in operation in about a year.

Authoritative sources said today that the alert plan was adopted as a goal more than a year ago, in response to Soviet missile achievements.

In the meantime, demands have grown for a system under which a certain number of nuclear-armed bombers would always be aloft as a precaution against surprise attack.

The administration has rejected the airborne-alert proposal as it has rejected demands that the United States match the Soviet Union in the production of intercontinental ballistic missiles.

INQUIRY PLANNED

However, Representative GEORGE H. MAHON, chairman of the House Defense Appropriation Subcommittee, said today that his committee would explore the controversy fully.

"We need to know much more about it than anybody seems to know," the Texas Democrat said.

Mr. MAHON said that he has been pushing the Air Force for information in connection with the airborne-alert proposal. Representative DANIEL J. FLOOD, Democrat, of Pennsylvania, an advocate of the proposal, estimated that it would cost about $1 billion a year to carry out.

Officials conceded that some confusion had developed in the administration's portrayal of the actual status of the Strategic Air Command's readiness.

M'ELROY'S STATEMENT

A statement by Neil H. McElroy, Secretary of Defense, was cited. The Secretary told his news conference yesterday that about one-third of the SAC force was on ground alert now.

"We do not have an air alert because the Joint Chiefs of Staff do not find a military need for an air alert," Mr. McElroy said. "We do have about one-third of our medium and heavy bombers on 15-minute ground alert. That is what is regarded as the military requirement at this time."

Officials said that the Secretary had been mistaken in his belief that the one-third goal has been achieved. The goal of one-third ground readiness—that is, with crews and planes ready for takeoff within 15 minutes—depends on a base dispersal building program that will not be completed for another year, authorities said.

The present 15-minute alert capability of SAC is a secret, but it is understood to include 400 aircraft. One-third of the SAC is 600 planes.

The 15-minute warning time has been adopted as a standard on the premise that that would be all the warning the United States could expect should the Soviet Union decide to launch a surprise attack with intercontinental ballistic missiles.

It is estimated that a 6,000-mile ICBM, armed with a nuclear warhead, could reach its target in about 30 minutes.

There was also reaction to Mr. McElroy's statement that a surprise nuclear attack, with all the preparations that it would entail, was virtually impossible in the foreseeable future.

First, it was said that Mr. McElroy's statement, which he said had been supported by the Joint Chiefs of Staff, appeared to undercut President Eisenhower's frequently voiced concern about surprise attack.

It was recalled that the Soviet Union, only with reluctance and with a certain amount of ridicule, agreed to negotiations to prevent surprise attack.

Second, the Secretary's statement was regarded as an effort to refute criticism of the administration's policy on the production of intercontinental ballistic missiles.

According to this policy, the United States will not attempt to match the Soviet Union ICBM for ICBM, although it is expected that Moscow may produce as many as 500 or more by 1962.

Pentagon sources confirmed today that an Air Force study has been presented to the Secretary of Defense calling for the production of some 400 ICBM's by mid-1963 instead of about 200, as presently planned.

Mr. SYMINGTON. Mr. President, I also ask unanimous consent to have printed two editorials from the Washington Post, entitled "On and Off," March 6, and "The Missing Rudder," March 7.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 6, 1959]

ON AND OFF

If it were not so deadly serious it would be funny. On Wednesday President Eisenhower appeared to take a more optimistic if somewhat malfocused view of the differences with the Soviet Union, despite Mr. Khrushchev's recent rudeness and rigidity. Yesterday morning, as if in response to criticism that the administration does not appear to be taking the situation seriously enough, Mr. Eisenhower held a special meeting of the National Security Council on Berlin and the German problem—just after Mr. Krushchev had turned on the warm spigot in Leipzig and said that the deadline on Berlin might be postponed. Then yesterday afternoon, amid the reports that the administration was considering some sort of gesture of preparedness, Defense Secretary McElroy asserted that there are no plans for partial mobilization or for deferring military manpower cuts, although other steps are being considered.

It is all very confusing. Of course, the situation itself is confusing, no doubt as the result of a deliberate tactic by Mr. Khrushchev. It is not easy to draw the fine line between prudence and panic, between restraint and recklessness. One can readily have sympathy with the President and Secretary McElroy in their wish not to seem either frightened or provocative. But the possibilities in Berlin are frightening, even if, as everyone must hope, they do not come to pass. There is a danger that in failing to give some further indication of serious preparation now the United States will seem not confident but complacent.

Mr. McElroy hinted strongly, to be sure, that something is being done to strengthen forces other than ground forces, presumably meaning air forces. He also implied that any war over Berlin could not be kept limited, and that hence any trouble over Berlin might invite an all-out response.

Certainly it is difficult to imagine any direct clash with the Russians remaining limited for very long. The United States must consider the grave possibility of large nuclear war. But is there not also a danger in seeming to adopt a policy that would convert any conflict with the Russians into all-out war even though the circumstances might argue for extraordinarily efforts to limit it? There would always be the question whether, in the case of a skirmish over a stopped convoy or the like, we would in fact push the button for nuclear war that also might result in destruction being rained on the United States. The curious Mr. Krushchev, an inveterate gambler, might be tempted to find out—to the woeful detriment of all of us.

What should be done to beef up the limited war forces in Europe at this particular time is debatable. Nevertheless, Mr. McElroy's announcement that Army and Marine Corps manpower reductions will proceed as scheduled is psychologically harmful, whether or not these will have any influence on the forces that could be brought to bear in NATO. We suspended the cuts at the time of Quemoy, but won't do it over Berlin. This seems to say that we just won't pay the price for a limited war force, thereby virtually insuring that any war would be all-out.

The same point is applicable respecting the rather futile argument over who would strike the first blow. Mr McElroy asserted that we would not commit suicide; that we would have means of detecting a coming Soviet blow and taking action. But of course after Soviet missiles had been sent on their way, American retaliation would not be very consoling even if it would affect the conclusion. A deterrent is successful only if it deters any sort of attack or plan for attack in the first place. It is here that the attitude of the Administration, that we cannot afford an across-the-board defense, is so distressing and damaging.

[From the Washington Post, Mar. 7, 1959]

THE MISSING RUDDER

It is time, we think, for the Democratic majority in Congress to assert the leadership that has been lacking from the administration in the looming crisis with the Soviet Union. This country and its Allies may very shortly face an extremely touchy and demanding military problem over Berlin. It will take far more than vague reassurances of bipartisanship, such as emerged from congressional leaders after their meeting with the President yesterday, to convince the Allies and the Russians that American intentions are backed with carefully conceived plans. Generalizations about standing firm and rallying around the flag really do not mean very much.

Perhaps the administration is doing much more than it acknowledges publicly. If American policy were to zig every time Mr. Khrushchev zagged, the country soon would become seasick. It is easy to be too impatient and too critical. Nevertheless, the administration's public position has seemed to alternate between optimism about negotiations and the ill-considered assertion of Secretary McElroy that any war over Berlin would be of the all-out variety. With Mr. Dulles ailing, the administration gives the impression that it is operating without any consistent and thought-out guidance in this crucial area of foreign affairs. And appearances can be terribly important.

What can be done? One would think that the first thing the administration would do

would be to halt the scheduled reductions in Army and Marine Corps manpower. Such moves as the prospective cut in the Strategic Army Corps from four to three divisions have a devastating psychological effect at this time. They seem to say that this country deliberately prefers all-out nuclear war to limited war, in the unhappy event that a clash should come, and is constituting its forces accordingly.

Beyond this, Adlai Stevenson has suggested in a speech in Boston that a resolute stand against interference in Berlin be coupled with exploration of a possible settlement in Europe "less unstable and explosive than the present situation," and that Democratic leaders in Congress attempt to focus public opinion. Former Secretary of State Dean Acheson in an article written several weeks ago advocated the strengthening of conventional NATO forces in Europe. Senator JACKSON has called for the mobilization of four or five additional Army divisions to undergird diplomacy.

Some or all of these things may be necessary. Of course, Congress cannot itself frame foreign policy or conduct negotiations, for the responsibility still rests with the administration. What it can do is urge detailed military planning for defense of land access to Berlin and any clash with the Russians, and encourage Western counterproposals on the larger differences with the Soviet Union.

But the underlying need is not so much partial mobilization, however important that may become in the present situation. It is, rather, the achievement and continuation of military parity with the Soviet Union. This is a long-range rather than a short-range problem. Ever since the first sputnik Soviet leaders have thrown their weight around. The administration has compounded its miscalculation on the significance of the earth satellite with a willingness to accept numerical inferiority in missiles and an unwillingness to prepare adequately to cope with limited war.

It is this, more than anything else, that is undercutting American diplomacy; and it is here that leadership is most necessary. Far beyond the particular crisis over Berlin, if we are to avert war and reach any sort of eventual settlement with the Russians, this will have to stem from military equality. The most important thing that Democratic leaders such as Senators JOHNSON and FULBRIGHT could do to strengthen confidence in the country's position, in this newspaper's judgment, would be to serve notice of their intention to increase the military budget so as to overcome the missile gap and provide for more adequate limited war preparedness.

Mr. SYMINGTON. I also ask unanimous consent to have printed at this point an editorial by Bob Hotz from Aviation Week, February 23, entitled "Will We Close the Missile Gap?" and a Roscoe Drummond article from the March 6 issue of the New York Herald Tribune, and an article only this morning by Miss Marguerite Higgins in the same paper entitled "After Ike, the Deluge?"

There being no objection, the editorial and articles were ordered to be printed in the RECORD, as follows:

[From Aviation Week, Feb. 23, 1959]

WILL WE CLOSE THE MISSILE GAP?

The recent congressional hearings on the current United States defense posture and the program planned for its future development in an era of revolutionary technical change in weapons development have thrown a glaring spotlight on three facts vital to the future survival of this Nation. They are:

1. The Soviet Union will have a numerical superiority of 3 to 1 in intercontinental ballistic missles for at least the next 3 years. This is the most conservative estimate of our national intelligence agency and has been reduced from earlier estimates without much explanation of why such reductions were rather hastily made. Other sources with access to the same intelligence data dispensed in secret briefings, such as Senator STUART SYMINGTON, unequivocally state the admitted Soviet superiority is actually 4 to 1. Based on our own sources, we are inclined to regard even Senator SYMINGTON'S estimate as being unduly conservative.

2. The United States has no present plans for attempting to close this ICBM gap befor 1962 at the earliest. This was made abundantly clear by Defense Secretary McElroy in his testimony on Capitol Hill. Mr. McElroy also made it clear that plans for closing the gap by 1963 were based largely on the hoped for operational use of new missiles that are still in the early research and development stage and which, in fact, may not meet what many observers consider to be unrealistic operational timetables.

3. During this period between now and 1963, the United States strategic deterrent will depend upon a mixed bag of weapons consisting primarily of Strategic Air Command's manned B–47 and B–52 bombers. New weapons scheduled to phase into some operational capability to assignment SAC's bombers beginning in 1960 include the USAF Atlas ICBM and the Navy's submarine-launched Polaris IREM, with the USAF Titan and Minuteman ICBM's scheduled to appear later. This position again was made clear in Mr. McElroy's testimony before Congress, although some of his earlier optimistic statements on operational capability dates of new weapons were admitted to be erroneous and were corrected to later dates for the official record.

SPEARHEAD CHANGES

Now, it is a hard technical fact that must be faced that the sharp spearhead of our strategic deterrent based on the doctrine of instantaneous, massive retaliation has passed from the 600-mile-per-hour manned bomber to the 18,000-mile per-hour ICBM. And, although other elements will still play a supporting role, it is the quantity, operational development and reliability of this megaton-tipped ICBM spearhead that is the most significant factor in the immediate future balance of military power.

With the present planned and publicly announced Defense Department policy, we are deliberately allowing the Soviet Union to take a significant and commanding superiority in the most significant weapon for the next 3 to 5 years. Our announced ICBM program for the next 3 years will see 9 squadrons of Atlas and 11 squadrons of Titan ICBM's emplaced and operational by 1963—a total of only 200 missiles. From the officially confirmed intelligence estimates, this justifies the conclusion that the Soviets will have an operational ICBM capability expanding from the present to at least 600 ICBM's by the end of 1962. It did not take Nikita Khrushchev's public announcements that the Soviets are in series production on their ICBM to relay this fact to U.S. sources. And the great ICBM production complex in the Dniepropetrovsk area hardly lends itself to concealment even in a police state such as the U.S.S.R.

ATLAS CAPACITY

In the face of these officially admitted and well-documented facts, it is difficult to comphehend why the only ICBM production line now operating in this country is operating at hardly more than 40 percent of its current tooling and plant capacity. We have listened to all of the arguments against increasing Atlas production to its current capability to make the only attempt now feasible to cut the Soviet missile superiority to a less dangerous margin in the next 3 to 5 years. None of them really hold water in the face of facts.

The Atlas is the only ICBM that has demonstrated reasonable systems reliability and mission performance over intercontinental ranges. Its initial operational version, the Atlas D, has a range of more than 7,500 nautical miles, capable of reaching any target in the Soviet Union from any spot in the United States. It has a development growth stretch in its propulsion system to accommodate even larger warheads for the future. It is already programed for inertial guidance and its internally pressurized structure can be deployed in concrete silos or any other type of hardened base utilizing maximum dispersal potential.

The total cost of an immediate maximum acceleration of the Atlas production program, plus the accelerated base construction and crew training operations required, is less than the $3.5 billion we taxpayers have already spent to store surplus corn in the past few years. Its immediate effect on the fiscal 1960 budget would probably not exceed $500 million.

It is high time that Congress, the Defense Department and the White House faced up to the grim facts they have publicly spread on the record. They must immediately tackle a concrete plan to narrow the ICBM gap with the Soviet Union in the quickest and only feasible method left within the critical time period we face. The alternative is to allow the Soviets to build an ICBM force capable of smashing both our own small ICBM capability and the grounded bombers of SAC in one swift 30-minute blow.

ROBERT HOTZ.

[From the New York Herald Tribune, Mar. 6, 1959]

PRESIDENT URGED TO TAKE SECOND LOOK AT ICBM POLICY

(By Roscoe Drummond)

WASHINGTON.—There are sober, somber, weighty, and mounting reasons why the Eisenhower administration should, and I believe will, want to take a second hard look at its decision to allow the Soviets—who are getting more truculent, not less—to maintain a 3-to-1 lead in intercontinental missiles during the next 3 years.

There is plenty of evidence that the American people are far from persuaded by the line of reasoning advanced by President Eisenhower and Secretary McElroy and are not satisfied with the decision.

If this decision was sound 6 months ago, it is being overtaken by events. Two of the events are these:

1. The ever larger use by the Soviets of their lead in missiles as a powerful instrument of diplomatic blackmail.

2. The necessity of being prepared for the worst over Berlin, and the increasing awareness that the best guarantee against the worst is to show that we are not going to permit the Soviets to upset the balance of military power.

I am not suggesting that I am enough of a military expert to assert that they Government is wrong in conceding a 3-to-1, 3-to-4-year missile lead to Moscow. But I believe it to be profoundly true that we cannot rest easy until the President faithfully reexamines this decision and offers more conclusive arguments to the public that it is a safe risk.

I am not suggesting that the mix of deterrent power which the United States now possesses is today, at this moment, unequal to the danger. I am suggesting that by deliberately allowing the Kremlin to enjoy its missile superiority, we are risking the future, the visible future, in a way which is un-

necessary, may be imprudent and could be a catastrophe.

I am not suggesting that it would be just ducky to unbalance the budget, that it doesn't matter how much we spend for military hardware. It does matter. It matters a lot. I am suggesting that if the President, after a new look at the Soviet missile menace, concludes that faster American production is needed, he could find the needed funds within the $40 billion Pentagon budget. I am suggesting that if the Democratic leaders in Congress really believe their own statements—that more missiles sooner are imperative—they could find the needed economies within the nonmilitary items of the budget.

There is no doubt that Mr. Eisenhower is right when he insists that our deterrent power today is massive and adequate. The deterrent of mutual terror prevails. But will it prevail next year and the next and the next if we concede the missile race to the Communists from here to 1964? We have already given the Soviets an 18-month lead. And what we do, or fail to do, today will determine how we stand tomorrow.

The overhanging danger of war—either because the Communists are prepared to risk war over Berlin or for any other reason—is not the only danger which comes from letting them hold the lead in the most persuasive and destructive weapon in the world, the ICBM.

The prime danger is that thereby we are inviting exactly the same kind of diplomatic blackmail which Hitler practiced on Britain and France in the thirties, and practiced successfully.

The prime danger is that our willingness to permit the Soviets to keep such a lead, and to keep it without our even challenging them, would induce much of the world to believe that we have neither the will nor the means to resist.

The missile technicians say that an average of less than $700 million a year for 4 years, put into stepping up the production of Atlas, would produce an insurance stockpile of ICBMs which would make all the difference between conceding dominance to the Soviets in the biggest deterrent of all and the awful gamble of not doing so.

The latest Gallop poll reveals the gravest public anxiety over the Russian lead in missiles and in rocketry.

I am convinced that the country would draw a sigh of profound relief if President Eisenhower announced that he was reexamining the administration's missile policy.

[From the New York Herald Tribune, Mar. 9, 1959]

AFTER IKE, THE DELUGE?

(By Marguerite Higgins)

WASHINGTON.—Today, in this cold-war Capital, the only thing that matches in intensity the high-spirited, bipartisan support for firmness in Berlin is the intensity of bipartisan misgivings over President Eisenhower's refusal to disturb the planned everyday pattern to show that this firmness is something more than bluff.

Although the Republican leadership has—so far—been loyally acquiescent in the administration line, it is certainly not just the Democrats who are wondering whether this is the right moment to press forward with cuts in Army, Navy, Marine, and Air Force manpower and whether this may not be an unfortunate moment to accentuate the acknowledged Soviet lead in short-range, medium-range, and long-range missiles by planning an even greater gap in the enemy's favor.

Nor are these misgivings confined just to the legislative branch. They are widespread in the Department of State. And, as you might expect, at the Pentagon the word "misgiving" is far too mild, at least for those who are not yet in a position so high as to be ideological captives of budget first. (For instance, to the distaste of congressional committees, such a person as General Twining, Chairman of the Joint Chiefs of Staff, has suddenly developed into an expert economist, an authority on what this Nation can and cannot afford.)

And at a foreign embassy the other day a disillusioned diplomat was heard to say: "Your President may have been a great hero of World War II, but so was France's Marshal Petain the hero of World War I at Verdun and yet lived to preside over his country's defeat." Now this is undoubtedly an exaggerated and exceptional attitude, but it is important as a sign of the times.

Now all of this does not relate solely to the erosion of the myth of President Eisenhower's military infallibility, although this, too, is an important political and historical reality.

What has caused the ebbing of this myth? Primarily, the march of events. President Eisenhower has said he knows more about the current military situation than anybody else, and few would question this insofar as access to the facts are concerned. But what is questionable is Mr. Eisenhower's application of the facts in making decisions on such things as numbers of bombers, missiles, and divisions in face of enemy strength. Bluntly, at issue is not the quantity of facts at his command but the quality of his judgments.

For, as the record shows, it was Mr. Eisenhower who, despite the facts at his command, was at the helm when this country deliberately gave up the quantitative and qualitative lead in the most advanced scientific weapon—the missiles—and, according to Defense Secretary McElroy, is deliberately planning to risk perpetuating that situation. And the record also shows that in President Eisenhower's administration the United States lost its position as the world's strongest power.

But was this decline of American power inevitable anyway?

Now, this is, of course, the main point and leads to another cause of misgivings.

For even if Mr. Eisenhower's military judgments have proved less than infallible, they would win a far less critical audience if they were based primarily on military reasons. But they are not.

What, of course, troubles Washington increasingly is the fact that Mr. Eisenhower is basing crucial military decisions on judgments in the field of economics in which he has very limited experience and in which he depends heavily on a conservative and minority school of businessmen. These are led by George M. Humphrey, former Secretary of the Treasury and the man of the curl your hair depression, whose views, to say the least, are so controversial as to be contested not only by leading economists throughout the country but by many important people.

It is notable that President Eisenhower in his unpublicized meeting Friday with congressional foreign and military affairs leaders quoted Mr. Humphrey repeatedly; in the process, incidentally, he harped on one of the most mistaken promises in current history: that the Russian aim (attributed to Lenin) is to cause this country to spend itself to death. The Soviet thesis is, of course, precisely the opposite: that U.S. Government spending props up the capitalist economy which would otherwise collapse.

By now there are many in Washington who have heard President Eisenhower assert without qualification that "national security and sound economy are synonymous". But what the President does not apparently see is that the definition of sound economy remains variable, whereas the definition of national security remains a constant. In essence, national security means having enough strength not to get licked. And even if the Eisenhower luck holds through the Berlin crisis, the truth is that the balance of strength is slipping so fast into the enemy's hand that responsible American's today for the first time talk out loud about the possibility of defeat. "After Ike, the deluge," is not an idle phrase.

For what happens after 1960 when the weapons gap and the manpower gap he permitted in Russia's favor have grown ever wider?

Mr. SYMINGTON. In addition, I ask unanimous consent to have inserted in the RECORD two articles from the Washington Evening Star, one by William Hines on February 17, and one by L. Edgar Prina on March 6.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Evening Star, Feb. 17, 1958]

POLICIES OF WASHINGTON BLAMED FOR MISSILE LAG

(By William Hines)

A swing through the industrial and military complex we have labeled missileland provides convincing evidence that the scientists, production men and military officers in the field are doing a superlative job. But at the end of such a trip, there is still a nagging question:

Why are we where we are missilery—in second place to the Russians?

The first, obvious answer is that we got started later. We waited for the feasibility of a hydrogen bomb to be proved and the Russians didn't, and consequently we are several years behind.

This explains the whole thing away nicely, althought it begs the question of the wisdom of our course. But it does not explain the fact that while research, development, production, and operating efficiency are high in missileland, morale is sagging and perplexity is king.

Nor does it explain the widespread feeling out there that Washington is a sort of big brother—always watching, but not wanting to be bothered with a lot of troublesome questions.

OFF AGAIN, ON AGAIN

It leaves unanswered, too, question about off-again, on-again production schedules; inaccurate public statements by officials that cannot be refuted by officials in the field because of security wraps; contradictory statements of objectives; tangled lines of authority; information policies that swing overnight from arrant press agentry to airtight security.

Too often, the observer feels, distraught missilemen look to Washington for guidance and find the paths of responsible officials criss-crossing like contrails in the sky.

Examples:

The Army is told to acquire some more land for its White Sands range in the New Mexico desert so the antimissile missile, Nike-Zeus, can be tested there. But now there is doubt whether the Zeus will ever be built.

The Douglas and Chrysler people are ordered to open their Thor and Jupiter assembly lines to press tours at virtually the same moment as Thors and Jupiters are becoming passe.

Project officers on the solid-fueled Minuteman ICBM forge doggedly ahead, but cannot be sure that Minuteman will ever get built—much less off the ground.

Congress, the usual thorn in the side of Government activities in the field, is less of a vexation than in most cases. There are probably two reasons for this.

First, the missile business is spread rather evenly around the country and a lot of money is being spent. Inclinations to rock the boat are absent.

Second, with the exception of a handful of legislators, Congress doesn't comprehend the complexities of the missile age.

Occasional summonses to Washington to appear before this committee or that committee are regarded by military and industrial leaders in missileland as minor annoyances, rather than an outright harassment.

INFORMATION POLICIES HIT

There are strong complaints, however, about information policies. Often the fire centers on Assistant Defense Secretary Murray Snyder, head of Pentagon public relations.

"Murray seems to regard public information as a proprietary commodity," one west coast industrialist commented. "He says this or that can't be given out because of security, so we point out that the information has already been published. 'All right,' he says, 'it's policy' not to put it out. And how do we answer that?"

It is clear to the visitor to missileland that Mr. Snyder's role there is an important one. Constantly the visitor runs into evidences of a restraining hand on information that seems to go beyond the requirements of security. There is scarcely a plant but has things that can be shown, described in detail, even sketched—but not photographed because the timing isn't right. Hardly an industry publicist but has a drawer full of photographs he can show, but cannot release.

The restrictions are less oppressive than they might be, however, because newsmen have little trouble, given adequate contacts, in getting the information they need from services beyond Pentagon control.

STUNTS CRITICIZED

The other side of the information coin is the use of strategic weapons for publicity stunts. The sober second thought of 2 months since the orbiting of the talking Atlas has left scant doubt that the shot was a stunt, however good, with only secondary scientific advantages. Numerous industrial, scientific, and military men expressed the opinion to this writer that shots which could not stand up on their scientific value alone should not be undertaken.

"At a time when the American public should be aware of its defense and space potential, it is being confused," one scientist prominent in industry said. "Whether the confusion is deliberate or accidental, I am in no position to know."

NUMEROUS AGENCIES

The men in the field attribute a good part of the confusion surrounding the missile program to the complicated governmental setup which finds a sextet of agencies—the civilian National Aeronautics and Space Agency and the Pentagon's Defense Research and Engineering office, its Advanced Research Projects Agency and the Army, Navy, and Air Force—all figuring in the space and missiles programs.

The ire and perplexity of industrialists and military men was more than mirrored recently in that of Senate Majority Leader JOHNSON who heads the Senate Space Committee. So criscrossed were chains of command in the Pentagon that Senator JOHNSON was unable to find out who, among Pentagon space officials W. M. Holaday, Roy W. Johnson, and Herbert F. York, was boss, Dr. York assumed the position—but only retroactively, a day after the go-round before the space group.

COOPERATION IN THE FIELD

In evaluating America's missile progress, one looks at the obvious things. Cooperation among the services in the field is excellent, and sharply in contrast with the jungle warfare of the Pentagon. The performance of industry oozes efficiency, and whatever slippages in production schedules occur can usually be traced back to a moment of indecision or a change of plans in Washington.

The conclusion one reaches is that our place in the race must be blamed in part at least on this fact: There are seven leading contenders for space and missile supremacy in the world. One is in Moscow. The other six are in Washington.

[From the Washington Star, Mar. 6, 1959]

MCELROY SEES BIG WAR IF BERLIN FIGHT FLARES

(By L. Edgar Prina)

Defense Sceretary McElroy has warned that any fighting over Berlin would in all probability lead to general war with the Soviet Union.

At the same time, he said that he and the Joint Chiefs of Staff believe that an all-out surprise attack on the United States by the Russians would be almost impossible now or in the foreseeable future.

Discussing the critical Berlin question at length, the Secretary told a news conference late yesterday that he did not expect war although the situation was potentially very inflammable. He noted that diplomatic negotiations were going forward.

But if there was armed conflict it would be very difficult to keep it a limited war, he said, adding:

"The reason I say this is I don't see how you could avoid involving Russian forces and we don't see ourselves fighting Russia in a limited way."

LOTS OF PLANNING

Mr. McElroy said "we are not doing a very great deal now" in a military way in reaction to the Berlin threat beyond lots of planning. He said that while specific movements of forces are being considered in these plans it would not be in the national interest to discuss them.

Under questioning, Mr. McElroy said the administration was going ahead with its plans to cut the manpower strength of the Army and Marine Corps. The Army is slated to drop from 980,000 to 870,000 and the Marines from 185,000 to 175,000 by June 30.

Asked why the manpower cuts were delayed last summer in view of the Quemoy and Lebanon crises but are not being held up because of Berlin, the Secretary smiled wryly and replied:

"Any rationalization I could give you isn't one I could regard with any great respect myself."

He then went on to say that he does not see a ground forces solution to the Berlin problem and that if any mobilization were ordered it would not be to send more troops to Europe. This seemed to imply that America's reliance would be placed in its strategic striking forces like the Air Force's long-range bombers.

NEEDS OF AGGRESSOR

On the matter of possible surprise attack, Mr. McElroy explained that any time a nation organized as massive a strike as it would need to destroy hundreds of thousands of targets simultaneously here and in the free world, it would be virtually impossible to avoid being observed and reported.

He mentioned the vast interchange of communications that would be necessary for an aggressor to have and also just plain motions in preparing for a surprise attack.

Mr. McElroy said the most dangerous possible situation which would face the United States would be if we relaxed our guard after an enemy seemed to be demonstrating nothing but peaceful intentions for a long period of time.

He said he sees no Pearl Harbor danger now because the Nation's military forces are on substantial alert. It could only happen, he added, if we go to sleep.

On other matters, the Secretary made these statements:

1. He did not suggest to a House committee that we change our policy of not striking the first blow in any war, but only meant to say that all Government policies should be subject to review.

2. He is tentatively planning to retire from his post at the end of the year unless the President decides that world conditions are such that he should stay on. His reasons, he said, were partly financial and partly concerned other personal matters he would not discuss.

3. The United States will use nuclear weapons of all kinds when we regard them as required for our military purposes. But we will always have a hesitancy to use them, he added.

4. If there is a new Berlin blockade, the free world is not thinking of an airlift as the exclusive response. In fact, he said the use of ground convoys could be used exclusively or there could be a mix of air and ground methods.

Mr. SYMINGTON. Mr. President, every American is becoming anxious about our relationship with our friends and allies throughout the world.

The previously referred to article by Dr. Kissinger in the New York Times magazine, as of yesterday, Sunday, March 8, is entitled, "As Urgent as the Moscow Threat—The immediate task arising out of the Berlin crisis is to strengthen the unity of NATO, for European doubts of American dependability have weakened the alliance".

This is indeed an able and informative article, based on experience. Therefore, Mr. President, I ask that excerpts from it be included at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

The current Berlin crisis raises a fundamental threat to the future of the Western alliance.

* * * * *

The Western alliance is in serious danger, partly because of confusion about our purposes.

* * * * *

For the first time, there exists grave doubt about our willingness to run risks on behalf of our allies, and even about our ability to understand what might constitute a threat.

* * * * *

It is beside the point whether this attitude is justified; it is the psychological environment in which our actions will be interpreted and with which we must reckon.

* * * * *

A French editor, to whom I remarked on what seemed to me the excessive suspiciousness of high officials, replied: "They think you are about to commit treason in a war that has already started."

* * * * *

As long as European security was thought to depend entirely on United States willingness to engage in all-out war, the European powers could rely on our nuclear capability without participating in it.

* * * * *

With the Soviet's development of long-range missiles, the steady shrinking of the United States capability for limited war and the widely advertised "missile gap," confi-

dence in American power and in our willingness to run risks has been gravely shaken.

* * * * *

A United States policy that our European allies interpret as irresolute will inevitably result in a redoubled effort to develop a local deterrent; in other words, in a vain and therefore demoralizing attempt to make the United States strategically dispensable. And the political corollary will be an increasing tendency to loosen Atlantic ties.

* * * * *

Moscow seeks to split the Western alliance by citing to us the "rigidity" of our European allies while warning them of our "unreliability."

* * * * *

The question that German and French editors, officials and political leaders asked most frequently was: What does the United States really want? There was concern that the United States attitude toward Europe had become confused and uncertain.

* * * * *

The reiteration of slogans such as "elasticity" and "new approaches" seemed less a constructive policy than a panicky reaction to a Soviet menace. The impression was that we have neither a new policy nor the courage to stand by our previous convictions.

* * * * *

It is easy to share the dismay of many critics about our unimaginative foreign policy of the past 6 years. There is no doubt that we have defined our position more by what we oppose than what we stand for, that every Soviet initiative has drawn Western energies into essentially sterile, defensive countermoves. Neither German unity nor European security nor the problems of the emergent nations have evoked a dynamic, consistent American response. We seem to be prisoners of circumstances rather than their creators.

* * * * *

But in making these criticisms we stand in danger of overestimating the degree of flexibility open to us in Europe. Our European allies would very likely interpret any basic shift in our policy now as a sign of American vacillation under stress. The common feature of such proposals as, the substitution of German troops for those of the West in Berlin, disengagement, or the Rapacki plan for a neutral zone in Middle Europe is that each of them became a subject of intense controversy only after the Soviet threat to Berlin.

* * * * *

Each of these schemes is based in some measure on the dubious premise that the danger to European security is Western rearmament even though the opposite proposition is more nearly true: Soviet pressure has become possible precisely because the Western defense effort has been all too inadequate. And each disengagement proposal would involve a withdrawal of American forces at a time of intense Soviet menace. Under current conditions, an American guarantee could not be substituted for the presence of American troops. If serious doubts already exist about our willingness to honor our commitments at a time when U.S. forces are in the direct line of Soviet advance—a withdrawal in the face of what Europeans consider a Soviet ultimatum would inevitably be interpreted as a United States attempt to escape its responsibilities.

* * * * *

Because many Europeans doubt our steadiness and realibility, the repeated declarations that the United States will stand firm on Berlin have proved relatively ineffective, all the more so as our deeds are so inconsistent with our words. It is difficult to convey determination while reducing our Armed Forces and focusing the national attention on a balanced budget.

* * * * *

If we behave imaginatively, as in the days of the Marshall plan and the Greek-Turkish aid program, we can lay the basis for a new era of ever deeper Western cooperation—and not only in Europe. The Far East, the Middle East, Africa, and Latin America all require new approaches. But the area under attack is hardly the place to prove our flexibility.

* * * * *

The most crucial task before the West is therefore to get its own house in order. The challenge is not simply to devise a hurried proposal to meet a Soviet demand. We must not delude ourselves that a negotiating position can remedy the lassitude of nearly a decade or that clever bargaining can substitute for the effort and dedication that have been lacking heretofore.

* * * * *

Free access to Berlin will be the touchstone of all other measures. If the sequence of events initiated by the Soviet threat ends with what is interpreted by our allies as an American defeat or withdrawal, NATO will prove no stronger than the French system of alliance in the interwar period.

* * * * *

To say that we will be firm on Berlin is not a policy. Our task is to give this term concrete content. We should make specific proposals defining guarantees of free access, to be given either by the Soviet Union or by a four-power agreement. The guarantee should be registered with the United Nations. With such a guarantee, it would make little difference whether Russians or East Germans man the checkpoints. But in the absence of such an assurance we cannot escape the problem by designating East Germans as Soviet agents.

* * * * *

At the same time, it is essential to make clear the seriousness of the situation to our people, to our allies, and to the Soviet Union. During the Soviet warning period on Berlin, the West has been bemused with determining Soviet intentions, first by marking time until the Mikoyan visit, then waiting for the 21st Party Congress, than for the result of Prime Minister Macmillan's sojourn in Russia.

* * * * *

We are sliding toward a crisis for which the American people have not been prepared. Our allies are becoming nervous about the lack of a tone of urgency in the United States and the Soviet Union may be misled into the brief that the issue of Berlin can be pressed with impunity.

* * * * *

A congressional resolution affirming our determination to maintain our rights in Berlin and an increased alert of our Armed Forces would seem minimum requirements.

* * * * *

Negotiating tactics: We should always be ready to negotiate not only for substantive but also for psychological reasons: To convey our peaceful purposes to the rest of the world. Negotiations, even if they fail, can at least project to other nations the issues for which we are prepared to contend. At the same time, it is important that, rather than expend energies on debates over abstractions like "rigidity" or "flexibility," we concentrate our efforts on developing a concrete program.

* * * * *

Rigidity is surely not helpful. But neither is flexibility an end in itself. Indeed, it may sometimes make agreement more rather than less difficult. If we base our negotiations on the principle that the West has an obligation to break any deadlock with new proposals, we shall encourage Soviet obstinacy, for we will nurture the belief that if Soviet negotiations hold out long enough they will elicit ever more favorable Western offers.

* * * * *

We have no obligation to make only proposals that the Soviet Union says it will accept, for this would turn diplomacy into a device for surrender. We do have a responsibility to make proposals that express our values and take into account legitimate Soviet security concerns. In short, the West requires a sense of direction more than negotiating skill. Only the purposeful can be flexible.

* * * * *

Western cohesion: The Western Powers should not confine themselves to issues raised by the Soviet Union; they should act boldly to strengthen unity among themselves.

* * * * *

A basic cause of Allied disunity is the weakness of NATO and the ambiguity of its strategy. Against the background of this weakness, declarations of firmness ring hollow and the sense of insecurity of our allies must inevitably increase.

* * * * *

Moreover, NATO has never resolved the question whether it is a device to unleash all-out war or a means to prevent Soviet occupation of Europe should deterrence fail. By adopting an uneasy compromise, NATO is in danger of paralyzing itself. The doubts of our allies as to our willingness to risk all-out war for the defense of Europe, while five U.S. divisions are stationed there, underline the inherent lack of plausibility of the doctrine of massive retaliation.

Two sets of measures are required: (1) an immediate strengthening of the U.S. overall deterrent with respect to its size, its mobility, and its dispersal; such a program is the prerequisite for all other measures; (2) a common effort to devise a defense of Europe which does not have the aspect of suicide. While we require the capability for massive retaliation to prevent a Soviet surprise attack on the United States, we should not rely on it as the sole deterrent to an attack on Europe or the chief means of defense against Soviet aggression should deterrence fail.

* * * * *

A defensive alliance which cannot protect the territory of its members without destroying them is inherently brittle. There is no reason why the United States and Western Europe, whose combined resources, human and material, still far exceed those of the U.S.S.R., cannot create an adequate force for a local defense of Europe. The obstacle is not capability, but lack of will.

* * * * *

Nothing is possible without a more dynamic conception by the United States of its role in the world. For too long we have treated our problems as technical ones; we have sought courses of action which involved the least effort and sacrifice.

* * * * *

As a result our military program is inadequate; continued at its present scale it will doom our diplomacy to futility by creating constant opportunities for Soviet pressure while reducing the means to resist them. Our economic program, both domestic and foreign, is too tentative and too conscious of the obstacles in the path. Our diplomacy lacks dynamism.

* * * * *

We are living through a period which, in retrospect, will undoubtedly appear to be one of the great revolutions in history. We cannot withdraw from it; we can only contribute to shaping it constructively. The great challenge of our time is that the self-sufficient nation-state is breaking down. No nation—not even the largest—can survive in isolation or realize its potentialities, material or spiritual, on its own.

* * * * *

In the past, the Soviet threat has often produced Atlantic unity. It may again.

But ultimately the unity of the West depends on what we affirm rather than on what we reject. It must flow from our convictions and hopes, not our fears.

Mr. SYMINGTON. Mr. President, in the interest of our national security, should we not put an end to all this confusion, perhaps described many years ago by Lewis Carroll in the following stanza from his famous book:

All in the golden afternoon
Full leisurely we glide;
For both our oars, with little skill,
By little arms are plied,
While little hands make vain pretence
Our wanderings to guide.

Mr. President, the decision we have before use is clear. Have we a better chance to reach a just and lasting peace if we negotiate from a position of relative weakness, or from one of relative strength?

Mr. President, I want to thank my colleague from Wisconsin for his gracious courtesy in yielding to me after the morning hour had been concluded.

The PRESIDING OFFICER. Will the Senator from Wisconsin yield now to the Senator from Alaska?

Mr. PROXMIRE. Mr. President, it is my understanding that the senior Senator from Massachusetts [Mr. SALTONSTALL] would like to have the floor for a few minutes, so he can reply to the junior Senator from Missouri. So I ask unanimous consent that the Senator from Massachusetts may have the floor for a few minutes, without my losing my basic right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SALTONSTALL. Mr. President, I desire to make two or three very brief comments at this time. First I wish to call attention to the address of the President of the United States on the state of the Union delivered before a joint session of the Congress.

In these days of unceasing technological advance, we must plan our defense expenditures systematically and with care, fully recognizing that obsolescence compels the never-ending replacement of older weapons with new ones.

The defense budget for the coming year has been planned on the basis of these principles and considerations. Over these many months I have personally participated in its development.

The aim is a sensible posture of defense. The secondary aim is increased efficiency and avoidance of waste. Both are achieved by this budgetary plan.

Working by these guidelines, I believe with all my heart that America can be as sure of the strength and efficiency of her Armed Forces as she is of their loyalty.

Those were the President's words on the state of the Union.

The Chairman of the Joint Chiefs of Staff, General Twining, on January 29, 1959, before the Senate Preparedness Subcommittee, in response to a question from the Senator from South Dakota [Mr. CASE], stated as follows:

The Senator from South Dakota asked:

Do you feel that you can measure our ability to deliver nuclear missiles intercontinentally today by a single weapon, or by considering the entire military team?

General Twining replied:

We have an entire gamut of weapons. We use a mix of weapons to carry out our nuclear retaliation.

General Twining said further:

I would much rather have the defense posture and the capabilities of the United States than that which the Soviet is facing today.

Mr. President, I have had prepared by the Legislative Reference Service of the Library of Congress a list of committee hearings on the subject of national defense which have been held since the start of the 86th Congress. It is an impressive list.

The responsible committees of the Congress have heard a great deal about our defense policies and programs. As yet these committees have not digested all that they have heard, and they have not reported to the Congress and the American people.. Until they do we shall not know the conclusions they have reached as to that part of the military structure which they have studied.

I should like to read very briefly a list of the committee hearings which have been had on the subject of national defense, as prepared by the Library of Congress at my request:

COMMITTEE HEARINGS ON THE SUBJECT OF NATIONAL DEFENSE, 86TH CONGRESS

HOUSE COMMITTEE ON ARMED SERVICES

February 3, 4, 5, 6, 1959: Hearings regarding military posture.

February 25, 1959: Met with representatives of the Central Intelligence Agency in executive session.

March 2, 3, 4, 5, 1959: Hearings on authorization for construction at military installations.

HOUSE COMMITTEE ON FOREIGN AFFAIRS

January 28, 29, 1959: Met in executive session and received a briefing on the current world situation.

February 11, 1959: Subcommittee for Review of the Mutual Security Programs met in executive session and received testimony from Deputy Assistant of Defense for Military Assistance Programs Charles H. Shuff.

HOUSE COMMITTEE ON GOVERNMENT OPERATIONS

February 4, 5, 6; March 2, 3, 5, 1959: Subcommittee on Military Operations. Hearings relative to management of the military missile program.

HOUSE COMMITTEE ON SCIENCE AND SPACE EXPLORATION

February 2, 3, 4, 5, 9, 10, 16, 17, 18, 1959: Hearings to brief new members and others with regard to current developments in the field of science and astronautics.

March 3, 1959: Hearings with respect to the production of the Nike-Zeus antimissile system.

March 4, 1959: Hearings with respect to international telecommunications and communications satellites.

SENATE COMMITTEE ON AERONAUTICAL AND SPACE SCIENCES

February 17, 1959: Held organizational meeting and appointed a subcommittee to study authorization legislation for the National Aeronautics and Space Administration.

February 19, 20, 1959: Hearings on pending space legislation.

February 27, March 2, 1959: Hearings on missile and antimissile program of the United States.

SENATE COMMITTEE ON ARMED SERVICES

January 16, 1959: Subcommittee on Central Intelligence, executive, to hear CIA Director Allen Dulles.

January 20, 1959: Committee met in executive session to receive a briefing on national defense from Secretary of Defense Neil H. McElroy and Chairman of Joint Chiefs of Staff Nathan F. Twining.

January 22–23, 1959: Committee met in executive session to receive a briefing from Secretary of the Army Wilber M. Brucker and Army Chief of Staff Gen. Maxwell D. Taylor.

January 26, 1959: Met in executive session, received a briefing from Secretary of the Navy Thomas S. Gates, Jr., and Chief of Naval Operations Adm. Arleigh A. Burke.

January 27, 1959: Met in executive session to receive a briefing from Secretary of the Air Force James H. Douglas and Air Force Chief of Staff Gen. Thomas D. White.

January 28, 1959: Air Force briefing. Heard Secretary of the Air Force James H. Douglas and Air Force Chief of Staff Gen. Thomas D. White.

January 29, 30, February 4, 1959: Preparedness Investigating Subcommittee. Hearings on the general subject of U.S. preparedness.

SENATE COMMITTEE ON FOREIGN RELATIONS

January 16, 1959: To receive testimony on the defense position of the United States from the Secretary of Defense Neil H. McElroy and Chairman of the Joint Chiefs of Staff Gen. Nathan F. Twining.

Mr. President, I understand the Senator from Missouri is heading a new committee to investigate space waste, which does not appear on this list.

JOINT COMMITTEE ON ATOMIC ENERGY

January 8, 1959: Subcommittee on Research and Development held an executive meeting to receive a briefing on the status of the Soviet nuclear-powered aircraft program, received testimony from representatives of the CIA and Air Force Intelligence.

January 13, 1959: Executive, to consider possible effects of a moratorium on further nuclear weapons testing.

January 14, 1959: Committee held executive hearings to discuss possible effects of a moratorium on further nuclear weapons development, with testimony from Dr. Carl Romney and Dr. Jack Oliver, both of the ad hoc panel of seismologists, the President's Scientific Advisory Committee; and Philip Farley, Special Assistant to the Secretary of State for Disarmament and Atomic Energy.

January 19, 1959: Committee held further executive hearings to receive testimony with regard to results of recent nuclear weapons tests (Hardtack operation, phases 1 and 2) and possible effects of a moratorium on further nuclear weapons development, with testimony from Adm. E. N. Parker, Chief, and Col. Jack Ledford, both of the Armed Forces Special Weapons Project; and Gen. Herbert B. Loper, Assistant to Secretary of Defense for Atomic Energy.

January 19, 1959: Subcommittee on Military. Applications held an executive session to receive a briefing on the Polaris missile project from Rear Adm. W. F. Raborn, Director, Special Projects, Navy.

January 27, 1959: Met in executive session to receive testimony on the aircraft nuclear propulsion program from Secretary of the Navy Thomas S. Gates, Jr., and Rear Adm. J. T. Hayward, assistant Chief of Naval Operations.

February 5, 1959: Executive meeting to discuss a proposed agreement with the United Kingdom relative to exchange of military information and to discuss the present status of and future prospects for the aircraft nuclear propulsion program.

March 2, 1959: Met in executive session for a briefing on Project Rover (nuclear rocket), Project Pluto (nuclear ramjet), and Project Snap (nuclear auxiliary power for space vehicles).

In addition, Mr. President, this morning the majority leader announced further hearings of the Preparedness Subcommittee.

I mention these matters, and have read the list off in detail, to indicate what the Congress is doing, and the committees investigating these subjects. When we have heard the conclusions of these committees, in my opinion, we shall have a better basis for thoughtful and careful consideration of our defense posture.

I thank the Senator from Wisconsin very much for yielding to me.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the statement I made earlier in the day on the state of the Nation's preparedness, together with the ensuing debate, be printed in the RECORD immediately after my unanimous consent request that the reading of the Journal of last Thursday be dispensed with.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour; and I ask unanimous consent that statements made in connection therewith be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

ELIMINATION OF LIMITATION ON CERTAIN WHEAT

A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Agricultural Adjustment Act of 1938, as amended, to eliminate the 30-acre limitation on the amount of wheat exempt from wheat marketing quotas where all the wheat produced on the farm is used on the farm for feed, food, and seed (with an accompanying paper); to the Committee on Agriculture and Forestry.

EXTENSION OF AUTOMATIC PRESERVATION OF ACREAGE HISTORY PROVISION OF AGRICULTURAL ADJUSTMENT ACT OF 1938

A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend section 377 of the Agricultural Adjustment Act of 1938, as amended, to provide for the extension of the automatic preservation of acreage history provision, with certain modifications (with an accompanying paper); to the Committee on Agriculture and Forestry.

REPORT ON SPECIAL PAY TO CERTAIN OFFICERS OF ARMED FORCES

A letter from the Secretary of Defense, reporting, pursuant to law, that the permissive authority vested in the Secretary of Defense to pay special pay, in addition to any other pay prescribed by law, to certain officers, was not exercised during the calendar year 1958; to the Committee on Armed Services.

AMENDMENT OF SECTION 13 OF DISTRICT OF COLUMBIA REDEVELOPMENT ACT OF 1945

A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of proposed legislation to amend section 13 of the District of Columbia Redevelopment Act of 1945, as amended (with an accompanying paper); to the Committee on the District of Columbia.

RESERVATION OF CERTAIN LAND FOR USE OF THE DALLES DAM PROJECT, OREGON

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to set aside and reserve Memaloose Island, Columbia River, Oreg., for the use of the Dalles Dam project and transfer certain property to the Yakima Tribe of Indians in exchange therefor (with an accompanying paper); to the Committee on Interior and Insular Affairs.

REPEAL OF CERTAIN STATUTES FIXING OR PROHIBITING THE COLLECTION OF FEES FOR SERVICES UNDER NAVIGATION AND VESSEL INSPECTION LAWS

A letter from the Acting Secretary of the Treasury, transmitting a draft of proposed legislation to repeal and amend certain statutes fixing or prohibiting the collection of fees for certain services under the navigation and vessel inspection laws (with accompanying papers); to the Committee on Interstate and Foreign Commerce.

REPORT OF ACTIVITIES AND TRANSACTIONS UNDER MERCHANT SHIP SALES ACT OF 1946

A letter from the Under Secretary of Commerce, transmitting, pursuant to law, a report on the activities and transactions under the Merchant Ship Sales Act of 1946, from October 1, 1958, through December 31, 1958 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

INTERSTATE TRANSPORTATION OF FISH

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to clarify a provision in the Black Bass Act relating to the interstate transportation of fish, and for other purposes (with an accompanying paper); to the Committee on Interstate and Foreign Commerce.

ADMISSION OF CERTAIN ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders granting the applications of certain aliens found admissible into the United States (with accompanying papers); to the Committee on the Judiciary.

SUSPENSION OF DEPORTATION OF ALIENS—WITHDRAWAL OF NAME

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, withdrawing the name of Pasquale Auricchio from a report relating to aliens whose deportation has been suspended, transmitted to the Senate on January 15, 1958 (with an accompanying paper); to the Committee on the Judiciary.

ADMISSION OF DISPLACED PERSONS—WITHDRAWAL OF NAME

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, withdrawing the name of Wah Sing Hou from a report transmitted to the Senate on January 15, 1959, pursuant to section 6 of the Refugee Relief Act of 1953, with a view to the adjustment of his immigration status; to the Committee on the Judiciary.

ADJUSTMENT OF IMMIGRATION STATUS OF CERTAIN ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders entered in the case of certain aliens, relating to adjustment of their immigration status (with accompanying papers); to the Committee on the Judiciary.

REPORT ON ACTIVITIES OF DIVISION OF COAL MINE INSPECTION, BUREAU OF MINES

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a report of the activities of the Division of Coal Mine Inspection, Bureau of Mines, for the calendar year January 1, 1958, through December 31, 1958 (with an accompanying report); to the Committee on Labor and Public Welfare.

PROPOSED WORK HOURS ACT OF 1959

A letter from the Secretary of Labor, transmitting a draft of proposed legislation to establish standards for hours of work and overtime pay of laborers and mechanics employed on work done under contract for, or with the financial aid of, the United States, for any Territory, or for the District of Columbia, and for other purposes (with accompanying papers); to the Committee on Labor and Public Welfare.

PROPOSED FEDERAL EQUAL PAY ACT

A letter from the Secretary of Labor, transmitting a draft of proposed legislation to prohibit discrimination on account of sex in the payment of wages by employers having employees engaged in commerce or in the production of goods for commerce, and to provide procedures for assisting employees in collecting wages lost by reason of any such discrimination (with accompanying papers); to the Committee on Labor and Public Welfare.

AMENDMENT OF FEDERAL EMPLOYEES PAY ACT OF 1945

A letter from the Director, Bureau of the Budget, Executive Office of the President, transmitting a draft of proposed legislation to amend the Federal Employees Pay Act of 1945, as amended, and for other purposes (with an accompanying paper); to the Committee on Post Office and Civil Service.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A resolution of the House of Representatives of the State of New Mexico; to the Committee on Agriculture and Forestry:

"HOUSE MEMORIAL 10

"Memorial memorializing against discrimination in price supports in similar farm commodities by the Secretary of Agriculture of the United States

"Whereas grain sorghums and corn are similar, and have substantially the same feed value; and

"Whereas some areas of the United States are suited to agricultural production of grain sorghums, and other areas of the United States are suited to the agricultural production of corn, and discrimination in the price supports between the two is a discrimination between different areas of the United States; and

"Whereas there is a prejudicial discrimination in the price supports for grain sorghums in that the supports are even below the cost of production; and

"Whereas the area of the United States defined as the high plains, which includes the State of New Mexico, has been unreasonably and unjustly discriminated against by the unrealistic support price of grain sorghum; and

"Whereas the area of the United States defined as the Midwest has been preferred by the relatively high price support for agricultural production of corn; and

"Whereas the State of New Mexico has been especially damaged by this unfair and unjust administrative determination of price supports; and

"Whereas the State of New Mexico should be preferred rather than prejudiced if any discrimination should exist in view of the fact that the agricultural producers of this State are otherwise greatly handicapped by lack of water, proximity to markets, and lack of cheap agricultural labor available generally throughout the Midwest; and

"Whereas the Congress of the United States never intended that price supports be provided on such an unequitable, unjust and discriminatory basis: Now, therefore, be it

"Resolved by the House of Representatives of the State of New Mexico, That the New Mexico delegation to the Congress of the United States is memorialized to implore the Secretary of Agriculture to correct administratively the discrimination against the high plains area of the United States with respect to the nominal price support applied to agricultural production of grain sorghums in relation to preference given the midwestern area in the relatively high price supports applied to agricultural production of corn; be it further

"Resolved, That in the event that the Sectary of Agriculture declines to correct such inequalities administratively, the New Mexico delegation to the Congress of the United States is memorialized to introduce appropriate legislation to insure against such prejudicial and preferential price supports and to exert maximum effort for its passage; be it further

"Resolved, That copies of this memorial be transmitted to the President of the United States, the President of the U.S. Senate, the Speaker of the House of Representatives of the United States, the Secretary of Agriculture, and the Members of the New Mexico delegation to the Congress of the United States.

"MACK EASLEY,
"Speaker, House of Representatives.
"ALBERT ROMERO,
"Chief Clerk, House of Representatives."

A resolution of the Senate of the State of Oklahoma; ordered to lie on the table:

"ENROLLED SENATE RESOLUTION 27

"Resolution commemorating the life and achievements of Charles Curtis, member of the Kaw Nation and Vice President of the United States; and expressing the gratitude of the Senate of the State of Oklahoma to those persons whose efforts resulted in the presentation of a statue of Vice President Curtis to the National Hall of Fame for Famous American Indians at Anadarko

"Whereas this sovereign State of Oklahoma has long been known among all her sister Commonwealths as the foremost repository of those memorials and monuments which preserve for future generations of Americans some knowledge of the culture of the American Indian and of the indelible imprint made on our national character by the original inhabitants of this great land; and

"Whereas the proudest heritage and most cherished birthright of every Oklahoman is the proud legacy of courage and honor bestowed upon our State by our Indian citizens; and

"Whereas the very name of our great Commonwealth springs from the meaningful and melodious tongue of one of the greatest of the American Indian Nations; and

"Whereas Anadarko, Okla., was therefore chosen as the site of the National Hall of Fame for Famous American Indians, established for the perpetuation of the memory of the contributions of this great people, and for the preservation of the symbols and memorials of their noble way of life; and

"Whereas Charles Curtis, outstanding attorney, civic leader and statesman, five times U.S. Senator, and Vice President of the United States from 1929 to 1933, was a member of the Kaw Nation, and had a tribal allotment in the lands of that people in Oklahoma; and

"Whereas because of his contributions to the cultural, spiritual, and social development of the American way of life, it has long been desired that this illustrious son of the Kaw Nation be included among that select and immortal group of American Indians honored in the National Hall of Fame for Famous American Indians at Anadarko; and

"Whereas a life-size bronze bust of Charles Curtis will be unveiled at Washington, D.C., on March 4, 1959, by his daughter, Mrs. Webster Knight II, of Providence, R.I., and will therefore be transported to Anadarko, where it will be dedicated and permanently installed in the Hall of Fame for Famous American Indians on August 17, 1959, in the presence of thousands of persons of American Indian descent from all over the United States; and

"Whereas this wholly appropriate tribute to the greatness of Charles Curtis and this magnificent addition in our own Oklahoma institution has been made possible only by the unceasing efforts and devotion of a dedicated band of Oklahomans, both private citizens and members of our congressional delegation, and a group of citizens of other States whose gracious efforts on behalf of this project should earn them the gratitude of our entire State; and

"Whereas it is appropriate that this body tender its tribute to the memory of Charles Curtis and express its deep appreciation to those who have given so unstintingly of their time to consummate this tribute to Mr. Curtis and the transfer of his bust to our Indian Hall of Fame: Now, therefore, be it

"Resolved by the Senate of the 27th Legislature of the State of Oklahoma, That this body, now duly assembled, does hereby pay official tribute to the accomplishments of the late Charles Curtis, illustrious son of the Kaw Nation, and does hereby officially express its deep gratitude on behalf of the people of Oklahoma, to the following persons who have obtained this signal honor for the National Hall of Fame for Famous American Indians: Hon. Patrick J. Hurley, general chairman; Hon. Edgar S. Vaught, Oklahoma City, Okla.; Joe W. McBride, Oklahoma City, Okla.; Hon. Roy Johnson, Ardmore, Okla.; Gov. Floyd Maytubby, Oklahoma City, Okla.; Paul Stonum, Anadarko, Okla.; Helen Peterson, executive director of National Congress of American Indians, Washington, D.C.; Dena Woods, Washington, D.C.; Allan Cromley, National Press Building, Daily Oklahoman, Washington, D.C.; Mrs. Peter J. Ward, 8144 Audrain Drive, St. Louis, Mo.; Mrs. Logan Billingsley, Katonah, N.Y; Robert Goombi, tribal chieftain and president, American Indian Exposition, members of the Charles S. Curtis memorial committee; Hon. Richard Nixon, Vice President of the United States; Hon. Henry A. Wallace, former Vice President of the United States, honorary members; Mrs. Webster Knight II, Providence, R.I.; Madeleine Park, Katonah, N.Y., the sculptress; Hon. Ed Edmondson, Carl Albert, Tom Steed, John Jarman, Page Belcher, and Toby Morris, U.S. Representatives from Oklahoma, Senator Robert S. Kerr, and Senator Mike Monroney, our U.S. Senators; be it further

"Resolved, That properly prepared copies of this resolution be mailed to the persons above-named, to the University of Oklahoma Library, and to the National Hall of Fame for Famous American Indians, at Anadarko, Okla.

"Adopted by the senate the 25th day of February 1959.

"HAROLD T. GARVIN,
"President Pro Tempore of the Senate.
"LEO WINTERS,
"Secretary of the Senate."

Joint resolutions of the Legislature of the State of Montana; to the Committee on Interior and Insular Affairs:

"HOUSE JOINT MEMORIAL 12

"Joint memorial of the Senate and House of Representatives of the State of Montana to the Congress of the United States; Senator JAMES E. MURRAY OF Montana; Senator MIKE MANSFIELD of Montana; Congressman LEE METCALF of Montana; Congressman LEROY ANDERSON of Montana; the Committee on Interior and Insular Affairs of the U.S. Senate; the Committee on Interior and Insular Affairs of the U.S. House of Representatives; and the Secretary of Interior, Fred A. Seaton; requesting the establishment of a Federal Indian policy which recognizes the duty of the Federal Government to the American Indian

"Whereas the State of Montana contains the fourth largest Indian population of the several States of the United States; and

"Whereas the U.S. Government, in exchange for vast grants of territory ceded by certain Indian tribes, did guarantee retained ownership of certain areas of land within the boundaries of the State of Montana as well as special services and privileges to these Indian tribes; and

"Whereas said guarantees and other agreements between the United States and said Indian tribes, is evidenced by treaty, custom, and statute of the Federal Government—thus establishing a special legal relationship between the Federal Government and said Indian tribes; and

"Whereas the 83d Congress did adopt House Concurrent Resolution 108, stating a policy whereby Indians were to be "subject to the same laws and entitled to the same privileges and responsibilities as are applicable to other citizens of the United States" and terminating "their status as wards of the United States"; and

"Whereas the policy adopted in House Concurrent Resolution 108 was a direct circumvention of the treaty-established Federal responsibility to Indians; and

"Whereas experience has shown that the Indians within Montana were and are not economically, emotionally, or socially prepared for application of such policy; and

"Whereas the actual invocation of said policy has: (1) Worked to the extreme detriment and severe hardship of Indian individuals and tribes within the State of Montana, (2) caused the Indians of Montana to become separated from their lands at an alarming rate, (3) created inordinate social and welfare problems within the State of Montana and the cities, towns, and counties thereof; and

"Whereas the State of Montana and the cities, towns, and counties thereof should not be laden with the cost or the administrative burden of assuming a responsibility which is historically Federal: Now, therefore, be it

"Resolved, That the 36th Legislative Assembly of the State of Montana of 1959, now in session, the senate and the house of representatives concurring, do respectfully request and urge the Congress of the United States, the Members of the House of Representatives and Senate, the Interior and Insular Affairs Committee, and the Secretary of the Interior, Fred A. Seaton, that action be taken to reaffirm the Federal responsibility to the American Indian and that such reaffirmation be stated as congressional policy and carried out by acts which will aid the Indians of the State of Montana in the development of their personal and tribal resources; be it further

"Resolved, That copies of this memorial be submitted by the secretary of state of Montana to the Congress of the United States; Senator James E. Murray, Senator Mike Mansfield; Congressman Lee Metcalf; Congressman LeRoy Anderson; the chairman of the Committee on Interior and Insular

Affairs of the U.S. Senate; the chairman of the Committee on Interior and Insular Affairs of the U.S. House of Representatives; and to the Honorable Fred A. Seaton, Secretary of Interior.

"JOHN J. MACDONALD,
"Speaker of the House.
"PAUL CANNON,
"President of the Senate."

"SENATE JOINT MEMORIAL 2

"Joint memorial of the Senate and the House of Representatives of the State of Montana to the Congress of the United States; Hon. JAMES E. MURRAY and Hon. MIKE MANSFIELD, U.S. Senators of Montana; Hon. LEE METCALF and Hon. LEROY ANDERSON, Members of the House of Representatives of Montana; the Committee on Interior and Insular Affairs of the U.S. Senate; the Committee on Interior and Insular Affairs of the United States House of Representatives; the Secretary of the Interior; and the United States Commissioner of Reclamation, urging that the Congress reject the program of the United States Bureau of Reclamation, as set forth in its report on the Three Forks Division, Missouri River Basin project, insofar as it relates to the diversion of water from the Madison River and that the Congress assures the preservation of recreational and fishery resources values of the Madison River Valley

"Whereas the U.S. Bureau of Reclamation since 1942 has been investigating various plans to divert water from the Madison River in Montana, and

"Whereas the Bureau now has set forth a recommended plan of development which includes construction of the Cameron diversion dam on the Madison River and a 32-mile canal; the Madison diversion dam on the same river and a 58-mile canal; and the Lyon powerplant on the Madison River and a 6.3-mile canal, all of which are intended to divert water from the Madison River for irrigation or power purposes, and

"Whereas said proposed diversions of water would aggregate 885 cubic feet per second for power purposes and 675 cubic feet per second for irrigation purposes, all of which would dangerously reduce the amount of water for fishery resources in the Madison River; and

"Whereas this plan would result in heavy drawdown of Hebgen Lake during the summertime irrigation season, causing serious fluctuations in the lake level, creating unsightly mud flats and reducing the value of homes and recreational facilities which are located on the shores of Hebgen Lake; and

"Whereas Hebgen Lake and the Madison River are universally recognized as being among the finest rainbow trout fishing waters in the entire world, attracting each year large numbers of sportsmen from all sections of North America; and

"Whereas residents of the town of Ennis and its surrounding recreational area have made large investments based on the tourist trade, and the economy of this area is largely dependent upon a continuation of excellent fishing and recreational activities, and

"Whereas fluctuations in the levels of Hebgen Lake and the Madison River would result in serious adverse effects, if not complete destruction, of the fishery resources of the area; and

"Whereas the diversion of 675 cubic feet per second of water from the Madison River would reduce the flow of the river by one-third to one-half during the irrigation season and would nearly deplete the river during periods of severe water shortage, thereby causing serious adverse effect on recreation and fishing and on landowners with long-standing water rights on the river, and

"Whereas the power installation proposed at Lyon site is unnecessary and wasteful and would duplicate the power supply which has adequately served the area for 58 years; and

"Whereas encroachment by the Government in the power-supply industry in the Madison River Valley would threaten the existing facilities of the present supplier and would jeopardize the tax revenue now received by Madison County of these facilities, such tax revenues exceeding $81,000 per year; and

"Whereas the present operation of Hebgen Reservoir is controlled by regulation of the Federal Power Commission for the purpose of preserving the area for recreation and fishing; and

"Whereas the Bureau of Reclamation would not be subject to control and regulation by that Commission; and

"Whereas the U.S. Fish and Wildlife Service has objected to parts of the Bureau of Reclamation program and the Montana Fish and Game Commission has expressed strong opposition to the adoption of the Bureau's plan because of the serious adverse effect on fishery resources of the Madison River Valley: Now, therefore, be it

"Resolved, That the Senate and the House of Representatives of the State of Montana memorialize the Congress of the United States to reject the Bureau of Reclamation proposal to divert water from the Madison River and to declare it to be the intent of Congress that any program which would jeopardize the fishery resources and recreational values of the Madison River Valley and which would result only in impractical, unwise, costly, and wasteful irrigation and power projects shall cease; and be it further

"Resolved, That the appropriate committees of the Congress convey to the Department of the Interior and the Bureau of Reclamation notice of this congressional intent; and be it further

"Resolved, That we call upon the Department of the Interior and the Bureau of Reclamation to abandon all plans for diverting Madison River water in such ways as would adversely affect the recreational values, sports fishery resources, and water rights in the area; and be it further

"Resolved, That copies of this memorial be submitted to the secretary of state of Montana, to each of the individuals named, and to the chairman of each of the committees and agencies named in the title of this memorial, and to the Presiding Officers of the Senate and the House of Representatives of the U.S. Congress.

"PAUL CANNON,
"President of the Senate.
"JOHN J. MACDONALD,
"Speaker of the House."

A joint resolution of the Legislature of the State of Idaho; to the Committee on Interior and Insular Affairs:

"SENATE JOINT MEMORIAL 10

"Joint memorial to the honorable Senate and House of Representatives of the United States in Congress assembled

"We, your memorialists, the Legislature of the State of Idaho, respectfully represent that—

"Whereas the Atomic Energy Commission has, for the past number of years, seen fit to withdraw certain lands in the Atomic Energy Commission area of the Idaho Falls site, commonly known as the Twin Buttes area of the Lost River Grazing District; and

"Whereas livestock ranks second to lumbering as the most important industry in Idaho; and

"Whereas these withdrawals have worked extreme hardships on approximately 100 livestock grazers by reducing the grazing area by some 540,000 acres; and

"Whereas these lands were leased at considerable cost to the permittees, and with the withdrawal have now made their livestock-raising activities precarious; and

"Whereas grazing lands to replace these withdrawals are not available to the livestock grazers of this area; and

"Whereas the livestock grazers have received no compensation for the loss of their grazing privileges, nor for the damage sustained: Now, therefore, be it

"Resolved by the Senate of the State of Idaho, House of Representatives concurring, That we most respectfully urge upon the Congress of the United States of America that the necessary action be immediately taken to compensate these livestock operators for the loss in grazing privileges, and for the damage that they have sustained by the above-mentioned action; be it further

"Resolved, That the secretary of state of the State of Idaho be, and he hereby is, authorized and directed to forward certified copies of this memorial to the President and Vice President of the United States, the Speaker of the House of Representatives of the Congress, and to the Senators and Representatives representing this State in the Congress of the United States."

A joint resolution of the Legislature of the State of Idaho; ordered to lie on the table:

"SENATE JOINT MEMORIAL 8

"Joint memorial to the honorable Senate and House of Representatives of the United States in Congress assembled

"We, your memorialists, the members of the Senate and House of Representatives of the Legislature of the State of Idaho, assembled in the 35th session thereof, do respectfully represent that—

"Whereas over 99 percent of the pupils in the public schools of Hawaii are citizens of the United States; and

"Whereas the half million people of the islands include among their members large numbers of three great racial groups who speak five of the greatest languages heard around the world; and

"Whereas members of nearly 50 language and racial groups and subgroups have long been associated together in amity and mutual esteem in the public schools of the Territory; and

"Whereas as long ago as 1851, the islanders secretly petitioned these United States to be taken under our protection; and

"Whereas the islands of Hawaii were annexed by joint resolution of Congress in 1898 and established as a Territory by law in 1900; and

"Whereas the people of the Territory have amply demonstrated their capacity for self-government and self-reliance; and

"Whereas the people of the United States must demonstrate to the world that our published ideals of liberty, fraternity, and equality are in truth a living creed to which we adhere: Now, therefore, be it

"Resolved by the 35th session of the Legislature of the State of Idaho, now in session, the Senate and House of Representatives concurring, That the Congress and President of the United States be respectfully petitioned to admit Hawaii to statehood without delay: And be it further

"Resolved, That the secretary of state of the State of Idaho be, and he hereby is, authorized and directed to forward certified copies of this memorial to the President and Vice President of the United States, the Speaker of the House of Representatives of the Congress and to the Senators and Representatives representing this State in the Congress of the United States."

Resolutions of the General Court of the Commonwealth of Massachusetts; to the Committee on Labor and Public Welfare:

"RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ESTABLISH A FEDERAL DOMICILIARY HOSPITAL IN NEW ENGLAND

"Whereas the Federal Government has provided eighteen domiciliary hospitals throughout the Nation for the care of its veterans; and

"Whereas the New England area, comprising a group of six States having a veteran

population of 1,350,000, has no domiciliary hospital therein; and

"Whereas the nearest domiciliary hospital to the New England area is located in Bath, N.Y., thereby entailing additional hardship and expense on the families of New England veterans now hospitalized when they visit their loved ones: Therefore be it

"Resolved, That the General Court of Massachusetts respectfully urge the Congress of the United States to take such action as may be necessary to establish a Federal domiciliary hospital in New England; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the secretary of the Commonwealth to the President of the United States, to the Presiding Officer of each branch of the Congress and to the Members of the Congress from this Commonwealth and the other New England States.

"House of representatives, adopted February 17, 1959.

"LAWRENCE R. GROVE,
"Clerk.

"Senate, adopted in concurrence February 19, 1959.

"IRVING N. HAYDEN,
"Clerk.

"A true copy.
"Attest.

"JOSEPH D. WARD,
"Secretary of the Commonwealth."

A joint resolution of the Legislature of the State of California; to the Committee on Agriculture and Forestry:

"ASSEMBLY JOINT RESOLUTION 10

"Relative to memorializing Congress concerning the establishment in California of a soil and water conservation laboratory

"Whereas a proposal is under consideration to provide for the establishment by the Secretary of Agriculture of four soil and water conservation laboratories, one to be located in the western irrigated area of the United States; and

"Whereas there is a great interest throughout California's extensive agricultural community in research into problems relating to soil and water management and conservation; and

"Whereas an excellent location for such a conservation laboratory exists at the Davis Campus of the University of California: Now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress and the Secretary of Agriculture to provide such laboratories; and be it further

"Resolved, That the Legislature of the State of California wishes to express its intent to the Congress and to the Secretary of Agriculture that it shall provide necessary land at or near the Davis Campus of the University of California upon which a conservation laboratory may be established and maintained; and be it further

"Resolved, That the chief clerk of the assembly is hereby directed to transmit copies of this resolution to the President of the United States, to the President of the Senate in the Congress of the United States, to the Speaker of the House of Representatives in the Congress of the United States, to each Senator and Representative from California in the Congress of the United States, and to the Secretary of Agriculture."

A joint resolution of the Legislature of the State of California; to the Committee on Armed Services:

"ASSEMBLY JOINT RESOLUTION NO. 13

"Relative to equalizing retirement benefits for retired members of the Armed Forces who retired prior to June 1, 1958

"Whereas there is now pending before the Congress of the United States legislation concerning the improvement of benefits for retired members of the United States Armed Forces who retired prior to June 1, 1958; and

"Whereas there appears to be no basis for the gross discrimination against retired personnel who retired before June 1, 1958, as they are, by reason of past meritorious services, equally entitled to the increased benefits granted personnel who retire, or have retired, after such date; and

"Whereas this false distinction violates the basic precepts of fair play, and the circumstances of retirement should not penalize these honorable members of our society, who must meet the present ever-increasing cost of living the same as personnel that retired after June 1, 1958: Now, therefore, be it

"Resolved by the Assembly and the Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to enact legislation that will increase the retirement benefits of the retired personnel who retired prior to June 1, 1958, so that they will be treated equally with personnel who retire, or have retired, after such date; and be it further

"Resolved, That the chief clerk of the assembly is hereby directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A concurrent resolution of the Legislature of the Territory of Hawaii; ordered to lie on the table:

"SENATE CONCURRENT RESOLUTION 11

"Whereas the people of Hawaii have lived for 59 years in the American tradition and throughout this entire period have demonstrated their understanding of national ideals and their capacity to conduct effectively their social, economic, and political affairs and have contributed worthily to the life of this Nation; and

"Whereas the people of Hawaii have repeatedly expressed their desire to enjoy the privileges of fullfledged citizenship by seeking to assume and discharge the responsibilities of statehood and have, in furtherance of this objective, prepared and adopted a constitution for their proposed new State, the spirit of which is embodied in the following preamble: 'We, the people of the State of Hawaii, grateful for Divine Guidance, and mindful of our Hawaiian heritage, reaffirm our belief in a government of the people, by the people and for the people, and with an understanding heart toward all the people of the earth, do hereby ordain and establish this constitution for the State of Hawaii': Now, therefore, be it

"Resolved by the Senate of the Legislature of the Territory of Hawaii, the House of Representatives concurring, That the deep appreciation of the people of Hawaii be expressed to those Members of the Congress who are responsible for the rapid progress now being made toward the granting of statehood to Hawaii, and to the President for his wholehearted support, and that they be and hereby are respectfully petitioned to continue in their efforts so that Hawaii's bright star may be added to those of the 49 sovereign States in this, the 184th year of the independence of the United States of America; and be it further

"Resolved, That copies of this concurrent resolution be forwarded to the President of the United States, to the Vice President of the United States and to the majority leader of the Senate of the United States, to the Speaker and majority leader of the House of Representatives of the United States and to the Delegate to Congress of the United States from Hawaii."

"THE SENATE OF THE TERRITORY
OF HAWAII,
"Honolulu, T.H., February 27, 1959.

"We hereby certify that the foregoing concurrent resolution was adopted by the Senate of the 30th Legislature of the Territory of Hawaii on February 20, 1959.

"HUBERT K. H. LEE,
"President of the Senate.
"JAMES H. KAMO,
"Clerk of the Senate.

"THE HOUSE OF REPRESENTATIVES
OF THE TERRITORY OF HAWAII,
"Honolulu, T.H., February 27, 1959.

"We hereby certify that the foregoing concurrent resolution was adopted by the House of Representatives of the 30th Legislature of the Territory of Hawaii on February 25, 1959.

"Speaker, House of Representatives.
"HERMAN T. F. LUM,
"Clerk, House of Representatives."

A resolution adopted by the Louisiana School Boards Association, at Monroe, La., relating to segregation in the schools of Louisiana; to the Committee on the Judiciary.

The petition of Ophelia Beard, of Chicago, Ill., praying for a redress of grievances; to the Committee on the Judiciary.

CONCURRENT RESOLUTION OF MINNESOTA LEGISLATURE

Mr. HUMPHREY. Mr. President, I ask unanimous consent that a concurrent resolution adopted by the 1959 Minnesota State Legislature entitled, "A concurrent resolution memoralizing the Congress of the United States to enact legislation providing for the repeal of the Federal excise tax upon the transportation of passengers," be printed in the RECORD and appropriately referred.

There being no objection, the concurrent resolution was referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

RESOLUTION 1

A concurrent resolution memoralizing the Congress of the United States to enact legislation providing for the repeal of the Federal excise tax upon the transportation of passengers

Whereas the Federal excise tax upon the transportation of passengers was adopted as a wartime tax to discourage the movement of civilian passengers during World War II; and

Whereas today, 13 years after the cessation of hostilities, there continues a 10 percent levy on the transportation of passengers (title VI, sec. 609(a) U.S. Code), which tax while collected by the common carriers of transportation by rail, by highway, by water, and in the air, is imposed upon and collected from the users of such transportation; and

Whereas millions of dollars in revenues are paid to the State of Minnesota by those common carriers; and

Whereas the 10 percent tax on transportation of passengers discourages the use of public transportation systems and tends to decrease the revenue of the State and local government by reason of the lesser earnings or volume of business of said public system of transportation; and

Whereas there exists ample facilities for the public transportation of persons throughout the State of Minnesota and the Nation and the purpose for which said tax was imposed has long since ceased to exist; and

Whereas the decrease in revenue by reason of the small amount received for said excise tax on the transportation of passengers will largely be made up by the increased income taxes paid by the passengers of common carriers and other excise taxes paid on the facilities and equipment used by said common carriers: Now, therefore, be it

Resolved by the Senate of the State of Minnesota, the House of Representatives concurring therein, That we respectfully urge and request the Congress of the United States to enact appropriate legislation to repeal the Federal excise taxes upon the transportation of persons.

Be it further resolved, That the secretary of state of the State of Minnesota be directed to transmit a copy of this resolution to the President of the United States, the Vice President of the United States, the Speaker of the House of Representatives of the Congress of the United States, and to each Member of the Minnesota delegation in the United States Senate and the United States House of Representatives.

KARL F. RALVAAG,
President of the Senate.
E. J. CHILGREN,
Speaker of the House of Representatives.
Approved February 19, 1959.
ORVILLE L. FREEMAN,
Governor of the State of Minnesota.

CONCURRENT RESOLUTION OF LEGISLATURE OF SOUTH DAKOTA

Mr. CASE of South Dakota. Mr. President, I ask unanimous consent to have printed in the RECORD the concurrent resolution passed by the Legislature of the State of South Dakota memorializing the Congress of the United States to refuse to enact any increase in the Federal gasoline tax.

The South Dakota Legislature points out that since the enactment in 1919 of the first State gasoline tax, this levy has been historically and rightfully a tax field particularly for the States. And insofar as South Dakota is concerned, such a tax since 1921 has been the principal source of revenue for State highway construction, maintenance, and supervision.

There being no objection, the concurrent resolution was referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

HOUSE CONCURRENT RESOLUTION 3

A concurrent resolution memorializing the Congress of the United States to refuse to enact any increase in the Federal gasoline tax

Be it resolved by the House of Representatives of the South Dakota Legislature, the Senate concurring therein:

Whereas since the enactment in 1919 of the first State gasoline tax, this levy has been historically and rightfully a tax field particularly for the States, and

Whereas, South Dakota has imposed such a tax since 1921, which levy has been the principal source of revenue for State highway construction, maintenance and supervision since such date, and

Whereas in 1932 the Federal Government first imposed an excise tax on gasoline which was supposed to be a temporary emergency tax relief measure, but which has since been increased two hundred percent and has now been set over as the principal source of revenue for the Federal Highway Trust Fund, and

Whereas the State and Federal gasoline tax combined averages about nine cents per gallon for the Nation as a whole and amounts to a levy equivalent to substantially 41 percent of the average retail price of gasoline, and

Whereas the President of the United States has recently suggested to the Congress of the United States that the Federal gasoline tax be increased 1½ cents per gallon, making it a tax of 4½ cents per gallon, and

Whereas such further increase could have the effect of discouraging the use of motor vehicles and would thus have serious consequences for the economy as a whole as well as highway transportation, and could jeopardize the tourist travel which is so advantageous to the State of South Dakota, and also might jeopardize the national highway program by retarding the normal growth of highway tax revenues, and

Whereas the Federal automotive excise taxes now imposed raised $1½ billion in the last fiscal year above the Federal excise taxes dedicated to the Federal Highway Trust Fund and is far in excess of any suggested future deficit which might occur in such Highway Trust Fund: Now, therefore, be it

Resolved by the House of Representatives of the South Dakota Legislature, the Senate concurring therein, That we respectfully request and memorialize the Congress of the United States to oppose any increase in the Federal gasoline tax; and be it

Resolved further, That the Members of Congress from the State of South Dakota are hereby urged and requested to oppose any such legislation to increase the Federal gasoline tax; and be it further

Resolved, That the secretary of state transmit copies of this resolution to the Senate and the House of Representatives of the Congress of the United States, and to Hon. KARL MUNDT and Hon. FRANCIS CASE, Members of the United States Senate from South Dakota, and to Hon. E. Y. BERRY and Hon. GEORGE MCGOVERN, Members of the House of Representatives of the Congress of the United States from the State of South Dakota.

JOHN F. LINDLEY,
Lieutenant Governor,
President of the Senate.
W. K. HOLLAND,
Secretary of the Senate.
ARCHIE GUBBRUD,
Speaker, House of Representatives.
W. J. MATSON,
Chief Clerk, House of Representatives.

CONCURRENT RESOLUTION OF SOUTH CAROLINA LEGISLATURE

Mr. THURMOND. Mr. President, on behalf of myself and my colleague, the senior Senator from South Carolina [Mr. JOHNSTON] I present for appropriate reference a concurrent resolution of the General Assembly of South Carolina, memorializing Congress to remove the wartime excise taxes upon local and long distance telephone service.

There being no objection, the concurrent resolution was referred to the Committee on Finance, and, under the rule, ordered to be printed in the RECORD, as follows:

A CONCURRENT RESOLUTION MEMORIALIZING CONGRESS TO REMOVE THE WARTIME EXCISE TAXES UPON LOCAL AND LONG DISTANCE TELEPHONE SERVICE

Whereas in 1941, as an emergency wartime measure, Congress imposed a 10 percent excise tax upon all local and long distance telephone service for the purpose of supporting the war effort and to discourage the use of telephone service during this emergency; and

Whereas telephone service has become an essential part of our economic and social life and under no circumstances can it be considered a luxury item, taxed as such; and

Whereas this tax stands out alone in that other household and business necessities, including electricity, water and gas, are not taxed; and

Whereas placing this high excise tax upon such a necessity of life results in the taxation of those citizens who can least afford to pay in the same manner as those of unlimited financial means; and

Whereas the wartime emergency for which this tax was imposed and the restriction of the use of telephone service has long since passed: Now, therefore, be it

Resolved by the house of representatives, the senate concurring, That the Congress of the United States be memorialized to remove the unfair and unequitable excise tax heretofore imposed upon telephone service and that the tax be removed during the present session of Congress; and be it further

Resolved, That a copy of this resolution be forwarded by the clerk of the house to the President of the United States, the Vice President, the Speaker of the House of Representatives and to the two Senators and each Member of Congress from this State.

I hereby certify that the foregoing is a true and correct copy of a resolution adopted by the South Carolina House of Representatives and concurred in by the Senate.

INEZ WATSON,
Clerk of the House.

The PRESIDENT pro tempore laid before the Senate a concurrent resolution of the Legislature of the State of South Carolina, identical with the foregoing, which was referred to the Committee on Finance.

CONCURRENT RESOLUTION OF KANSAS LEGISLATURE

Mr. CARLSON. Mr. President, water is one of our Nation's greatest resources and one we all too often take for granted. Those of us who live in the great Midwest fully realize that the growth and development of our area is going to be determined by the amount of water we can conserve and use for beneficial purposes.

The Kansas Legislature, which is now in session, is fully aware of this problem and the house of representatives and the senate are to be commended for approving House Concurrent Resolution No. 20, which stresses the urgency of this problem.

It is so important that I ask unanimous consent that this resolution be printed in the RECORD and referred to the appropriate committee.

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). The resolution will be received and appropriately referred; and, without objection, the resolution will be printed in the RECORD.

The concurrent resolution was referred to the Committee on Public Works; and, under the rule, was ordered to be printed in the RECORD, as follows:

HOUSE CONCURRENT RESOLUTION 20

Concurrent resolution petitioning the Congress of the United States to take appropriate action to assure the continuance of surveys and planning and cooperation in the construction of projects in the State of Kansas that are vital and necessary to the control of floods and the conservation of soil and water by sufficient appropriations being granted for this purpose to the Bureau of Reclamation, the U.S. Department of Agriculture and the Corps of Engineers and other Federal agencies and departments

Whereas water and soil are the most valuable natural resources of Kansas; and

Whereas the citizens, industries, farms, and cities of Kansas have always been subject to flood and drought but more recently they have experienced severe hardships and

great financial losses from floods and droughts during the years 1951, 1952, 1953, 1954, 1955, 1956, 1957, and 1958; and

Whereas many cities, industries, and farms have recently suffered from a critical shortage of water and at the same time are exposed to the further hazards of flood and drought; and

Whereas the nature of rivers is such that storms occurring in headwater regions of a stream in one State frequently inflict damage to areas in other States, and the benefits of stream stabilization resulting in adequate and dependable water supplies in one State become beneficial to areas in other States; and

Whereas it has become evident that we must use every means available and feasible to conserve and control all of the sources of water supply for agricultural, municipal, industrial, and recreational use; and

Whereas land treatment and watershed development have been increasingly emphasized as vital to all programs for the conservation of water and soil by the executive and legislative branches of State government, the State water resources board, State department of agriculture and other agencies, and the program is lagging because of the insufficiency of Federal funds for planning purposes; and

Whereas the Federal Government through acts of Congress has delegated to three agencies, namely, the Bureau of Reclamation, the Soil Conservation Service of the U.S. Department of Agriculture, and the Corps of Engineers the principal responsibilities for the conservation of water and soil, and more specifically, such matters as water supply, irrigation, pollution control, soil conservation, and flood control: Now, therefore, be it

Resolved by the House of Representatives of the State of Kansas, the Senate concurring therein, That we respectfully urge, request, and petition the Congress of the United States to take such action necessary to assure (1) continuance of surveys, planning, and cooperation in the construction of projects in the State of Kansas that are vital and necessary to the prevention of floods and to the conservation of water and soil, and (2) that Federal funds for this purpose be appropriated in sufficient amounts to the Soil Conservation Service of the U.S. Department of Agriculture, the Bureau of Reclamation, and the Corps of Engineers, and also other Federal agencies and departments; and be it further

Resolved, That the secretary of state be instructed to transmit enrolled copies of this resolution to the President of the United States, the Vice President of the United States, each Member of Congress of the United States, and the Director of the Bureau of the Budget of the United States.

I hereby certify that the above concurrent resolution originated in the house, and was adopted by that body February 16, 1959.

JESS TAYLOR,
Speaker of the House.
A. E. ANDERSON,
Chief Clerk of the House.

Adopted by the senate February 27, 1959.

JOSEPH W. HENKLE, Sr.,
President of the Senate.
RALPH E. ZARKER,
Secretary of the Senate.

Mr. SCHOEPPEL. Mr. President, I ask unanimous consent that there be printed in the RECORD a resolution, House Concurrent Resolution No. 20, passed upon by the Legislature of the State of Kansas, pertaining to the subject of control of floods and soil conservation in the State of Kansas.

The concurrent resolution was referred to the Committee on Public Works.

(See the above concurrent resolution printed in full when presented by Mr. CARLSON today.)

The PRESIDENT pro tempore laid before the Senate a concurrent resolution of the Legislature of the State of Kansas, identical with the foregoing, which was referred to the Committee on Public Works.

HAWAIIAN STATEHOOD

Mr. CARLSON. Mr. President, the Kansas Junior Chamber of Commerce, an organization of 4,000 members, representing 65 communities in the State of Kansas, adopted a resolution at its meeting on the 24th day of February 1959, urging that the Territory of Hawaii be admitted to the Union as the 50th state.

I ask unanimous consent that the resolution be printed in the RECORD, and referred to the appropriate committee.

The PRESIDING OFFICER. The resolution will be received and appropriately referred; and, without objection, the resolution will be printed in the RECORD.

The resolution was ordered to lie on the table, as follows:

KANSAS JUNIOR CHAMBER OF COMMERCE RESOLUTION

Whereas the Territory of Hawaii has long been an integral part of the United States of America, with its people having served and contributed to our Nation in time of peace and war; and

Whereas the said Territory of Hawaii has progressed economically, politically and socially to the point where it is ready and willing to assume the position of a sovereign State and now seeks admittance to our great Union as the 50th State: Now, therefore, be it

Resolved by the Kansas Junior Chamber of Commerce, an organization of 4,000 members representing 65 communities in the State of Kansas, That the Territory of Hawaii should be admitted to the Union as the 50th State by the Congress of the United States by immediate passage of the Hawaiian statehood bill; and be it further

Resolved, That copies of this resolution be forwarded to all Kansas Congressmen and Senators urging their support for Hawaiian statehood.

Dated this 24th day of February 1959.

KANSAS JUNIOR CHAMBER OF COMMERCE,
By: EMERSON SHIELDS, *President.*

Attest:

WAYNE FOX,
Secretary.

RESOLUTIONS OF GENERAL ASSEMBLY OF RHODE ISLAND

Mr. GREEN. Mr. President, on behalf of my colleague, the junior Senator from Rhode Island [Mr. PASTORE] and myself, I present a resolution of the General Assembly of Rhode Island memorializing the President of the United States, the Senators and Representatives from Rhode Island in the Congress of the United States and the Secretary of the Interior, to make every effort to have built on Federal unused land in the city of Newport, R.I., a saline water conversion plant.

I ask unanimous consent that the resolution may be appropriately referred.

There being no objection, the resolution was referred to the Committee on Interior and Insular Affairs, and, under the rule, ordered to be printed in the RECORD, as follows:

S. 255

A resolution memorializing the President of the United States, the Senators and Representatives from Rhode Island in the Congress of the United States and the Secretary of the Interior, to make every effort to have built on Federal unused land in the city of Newport, R.I., a saline water conversion plant

Whereas the Department of the Interior of our Federal Government is about to have built, five saline water conversion plants somewhere in the United States; and

Whereas it has been stated that unused Federal land would be used for this purpose; and

Whereas we, in the city of Newport, R.I., have many present inactive Federal Government installations; and

Whereas we, in the city of Newport, R.I., had a recent water shortage that caused the hiring of a rainmaker; and

Whereas the fact that the city of Newport is on an island and depends on watershed water that requires much treatment with chlorine, etc.; and

Whereas the taste of this water (due to the treatment it must have) leaves much to be desired and many people buy distilled bottled water for drinking and cooking purposes: Now, therefore, be it

Resolved, That the General Assembly of the State of Rhode Island and Providence Plantations does now respectfully request the President of the United States, the Senators and Representatives from Rhode Island in the Congress of the United States and the Secretary of the Interior to make every effort to have built on one of the inactive Federal Government installations in the city of Newport, R.I., and not necessary to the public defense, a saline water conversion plant; and be it further

Resolved, That the secretary of state be and he is hereby authorized and directed to transmit duly certified copies of this resolution to the President of the United States, to the Senators and Representatives from Rhode Island in the Congress of the United States and to the Secretary of the Interior.

Mr. GREEN. Mr. President, at its January 1959 session, the Rhode Island General Assembly passed house resolution 1250, which became effective February 28, 1959.

I have the honor to call this resolution to the attention of my Senate colleagues, the title being: "Resolution commending Hon. JOHN O. PASTORE, Senator from Rhode Island, for his stand and recommendations with respect to the creation of a permanent textile interagency committee in the Department of Commerce to deal with the problems and foster the interests of the ailing textile industry and memorializing Congress to enact legislation to activate these recommendations."

In the conduct of the investigation of the textile industry and its related problems undertaken by the special subcommittee of the Senate Interstate and Foreign Commerce Committee during the 2d session of the 85th Congress, my distinguished colleague the junior Senator from Rhode Island, as chairman of that subcommittee, performed a remarkable service to the Congress and to the textile industry itself.

It is, indeed, fitting that the Rhode Island General Assembly has recognized this important service of my Senate colleague by passage of house resolution 1250. I hereby ask unanimous consent

for the printing of the complete text of this resolution in the RECORD.

There being no objection, the resolution was ordered to lie on the table, and, under the rule, ordered to be printed in the RECORD, as follows:

House Resolution 1250

A resolution commending Hon. JOHN O. PASTORE, Senator from Rhode Island, for his stand and recommendations with respect to the creation of a permanent textile interagency committee in the Department of Commerce to deal with the problems and foster the interests of the ailing textile industry and memorializing Congress to enact legislation to activate these recommendations

Whereas Hon. JOHN O. PASTORE, Senator from Rhode Island, of the Pastore textiles subcommittee, and his associates have recommended the creation of a permanent textile interagency committee in the Department of Commerce to deal with the problems and foster the interests of the ailing industry; and

Whereas the suggested committee would fall short of last year's recommendations to the subcommittee that a new Federal textiles agency be established, but it is designed to allow for a continuing close look at the industry by the executive departments whose policies can affect it for better or worse; and

Whereas at the same time the subcommittee, a special group named last year and headed by Senator JOHN O. PASTORE, urged that the Senate Commerce Committee should create a permanent textiles subcommittee, a sort of congressional watchdog over the proposed executive watchdog; and

Whereas the recommendations were the first points of a program which won approval of the parent Commerce Committee, while other points included:

Collection, analysis, and publication by the Commerce Department of statistics of the industry, under the supervision of the textile interagency committee;

Establishment of quotas on textile imports, under the supervision of the textile interagency committee;

A careful administrative review of the foreign aid program with a view to encouraging other countries to concentrate on development of industries other than textiles;

More realistic interpretation of the current peril-point provision of the Trade Agreements Act and faster action on escape-clause cases brought before the Tariff Commission;

Earmarking of some proportion of customs duties on imported textiles to foot the cost of Federal aid for research in the textile industry: Now, therefore, be it

Resolved, That the General Assembly of the State of Rhode Island now commends Senator JOHN O. PASTORE, of Rhode Island, chairman of the textiles subcommittee, for the excellence of his recommendations and those of the subcommittee, requesting Congress to pass needed legislation to activate the program; and be it further

Resolved, That the secretary of state be and he is hereby authorized to transmit to the Senators and Representatives from Rhode Island in the Congress of the United States duly certified copies of this resolution.

GEORGE H. LEHLEITNER—CONCURRENT RESOLUTION OF ALASKA LEGISLATURE

Mr. GRUENING. Mr. President, the Alaska State Legislature has passed a resolution expressing appreciation to a distinguished citizen of New Orleans, La., for his participation in the movement to achieve statehood for Alaska.

His service in behalf of this cause of Alaskan statehood has been so unique, so unselfish, and so outstanding that, before presenting the resolution for the RECORD, I desire to make a brief comment about him.

George H. Lehleitner is a successful, self-made businessman in New Orleans. During World War II, he enlisted in the Navy and was stationed in Honolulu. There, he became greatly interested in the cause of Hawaiian statehood, and worked to promote that cause. Inevitably, the interest he developed in Hawaiian statehood led him to an equal concern for Alaskan statehood.

Finding that despite a steadily growing and overwhelming public sentiment in favor of both Alaskan and Hawaiian statehood, as evidenced not merely by the public opinion polls but by the polls taken in numerous congressional districts by Members of Congress, enactment of statehood legislation was lagging. George Lehleitner, to counter this lag, extracted precedents out of America's past history and proposed a bold course of action.

That proposal was that the people of Alaska should adopt the procedure first originated in 1796 by the pioneer people of the region west of the Appalachians, which was to become the State of Tennessee. In 1796, the Tennesseans, impatient because the first three Congresses had not enacted statehood for Tennessee, elected two United States Senators and sent them to the National Capital—which was then Philadelphia—to work for statehood. The plan succeeded, and in a few months, Tennessee was admitted to the Union. The first Representative in the House of that great State was none other than Andrew Jackson, subsequently the seventh President of the United States. A similar procedure was adopted in 1835 by Michigan; in 1846 by Iowa; by California in 1850; by Minnesota in 1858; by Oregon in 1859; and by Kansas in 1861.

It was George Lehleitner who called this important historical precedent to the attention of the people of Alaska. Detailed information was secured from the Library of Congress, through the helpful and friendly intercession of the distinguished junior Senator from the State of Louisiana [Mr. LONG] and presented to the people of Alaska. The Alaska Territorial Legislature, in 1955, had already provided for a constitutional convention in advance of action by the Congress, appropriating $300,000 for it, scorning the advice of the timid that if Alaska waited until Congress enacted a statehood bill, the cost of the constitutional convention would be defrayed by Federal funds. The people of Alaska, after 88 years of territorialism, were determined to wait no longer. They had been far more patient than the people of Tennessee, and far more patient than the people of California who leaped boldly over any interval of territorial status. Fifty-five delegates—the same historic number as those who met in Philadelphia in 1787 to draft the Constitution of the United States—met at the University of Alaska in November of 1955, and there drafted a constitution which political scientists have compared favorably with any existing State constitution. The constitutional convention also provided for presentation to the people of Alaska an ordnance which would enable them to decide whether they wished or did not wish to adopt the Tennessee plan and to elect two Senators and a Representative and to send them to Washington to work for statehood. At an election on April 24, 1956, the people of Alaska both ratified the constitution and voted to adopt the plan which was henceforth named the Alaska-Tennessee plan. The only essential difference between Alaska's history and the history of the seven States which earlier adopted the Tennessee plan is that their Senators were seated without another election. Alaska's were not.

The author, the pioneer, and the promoter of this bold and successful adaptation of earlier American history was George Lehleitner. He journeyed to Fairbanks at his own expense to appear before the Alaska Constitutional Convention to urge its adoption. In the intervening months, he spent liberally of his own funds in travel and in other ways to advance the cause of statehood for both Alaska and Hawaii. His sacrifices were wholly unselfish and motivated solely by his adherence to basic American principles, above all, to that most fundamental of American principles—the principle of government by consent of the governed.

It is not often, Mr. President, that we find a man in private life devoting his time, his energy, and his funds to the advancement of a principle and a cause in which he believes and from which he stands to gain no personal benefit whatsoever.

Therefore, it gives me great pleasure to ask unanimous consent to have printed in the CONGRESSIONAL RECORD, at this point—at the conclusion of my remarks—House Concurrent Resolution No. 7 of the First State Legislature of Alaska, introduced by Representative Helen Fischer, of Anchorage, the National Democratic Committeewoman for Alaska, and Representatives James Hurley, of Palmer, and John S. Hellenthal, of Anchorage, which expresses the gratitude of the people of Alaska to that outstanding American, George H. Lehleitner.

There being no objection, the resolution was referred to the Committee on Interior and Insular Affairs, as follows:

HOUSE CONCURRENT RESOLUTION 7

Concurrent resolution relating to an expression of gratitude to George H. Lehleitner

Whereas the struggle to attain full statehood for Alaska has spanned a half century of time and many persons have contributed greatly to the success of the statehood movement, to all of whom Alaskans owe a debt of gratitude; and

Whereas there is one person, a private citizen, whose completely unselfish, vigorous, and dedicated attention to the cause of Alaska statehood was most unusual in that he had never been in Alaska, but believed sincerely that statehood was the inherent right of Alaska, and to that end devoted many years of his life at great personal sacrifice: Now, therefore, be it

Resolved by the House of Representatives of the First State Legislature, the Senate concurring, That George H. Lehleitner, of New Orleans, La., be recognized as the father of the Alaska-Tennessee plan, and that the Legislature of the State of Alaska on behalf

of the people of Alaska hereby conveys its appreciation to the said George H. Lehleitner for his invaluable assistance in their successful bid for statehood; be it further

Resolved, That a copy of this resolution be transmitted to the said George H. Lehleitner.

Mr. BARTLETT. Mr. President, I am glad that my colleague, the Senator from Alaska [Mr. GRUENING] has brought to the attention of the Senate the resolution of the Alaska State Legislature in praise of George Lehleitner. In my opinion no man has ever been more deserving of the esteem and gratitude of an entire people than this gentleman from Louisiana. His efforts in behalf of Alaskan statehood were those of a dedicated man in a dedicated cause. He sought nothing—absolutely nothing—for himself. He sought only the attainment of the goal now reached—Alaska statehood.

George Lehleitner gave ever so freely of his money, time, and the contributions of his first class mind in his determination that Alaska should be a State. I have never known a man more selfless and more unselfish. Perhaps this legislative resolution is the first official expression which has gone to George Lehleitner indicating how Alaskans feel about him. But even if no other recognition were ever to be extended to him—an unlikely contingency, I assure Senators—I want these words of mine to stand as a declaration that those of us who were closely associated with him as we sought Alaskan statehood together will retain always for George Lehleitner a deep feeling of thanks for his really tremendous contributions and a feeling of pleasure that this cause enabled us to come to know, respect, and entertain affection for a very wonderful human being.

Mr. LONG subsequently said:

Mr. President, it has been extremely gratifying to me to hear the words of praise for George Lehleitner from the two Senators from Alaska. George Lehleitner is truly a noble American, and one of the most selfless persons whom I have ever had the privilege to know. Without George Lehleitner I am inclined to believe that the case of statehood for both Alaska and Hawaii would have died a natural death for lack of interest from outside the Territories, and as a result of the discouragement incident to continued frustrations by reason of the repeated failure of efforts to pass earlier statehood bills.

George Lehleitner refused to be discouraged, and persisted at a time when when the cause looked most dismal.

It was to a large degree because of his efforts as a true believer in statehood that Alaskan statehood became a reality; and I believe that it will be in large measure due to his determined efforts that statehood for Hawaii will become a reality at this session of Congress.

AMENDMENT OF SOCIAL SECURITY ACT, RELATING TO RESTRICTION OF ANNUAL EARNINGS—RESOLUTION

Mr. SALTONSTALL. Mr. President, on behalf of myself, and my colleague, the junior Senator from Massachusetts [Mr. KENNEDY], I present a resolution adopted by the Board of Aldermen of the City of Somerville, Mass., relating to the restriction on annual earnings under the Social Security Act. I ask unanimous consent that the resolution may be printed in the RECORD.

There being no objection, the resolution was referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

RESOLUTION MEMORIALIZING THE U.S. CONGRESS RELATIVE TO AMENDING SOCIAL SECURITY LAWS ANENT ANNUAL EARNINGS RESTRICTION

Whereas the present law restricts the earnings of people between the ages of 65 to 72 to $1,200 in a calendar year; and

Whereas the higher cost of food and commodities and the general rise in the cost of living affects all: Be it therefore

Resolved, That the Board of Aldermen of the City of Somerville, Commonwealth of Massachusetts, does hereby go on record as favoring an amendment to the social security laws, and does petition for same, whereby people between the ages of 65 and 72 shall be allowed earnings of $2,000 in a calendar year, in order to alleviate the hardships caused by the increased cost of living; and be it further

Resolved, That copies of this resolution be forwarded to the U.S. Senate and the House of Representatives, and to Senator JOHN F. KENNEDY, Senator LEVERETT SALTONSTALL, Congressman TORBERT H. MACDONALD, and Congressman THOMAS P. O'NEILL, JR.

CLOSING OF SOUTH BOSTON NAVAL ANNEX—RESOLUTION

Mr. SALTONSTALL. Mr. President, on behalf of myself, and my colleague, the junior Senator from Massachusetts [Mr. KENNEDY], I present a resolution adopted by the Board of Aldermen of the City of Somerville, Mass., relating to closing of the South Boston Naval Annex. I ask unanimous consent that the resolution may be printed in the RECORD.

There being no objection, the resolution was referred to the Committee on Armed Services, and ordered to be printed in the RECORD, as follows:

RESOLUTION MEMORIALIZING THE U.S. CONGRESS AND THE SECRETARY OF NATIONAL DEFENSE OF SOMERVILLE BOARD OF ALDERMEN'S OPPOSITION TO PROPOSED CLOSING OF THE SOUTH BOSTON NAVAL ANNEX

Whereas the Secretary of National Defense has given indication of the closing of the Boston Naval Shipyard's South Boston Annex facility, the South Boston Naval Annex, with the overhauling and repair work to be transferred from said South Boston Drydock to southern ports; and

Whereas the South Boston Naval Annex employees some 1,500 to 2,000 civilian artisans, many of them Somerville residents, who will become unemployed if said South Boston Naval Annex is closed, thereby causing hardship to these workers and their families; and

Whereas the South Boston Naval Annex has proved its value to our country in both peace and war and is recognized as geographically and strategically essential to our national defense in the event of hostilities: Be it therefore

Resolved, That the Board of Aldermen of the City of Somerville, Commonwealth of Massachusetts, does hereby go on record as opposing any proposed closing of the South Boston Naval Annex as being contrary to the interests of our national defense as well as the economic welfare of the greater Boston community; and be it further

Resolved, That copies of this resolution be forwarded to both branches of the U.S. Congress, members of the Massachusetts congressional delegation and Secretary of Defense Neil McElroy.

RESOLUTION OF BOARD OF CITY COMMISSIONERS, FARGO, N. DAK.

Mr. LANGER. Mr. President, I present, for appropriate reference, a resolution adopted by the Board of Commissioners of the City of Fargo, N. Dak., relating to the establishment of the Office of Water Pollution Control. I ask unanimous consent that the resolution may be printed in the RECORD.

There being no objection, the resolution was referred to the Committee on Public Works, and ordered to be printed in the RECORD, as follows:

Be it resolved by the Board of City Commissioners of the City of Fargo:

Whereas there is now before the 86th Congressional Assembly of the United States of America, a bill providing for the amendment of the Federal Water Pollution Control Act to increase grants for construction of sewage treatment works; to establish the Office of Water Pollution Control, and for other purposes, being House of Representatives congressional bill No. 3610; and

Whereas the passage of said bill will be of great benefit to all municipalities of the United States of America: Now, therefore, be it

Resolved, That the Board of City Commissioners of the City of Fargo, N. Dak., hereby strongly endorses said bill, and urges its passage; be it further

Resolved, That a certified copy of this resolution be forwarded to the Honorable JOHN A. BLATNIK, chairman of the Rivers and Harbor Subcommittee of the House of Representatives; the Honorable CHARLES A. BUCKLEY, chairman of the Committee on Public Works of the House of Representatives; and to the North Dakota legislative delegation in Washington, D.C.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

S. 243. A bill for the relief of Donald D. Ellis, an individual trading as the Ellis Timber Co. (Rept. No. 84);

S. 328. A bill for the relief of Ellen B. Mueller (Rept. No. 85);

S. 330. A bill for the relief of Erminio Neglia (Rept. No. 86);

S. 331. A bill for the relief of Jakob Liblang, Jr. (Rept. No. 87);

S. 332. A bill for the relief of Martin Albert (Rept. No. 88);

S. 624. A bill for the relief of Girolamo Naselli (Rept. No. 89);

S. 633. A bill for the relief of Yasuko Kitano (Rept. No. 90); and

S. 869. A bill for the relief of Konstantinos A. Kostalas (Rept. No. 91).

By Mr. EASTLAND, from the Committee on the Judiciary, with an amendment:

S. 459. A bill for the relief of Penelope Carnavas Kafos (Rept. No. 92); and

S. 460. A bill for the relief of Gorjana Grdjic (Rept. No. 93).

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

S. 327. A bill for the relief of Cwy Pinkusiewicz (Rept. No. 94); and

S. 425. A bill for the relief of Klarchen Huebner (Rept. No. 95).

By Mr. RUSSELL, from the Committee on Armed Services, with amendments:

H.R. 2260. An act to extend until July 1, 1963, the induction provisions of the Universal Military Training and Service Act; the provisions of the Act of August 3, 1950, suspending personnel strengths of the Armed Forces; and the Dependents Assistance Act of 1950 (Rept. No. 96).

REPORT ENTITLED "PATENTS, TRADEMARKS, AND COPYRIGHTS"—REPORT OF A COMMITTEE (S. REPT. NO. 97)

Mr. O'MAHONEY, from the Committee on the Judiciary, submitted a report entitled "Patents, Trademarks, and Copyrights," pursuant to Senate Resolution 236, 85th Congress, 2d session, as extended, which was ordered to be printed.

REPORT ENTITLED "1959 JOINT ECONOMIC REPORT" (S. REPT. NO. 98)

Mr. DOUGLAS. Mr. President, on behalf of the Joint Economic Committee I submit for filing the report, with illustrations, of the Joint Economic Committee on the January 1959 Economic Report of the President, with minority and other views. The report is being filed at this time in accordance with the extension which was granted by unanimous consent in the Senate and the House of Representatives on Thursday, February 26.

I ask unanimous consent that the report with the minority and other views be printed as a Senate report, with illustrations.

The PRESIDING OFFICER. The report will be received and printed, as requested by the Senator from Illinois.

REPORTS ON DISPOSITION OF EXECUTIVE PAPERS

Mr. JOHNSTON of South Carolina, from the Joint Select Committee on the Disposition of Papers in the Executive Departments, to which were re-referred for examination and recommendation two lists of records transmitted to the Senate by the Archivist of the United States that appeared to have no permanent value or historical interest, submitted reports thereon, pursuant to law.

STUDY OF FEDERAL JUDICIAL SYSTEM—REPORT OF A COMMITTEE

Mr. JOHNSTON of South Carolina, from the Committee on the Judiciary, reported an original resolution (S. Res. 91), which was referred to the Committee on Rules and Administration, as follows:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized under sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdictions specified by rule XXV of the Standing Rules of the Senate, to make a complete study and examination of the Federal judicial system with a view to determining the legislative or other measures, if any, which may be necessary or desirable in order to increase the efficiency of the Federal courts in justly and expeditiously adjudicating or determining the cases, controversies, and other matters which may be brought before them.

SEC. 2. For the purposes of this resolution the committee, from February 1, 1959, to January 31, 1960, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ, upon a temporary basis, technical, clerical, and other assistants and consultants: *Provided,* That the minority is authorized to select one person for appointment, and the person so selected shall be appointed and his compensation shall be so fixed that his gross rate shall not be less by more than $1,200 than the highest gross rate paid to any other employee; and (3) with the prior consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1960.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $60,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

SUMMARY OF MONTHLY PERSONNEL REPORTS ON CIVILIAN EMPLOYMENT BY JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES

Mr. BYRD of Virginia. Mr. President, as chairman of the Joint Committee on Reduction of Nonessential Federal Expenditures, I submit a summary of monthly personnel reports on civilian employment in the executive branch of the Federal Government for the period November 1958 to January 1959 inclusive.

In accordance with the practice of several years standing, I request that the summary be printed in the RECORD as a part of my remarks.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

Personnel summary, November 1958 through January 1959, and pay summary, October 1958 through December 1958

Total and major categories	Civilian personnel in executive branch			Payroll (in thousands) in executive branch		
	In January numbered—	In November numbered—	Increase (+) or decrease (−)	In December was—	In October was—	Increase (+) or decrease (−)
Total [1]	2,337,823	2,354,767	−16,944	$1,118,638	$1,068,439	+$50,199
Agencies exclusive of Department of Defense	1,253,821	1,262,289	−8,468	624,625	560,214	+64,411
Department of Defense	1,084,002	1,092,478	−8,476	[3] 494,013	508,225	−14,212
Inside continental United States [2]	2,154,638	2,157,345	−2,707			
Outside continental United States [2]	183,185	197,422	−14,237			
Industrial employment	569,395	573,673	−4,278			
Foreign nationals	197,073	203,409	−6,336	[3] 25,974	24,712	+1,262

[1] Exclusive of foreign nationals shown in the last line of this summary.
[2] Beginning in January 1959 employment in the State of Alaska is reported inside continental United States. Formerly employment in Alaska was reported outside continental United States. January employment in Alaska totaled 13,200.
[3] Subject to revision.

TABLE I.—*Consolidated table of Federal personnel inside and outside continental United States employed by the executive agencies during January 1959, and comparison with November 1958, and pay for December 1958, and comparison with October 1958*

Department or agency	Personnel				Pay (in thousands)			
	January	November	Increase	Decrease	December	October	Increase	Decrease
Executive departments (except Department of Defense):								
Agriculture	83,573	89,464		5,891	$37,720	$39,603		$1,883
Commerce [1] [2]	30,147	58,188		29,041	15,143	31,568		16,425
Health, Education, and Welfare	57,494	56,821	673		27,301	26,345	$956

[1] January figure includes 204 seamen on the rolls of the Maritime Administration and their pay.

[2] The Federal Aviation Agency was created pursuant to Public La . The Airways Modernization Board was abolished thereby and its functions and duties were transferred to the new Federal Aviation Agency effective Nov. 1, 1958. In accordance with Bureau of the Budget directive dated Dec. 30, 1958, the Civil Aeronautics Administration, Department of Commerce, and certain functions of the Civil Aeronautics Board were transferred to the Federal Aviation Agency, effective Dec. 31, 1958.

[3] Includes pay of temporary Christmas employees.

[4] January figure includes 12,819 employees of the International Cooperation Administration as compared with 12,730 in November, and their pay. These ICA figures include employees who are paid from foreign currencies deposited by foreign governments in a trust fund for this purpose. The January figure includes 2,036 of these trust fund employees and the November figure includes 2,057.

[5] Revised on basis of later information.

[6] Excludes personnel and pay of the Central Intelligence Agency.

[7] New agency created pursuant to Executive Order 10758, dated Mar. 4, 1958.

[8] Includes 3 employees of the Federal Facilities Corporation.

[9] New agency created pursuant to Public Law 85-470.

[10] New agency created pursuant to Public Law 85-850.

[11] New agency created pursuant to Public Law 85-843.

[12] Subject to revision.

[1] January figure includes 204 seamen on the rolls of the Maritime Administration.
[2] The Federal Aviation Agency was created pursuant to Public Law 85-726. The Airways Modernization Board was abolished thereby and its functions and duties were transferred to the new Federal Aviation Agency effective Nov. 1, 1958. In accordance with Bureau of the Budget directive dated Dec. 30, 1958, the Civil Aeronautics Administration, Department of Commerce, and certain functions of the Civil Aeronautics Board were transferred to the Federal Aviation Agency, effective Dec. 31, 1958.
[3] January figure includes 1,841 employees of the International Cooperation Administration as compared with 1,806 in November.
[4] Revised on basis of later information.
[5] Exclusive of personnel of the Central Intelligence Agency.
[6] New agency created pursuant to Executive Order 10758, dated Mar. 4, 1958.
[7] January figure includes 3 employees of the Federal Facilities Corporation.
[8] New agency created pursuant to Public Law 85-470.
[9] New agency created pursuant to Public Law 85-850.
[10] New agency created pursuant to Public Law 85-843.

NOTE.—January figure includes 13,200 employees in the State of Alaska. Formerly employment in Alaska was reported outside continental United States in table 3 of this report.

TABLE III.—*Federal personnel outside continental United States employed by the executive agencies during January 1959, and comparison with November 1958*

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WILEY (by request):

S. 1315. A bill for the incorporation of the Blue Star Mothers of America, Inc.; to the Committee on the Judiciary.

By Mr. LANGER:

S. 1316. A bill amending title II of the Social Security Act so as to provide that the minimum lump-sum death payment shall be $255; and

S. 1317. A bill to amend the Internal Revenue Code of 1954 so as to allow a deduction for certain expenses paid by a taxpayer in obtaining a college education or in providing a college education for his spouse or dependents; to the Committee on Finance.

S. 1318. A bill to confer jurisdiction upon the Court of Claims to hear, determine, render judgment upon the claim of Col. Walter E. Cole for retirement from the Army of the United States due to a service-connected disability; and

S. 1319. A bill for the relief of Henry Gappert; to the Committee on the Judiciary.

By Mr. HICKENLOOPER:

S. 1320. A bill for the relief of Taufic Deoud Gebran (also known as Taufic G.

Dawd) and his wife, Hanne Elias Wehby Deoud; to the Committee on the Judiciary.

By Mr. AIKEN (for himself and Mr. PROUTY):

S. 1321. A bill to authorize the Attorney General to consent, on behalf of the Library of Congress Trust Fund Board, to a modification of the terms of a trust instrument executed by James B. Wilbur; to the Committee on the Judiciary.

By Mr. RANDOLPH (for himself and Mr. BYRD of West Virginia):

S. 1322. A bill to provide emergency food assistance to persons in areas of severe economic distress caused by unemployment; to the Committee on Labor and Public Welfare.

By Mr. MCNAMARA (for himself, Mr. CLARK, Mr. HART, Mr. MURRAY, Mr. MANSFIELD, Mr. MORSE, Mr. NEUBERGER, Mr. GREEN, Mr. GRUENING, Mr. BYRD of West Virginia, Mr. RANDOLPH, Mr. HUMPHREY, Mr. MCCARTHY, Mr. DOUGLAS, Mr. KENNEDY, and Mr. WILLIAMS of New Jersey):

S. 1323. A bill to authorize temporary unemployment benefits for individuals who exhaust their benefit rights under existing unemployment compensation laws, and for individuals who were employed in noncovered employment; to the Committee on Finance.

(See the remarks of Mr. MCNAMARA when he introduced the above bill, which appear under a separate heading.)

By Mr. BEALL:

S. 1324. A bill to provide for the licensing and bonding of collection agencies in the District of Columbia;

S. 1325. A bill to provide for the regulation of closing-out and fire sales in the District of Columbia; and

S. 1326. A bill to prescribe penalties for willful concealment of goods or merchandise on the premises of stores in the District of Columbia; and to exempt certain persons having probable cause to believe such offenses have been committed, from civil liability in connection with apprehension of persons suspect thereof; to the Committee on the District of Columbia.

S. 1327. A bill for the relief of Ida L. Rollins; to the Committee on the Judiciary.

By Mr. HUMPHREY:

S. 1328. A bill for the relief of Parker E. Dragoo; to the Committee on the Judiciary.

By Mr. JOHNSTON of South Carolina (by request):

S. 1329. A bill to restore the authority of the Postmaster General to adjust the postage rates for airmail weighing in excess of 8 ounces, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. HOLLAND (for himself and Mr. SMATHERS):

S. 1330. A bill to amend the act entitled "An act for the relief of the city of Fort Myers, Fla., and Lee County, Fla.," approved July 22, 1958; to the Committee on the Judiciary.

By Mr. CASE of New Jersey (for himself, Mr. BUSH, Mr. CLARK, Mr. DODD, Mr. JAVITS, Mr. KEATING, and Mr. NEUBERGER):

S. 1331. A bill to amend the Interstate Commerce Act, as amended, so as to strengthen and improve the national transportation system, insure the protection of the public interest, and for other purposes; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. CASE of New Jersey when he introduced the above bill, which appear under a separate heading.)

By Mr. CASE of New Jersey (for himself and Mr. NEUBERGER):

S. 1332. A bill to promote public confidence in the integrity of Congress and the executive branch; to the Committee on Rules and Administration.

By Mr. KEATING:

S. 1333. A bill to provide for the temporary free entry of religious sceneramas and other articles imported for exhibition by religious societies or institutions; to the Committee on Finance.

By Mr. HUMPHREY:

S. 1334. A bill to amend the Internal Revenue Code of 1954 so as to impose a graduated tax on the taxable income of corporations; to the Committee on Finance.

S. 1335. A bill to amend section 4B of the Clayton Act;

S. 1336. A bill to amend the Clayton Act to declare private antitrust suits to be impressed with a substantial public interest; and

S. 1337. A bill to provide for the publication before entry of decrees, judgments, and orders entered by consent upon the merits of civil antitrust proceedings; to the Committee on the Judiciary.

By Mr. HUMPHREY (for himself, Mr. CLARK, Mr. LONG, and Mr. MORSE):

S. 1338. A bill to amend the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, and to amend the act entitled "An act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890, for the purpose of prohibiting loss leader sales; to the Committee on the Judiciary.

By Mr. HUMPHREY (for himself, Mr. LONG, and Mr. MORSE):

S. 1339. A bill to amend the Clayton Act to prohibit sales in commerce at unreasonably low prices where the effect may be to injure competition; to the Committee on the Judiciary.

By Mr. HUMPHREY:

S. 1340. A bill to provide for disaster loans to small business concerns which suffer economic injury due to Federally-aided highway construction programs; to the Committee on Banking and Currency.

(See the remarks of Mr. HUMPHREY when he introduced the above bills, which appear under a separate heading.)

By Mr. JAVITS:

S. 1341. A bill to strengthen and improve State and local programs to combat and control juvenile delinquency; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. JAVITS when he introduced the above bill, which appear under a separate heading.)

By Mr. JAVITS (for himself and Mr. CLARK):

S. 1342. A bill to create a Federal Limited Profit Mortgage Corporation to assist in the provision of housing for moderate-income families and for elderly persons; to the Committee on Banking and Currency.

(See the remarks of Mr. JAVITS when he introduced the above bill, which appear under a separate heading.)

By Mr. YARBOROUGH (for himself, Mr. CHAVEZ, Mr. CARLSON, Mr. KERR, Mr. HUMPHREY, Mr. MANSFIELD, and Mr. MURRAY):

S. 1343. A bill to amend section 105(b) of the Agricultural Act of 1949, as amended, relating to price support for oats, rye, barley, and grain sorghums; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. YARBOROUGH when he introduced the above bill, which appear under a separate heading.)

By Mr. COOPER (for himself, Mr. CASE of New Jersey, Mr. JAVITS, and Mr. PROUTY):

S. 1344. A bill to establish standards for hours of work and overtime pay of mechanics employed on work done under contract for, or with the financial aid of, the United States, for any Territory, or for the District of Columbia, and for other purposes; and

S. 1345. A bill to prohibit discrimination on account of sex in the payment of wages by employers having employees engaged in commerce or in the production of goods for commerce, and to provide procedures for assisting employees in collecting wages lost by reason of such discrimination; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. COOPER when he introduced the above bills, which appear under separate headings.)

By Mr. COOPER (for himself and Mr. MORTON):

S. 1346. A bill providing for the establishment, equipment, and maintenance of a nuclear energy-coal experiment station in the coal regions of eastern Kentucky; to the Committee on Interior and Insular Affairs.

By Mr. DIRKSEN:

S. 1347. A bill for the relief of George T. Moore, Carl D. Berry, and Dr. Harold J. Heck; to the Committee on the Judiciary.

By Mr. LANGER (for himself and Mr. DODD):

S.J. Res. 69. Joint resolution proposing an amendment to the Constitution of the United States relative to the equal rights for men and women; to the Committee on the Judiciary.

By Mr. SCOTT:

S.J. Res. 70. Joint resolution to provide for the designation of August 27, 1959, as "Oil Industry Centennial Day"; to the Committee on the Judiciary.

By Mr. BEALL:

S.J. Res. 71. Joint resolution proposing an amendment to the Constitution to provide that the people of the District of Columbia shall be entitled to vote in presidential elections; to the Committee on the Judiciary.

By Mr. KEFAUVER:

S.J. Res. 72. Joint resolution proposing an amendment to the Constitution of the United States providing for the election of President and Vice President; to the Committee on the Judiciary.

(See the remarks of Mr. KEFAUVER when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. HART:

S.J. Res. 73. Joint resolution extending an invitation to the International Olympic Committee to hold the 1964 Olympic games at Detroit, Mich.; to the Committee on Foreign Relations.

(See the remarks of Mr. HART when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. JOHNSON of Texas (for himself and Mr. DIRKSEN):

S.J. Res. 74. Joint resolution consenting to an extension and renewal of the Interstate Compact To Conserve Oil and Gas; to the Committee on Interstate and Foreign Commerce.

CEREMONIES IN ROTUNDA IN CONNECTION WITH STATUE OF THE LATE JOSEPH WARD, OF SOUTH DAKOTA

Mr. CASE of South Dakota (for himself and Mr. MUNDT) submitted the following concurrent resolution (S. Con. Res. 14), which was referred to the Committee on Rules and Administration:

Resolved by the Senate (the House of Representatives concurring), That the South Dakota State Historical Society of South Dakota is hereby authorized to place temporarily in the rotunda of the Capitol a statue of the late Joseph Ward, of South Dakota, and to hold ceremonies in the rotunda on said occasion; and the Architect of the Capitol is hereby authorized to make the necessary arrangements therefor.

RESOLUTION

Mr. JOHNSTON of South Carolina, from the Committee on the Judiciary, reported an original resolution (S. Res. 91) authorizing a study of the Federal

judicial system, which was referred to the Committee on Rules and Administration.

(See the above resolution printed in full, where it appears under the heading "Reports of Committees.")

TEMPORARY UNEMPLOYMENT COMPENSATION ACT OF 1959

Mr. MCNAMARA. Mr. President, on behalf of myself, and Senators CLARK, HART, MURRAY, MANSFIELD, MORSE, NEUBERGER, GREEN, GRUENING, BYRD of West Virginia, RANDOLPH, HUMPHREY, MCCARTHY, DOUGLAS, KENNEDY, and WILLIAMS of New Jersey, I introduce, for appropriate reference, a bill to authorize temporary unemployment benefits for individuals who exhaust their benefit rights under existing unemployment compensation laws, and for individuals who were employed in noncovered employment.

The latest unemployment statistics indicate that we are fast approaching last year's record postwar level. January ended with 4.7 million Americans out of work.

Approximately 2.9 million of these workers are drawing some form of unemployment insurance benefits. This means that almost 2 million others have either exhausted their benefits or are not eligible for such benefits.

As of today, I have seen no evidence offered to prove that this situation is capable of self-correction. On the contrary, most facts point to an even further deterioration.

We spent a substantial period last year debating this problem. Many of us at that time believed that only a bold Federal action program could provide an effective solution.

We asked the Congress to enact a Federal unemployment insurance standards law—establishing uniform minimums for both benefits and duration. And we asked that such a program be accompanied by Federal grants of temporary uniform benefits to those who had exhausted their benefits or who were not covered by unemployment insurance.

This was not done. Instead, legislation was enacted which enabled States to borrow from the Federal Government if they wished to provide their covered unemployed with 50 percent more benefits.

Unfortunately—only 17 States did participate in this program—and 5 others established programs of extension through their own funds. The amount of relief provided was small in comparison to the needs—and we now find ourselves confronted by a level of unemployment far beyond that which we can tolerate.

I ask unanimous consent to have printed in the RECORD the latest unemployment figures as released by the Department of Labor. This table lists only the number and percentage of the unemployed in covered employment.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Insured unemployment for week ended Feb. 14, 1959, continental United States

State	Insured unemployment							
	State and UCFE				UCX [2]	UCV [3]	Temporary programs [4]	Total (excluding railroad)

Mr. McNAMARA. Mr. President, figures are not available, on a State-to-State basis, listing total unemployment. But the Department of Commerce's unofficial estimate of 4.7 million total unemployment is probably a conservative one.

There is only one real solution for this problem. That is the enactment of a Federal unemployment insurance standards bill. We are going to make every possible effort to insure that the bill—S. 791—introduced by the Senator from Massachusetts [Mr. KENNEDY], and others, will be passsed this year.

However, we still must find some way to solve the problems that are immediately before us. The standards bill must be supplemented by Federal grants to those who have or soon will have exhausted their present unemployment eligibility or who have never enjoyed such eligibility.

The bill which we have introduced today will accomplish those ends.

It will provide a uniform 16 weeks of benefits—at the dollar amount provided by State unemployment insurance laws—to those who have exhausted their normal eligibility. It will also provide 16 weeks of benefits to those who have not been covered—at a dollar level equal to 1¼ percent of their annual earnings, up to the State maximum set by unemployment insurance laws.

Those not now covered by unemployment insurance will have to meet two criteria to be eligible under this bill. They must have earned a total of $1,000 in either of the 2 calendar years prior to their application for benefits—and have worked a total of four quarters during those 2 years.

These requirements will insure that those who have not compiled a substantial record of employment in the recent past will not burden the administering agencies in the States. I want to point out that such records are available through the social security files—and can be obtained promptly.

If we are going to provide grants from the Federal Treasury for those in covered employment, we cannot, in justice, fail to provide assistance for those who have worked in uncovered employment.

The problems faced by these workers and their families are the same that are faced by those who have exhausted their unemployment insurance eligibility. Their families still require food, housing and medical care—and the fact that they have worked for a small employer or some other employer not required to participate in an unemployment insurance program—should not be a barrier to their receiving help.

In conclusion, Mr. President, let me emphasize that this is not a dole. Each and every person who is helped by this bill will have to be ready and willing to work.

Let us not make the same mistake we made last year. It should be apparent to us now that glowing predictions about recovery do not produce recovery. It takes a reasoned plan of attack on recession to overcome it. This bill is a necessary part of such a reasoned plan.

I ask unanimous consent that this bill lie on the table for 1 day to allow other Senators to join in cosponsorship.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will lie on the desk, as requested by the Senator from Michigan.

The bill (S. 1323) to authorize temporary unemployment benefits for individuals who exhaust their benefit rights under existing unemployment compensation laws, and for individuals who were employed in noncovered employment, introduced by Mr. MCNAMARA (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Finance.

REVIEW BY INTERSTATE COMMERCE COMMISSION OF RAILROAD PASSENGER TRAIN AND FERRY DISCONTINUANCES

Mr. CASE of New Jersey. Mr. President, on behalf of myself, Senators BUSH, CLARK, DODD, JAVITS, KEATING, and NEUBERGER, I introduce for appropriate reference a bill to provide for thorough consideration and review by the Interstate Commerce Commission of railroad passenger train and ferry discontinuances. I ask unanimous consent that the bill lie on table until end of week during which time any Senator may join as a cosponsor.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will lie on the desk as requested by the Senator from New Jersey.

The bill (S. 1331) to amend the Interstate Commerce Act, as amended, so as to strengthen and improve the national transportation system, insure the protection of the public interest, and for other purposes, introduced by Mr. CASE of New Jersey (for himself and other Senators) was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

Mr. CASE of New Jersey. The wave of discontinuance notices which has flooded the Commission since the passage of last year's Transportation Act has created a critical situation. The 1958 law will allow such discontinuances to go into effect, unless the ICC, within 5 months of the time it is notified that a train or ferry will be discontinued, orders the railroad to continue the train or ferry for another year. We have grave doubts whether the Commission can adequately consider the diverse and complex issues involved in each of these cases within the time allotted.

Unless Congress acts, therefore, to amend the act, this extremely important matter affecting many thousands of railroad passengers may be determined on the basis of a hasty and incomplete consideration of all the facts.

The problem can best be approached by recalling the circumstances under which the Transportation Act of 1958 was adopted.

As stated in the reports of the Surface Transportation Subcommittee and the Interstate and Foreign Commerce Committee, section 5 of the Transportation Act of 1958 which became section 13a of the Interstate Commerce Act was enacted in order to vest the Interstate Commerce Commission with authority to authorize in proper cases the discontinuance, curtailment, or consolidation of unprofitable railroad services and facilities burdening interstate commerce. Evidence elicited by the subcommittee tended to demonstrate that State regulatory bodies had been unduly repressive in requiring the continuation of uneconomic and unnecessary passenger services by the railroads. There was also testimony to the effect that these same regulatory bodies frequently delayed decisions for an unreasonable time. In order to correct this situation, the subcommittee and the full committee proposed to give to the Interstate Commerce Commission jurisdiction in the field of discontinuance or change of rail services similar to the jurisdiction which the Commission now has over intrastate rates under section 13 of the Interstate Commerce Act. It was thought that to do this would protect and further the broad public interest in a sound transportation system and would prevent undue importance being attached to matters of a purely local nature.

The bill which was enacted into law for these purposes has not accomplished them. Rather it has resulted in a delegation of congressional authority directly to the railroads of this country, with no effective machinery for review by any regulatory agency.

The act has been construed by the railroads as on open invitation to abandon interstate passenger service without regard to public need. Twenty-seven notices to discontinue approximately 100 trains are pending before the Commission. And railroads are threatening to discontinue additional service affecting many more thousands of passengers.

As the law is now written and interpreted by the Federal courts and the Commission, the railroads are given what amounts to full authority to remove any passenger train they desire, unless stopped by action of the ICC in the limited time provided by the act.

The experience of recent months clearly indicates the need for providing more effective review by the Commission of passenger train and ferry discontinuance. We believe our bill will accomplish what Congress sought to achieve last year and at the same time prevent the wholesale elimination of passenger service. It will do this by giving to the Interstate Commerce Commission jurisdiction over passenger train abandonments similar to the jurisdiction it now has over the abandonment of railroad lines by virtue of paragraph 18 of section 1.

Under that old section and under our new bill, before it may abandon a line or discontinue a train or ferry, a railroad is required to come to the Commission and obtain a certificate permitting it to do so. There is no 4-month time limit within which the Commission must reach a decision. And the Commission may order the line, train, or ferry continued for whatever period it deems necessary.

This can be done by the insertion of a new paragraph 19 in section 1 of the act. No railroad has ever complained about the provisions of paragraph 18, nor have they complained of the treatment received at the hands of the Commission in cases arising under that paragraph. Furthermore, section 1 is the logical section of the act in which to place passenger train abandonment provisions—abandonments of lines of railroads and discontinuance of passenger trains are identical in terms of their effect on the public, be it the riding or shipping public, the railroads and their employees. And the ICC has many years of precedents involving line abandonments on which to rely in determining passenger train abandonments. In short, we have, in paragraph 18, a logical precedent on which to pattern legislation dealing with discontinuances.

Our bill would require the railroads to apply to the ICC, if the particular States involved have not legislated regarding train discontinuances, and it gives the railroads an option to choose between the ICC and a State commission where the States have regulatory laws regarding such discontinuances. Upon the filing of an application, the Commission shall hold a hearing prior to acting upon the discontinuance application. All interested parties would be permitted to be heard at the hearing. The ordinary procedures now followed by the Commission in line abandonment cases then would be pursued with the result that each train abandonment would be fully considered by the Commission regarding its effect on the public and the railroad. The time restrictions now placed on the Commission would be eliminated, but in a normal case this would mean that the final discontinuance of the service, if such were warranted, would be postponed for only 2 or 3 months. In addition, the Commission would be empowered to impose conditions which it found the public interest required. Under the present statute the Commission has held that it has no such power.

In summary, the bill which we propose would permit the railroads to discontinue all trains which should be discontinued but will prevent the railroads from discontinuing those trains for which there is a public need. In other words, this bill will accomplish the purposes for which section 13(a) was intended but which it has not and will not achieve.

Mr. JAVITS. Mr. President, I wish to identify myself with the bill introduced by the distinguished Senator from New Jersey [Mr. CASE] and to comment on the action of the Interstate Commerce Commission in permitting the discontinuance of commuter service.

There are 500,000 railroad commuters in the United States, of whom 208,000 commute to New York City alone. I point out that only 100,000 commuters commute by automobile. So railroad commuter services are vital. The railroads lost $165 million on such service in 1958.

Last year I opposed that provision of the Transportation Act of 1958, which allows what I call hasty discontinuances. I hope we shall take constructive action concerning the commuter problem, which is so grave and is one of the major problems of our country as it affects metropolitan areas.

I am very glad to join with the distinguished senior Senator from New Jersey in the introduction of the bill. I believe we shall have other similar measures to suggest to Congress.

Mr. BUSH subsequently said: Mr. President, I ask unanimous consent that my remarks may be printed in the RECORD at the conclusion of the remarks of the distinguished Senator from New Jersey [Mr. CASE] when he introduced the bill applying to the commuter railroads this morning.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Connecticut? The Chair hears none, and it is so ordered.

Mr. BUSH. Mr. President, I am happy to join the Senator from New Jersey in sponsoring this bill. However, I wish to make it clear that in my judgment the bill will in no way really solve the problem of the commuter. It will reopen that question, which was dealt with to some extent in the 1958 act affording relief to the railroads. We hope that the introduction of this bill will focus attention upon the problem of the commuter railroads. The 1958 act did give some relief, but it was not noticeable. Certainly it was not a sufficient amount of relief or consideration for the commuters or the railroads.

What they need is one of several things, or perhaps each of several things, including reasonable rates to be charged for the service, reduced costs, or a subsidy from the States served by the commuter roads. Perhaps they need a combination of all three things.

Those railroads must not be put in a straitjacket by legislation. They must be permitted to earn a living.

In joining the Senator from New Jersey and other Senators in sponsorship of this particular bill, my purpose is to reopen the question of the commuter railroads before the Interstate and Foreign Commerce Committee of the Senate and before the Interstate Commerce Commission itself.

DISCLOSURE OF FINANCIAL INTEREST OF FEDERAL GOVERNMENT OFFICIALS

Mr. CASE of New Jersey. Mr. President, I introduce, for appropriate reference, a bill designed to promote confidence in the integrity of our governmental processes. The distinguished junior Senator from Oregon [Mr. NEUBERGER], who has long taken a particular interest in the maintenance of high standards of public service, joins me in sponsoring the measure.

Talk of influence, charge, and counter-charge of special interest, are a commonplace in American political life. It would be naive to deny that there is occasional corruption, that there are instances of improper influence. In my own experience, however, most public officials are sincerely, and to the best of their ability, trying to carry out the responsibilities of their office. Apparently, however, human nature being what it is, it is always easier to believe the worst. Certainly, it is a fact, a tragic fact, I believe, that far too many Americans tend to look upon politicians as practitioners of a not quite respectable profession. As repeated polls show, the average American does not want his children to enter politics and, while he may be saddened, he is not surprised by stories of "fixing" and political favoritism.

This situation is, I believe, cause for serious concern. Carried far enough, this attitude can only result in a general disenchantment and cynicism that saps the validity of the democratic process. Recent French history is a case in point. For if there is any aspect of the troubled history of France since the war upon which all commentators seem agreed, it has been the contempt of the French people generally for their elected representatives.

I do not suggest we are approaching that unhappy state. But I do not think we can afford to view with complacency a situation where, for example, any and all travel by a congressional committee, however conscientious its members and worthy its purpose, tends to be automatically dismissed as a junket; where, for example, many people take it for granted that any vote can be explained in terms of the pressures, generally sinister, brought to bear on the individual legislator.

However unwarranted and unjustified—and they are in most cases—these are not uncommon attitudes.

The bill we introduce today is designed to dispel the mystery and secrecy that inevitably tends to breed such attitudes. First, it would require full disclosure of the financial interests of all top officials in the Federal Government, Senators, and Congressman, as well as the top people in the executive branch and in the independent agencies.

Second, the bill would require that all communications in regard to a pending case, whether by letter or by word of mouth, to a regulatory or semi-judicial agency be made part of the public record in the case.

Two other provisions would require, first, itemized expense accounts for all travel by members or staff of congressional committees, the accounts to be published in the CONGRESSIONAL RECORD, and, second, the establishment of a Commission on Legislative Standards to study and make recommendations concerning problems of conflicts of interest confronting Members of Congress as well as their relations with executive and other agencies. This would include such matters as that of disqualification from voting on particular items, and the often difficult determination of the line between adequate representation of constituent interest and attempted influence.

The basic notion behind the bill is not new. It is simply that disclosure of the facts offers the most effective way of dealing with this kind of problem. Rather than attempting to police what is inherently unpoliceable, my proposal would put the facts on the record where the people can make their own decisions.

The mere fact that Members of Congress and Federal employees would be required to report gifts and outside income would, I believe, serve as a brake on both those who would influence and those who would be influenced. When an individual realizes that a gift, for example, will be a matter of public record, he is likely to give additional consideration to the propriety of the gift.

The bill is similar to one I introduced in the last session. Following its introduction I received many letters. The number of people who took the time to write was gratifying indeed. But many of the letters contained a disturbing note. Their general import was that while the writers heartily approved this kind of approach they could not believe that it could or would be adopted. The implication is, of course, that Members of Congress cannot afford to expose their financial interests or activities to public view.

To my mind this kind of reaction only confirms the need for some such measure as we propose.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1332) to promote public confidence in the integrity of Congress and the executive branch, introduced by Mr. CASE of New Jersey (for himself and Mr. NEUBERGER) was received, read twice by its title, and referred to the Committee on Rules and Administration.

FREE IMPORTATIONS OF CERTAIN RELIGIOUS ARTICLES

Mr. KEATING. Mr. President, I introduce, for appropriate reference, a bill to provide for the temporary free entry of religious sceneramas and other articles imported for exhibition by religious societies or institutions. This is the identical bill that was passed by the House of Representatives during the last session of Congress. It was sent to the Senate, but was not reported out of committee in the few days—9—left before Congress adjourned.

The need for this bill came to my attention when I learned that the Sisters of Notre Dame in Rochester, N.Y., were charged duty on religious objects borrowed from their Motherhouse in Canada. The articles, consisting of several posters and small statutes, were used in a Mission Scenerama at the Rochester War Memorial to illustrate firsthand the meaning of "Catholic Action Around the World."

Under present customs regulations, these articles are not specifically exempted from duty payments. Therefore, the Sisters were forced to pay the rate charged on all imported goods consisting chiefly of wood. This is, of course, unjust. It seems obvious to me that material used strictly for and by religious groups, without profit to anyone, should be free from duty when brought into the United States. This bill will eliminate this serious shortcoming in the present tariff laws.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1333) to provide for the temporary free entry of religious sceneramas and other articles imported for exhibition by religious societies or institutions, introduced by Mr. KEATING, was received, read twice by its title, and referred to the Committee on Finance.

PROPOSED LEGISLATION RELATING TO SMALL BUSINESS

Mr. HUMPHREY. Mr. President, one of the many outstanding accomplishments of the 85th Congress was the legislation enacted on behalf of small business. I refer to the Small Business Investment Act, the Small Business Administration being made a permanent agency, and the small business tax relief measures. I need not, at this time, recite all the reasons why this legislation was so badly needed. It is sufficient for the moment to point out that small business failures climbed last year to the highest total in 25 years. Surely this is reason enough for the Congress to correct some of the imbalance in our economic system.

What may be easily overlooked in this entire matter is the importance of the very fact that legislation on behalf of small business was actually passed. The action of the 85th Congress in passing such legislation indicates a growing awareness of the fact that economic, social, and political forces have combined in recent years with increased momentum to create competitive handicaps to small business which are artificial to the extent that they are traceable to size alone. The removal of these artificial barriers is necessary not only for the continued growth and development of the small business community, but also to preserve a truly free enterprise economic system.

We have, indeed, made a good start in removing these artificial barriers. It is my earnest expectation and, I am certain, the most fervent hope and desire of every person who is concerned with the welfare of the Nation's 4 million small enterprises that this Congress continue the constructive program it began last year.

I am happy to report that already a number of bills designed to aid small, independent businessmen have been introduced. I am proud to have joined in five of these as cosponsor with the distinguished Senator from Alabama [Mr. SPARKMAN].

I refer specifically to S. 59, a bill to provide a program of tax adjustments for small business by allowing a deduction for additional investment in depreciable assets, inventory, and accounts receivable; S. 725, a bill to amend the Clayton Act to permit the institution of actions for damages for violations of the Robinson-Patman Act; S. 1009, a bill to amend the Internal Revenue Code of 1954, so as to encourage the establishment of voluntary retirement plans by individuals; S. 1010, a bill to amend the Internal Revenue Code of 1954, so as to permit the use of the new methods and rates of depreciation for used property; and S. 1011, a bill to designate judicial precedents which shall be binding in the administration and enforcement of the internal revenue laws.

Today, I introduce seven bills which also are aimed toward making it more possible for business success to depend upon an individual's judgment and ability, by his relative efficiency, and not by his size, or power of prestige in his field of enterprise. These measures are:

First, a bill to amend the Internal Revenue Code of 1954, so as to impose a graduated tax on the taxable income of corporations.

This bill would substitute graduated rates for the present normal and surtax rates applicable to corporate income. It is drawn in such a fashion as to bring the maximum benefit to those who need it most, the smallest corporations.

The present law imposes a normal tax rate of 30 percent on the first $25,000 of corporate net income and a surtax of 22 percent for a total statutory rate of 52 percent on all net income over that amount. The bill which I have introduced today would substitute the following rates:

If the taxable income is:	The tax is:
Not over $10,000	20 percent of the taxable income.
Over $10,000 but not over $25,000	$2,000, plus 25 percent of excess over $10,000.
Over $25,000 but not over $50,000	$5,750, plus 35 percent of excess over $25,000.
Over $50,000 but not over $100,000	$14,500, plus 45 percent of excess over $50,000.
Over $100,000	$37,000, plus 52 percent of excess over $100,000.

I am sure my colleagues will be interested in a comparison of this bill and the present law, and I am therefore requesting that there be printed in the RECORD at this point, a table showing the tax yields at various taxable income levels ranging from $10,000 to $10 million, together with data showing the amount and percent of change in corporate income tax payments that would result from this bill.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 1

Taxable income	Present rate (percent)	Proposed rate (percent)	Present tax liability	Proposed tax liability	Change	
					Amount	Percent
$10,000	30.0	20.0	$3,000	$2,000	−$1,000	33⅓
$15,000	30.0	21.66	4,500	3,250	−1,250	27.77
$20,000	30.0	22.5	6,000	4,500	−1,500	25.0
$25,000	30.0	23.0	7,500	5,750	−1,750	23.33
$50,000	41.0	29.0	20,500	14,500	−6,000	29.26
$100,000	46.5	37.0	46,500	37,000	−9,500	20.43

TABLE 1—Continued

Taxable income	Present rate (percent)	Proposed rate (percent)	Present tax liability	Proposed tax liability	Change	
					Amount	Percent
$250,000	49.8	46.0	124,500	115,000	−9,500	7.63
$500,000	50.9	49.0	254,000	245,000	−9,500	3.73
$1,000,000	51.4	50.5	514,500	505,000	−9,500	1.84
$5,000,000	51.9	51.7	2,594,500	2,585,000	−9,500	.36
$10,000,000	51.95	51.84	5,194,500,000	5,184,500	−9,500	.18

Mr. HUMPHREY. I said at the outset of my remarks, Mr. President, that this bill is designed to bring the maximum benefit to those who need it most, the smallest corporations. I believe the table which I have just introduced will establish this point. Corporations with taxable net incomes up to $10,000 would make the greatest rate of savings in the taxes they pay under the present law, viz, 33⅓ percent. I should like to point out additionally that these same corporations constitute upward of 60 percent of the total number of corporations.

At this time, therefore, I request that a second table which includes data supplied by the Internal Revenue Service with respect to Statistics of Corporate Incomes for 1956, the latest year available, be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 2

Taxable income	Number of returns	Percent of total
Under $10,000	340,285	−60.79
$10,000 under $15,000	48,643	8.69
$15,000 under $20,000	33,027	5.9
$20,000 under $25,000	31,916	5.7
$25,000 under $50,000	51,058	9.12
$50,000 under $100,000	23,735	4.24
$100,000 under $250,000	16,510	2.94
$250,000 under $500,000	6,486	1.15
$500,000 under $1,000,000	3,515	.62
$1,000,000 under $5,000,000	3,409	.60
$5,000,000 under $10,000,000	548	.09
$10,000,000 and over	578	.10

Mr. HUMPHREY. Mr. President, these tables I have presented conclusively demonstrate that the smaller corporations get the greatest benefit from this graduated income tax bill. Current financing practice and the broad welfare of our economic system make this imminently necessary.

Current financing practice has forced the small concern to rely on its retained earnings as the principal source for its working capital, thus restricting its growth potential. This is the story told me by businessman after businessman. It is substantiated by sound economic research.

A few years ago, Profs. John Lintner and J. Keith Butters, of Harvard University, found that in the period 1925–29 retained earnings financed about 75 percent of the net physical expansion—including inventories—of U.S. nonfinancial corporations; for the period 1947–50 the proportion increased to 80 percent; and in the 3 years 1953–55 it rose further to 87 percent.

High corporate taxes restrict in particular the growth of small companies, which are at a disadvantage as compared to the larger corporations in obtaining outside capital on satisfactory terms. The small corporations must rely heavily on retained earnings for growth and development.

Clouding the entire small business problem is the strong merger movement that has invaded our economy in recent years. It has even become advantageous for large corporations to absorb their smaller competitors who have suffered losses in order to take advantage of the tax savings through loss carryovers.

One final observation: The American wage earner has a special stake in this bill, inasmuch as the job security and an improving standard of living for thousands and thousands of wage earners depend on the prosperity, growth, and expansion of small business. Over 98 percent of all manufacturing firms in this country employ less than 500 employees. This is a common definition of small business applied by the Small Business Administration. Bureau of the Census figures reveal that 54.8 percent of all persons employed in manufacturing are employed in such small concerns.

Mr. President, in my opinion, and this is based on many years of close study of the problems of American small business, this bill for a graduated corporate income tax gives promise of bringing meaningful relief to an important segment of the American small business community and, at the same time, of serving to strengthen the economic and social fiber of our entire free enterprise system.

It should be noted, Mr. President, that the Democratic Party in its platform as adopted at the 1956 Chicago convention advocated a graduated corporate income tax.

My second and third bills today are closely related. The second bill prohibits the waiver of private enforcement rights under the antitrust laws; the third bill declares private antitrust suits to be impressed with a substantial public interest. Both of these bills have developed as a result of the public hearings held jointly last year by the Subcommittee on Retailing, Distribution, and Fair Trade Practices and the Subcommittee on Monopoly of the Small Business Committee. They are identical to S. 4234 and S. 4233 which I introduced in the last session.

Mr. President, our committees discovered that it is common practice in certain industries for major suppliers to require their lessee and contract dealers to waive their legal rights to sue for damages resulting from their suppliers' antitrust violations. Despite the universal recognition of the rule that statutory rights may not be waived where to do so would be against public policy, it was discovered during the hearings that there may be some question as to the applicability of this rule to the waiver of private enforcement rights under the antitrust laws. My second bill is introduced in order to remove all doubt as to congressional intent in this matter.

The third bill introduced here is focused on a slightly broader scope. It is directed toward the whole role of private antitrust enforcement in protecting small business.

Briefly, let me state that the right of private parties to sue for treble damage redress of business injuries resulting from trade restraints and other monopolistic practices first found statutory expression in section 7 of the Sherman Act. By allowing injured parties to recover costs of suit, plus three times the amount of the damage done, Congress hoped to give businessmen a strong incentive to become copartners, in effect, with the Government in antitrust enforcement. The procedures established reflected a logical uniting of self-interest with public policy.

After a quarter century of experience, however, it became clear that private enforcement of the Sherman Act was falling far short of expectations held for it. Therefore, in 1914, the Congress passed the Clayton Act and the Federal Trade Commission Act. Congress reaffirmed the right of private suit and, to make it an effective instrument, proclaimed that a final judgment or decree rendered in a criminal antitrust prosecution against a defendant shall be prima facie evidence against that defendant in a private suit. But, and this is important, the Congress declared this was not to apply to consent judgments or decrees.

Little did the framers of this section—section 5—of the Clayton Act realize that in certain periods to come the Department of Justice would be settling the heavy majority of its antitrust cases by means of consent judgments, thus vitiating the purposes of section 5 of the act. Justice Department records for 1957, for instance, reveal that the Antitrust Division terminated by consent judgment 83 percent of all antitrust cases instituted. By contrast, between 1935 and 1955, only 70 percent of the Government's civil cases ended by negotiated settlements. The necessary result is that private litigants are being increasingly deprived of section 5's benefits and antitrust violators are getting away with minor punishment.

My third bill, therefore, is aimed at restoring private antitrust enforcement to its intended role as a copartner with the Federal Government by declaring once and for all that private antitrust suits are impressed with a substantial public interest.

My fourth bill would require publication of the terms of antitrust judgments and orders in the Federal Register, 30 days before such judgment or order is to become final. The purpose is to give the general public an opportunity to lodge objections to the proposed judgment or order with the Justice Department or the Federal Trade Commission. This bill will also enable the general public to put a brake on the light punishments so often meted out to antitrust violators.

Fifth is a bill prohibiting loss leader sales. This bill would amend both the Sherman Act and the Clayton Act by making it unlawful for a retailer to sell any commodity at less than his delivered cost. As defined in the bill, the term "delivered cost" means invoice cost, less discounts, and includes all transportation costs and applicable taxes. Enforcement of the bill's provisions would lie with private parties and would be undertaken by any person damaged by a loss leader practice which affects interstate commerce.

I should like to point out that this is identical to S. 3851 which I introduced last year and is the same bill which was introduced in 1952 when Congress was considering the legislation which was to become the McGuire Act.

Sixth is a bill to amend section 2 of the Robinson-Patman Act to prohibit sales in commerce at unreasonably low prices where the effect may be to injure competition. This is identical to S. 3852 which I introduced last year. It is intended to be a civil counterpart to the somewhat similar provision now found in the criminal prohibitions of section 3 of the Robinson-Patman Act. The need for such protection against predatory pricing practices has long been recognized.

Seventh, a bill to provide for disaster loans to small business concerns which suffer economic injury due to condemnation proceedings under federally aided highway construction programs. This bill is similar to one which I introduced last year, S. 3434.

The State highway commissioner of the State of Minnesota, Mr. L. P. Zimmerman, has expressed to me his concern that many small businesses which are forced to move as the result of highway programs have no loan program which would assist them in making the change-over to a new place of business.

Last year there was a very interesting article in the Washington Star, which estimated that perhaps as many as 50,000 American businesses may be forced out of their current sites in the next few years because of the tremendous amount of redevelopment and highway construction scheduled.

My proposal addresses itself solely to condemnation proceedings of small businesses as a result of federally aided highway construction programs. Clearly this is a Federal undertaking and a Federal responsibility.

The Small Business Act now provides a program of disaster loans at very low interest to business firms which suffer economic hardship as a result of floods, droughts, and other natural catastrophies. These loans are to be made either by the Small Business Administration directly, or in cooperation with private lending institutions, at 3 percent interest payable within 20 years. It seems to me, Mr. President, that the disastrous effect on many small businessmen who are forced to move is no less complete than a disaster suffered as a result of natural causes. It is in my opinion only equitable there be set up a program to provide such small businessmen with disaster loans to enable them to make the transition over to a new place of business.

It will be argued that in condemnation proceedings there is a constitutional guarantee of just compensation. I am informed, however, that very often business property in particular is undervalued. The courts seldom permit appraisers to take into consideration such items as loss of goodwill, costs of moving the business to a new location, or loss of profits occasioned by the move. It is for this reason that I think my proposal should be enacted.

The support for this proposal which I have received from numerous small businessmen has been most heartening. I wish to quote from one typical letter:

> In regard to your recently introduced bill enabling a person put out of business by coming tide of new highways, I am faced with having to move for the third time since 1936 on this account, and I think your bill will do more for a smooth transforming of business and help for a person faced with this problem than anything else that could be devised.

In view of the scope of the Federal Interstate Highway program which is now under way, this is a problem which is going to be of increasing importance. I believe that now is the time to enact legislation to ease the difficulties of countless businessmen in making the move to new locations.

Mr. President, I introduce these small business bills in the firm belief that the independent businessman is a prime cause and not merely a product of America's economic greatness and strength. It is the energy, ingenuity, competitive challenge of our Nation's 4 million small businessmen which stimulates the timely arrival of a variety of new and better products. Moreover, it is our small entrepreneurs, who, by their number and diversity and independence of action, constitute the most effective safeguard against the creation of corporate giantism and monopoly. So long as small businessmen remain numerous, healthy, and prosperous, our economy will continue free and competitive and, thus, a fount of opportunity for all.

The PRESIDING OFFICER. The bills will be received and appropriately referred.

The bills, introduced by Mr. HUMPHREY, were received, read twice by their titles, and referred, as indicated:

To the Committee on Finance:

S. 1334. A bill to amend the Internal Revenue Code of 1954 so as to impose a graduated tax on the taxable income of corporations.

To the Committee on the Judiciary:

S. 1335. A bill to amend section 4B of the Clayton Act;

S. 1336. A bill to amend the Clayton Act to declare private antitrust suits to be impressed with a substantial public interest;

S. 1337. A bill to provide for the publication before entry of decrees, judgments, and orders entered by consent upon the merits of civil antitrust proceeding;

By Mr. HUMPHREY (for himself, Mr. CLARK, Mr. LONG, and Mr. MORSE):

S. 1338. A bill to amend the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, and to amend the act entitled "An act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890, for the purpose of prohibiting loss leader sales; and

By Mr. HUMPHREY (for himself, Mr. LONG, and Mr. MORSE):

S. 1339. A bill to amend the Clayton Act to prohibit sales in commerce at unreasonably low prices where the effect may be to injure competition.

To the Committee on Banking and Currency:

S. 1340. A bill to provide for disaster loans to small business concerns which suffer economic injury due to federally aided highway construction programs.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the bills be printed in the RECORD.

There being no objections, the bills were ordered to be printed in the RECORD, as follows:

S. 1334

A bill to amend the Internal Revenue Code of 1954 so as to impose a graduated tax on the taxable income of corporations

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsections (a), (b), and (c) of section 11 of the Internal Revenue Code of 1954 (relating to tax on corporations) are amended to read as follows:

"(a) CORPORATIONS IN GENERAL.—A tax is hereby imposed for each taxable year on the taxable income of every corporation. The tax shall be computed under subsection (b) in the case of a taxable year beginning before January 1, 1959, and under subsection (c) in the case of a taxable year beginning after December 31, 1958.

"(b) TAXABLE YEARS BEGINNING BEFORE JANUARY 1, 1959.—In the case of a taxable year beginning before January 1, 1959, the tax shall consist of—

"(1) a normal tax equal to 30 percent of the taxable income, and

"(2) a surtax equal to 22 percent of the amount by which the taxable income (computed without regard to the deduction, if any, provided in section 242 for partially tax-exempt interest) exceed $25,000.

"(c) TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1958.—In the case of a taxable year beginning after December 31, 1958, the tax shall be determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $10,000	20 percent of the taxable income.
Over $10,000 but not over $25,000.	$2,000, plus 25 percent of excess over $10,000.
Over $25,000 but not over $50,000.	$5,750, plus 35 percent of excess over $25,000.
Over $50,000 but not over $100,000.	$14,500, plus 45 percent of excess over $50,000.
Over $100,000	$37,000, plus 52 percent of excess over $100,000."

SEC. 2. (a) Section 12(7) of the Internal Revenue Code of 1954 (cross references relating to tax on corporations) is amended by striking out "section 11(c)" and inserting in lieu thereof "section 11(b)(2)".

(b) Section 244(2)(B) of such Code (relating to dividends received on certain preferred stock) is amended to read as follows:

"(B) the denominator of which is that percentage which equals—

"(i) the sum of the normal tax rate and the surtax rate prescribed by section 11, in the case of a taxable year beginning before January 1, 1959, or

"(ii) the tax rate prescribed by section 11 (determined as though the amount of such tax were expressed entirely in terms of

a percentage of taxable income), in the case of a taxable year beginning after December 31, 1958."

(c) Section 247(a)(2)(B) of such Code (relating to dividends paid on certain preferred stock of public utilities) is amended to read as follows:

"(B) the denominator of which is that percentage which equals—

"(i) the sum of the normal tax rate and the surtax rate prescribed by section 11, in the case of a taxable year beginning before January 1, 1959, or

"(ii) the tax rate prescribed by section 11 (determined as though the amount of such tax were expressed entirely in terms of a percentage of taxable income), in the case of a taxable year beginning after December 31, 1958."

(d) Section 511(a)(1) of such Code (relating to imposition of tax on unrelated business income of charitable, and so forth, organizations) is amended by striking out "a normal tax and a surtax" and inserting in lieu thereof "a tax".

(e) (1) Sections 802(a) and 802(c)(2)(A) of such Code (relating to imposition of tax on life insurance companies) are amended by striking out "a normal tax (computed under section 11(b)) and a surtax (computed under section 11(c))" and inserting in lieu thereof "a tax (computed under section 11)".

(2) Section 811(a) of such Code (relating to imposition of tax on life insurance companies) is amended to read as follows:

"(a) TAX IMPOSED.—A tax (computed under section 11) is hereby imposed, on the life insurance company taxable income of every life insurance company, for each taxable year beginning after December 31, 1958."

(f) Section 852(b)(1) of such Code (relating to taxation of regulated investment companies and their shareholders) is amended (1) by striking out "Normal Tax and Surtax" in the heading and inserting in lieu thereof "Tax", (2) by striking out "a normal tax and surtax" ind inserting in lieu thereof "a tax", and (3) by striking out "the normal tax under section 11" and inserting in lieu thereof "the tax under section 11 (but only the normal tax under such section in the case of a taxable year beginning before January 1, 1959)".

(g) Section 922(2)(B) of such Code (relating to special deduction for Western Hemisphere trade corporations) is amended to read as follows:

"(B) the denominator of which is that percentage which equals—

"(i) the sum of the normal tax rate and the surtax rate prescribed by section 11, in the case of a taxable year beginning before January 1, 1959, or

"(ii) the tax rate prescribed by section 11 (determined as though the amount of such tax were expressed entirely in terms of a percentage of taxable income), in the case of a taxable year beginning after December 31, 1958."

(h) Section 1361(h)(1) of such Code (relating to imposition of taxes on unincorporated business enterprises electing to be treated as domestic corporations) is amended by striking out "the normal tax and surtax" and inserting in lieu thereof "the tax".

(i) Section 1503(a) of such Code (relating to computation and payment of tax on consolidated returns) is amended (1) by striking out "tax imposed under section 11(c)" and inserting in lieu thereof "surtax imposed under section 11", and (2) by adding at the end thereof the following new sentence: "For purposes of the first sentence of this subsection, the term 'surtax imposed by section 11' means (1) the tax imposed by section 11(b)(2), in the case of a taxable year beginning before January 1, 1959, and (2) that portion of the tax imposed by section 11(c) which is attributable to consolidated taxable income exceeding $25,000, in the case of a taxable year beginning after December 31, 1958."

(j) Section 1551 of such Code (relating to disallowance of surtax exemption and accumulated earnings credit) is amended by striking out "provided in section 11(c)" and inserting in lieu thereof "provided (in the case of a taxable year beginning before January 1, 1959) in section 11(b)(2)."

SEC. 3. The amendments made by this Act shall apply only with respect to taxable years beginning after December 31, 1958.

S. 1335

A bill to amend section 4B of the Clayton Act

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4B of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914 (38 Stat. 730, as amended; 15 U.S.C. 15b), is amended to read as follows:

"SEC. 4B. Notwithstanding any provision contained in any contract, agreement, or conveyance, any action arising under section 4 or section 4A may be commenced at any time within four years after the accrual of the cause of action upon which such action is based. Any such action shall be forever barred unless commenced within four years after the cause of action accrued. No cause of action barred under existing law on the effective date of this section as originally enacted shall be revised by the enactment of this section."

S. 1336

A bill to amend the Clayton Act to declare private antitrust suits to be impressed with a substantial public interest

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 4 of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914 (38 Stat. 731; 15 U.S.C. 15), is amended by adding at the end thereof the following new sentence: "Each such suit shall be deemed to be impressed with a substantial public interest."

(b) Section 16 of such Act (15 U.S.C. 26) is amended by adding at the end thereof the following new sentence: "Each such suit shall be deemed to be impressed with a substantial public interest."

S. 1337

A bill to provide for the publication before entry of decrees, judgments, and orders entered by consent upon the merits of civil antitrust proceedings

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4 of the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies", approved July 2, 1890 (26 Stat. 209; 15 U.S.C. 4), is amended by—

(1) inserting, immediately after the section number "SEC. 4.", the subsection designation "(a)"; and

(2) adding at the end thereof the following new subsection:

"(b) In any action instituted under this section, no proposed decree, judgment, or order for the final determination of such action upon its merits as to any defendant may be entered by consent of such defendant, without adjudication by the court as to the merits of the action with respect to such defendant, unless the full text of such proposed decree, judgment, or order has been published by the Attorney General in the Federal Register not less than thirty days before the date of entry of such decree, judgment, or order."

SEC. 2. (a) Section 15 of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914 (38 Stat. 736; 15 U.S.C. 25), is amended by—

(1) inserting, immediately after the section number "SEC. 15." the subsection designation "(a)"; and

(2) adding at the end thereof the following new subsection:

"(b) In any action instituted under this section, no proposed decree, judgment, or order for the final determination of such action upon its merits as to any defendant may be entered by consent of such defendant, without an adjudication by the court as to the merits of the action with respect to such defendant, unless the full text of such proposed decree, judgment, or order has been published by the Attorney General in the Federal Register not less than thirty days before the date of entry of such decree, judgment, or order."

(b) Section 11 of such Act (15 U.S.C. 21) is amended by adding at the end thereof the following new paragraph:

"In any proceeding before a board or commission against any person for the enforcement of any provision of this Act or the Federal Trade Commission Act, no proposed order for the determination of such proceeding upon its merits as to such person may be entered by consent of such person, without an adjudication by the board or commission upon the merits of the proceeding with respect to such person, unless the full text of such proposed order has been published by the board or commission in the Federal Register not less than thirty days before the date of entry of such order."

S. 1338

A bill to amend the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, and to amend the act entitled "An act to protect trade and commerce against unlawful restraints and monopolies, and for other purposes, approved July 2, 1890, for the purpose of prohibiting loss leader sales

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914, is amended by adding at the end thereof the following new section:

"SEC. 27. (a) For the purposes of this section—

"(1) The term 'delivered cost' shall mean invoice cost to a seller less the value of discounts received by a seller in money or the equivalent, plus the cost of transportation incident to delivery to the seller, and plus applicable excise and sales taxes to the seller.

"(2) The term 'seller' shall mean a vendee, as used in this Act, who purchases for resale.

"(3) The term 'loss leader practice' shall mean selling a commodity, or advertising or offering a commodity for sale at retail at a price below the delivered cost of the commodity to the seller except that it does not include any of the following sales, or any advertisement or offer in connection therewith:

"(A) Any sale of a commodity for the bona fide purpose of discontinuing dealing in such commodity or of discontinuing the seller's business, when plain notice of that fact is given to the public.

"(B) Any sale of a commodity which is substantially damaged or deteriorated in quality if plain notice of the fact is given to the public.

"(C) Any sale by an officer acting under on order of court.

"(D) Any sale to any association organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals, no part of the net earnings of which inures to the benefit of any private shareholder or individual.

"(E) Any sale of a perishable commodity if further retention of the commodity by the seller could reasonably be expected to result in a loss to the seller.

"(F) Any sale which reasonable business practices require the seller to make in order to liquidate an inventory of a commodity to avoid insolvency or bankruptcy.

"(G) Any seasonal clearance sale made in accordance with customary business practices in order to dispose of excess inventory.

"(b) Any loss leader practice which affects commerce is hereby declared to be unlawful and actionable at the suit of any person damaged thereby.

"(c) (1) Any person injured in his business or property by any loss leader practice hereby declared to be unlawful may sue therefor in any district court of the United States, as provided in section 4 of this Act, or in any State court of competent jurisdiction, and recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee. Any person threatened with injury by any loss leader practice shall be entitled to injunctive relief against such threatened injury in any court of the United States, as provided in section 16 of this Act, or to sue for and have such relief in any State court of competent jurisdiction when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity in that State, under the rules governing such proceedings, and upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss or damage is immediate, a preliminary injunction may issue.

"(2) Section 15 of this Act (providing for suits by United States district attorneys to restrain violations of this Act) shall not apply with respect to any loss leader practice."

"(d) (1) Nothing contained herein or in any of the Antitrust Acts shall render illegal any contract or agreement prohibiting a seller from reselling at a price below his delivered cost, any commodity which bears, or the label or container of which bears, the trade-mark, brand, or name of the producer or distributor of such commodity and which is in free and open competition with commodities of the same general class produced or distributed by others, when contracts or agreements prescribing minimum prices are lawful under any statute, law, or public policy now or hereafter in effect in any State, Territory, or the District of Columbia, in which such resale is to be made, or to which the commodity is to be transported for such resale, or for delivery to a vendee pursuant to a sale.

"(2) Nothing contained herein or in any of the Antitrust Acts shall render illegal the exercise or enforcement of any right or right of action created by any statute, law, or public policy now or hereafter in effect in any State, Territory, or the District of Columbia, which provides in substance that willfully and knowingly advertising, offering for sale, or selling any commodity at less than the minimum prices prescribed in any such contract or agreement whether the person so advertising, offering for sale, or selling is or is not a party to such contract or agreement, is unfair competition and is actionable at the suit of any person damaged thereby: *Provided, however,* That the rights or right of action created by or under such contracts and agreements shall not apply where the minimum price prescribed in such contract is higher than the delivered cost to the seller: *And provided further,* That the rights or right of action created by or under such contracts and agreements shall not apply to any of the following sales, or advertisement or offer in connection therewith:

"(A) Any sale of a commodity for the bona fide purpose of discontinuing dealing in such commodity or of discontinuing the seller's business, when plain notice of that fact is given to the public.

"(B) Any sale of a commodity which is substantially damaged or deteriorated in quality if plain notice of the fact is given to the public.

"(C) Any sale by an officer acting under an order of court.

"(D) Any sale to any association organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals, no part of the net earnings of which inures to the benefit of any private shareholder or individual.

"(E) Any sale of a perishable commodity if further retention of the commodity by the seller could reasonably be expected to result in a loss to the seller.

"(F) Any sale which reasonable business practices require the seller to make in order to liquidate an inventory of a commodity to avoid insolvency or bankruptcy.

"(G) Any seasonal clearance sale made in accordance with customary business practices in order to dispose of excess inventory."

SEC. 2. That section 1 of the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890, as amended, is amended to read as follows:

"SECTION 1. Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both punishments, in the discretion of the court."

S. 1339

A bill to amend the Clayton Act to prohibit sales in commerce at unreasonably low prices where the effect may be to injure competition

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914 (38 Stat. 730, as amended; 15 U.S.C. 13), is amended by adding at the end thereof the following new subsection:

"(g) It shall be unlawful for any person engaged in commerce, in the course of such commerce, to sell or contract to sell goods at unreasonably low prices if the effect of any such sale at any such price may be to destroy competition or to eliminate a competitor."

S. 1340

A bill to provide for disaster loans to small business concerns which suffer economic injury to federally aided highway construction programs

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8(b)(1) of the Small Business Act is amended by inserting before the word "floods" the words "condemnation proceedings under federally aided highway construction programs, or because of".

IMPROVEMENT OF PROGRAM TO COMBAT JUVENILE DELINQUENCY

Mr. JAVITS. Mr. President, I introduce for appropriate reference a bill to strengthen and improve State and local programs to combat and control juvenile delinquency and youth crime, with a portion of the costs to be shared with the States.

The emergency, 5-year program set up by the measure entitled "The Juvenile Delinquency Control Act" has three primary objectives:

First. To assist States in the establishment and operation of major juvenile delinquency control programs, $2 million in Federal funds will be made available the first year and $5 million annually for the remaining 4 years to States whose plans have been approved by the Secretary of the Department of Health, Education, and Welfare, with no allocations to exceed two-thirds of the amount spent by States on such projects;

Second. To encourage the research, development, and demonstration of new techniques in dealing with behavioral problems of children and youth crime, Federal grants totaling $500,000 for the first year but not to exceed $2 million annually for the remainder of the program may be made to share project costs with States, municipalities, and public and other nonprofit institutions of higher learning or research; and

Third. To promote the training of personnel to staff programs for the control and treatment of juvenile delinquency, Federal moneys identical with the sums listed under (2) will be used to pay part of the cost incurred by the States and public and nonprofit institutions.

The legislation would also create within the Department of Health, Education, and Welfare a Federal Advisory Council on Juvenile Delinquency, and at the State level State advisory councils would be set up; in each instance their membership would include public officials directly dealing with youth problems in addition to professional experts and community leaders who are experienced in the fields of welfare, education, health, vocational rehabilitation, and police and court procedures as they concern juvenile delinquency.

An all-out, coordinated national attack against juvenile delinquency is about the only way we are going to stem the alarming increase in youth crime now approaching emergency proportions in some rural as well as urban areas. In a preliminary report just released by the FBI Director J. Edgar Hoover reveals what he terms an appalling 8-percent rise in U.S. crime in 1958 with even steeper rises noted in smaller and medium-sized cities than in larger metropolitan areas. The most ominous figure in the report, however, is the statistic showing nearly a 7-percent increase in arrests of youths under 18 in 1958, which marks the sixth consecutive year that figure has gone up.

There seems little hope that any significant improvements will be noted

when a more detailed breakdown is released. In 1957, persons under 18 accounted for more than one-fourth of all arrests for robbery, over half the arrests for larceny and burglary, and nearly 70 percent of those for auto thefts. Since 1952, the juvenile population in the United States has increased about 22 percent, but juvenile arrests have shot up 55 percent; at this rate, a million youngsters may be arrested by the year 1961, if not sooner.

Some cities have already issued a crime report for 1958. The other day the New York State Commissioner of Corrections revealed that juvenile arrests in New York City last year increased 18.3 percent as compared with 1957.

In the face of these grim statistics, Congress should not postpone a major Federal juvenile delinquency program. At present a minor job of the Children's Bureau in the Department of Health, Education, and Welfare is to supply technical assistance to States in the amount of about $200,000 annually as salaries for professionals who advise on State and local delinquency and youth plans and activities. Certainly, the 5-year effort provided for in this "Juvenile Delinquency Control Act" which limits Federal expenditures to a maximum of $39 million in all is the minimal program which should be undertaken at this time and will have no material impact on the budget in any one year.

This program I am proposing is in substance the one called for by the President's budget for the fiscal year of 1958, and supported by the Department of Health, Education, and Welfare and the Department of Justice. In general, its provisions would realize the Federal legislative goals in the field of juvenile delinquency supported by the American Municipal Association in its 1959 National Municipal Policy Statement.

Juvenile delinquency has been diagnosed as a critical social disease which makes itself most keenly felt when it flares up into sensational headlines reporting a grave youth crime, sometimes even murder. However, despite public consciousness of the chronic nature of this disease and the activities of voluntary and public agencies to stamp out the sources of infection and to rehabilitate youthful offenders where it is already too late to prevent their delinquency, they need more financial help if we are to stop losing ground, as we now are, in the fight to combat and control it.

Probing studies including one by the New York State Temporary Commission on Youth and Delinquency reveal that the well-known factors contributing to the upsurge in youthful offenders like lack of organized recreation, substandard housing and low economic status are often secondary to primary causes like broken homes, personality maladjustments, too little help for borderline delinquents and inadequate rehabilitation of youngsters following their apprehension.

The broad-scale offensive envisioned for the legislation I introduced today will enable each State to launch a coordinated attack on all phases of juvenile delinquency, with special concentration on experimentation, demonstration projects in problem areas and training personnel including psychiatrists, psychologists, and social caseworkers in the new methods of prevention, control, and aftercare. All this can be accomplished in partnership with the Federal Government which will provide $3 million the first year and $9 million for each of the last 4 years to help combat youth crime at the grassroots level.

The Federal Advisory Council on Juvenile Delinquency established by the act would be of invaluable aid in furnishing overall supervision of the nationally launched program. It could compile and make available data on new developments and inform local authorities on job needs and opportunities for youth.

Temporary patchwork improvement of existing methods and agencies are no substitute for Federal legislation to support and intensify State and local efforts through public and voluntary organizations to combat juvenile delinquency. We must affirm that it is an integral part of our national policy to prevent the sapping of our manpower resources attributable to juvenile delinquency and youth crimes for we are dealing here with our most precious resource, our youth, to whom we will entrust the future of our country and, in a very real sense, the future of the free world.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1341) to strengthen and improve State and local programs to combat and control juvenile delinquency, introduced by Mr. JAVITS, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

FEDERAL LIMITED PROFIT MORTGAGE CORPORATION

Mr. JAVITS. Mr. President, on behalf of myself, and the distinguished senior Senator from Pennsylvania [Mr. CLARK], I introduce a bill to establish a Federal Limited Profit Mortgage Corporation which could issue tax-exempt bonds up to a maximum of $2 billion after the first year of operation for the purpose of directly aiding in the construction of 150,000 housing units for lower and middle income families.

This bill, the Federal Limited Profit Mortgage Corporation Act, would establish a new housing program on the Federal level, which is intended, without substantial cost to the Federal Treasury, to fill part of the most shocking gap in the entire national housing picture—the needs of those families whose income is too high for low-rent subsidized public housing but is substantially below the levels which unassisted private enterprise is able to meet.

Basically, the concept for this national middle income housing program was pioneered in New York State where the States limited profit housing program, twice approved by referendum, will build about 25,000 units in the next 5 years with monthly rents or carrying charges of between $20 and $25 per room per month. This has been achieved by making available to private enterprise assistance in terms of lower interest rates and amortization payments, limitation of builders' and investors' profits, and other assistance. It was established and has been carried forward on a nonpolitical, bi-partisan basis and has received commendation from all parts of the Nation.

The one principal distinction between the proposed Federal program and that in the State is that the latter utilizes direct State loans, while the proposed program will be financed through the issuance of bonds with guarantees similar to FHA, without requiring direct loans from the Treasury. The Corporation which this act establishes, would be authorized to issue tax-exempt bonds, $500 million at its inception and up to $1,500 million after 1 year at the President's discretion. Its funds are lent to private rental builders and cooperatives who meet the act's requirements at the rate at which the Corporation secured the funds plus one-half percent, in the form of 50- year, 90-percent mortgages, with the remaining 10 percent supplied as an investment or downpayment.

In order to be eligible for loans under the program, builders would have to meet the all-important requirement that profits be limited to 6 percent, and that the Corporation approve rents and carrying charges to keep them within the limits which the program is intended to meet.

This new program should prove a significant stimulus for increased State and local government activity at little or no cost to them, for it would also give preference to housing which is granted some local tax assistance, aid in the assembling of land, and the use of urban renewal sites.

Mr. President, I ask unanimous consent that a section by section analysis of the bill be printed at this point in the RECORD, and that the bill be appropriately referred.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the analysis will be printed in the RECORD.

The bill (S. 1342) to create a Federal Limited Profit Mortgage Corporation to assist in the provision of housing for moderate income families and for elderly persons, introduced by Mr. JAVITS (for himself and Mr. CLARK) was received, read twice by its title, and referred to the Committee on Banking and Currency.

The analysis presented by Mr. JAVITS is as follows:

SECTION-BY-SECTION ANALYSIS OF "FEDERAL LIMITED PROFIT MORTGAGE CORPORATION" ACT

Section 1. Statement of congressional findings: This section reiterates the national housing policy of the Housing Act of 1949, that governmental assistance shall be utilized where feasible to enable private enterprise to serve more of the total housing need, and determines that there is a need for a supplementary system of financing to permit private enterprise to meet the needs of families of moderate income and elderly persons. It also makes a determination that State and local governments can give assistance in certain areas without substantial

cost to themselves, and encourages such further help to carry out the purposes of this act.

Section 2. Statement of purposes: The purposes are set out in self-explanatory manner—to make financial assistance available to eligible borrowers for the provision of housing for those groups which neither private nor public programs now in existence have been able to serve.

Section 3. A Federal Limited Profit Mortgage Corporation is created, with all the corporate powers of the usual Government-owned corporation.

Section 4. The corporation is run by a board of five directors, the chairman of which is the Housing and Home Finance Administrator, and the members of which are officers or employees of the agency. It also elects a president, who is the actual operating head of the corporation. In addition, an advisory committee of seven members is created, which represents the building industry, local governments, and others whose experience can help the board and president in the implementation of the program.

Section 5. The Corporation is authorized to issue capital stock in the amount of $100 million, or such smaller amounts as are required. This represents the only contribution to the Corporation out of the Treasury, and represents an investment receiving preferred dividends; it is the working capital of the Corporation to get it into business. This section also provides that, on liquidation, the Treasury shall receive any profits which the Corporation has made.

Section 6. The Corporation is authorized to make mortgage loans to private rental or cooperative mortgagors, who meet the following requirements: that the proposed project will meet a need for housing of families of moderate income or elderly persons, that it will be economically sound and of economical design, that the borrower has agreed to bar excessive fees and salaries, to establish rents at a level which can meet the intended needs and reflect the savings which the provisions of the act create, and, in the case of borrowers other than nonprofit corporations, that it agrees to limit dividends to 6 percent. The mortgage loan is not to exceed 90 percent of the project's development cost and not to be for more than 50 years (with an emergency extension provision to 60 years), and cost certification is required. The loan is made at the rate at which the Corporation secured its funds, plus one-half of 1 percent, which is for administrative costs plus the creation of reserves. [It has been shown in New York that this amount is sufficient for these purposes.

Section 7. The Corporation is authorized to issue bonds in the amount of $500 million, and, after its first year, additional amounts up to $1,500 million with the approval of the President. Such obligations are obligations of the Corporation and not of the United States; however, in case the Corporation (not any individual borrower) defaults, which is very unlikely, then it will exchange its bonds for debentures guaranteed by the Treasury, similarly to the FHA approach, but carrying a more realistic rate—that of the defaulted bonds.

Section 8. This section establishes a reserve fund, to be built up from half of the premium charged the borrowers.

Section 9. This section provides that priority shall be given to applications with respect to which the State or locality has also given some additional assistance as specified in the statement of purposes.

Section 10. Definitions.

Section 11. Technical amendments of other acts.

Section 12. This section makes the debentures and bonds of the Corporation exempt from taxation, in the same manner as bonds and obligations of public authorities under the low rent program. The interest saving to be secured through this exemption is one of the major factors contributing toward the purposes of this program. The exemption goes only to the Government Corporation, not to the borrower.

Section 13. The Davis-Bacon Act is applied to construction under this program.

Section 14. Penalties are imposed on false applications, false advertising, forgery, etc.

AMENDMENT OF AGRICULTURAL ACT OF 1949, RELATING TO PRICE SUPPORTS FOR OATS, RYE, BARLEY, AND GRAIN SORGHUMS

Mr. YARBOROUGH. Mr. President, I introduce for reference to the appropriate committee a bill to amend section 105(b) of the Agricultural Act of 1949, as amended, relating to price supports for oats, rye, barley, and grain sorghums.

Mr. President, on this bill I am joined by Senators CHAVEZ, CARLSON, KERR, HUMPHREY, MANSFIELD, and MURRAY.

Mr. President, I ask unanimous consent that the bill lie on the desk for 2 days in order that other Senators who so desire may join in cosponsorship of the bill.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will lie on the desk for 2 days, as requested by the Senator from Texas.

The bill (S. 1343) to amend section 105(b) of the Agricultural Act of 1949, as amended, relating to price support for oats, rye, barley, and grain sorghums, introduced by Mr. YARBOROUGH (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

Mr. YARBOROUGH. Mr. President, the purpose of this amendment is to secure equitable treatment of feed grain farmers under our present farm price support program. Under the Agriculture Act of 1949, as administered by Secretary of Agriculture Ezra Taft Benson, there has been unfair discrimination against the feed grain producers. The amendment which I propose does not provide for any serious or far-reaching change of the existing law. It simply directs Secretary Benson to administer the program as the Congress contemplated it would be administered under the original act. Certainly, it was not the intention of the Senate or the House that our price support program would be used to the detriment of one group of farmers.

There has been unfair discrimination against the feed grain producer.

The Secretary of Agriculture raised unallotted corn 16 cents a hundred and lowered unallotted grain sorghum 31 cents a hundred on the national average. This will glut the corn market and will ruin the feed grain producers this year and the corn producers next year. The grain sorghum producers have met in emergency sessions during the past 10 days in Texas, Oklahoma, New Mexico, and Kansas, and have strongly urged the congressional delegations of all these States to tie grain sorghum to the corn support in direct relation to its feed value to corn. These producers have asked the congressional delegations for urgent and immediate aid to secure relief. Many of these producers advise us that the program outlined by Secretary Benson would call for a reduction in prices that would be below the cost of production. If the Secretary persists in his current course, it will force many tenant farmers to abandon their farms. The current program of the Secretary of Agriculture would reduce prices to a level equivalent to the lowest level since 1942. In view of other increased operating costs on farms, this would cause great loss in the farm communities. I am advised that the producers in the Panhandle section of Texas alone would suffer a loss of $38 million.

In connection with some of these crops, it would appear that it might have saved the Government money to have kept the support level somewhere near the 1958 level. For example, in the case of soybeans, it would appear that the acreage would be cut now for the new support level has been announced in favor of planting more corn, to be supported at $1.12 per bushel. This will just pair up with corn, and at the same time will cut back soybeans which we know how to dispose of domestically and overseas.

We have a good market for soybean meal. The price is actually higher this year than last year, in spite of the fact that we have been producing the beans at a record level.

A sizable delegation of congressional representatives met with Secretary Benson last Friday to explore alternative solutions under the present statutes. The Secretary advised the delegation that he would not proceed further under the present law to correct this inequity. Consequently, this amendment is offered to remedy this inequitable plight of the feed grain producers in the various States who are in urgent and immediate need of remedial legislation.

The bulk of our grain sorghum production comes from sections of the country of less rainfall than the average, where producers have little or no choice as to what they plant.

Because of the production restrictions imposed by nature and the production restrictions imposed by law, the sponsors of this bill, and I hope a great majority of the Members of the Senate will see that it is unfair to further penalize the feed grain farmers.

This bill is needed to save farmers of the feed grain area from economic disaster.

WORK HOURS ACT OF 1959

Mr. COOPER. Mr. President, on behalf of myself, the Senator from New Jersey [Mr. CASE], the Senator from New York [Mr. JAVITS] and the Senator from Vermont [Mr. PROUTY] I introduce, for appropriate reference, a bill to establish standards for hours of work and overtime pay of mechanics employed on work done under contract for, or with the financial aid of, the United States, for any

Territory, or for the District of Columbia, and for other purposes.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1344) to establish standards for hours of work and overtime pay of mechanics employed on work done under contract for, or with the financial aid of, the United States, for any Territory, or for the District of Columbia, and for other purposes, introduced by Mr. COOPER for himself and other Senators was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

Mr. COOPER. Mr. President, I ask unanimous consent to have printed in the RECORD an explanation of the bill.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT AND EXPLANATION OF PROPOSED WORK HOURS ACT OF 1959

The purpose of this bill is to clarify the heretofore piece-meal legislation detailing the circumstances under which daily overtime may be worked on Federal contracts that require the employment of laborers and mechanics and to modernize that legislation. I am referring to the 8-hour laws.

The bill has three major objectives. They are:

First, to replace the uncoordinated and confusing series of laws presently existing with a single statute. This statute would make clear such things as the fact that there exists a right of action by laborers and mechanics protected by the 8-hour laws for the overtime pay required by those laws. The existence of such a right of action is not clear under the present construction of the 8-hour laws by the courts. It will also provide the Comptroller General of the United States with express authority to disburse contract funds withheld for violations of the 8-hour laws to the laborers and mechanics found underpaid. The Comptroller General has declined to make such disbursements in the absence of this authority.

Second, to provide for weekly as well as daily overtime payments for work performed on projects subject to the bill. The straight-time workweek would be one of 40 hours. Payment at not less than time and one-half would be required for hours worked in excess of 40. This is similar to the overtime provisions of the wage and hour law, the application of which depends on whether or not the work of the employees involved is connected with interstate commerce. Under the present 8-hour laws, it is possible for a contractor to work his employees 56 hours a week without paying 1 cent of overtime in those situations where the wage and hour law is not applicable.

Third, to require the payment of overtime not only on direct Government contracts, as now provided by the 8-hour laws, but also to those Federally financed and assisted contracts which require the payment of minimum wages determined by the Secretary of Labor. This proposal is designed to carry out the recommendations of the President for the strengthening of the 8-hour laws, as noted in his 1958 Economic Report and in his 1958 budget message. The Congress has already taken a step in this direction by requiring the payment of daily and weekly overtime compensation to construction under the Federal Civil Defense Act as amended by Public Law 85-606 during the last Congress.

EQUAL PAY WITHOUT DISCRIMINATION ON ACCOUNT OF SEX IN INTERSTATE EMPLOYMENT

Mr. COOPER. Mr. President, for myself and my colleagues Mr. CASE of New Jersey, Mr. JAVITS, and Mr. PROUTY, I introduce a bill to prohibit discrimination on account of sex in interstate employment.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1345) to prohibit discrimination on account of sex in the payment of wages by employers having employees engaged in commerce or in the production of goods for commerce, and to provide procedures for assisting employees in collecting wages lost by reason of such discrimination, introduced by Mr. COOPER (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

Mr. COOPER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement in explanation of the bill which I have just introduced.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT IN EXPLANATION OF A BILL TO PROVIDE EQUAL PAY WITHOUT DISCRIMINATION ON ACCOUNT OF SEX IN INTERSTATE EMPLOYMENT

This proposal is designed to provide a means within the scope of the Federal regulatory power to eliminate discrimination in wage rates based on sex where men and women are performing comparable work for the same employer. It is a part of the legislative program of the Department of Labor.

The proposal would apply to employers whose employees are engaged in commerce or in the production of goods for interstate commerce. The administration of the act would be vested in the Secretary of Labor and procedures of enforcement and wage collection authorized similar to those now utilized by the Department of Labor in the administration of the Fair Labor Standards Act.

The payment of lower wage rates to workers of one sex for the same or comparable work as that performed by the other sex has an undesirable effect on the economic life of the entire Nation. Such practices tend to affect adversely the general purchasing power and the standards of living of workers. Unfair competitive advantages are enjoyed by employers who pay discriminatory wage rates based on sex. In addition to the tangible economic ills caused by discriminatory wage practices, such practices violate fundamental principles of justice and impair the prestige of the United States in international affairs.

A nondiscriminatory wage level makes possible the maximum utilization of worker skills. This, together with collateral benefits, such as morale improvement, may stimulate production and lessen the effects of unfair competition.

It is of great importance that Congress eradicate discriminatory pay practices in interstate commerce.

EQUAL PAY PROPOSAL—SECTION-BY-SECTION ANALYSIS

Section 1, title of act: Establishes short title of "Federal Equal Pay Act."

Section 2, finding and declaration of policy: Enumerates undesirable conditions in interstate commerce resulting from payment of wage differentials based on sex and intention of Congress to correct such conditions.

Section 3, prohibition of wage rate differential based on sex: Prohibits employers having employees engaged in commerce or in the production of goods for commerce from discriminating, on the basis of sex, in payment of wages in any place of employment in which their employees are so engaged. The language descriptive of proposed coverage and the supporting definitions in section 10 are phrased to make available precedents established under the Fair Labor Standards Act in determining coverage under the proposed legislation.

Section 4, administration: Authorizes the Secretary of Labor to issue rules and regulations, make investigations regarding compliance with the act, issue subpenas, and restrain violations. These provisions are largely adapted from similar provisions of the Fair Labor Standards Act.

Section 5, wage restitution and liquidated damages: Provides that employers who violate the act shall be liable for wages of which an employee is deprived and for not more than an additional equal amount as liquidated damages. The liability in employee suits for unpaid wages and liquidated damages is like that now provided by the Fair Labor Standards Act, as modified by section 11 of the Portal-to-Portal Act.

Section 6, enforcement: Authorizes employee suits to recover amount of employer liability under section 5. Authorizes Secretary to supervise payment of wages withheld in violation of the act and to bring suits for such wages in behalf of employees upon their request. The recovery of unpaid wages, but not liquidated damages, is authorized in suits by the Secretary of Labor or by administrative action in supervising employer payments. Establishes a 2-year period of limitation for commencing recovery action after cause accrues.

Section 7, posting: Requires employer to post copy of act or official poster explaining its provisions in each place of employment where act applies.

Section 8, unlawful discharge or discrimination and penalties: Makes it unlawful to discharge or discriminate against any employee assisting in the enforcement of the act. Upon a second conviction for such discharge or discrimination, imposes a criminal penalty. Provides that the United States district courts will have jurisdiction of criminal proceedings for violation of this section.

Section 9, injunction proceedings: Provides that the U.S. district courts will have jurisdiction to restrain violations of the act or regulations issued under it.

Section 10, definitions: Defines terms used in the act principally as defined in the Fair Labor Standards Act.

Section 11, appropriation: Authorizes necessary appropriations to carry out act.

Section 12, effective date: Provides that act will take effect 120 days after passage.

ELECTION OF PRESIDENT AND VICE PRESIDENT—PROPOSED CONSTITUTIONAL AMENDMENT

Mr. KEFAUVER. Mr. President, I introduce for appropriate reference a joint resolution proposing an amendment to the Constitution of the United States providing for the election of President and Vice President.

It is identical with the so-called Lodge-Gossett amendment which was agreed to by the Senate in 1950 by vote of 64 to 27. Unfortunately, the proposed amendment failed to pass in the House of Representatives.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

The joint resolution (S. J. Res. 72) proposing an amendment to the Constitution of the United States providing for the election of President and Vice President, introduced by Mr. Kefauver, was received, read twice by its title, and referred to the Committee on the Judiciary.

Mr. KEFAUVER. The purpose of the proposed amendment would be to abolish the unit-rule system of counting electoral votes in favor of a method whereby the President and Vice President are elected by taking the popular vote cast for a given candidate and establishing the proportion which that vote bears to the total vote cast and the number of electoral votes available to a given State.

I ask unanimous consent to have printed in the RECORD at this point a very brief analysis of the proposed legislation which is contained in Senate Report No. 594 of the 82d Congress.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

ANALYSIS OF THE PROPOSED CONSTITUTIONAL AMENDMENT

1. It abolishes entirely the office of presidential elector. The electoral vote per State (equal to the total number of Senators and Representatives, as under the existing system) is retained—but purely as an automatic counting device.

2. It eliminates the possibility of an election being determined by the House of Representatives solely and permits the determination of an election for President or Vice President by both the Senate and House of Representatives only in the event the electoral vote of any single candidate does not total 40 percent of the whole number of electoral votes.

3. It does away with the so-called unit-rule system of counting electoral votes. Under the existing system, the candidate receiving a plurality of the popular vote in any given State is credited with all the electoral votes of that State, regardless of how infinitesimal the plurality. Under the proposed system, the electoral votes in each State are automatically divided among the candidates in direct proportion to the popular vote.

Example: A State has 12 electoral votes. Of the 2,400,000 popular votes cast in that State, R, the Republican, received 1,600,000. D, the Democrat, received 600,000. T, the third party candidate, received 200,000. Under the present system, all of the State's 12 electoral votes would go to R. Under the proposed system, the electoral vote would be divided in proportion to the popular vote as follows: 8 electoral votes for R; 3 electoral votes for D; and 1 electoral vote for T.

The electoral votes which each candidate receives therefor represent his proportional strength in the State. These votes are then taken and added to the electoral votes received in all the other States. The candidate having the greatest number of electoral votes wins the presidency unless no candidate receives 40 percent of the whole number of electorial votes, in which event 1 of the 2 persons having the 2 highest numbers of electoral votes for President will be elected by the Senate and the House of Representatives assembled in joint session.

In order to be elected, however it is necessary that 1 of these 2 persons receive a majority of the votes of the combined authorized membership of the Senate and the House of Representatives.

Mr. KEFAUVER. Mr. President, nearly 10 years have passed since this proposal failed of adoption in the House of Representatives. It is my hope that the legislation can be approved again by the Senate promptly and sent to the House for its reconsideration. The reform contained in this amendment is long overdue, and it is my hope that the present House of Representatives will look upon it with considerably more favor than the House during the 81st Congress.

INVITATION TO HOLD 1964 OLYMPIC GAMES AT DETROIT, MICH.

Mr. HART. Mr. President, I introduce, for appropriate reference, a joint resolution, the purpose of which is to have the Government of the United States invite the International Olympic Committee to hold the 1964 Olympic games in Detroit.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 73) extending an invitation to the International Olympic Committee to hold the 1964 games at Detroit, Mich., introduced by Mr. HART, was received, read twice by its title, and referred to the Committee on Foreign Relations.

ACQUISITION OF ADDITIONAL FOOD COMMODITIES FOR DISTRIBUTION TO NEEDY PERSONS—AMENDMENT

Mr. BYRD of West Virginia (for himself and Mr. RANDOLPH) submitted an amendment, intended to be proposed by them, jointly, to the bill (S. 663) to authorize the Secretary of Agriculture to acquire additional food commodities for distribution to needy persons, which was referred to the Committee on Agriculture and Forestry, and ordered to be printed.

CHANGES OF REFERENCE

Mr. RUSSELL. Mr. President, I ask unanimous consent that the Committee on Armed Services be discharged from further consideration of S. 723 and S. 911, and that these bills be referred to the Committee on Finance.

S. 723 would amend title 38 of the United States Code, which is the codification of veterans benefits, and relates to the amounts that would be payable under the Servicemen's Indemnity Act, which was considered in the Finance Committee. For these reasons I ask this change of reference.

S. 911 relates to the circumstances under which a former member of the armed services may be paid a pension by the Veterans' Administration, and this fact appears to place the bill within the jurisdiction of the Finance Committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUSSELL. Mr. President, I also ask unanimous consent that the Committee on Armed Services be discharged from further consideration of Senate bill 1165. This bill relates to the so-called dual compensation provision in the Economy Act of 1932. The Committee on Armed Services has never exercised jurisdiction over the dual compensation and dual employment statutes, since the impact of any changes in them is on civilian employment. For this reason I ask that S. 1165 be re-referred to the Committee on Post Office and Civil Service.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF GI BENEFITS FOR EDUCATIONAL PURPOSES—ADDITIONAL COSPONSOR OF BILL

Mr. KUCHEL. Mr. President, I ask unanimous consent that the name of the Senator from Colorado [Mr. ALLOTT] may be added as an additional cosponsor of the bill (S. 270) to extend the educational benefits of the Veterans' Readjustment Assistance Act of 1952 until such time as existing laws authorizing compulsory military service cease to be effective, introduced by me on January 14, 1959.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLARIFICATION OF PARAGRAPH 4, SECTION 15, PAY READJUSTMENT ACT OF 1942—ADDITIONAL COSPONSORS OF BILL

Under authority of the order of the Senate of March 2, 1959, the names of Senators MANSFIELD and BEALL were added as additional cosponsors of the bill (S. 1209) to clarify paragraph 4 of section 15 of the Pay Readjustment Act of 1942 (56 Stat. 368), introduced by Mr. SPARKMAN. (for himself, Mr. JACKSON, and Mr. KEFAUVER), on March 2, 1959.

AMENDMENT OF EMPLOYMENT ACT OF 1946, RELATING TO PRODUCTIVE CAPITAL INVESTMENTS—ADDITIONAL COSPONSORS OF BILL

Under authority of the order of the Senate of March 2, 1959, the names of Senators NEUBERGER, MAGNUSON, GRUENING, and HART were added as additional cosponsors of the bill (S. 1244) to amend the Employment Act of 1946 to establish policies with respect to productive capital investments of the Government, introduced by Mr. MORSE (for himself, Mr. PROXMIRE, and Mr. BARTLETT), on March 2, 1959.

FEDERAL RESPONSIBILITY TOWARD INDIANS—ADDITIONAL COSPONSORS OF CONCURRENT RESOLUTION

Under authority of the order of the Senate of March 2, 1959, the names of Senators MANSFIELD, CHAVEZ, MCCARTHY, GRUENING, CHURCH, DOUGLAS, and GOLDWATER were added as additional cosponsors of the concurrent resolution (S.

Con. Res. 12) to restate Federal responsibility toward Indians and the Federal Government's relation with Indian tribes or groups, submitted by Mr. MURRAY (for himself and Mr. NEUBERGER) on March 2, 1959.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. JOHNSON of Texas:

Address, "The Place of Government in Agriculture," delivered by Hon. HAROLD D. COOLEY, chairman of the House Committee on Agriculture, before the National Farm Institute, at Des Moines, Iowa, on February 21, 1959.

By Mr. DODD:

Address entitled "Needed Leadership for Our Economy," delivered by Senator SYMINGTON at the Democratic victory dinner, at Clarksburg, W. Va., on March 7, 1959.

By Mr. ENGLE:

Statement by him before Subcommittee on Territories and Insular Affairs regarding Hawaiian statehood, February 25, 1959.

By Mr. MUNDT:

Weekly newsletter by him and column entitled "Here's How To Give the People What They Want Without Increasing Taxes," written by Elmer Roessner and published by the McClure Newspaper Syndicate, February 17, 1959.

NECESSITY FOR NEW TAXES

Mr. WILEY. Mr. President, we receive numerous letters in which we are asked, "What are you fellows doing there in Washington?"

Let me point out that at this session more than 7,000 bills have been introduced—6,000 in the House of Representatives and 1,300 in the Senate. Only a small handful of them are major measures of broad national interest.

A rough count indicates that almost one-fourth of the total would confer special benefits upon such important numbers of voters as the 2.3 million Federal civilian employees, the 2.5 million in the military services, the 12-plus million beneficiaries of social security, or the 22.7 million veterans. In no case, Mr. President, are any offsetting new taxes proposed.

Another large segment proposes direct tax relief for individuals or corporations by permitting them new or larger deductions for certain expenses, by increasing exemptions, by lowering rates, or by cutting excises.

A third, very large group embraces spending bills of all types and sizes. These range from the pet measures of individual Members of Congress for local projects to authorizations or appropriations for vast undertakings, the cost of which would ultimately run into the high billions of dollars.

However, Mr. President, higher taxes are the only honest answer to the fiscal dangers posed by new spending programs. Mr. President, in my humble opinion we must see to it that such programs are met in that way.

Labor's demands on the economy put consumers at a growing disadvantage. Wage demands that force price levels up are self-defeating. Pressures for more deficit-financed welfare programs further undermine the value of the dollar. The long-term effect is to diminish not only the value of the currency, but also the value of the workingman's labor.

Mr. President, I bring these matters to the attention of the Senate because we are going off in all directions except the right one—namely, to see to it that, if we are going to spend, we raise the necessary funds by appropriate taxes.

NECESSITY OF MAINTAINING READY COMBAT UNITS OF THE ARMY AND THE MARINE CORPS

Mr. STENNIS. Mr. President, from the President and from congressional leaders we have had splendid expressions regarding the Berlin crisis, assuring our complete unity. I heartily applaud and fully concur in those sentiments.

But is this unity to include the continued dismantling of our ready combat units of the Army and the Marine Corps? I think not. In view of the Berlin situation, certainly it should not.

Current reductions in these fighting units must be reversed. Not a single day should be lost. Furthermore, not one day should be lost in rebuilding those units to their 1958 strength or above.

Quite briefly, let me refer to congressional action for the current fiscal year 1959 as to our ready combat troop strength.

In acting on the defense appropriation bills for the current fiscal year, the Congress provided the funds required to keep the Army at a strength of 900,000, and the Marine Corps at a strength of 200,000, although the executive branch contemplated reducing the strength of the Army to 870,000 and the strength of the Marine Corps to 175,000.

The amount of money involved is slightly more than $99 million for the Army, and slightly more than $45 million for the Marine Corps.

The intent of the Congress was made crystal clear in the conference report on the defense appropriation bill, which states:

> It is the belief of the committee of conference that the national defense requires the maintenance of a Regular Army of not less than 900,000, and it is the intent that planned strength for fiscal year 1959 be maintained at that level in accordance with the funds provided.

Similarly, the conference report contains the following statement with reference to the strength of the Marine Corps:

> As with the strength of the Regular Army, it is the belief of the committee of conference that the national defense requires that the Marine Corps be maintained at a strength of not less than 200,000, and it is the intent that the planned strength for fiscal year 1959 be maintained at that level in accordance with the funds provided.

Nevertheless, the Department of Defense is proceeding to reduce the strength of the Army and the Marine Corps below the levels intended by Congress.

Earlier this year, when Department of Defense officials appeared before the Committee on Armed Services, the committee pressed an inquiry into how the Army and the Marine Corps would absorb these reductions. Frankly, I had expected the absorption to be made in noncombat troops areas. But the testimony is that this cannot be done.

The reduction in the Army is being absorbed by eliminating one of the divisions of STRAC, an acronym composed of the initial letters of the motto of the Army's Strategic Striking Force: "Strong, tough, ready around-the-clock." The impact of this, Mr. President, is appalling. This is a mobile, combat-ready force consisting of both ground forces and paratroops designed to meet the initial—I repeat, the initial—requirements of limited war, or to provide the initial reinforcements in the event of general war. When asked about the possibility of absorbing this reduction in noncombat troops, the Army officials indicated that for several years the Army strength has been diminishing, and that all units have been combed to try to accomplish the reductions without affecting the combat capability. They testified it was impossible to absorb the 30,000 reduction in manpower without losing a STRAC division.

For the Marine Corps, the reduction means that in each of its three divisions the Marine Corps must disband two battalion landing teams. This means a total loss of 6 of 27 such landing teams in existence before the reduction.

Mr. President, I ask unanimous consent that I may proceed for 1 additional minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President this dismantling policy must be reversed. To fail to reverse it now will be tragic error.

Within the last 8 months we have had the Lebanon crisis. We are now facing the crisis in Berlin. The situation there grows more serious by the hour. Solemn treaties obligate us to more than 40 different nations around the globe, should those nations be placed in jeopardy. Trouble still brews in Formosa and Korea. Many other similar obligations bind us to respond in some degree in other potential trouble spots.

Furthermore, this is a step which would require no great outlay of additional appropriations. Ninety-nine million dollars for the Army and $45 million for the Marine Corps for the current fiscal year have already been appropriated. I am convinced that a reevaluation of various phases of our military program, including travel expenses, point defenses, and related matters, would allow the saving of virtually the same amount in the 1960 budget.

Can we afford to actually liquidate existing combat units already trained and already on a standby alert for instant action, the very units we are most likely to need within the next few years?

Mr. President, I plead for adequate strength where strength is needed. Let

us have unity. But in this instance we must have unity of action.

I urge responsible officials to reconsider. We cannot delay any longer. Combat strength already lost must be retrieved.

Now, and for several years to come, offensive ground strength is one of our greatest deterrents.

This loss of manpower, especially in view of the relatively small sum involved, is indefensible. It may prove fatal.

EXECUTIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to consider executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDING OFFICER (Mr. YOUNG of Ohio, in the chair) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEE ON ARMED SERVICES

Mr. CANNON. Mr. President, from the Committee on Armed Services, I report favorably the nominations of two admirals and four vice admirals in the Navy; two generals, one lieutenant general, six major generals, and nine brigadier generals in the Army, and two generals in the Air Force. I ask that these nominations be printed on the Executive Calendar.

The PRESIDING OFFICER. The nominations will be placed on the Executive Calendar.

The nominations are as follows:

Lt. Gen. Samuel E. Anderson, 92A (major general, Regular Air Force), U.S. Air Force, to be assigned to positions of importance and responsibility designated by the President, in the rank of general;

Gen. Edwin W. Rawlings, 95A (major general, Regular Air Force), U.S. Air Force, to be placed on the retired list in the grade of general;

Brig. Gen. Isaac Sewell Morriss, and sundry other officers, for temporary appointment in the Army of the United States;

Gen. Henry Irving Hodes, Army of the United States (major general, U.S. Army), to be placed on the retired list in the grade of general;

Lt. Gen. Clyde Davis Eddleman, Army of the United States (major general, U.S. Army), to be assigned to a position of importance and responsibility designated by the President, in the rank of general;

Maj. Gen. Paul DeWitt Adams, Army of the United States (brigadier general, U.S. Army), to be assigned to a position of importance and responsibility designated by the President, in the rank of lieutenant general;

Vice Adm. Robert L. Dennison, U.S. Navy, for appointment to the grade of admiral while serving for commands and other duties determined by the President;

Vice Adm. George C. Towner, Vice Adm. Hyman G. Rickover, and Rear Adm. William R. Smedberg III, U.S. Navy, for appointment as vice admirals for commands and other duties determined by the President;

Adm. James L. Holloway, Jr., U.S. Navy, for appointment to the grade of admiral on the retired list; and

Adm. Byron H. Hanlon, U.S. Navy, for appointment to the grade of vice admiral, on the retired list.

The PRESIDING OFFICER. If there be no further reports of committees, the nominations on the calendar will be stated.

FEDERAL AVIATION AGENCY—NOMINATION PASSED OVER

The Chief Clerk read the nomination of Elwood R. Quesada, of California, to be Administrator of the Federal Aviation Agency, which nomination had previously been passed over.

Mr. JOHNSON of Texas. Mr. President, by request, I ask that the nomination go over. I am informed that we shall be ready to act on the nomination some time in the middle of the week. But the Senator who is interested in this matter is not present at the moment.

The PRESIDING OFFICER. Objection being heard, the nomination will go over.

INTERNATIONAL COOPERATION ADMINISTRATION

The Chief Clerk read the nomination of James W. Riddleberger, of Virginia, to be Director of the International Cooperation Administration, in the Department of State.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

POST OFFICE DEPARTMENT

The Chief Clerk read the nomination of Rollin D. Barnard, of Colorado, to be an Assistant Postmaster General.

Mr. JOHNSON of Texas. Mr. President, I ask that that nomination go over. I have received from a Member of the Senate an objection to it. I understand that the Senator desires to confer with the distinguished chairman of the Committee on Post Office and Civil Service.

The PRESIDING OFFICER. The nomination will go over.

DIPLOMATIC AND FOREIGN SERVICE

The Chief Clerk proceeded to read sundry nominations in the Diplomatic and Foreign Service.

Mr. JOHNSON of Texas. Mr. President, I ask that these nominations be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations will be considered en bloc; and, without objection, they are confirmed.

POSTMASTERS

The Chief Clerk proceeded to read sundry nominations for postmasters.

Mr. JOHNSON of Texas. Mr. President, I ask that these nominations be considered en bloc.

The PRESIDING OFFICER. Without objection the nominations will be considered en bloc; and, without objection, they are confirmed.

Mr. JOHNSON of Texas. Mr. President, I ask that the President be notified immediately of the nominations today confirmed.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

LEGISLATIVE PROGRAM—EASTER RECESS

Mr. JOHNSON of Texas. Mr. President, I should like to make a brief announcement for the information of the Senate. Last week the policy committee met and carefully considered the bills I shall enumerate which have been reported or are about to be reported to the Senate. It is the hope of the leadership that all these bills can be considered before the Senate recesses for Easter. That will depend on committee action.

The policy committee, however, has authorized the leadership to motion up, with the approval of a majority of the Senate, the following bills, and I should like to have all Senators on notice that these bills may be motioned up:

Calendar No. 73, S. 1096, authorizing an appropriation to the National Aeronautics and Space Administration.

I am informed that bill will be brought up by motion later today, after Senators have concluded their statements, and will be handled on the floor by the Senator from Mississippi [Mr. STENNIS]. That is an authorization bill, involving some $48 million. Calendar No. 75, S. 50, the Hawaiian statehood bill.

We anticipate that we may get to that bill in the latter part of this week, perhaps Thursday. I am informed by several Senators there will be some discussion of the bill. I would not anticipate a vote before the early part of next week. If action on the bill could be completed this week, well and good, but I do not anticipate it will be. Monday is a bad day for a vote. Next Tuesday is St. Patrick's Day. Several Senators will be away. It may be that the earliest day we can complete it will be Wednesday.

We expect to have the draft bill precede the Hawaiian statehood bill. That bill is being marked up, I am informed. The Senator from Massachusetts [Mr. SALTONSTALL] is present.

Mr. SALTONSTALL. Mr. President, if the Senator will yield, the bill is in the process of being prepared for reporting. The chairman stated he understood it would be on the calendar and ready to debate on Wednesday.

Mr. JOHNSON of Texas. The hearings are available. The reports will be printed today. The committee has already reported the bill. Senators who may desire to read the report will have ample opportunity to do so. If it is

agreeable with the minority leader, we shall attempt to work out an arrangement to take up the draft bill on Wednesday, and follow it with the Hawaiian statehood bill.

The next is Calendar No. 76, S. 726, amending section 2 of the Clayton Act.

I will give the Senator from Illinois a list of these bills.

Calendar No. 52, S. 12, the educational television bill.

I have already mentioned the bill on extension of the draft.

Senate bill 722, the area redevelopment bill. I am informed the committee anticipates it will report that bill this week, but it will take a few days for the minority members to file their views, so I do not anticipate it will be called up until after the Hawaiian bill, which will be later next week.

S. 465 or S. 562, the juvenile court bill.

S. 643, relating to the collection of taxes in the District of Columbia.

S. 644, providing for the taking of a school census in the District.

S. 645, amending the Removal of Dangerous Buildings Act in the District of Columbia.

S. 745, amending the Condemnation of Unsanitary Buildings Act.

S. 4245, the life insurance tax bill.

That is a very important bill. It involves millions of dollars in revenue. I am informed the House has completed hearings, and will have the bill ready by the 16th or 17th. Shortly thereafter it will be reported. Senators interested in it will want to keep up with the hearings as they become available, at least in part. If possible, we would like to act on that bill before Easter. If it is not ready by that time, it will have to go over.

S. 1094, the International Monetary Fund and World Bank bill.

That bill is being heard by the Committee on Foreign Relations. We do not know when it will be reported, but it has a very high priority.

S. 747, relating to surplus property in Illinois.

I have to get some details on that bill from the Senator from Illinois, but I trust it is not too controversial.

S. 422, requiring prenotification of mergers.

That is an important bill, from the Committee on the Judiciary. It had been reported by the subcommittee, and the full committee sent it back for other action, but the committee expects to report the bill before Easter.

S. 505 is the labor reform bill, the Kennedy-Ervin bill.

I am informed it is hoped amendments can be considered in the committee this week, and that a report will be made by the Committee on Labor and Public Welfare at the earliest date possible.

I am not sure I have mentioned Senate Joint Resolution 41, the International Medical Research Institute bill.

I am informed the only thing holding that bill up is the testimony of the Secretary of Health, Education, and Welfare. It is anticipated he will testify in the middle of the week. We hope to get as early action on that bill as possible.

S. 226, the railroad retirement bill, has been reported by a subcommittee and will shortly be acted upon, by the full committee, I am informed.

I hear the House anticipates it will recess on the Thursday before Good Friday, be in recess the following week, and resume its duties on the following Monday. That will give Members of Congress about 10 days to visit among their constituents or attend to any other business they care to transact.

The minority leader and I have not been able to agree on those dates as yet, because we want to see how much of this proposed legislation we can get through. But we are both hopeful we can adopt a resolution that will concur in the House action. If it is at all possible, we are going to do so. We are working to that end.

Mr. President, I have a brief statement on another subject——

Mr. LANGER. Mr. President, will the Senator yield for a question?

Mr. JOHNSON of Texas. Yes.

Mr. LANGER. I have received a great many letters about when the farm bill is to be brought up for consideration. Does the majority leader have any information at all on the farm bill?

Mr. JOHNSON of Texas. I have asked the members of the committee to give thorough and prompt consideration to the farm bill, but I do not think it is in a stage now so we can predict accurately when it will be reached for consideration.

I will say that once a farm bill is reported, it will take the highest priority, and we will try to get it up for consideration as early as possible. As a result of the inquiry of the Senator, I will make appropriate inquiries of the committee members.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. DIRKSEN. Am I to assume there will be a session of the Senate every day this week?

Mr. JOHNSON of Texas. I am not sure about tomorrow. The draft bill is ready, but we would like to have Members of the Senate go over the report. I do not think it is too controversial. I may ask the Senator from Massachusetts [Mr. SALTONSTALL] if there was a divided vote in committee.

Mr. SALTONSTALL. No, Mr. President; it was a unanimous report. The report and the hearings will be ready by Wednesday, I am informed.

Mr. JOHNSON of Texas. I am not sure about tomorrow. We will know about that a little later today.

Mr. President, I am informed that the majority leader of the House has said the House Easter recess will be from the Thursday before Good Friday until a week after the following Tuesday, instead of coming back on a Monday.

Mr. BARTLETT. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. If I have any time remaining, I yield to the Senator from Alaska.

Mr. BARTLETT. I merely wanted to ask the distinguished majority leader if he will indicate at this early date whether the Senate will be in session on March 17. Many of us who are Irishmen have engagements out of town on that day.

Mr. JOHNSON of Texas. I will confer with the Senator about that matter. We had no plans not to be in session, but I am always interested in accommodating the Irish.

WHO GETS GOVERNMENT SUBSIDIES?

Mr. YOUNG of North Dakota. Mr. President——

The PRESIDING OFFICER. The Senator from North Dakota is recognized.

Mr. YOUNG of North Dakota. Mr. President, in recent months there has been far more than the usual amount of criticism of farm programs and their costs. In almost every magazine or newspaper one will find news items condemning farm subsidies and farm programs.

The costs of farm programs have increased sharply, and unnecessarily so. Farm legislation which would do more to help farmers receive fair prices than the present program does, and at much less cost, could and should be written.

However, the costs are far less than most news stories would indicate. Unfortunately, a true picture of the budget is not presented in most of these stories. This is understandable, since the Secretary of Agriculture does little himself to present an accurate picture to the public.

Because of this adverse publicity, most people believe that farmers are being highly subsidized. This has tended to create suspicion, distrust, and discord between farm and nonfarm people.

If this condition is permitted to continue, there will be a wide and bitter rift between farmers and their always good friends in the urban centers of the Nation.

The National Grange—the oldest farm organization—has rightly taken cognizance of the ever-widening fight between farm and nonfarm folks. The Grange has prepared some excellent information, from official Government records, to prove that farmers are among the least-subsidized people in our Nation.

This information deserves wide publicity. I hope all Senators will read it. It is for this reason that I ask, Mr. President, that the data prepared by the National Grange be printed in the RECORD, as a part of my remarks.

There being no objection, the data were ordered to be printed in the RECORD, as follows:

WHO GETS GOVERNMENT SUBSIDIES?

Ask the average man on the street what he thinks of Government subsidies and chances are 10-to-1 that he will tell you he is against them. Ask him who gets most Government subsidies and his answer will be farmers. Ask him if he or his business receive a subsidy and the answer is likely to be an emphatic "no."

But despite such commonly expressed opinions, the American public has been supporting an elaborate system of Government subsidies since the First Congress met in 1789. It is difficult to name a business which is not receiving some type of Government

subsidy. This average man on the street who says he is opposed to all subsidies, comes into contact with them everyday.

When he awakens in the morning, he turns on a light and immediately starts sharing the results of a subsidy provided through a fast tax writeoff plan which saves power companies billions of dollars—and which reduces his light bill accordingly.

When he goes to a breakfast of bacon and eggs, he shares the benefits of the Government's $19 million Federal meat inspection program—a program conducted by the U.S. Department of Agriculture for the sole purpose of assuring the public a safe and wholesome supply of meat.

If he has children in school, their education is subsidized by taxes paid by the childless neighbor across the street. And, if his are among the 35 million children who eat a hot lunch provided through the highly popular Government school lunch program, he receives direct benefits from another $100 million Government subsidy. If his children are in one of the 62,000 schools participating in the special school milk program, they come in for a share of still another $75 million subsidy.

When Mr. Average Man on the Street drives the family car into the filling station and tells the attendant to "fill her up," he again shares in a major Government subsidy—one brought about through a special depletion allowance tax regulation which cuts the petroleum industry's annual operation expense by about $1 billion a year.

If he makes a trip by plane, he rides at a fare made possible by a direct subsidy to airlines—and by tax supported airports and air traffic control facilities.

If he lives in a house purchased with a GI loan, he pays a lower rate of interest because Uncle Sam has agreed to bail the banker out, in case there is a default in payments.

When he sits down to read a magazine, he starts sharing a subsidy provided through the U.S. Post Office Department, a subsidy which has cut the annual cost of mailing a single publication by as much as $8,604,000.

Ready for bed, the average man on the street goes to a closet and places his trousers on a steel hanger that came from a plant built on a cost-plus basis during World War II and sold to a steel company for a song a few years later.

So, throughout the day, the man who says he is opposed to all forms of subsidy, has been sharing special services provided at the taxpayer's expense.

The following figures show the Bureau of the Budget's breakdown of current expense of aids and special services for a recent year:

	Million
CCC losses on farm price support	$184
International wheat agreement	77
Grants-in-aid (extension service, experiment stations, etc.)	60
Other USDA operations	94
Total for agriculture	463
Post Office Department in favor of business	670
Navigation aids	137
Air navigation aids	93
Ship operation subsidies	50
Other special aids to business	138
Total to business	1,041
To labor (grants to States for operating employment service and unemployment compensation programs)	200

These conditions do not justify a continuation of ineffective farm price support programs now in operation, they do show clearly that farmers have not been, and are not now, the exclusive beneficiaries of special subsidies and services supplied at the expense of U.S. taxpayers.

TOTAL USDA APPROPRIATIONS NOT A SUBSIDY TO FARMERS

Editorials labeling total USDA's expenditures as a 6½ or 7 billion dollar subsidy to farmers have become commonplace.

Many critics, in an effort to discredit farm programs they do not like are using inaccurate and misleading figures which tend to turn the public against any type of Government service to agriculture, and even against farmers themselves.

Eliminating excessive Government farm program cost, and even farm programs themselves, where they are not effective, should be the goal of every American, but we cannot—and we must not—permit the public to think of the cost of all USDA activities as a subsidy to farmers.

We must remind the public that USDA activities serving the total public include:

A. The farm commodity export program, which in 1957, cost $843 million, or about one-sixth of the total USDA appropriation for that year.

Secretary Benson has said of this program: "It is helping keep the free world free. It is an ambassador of good will. Every American can be proud of the constructive use being made of the abundance of American agriculture."

B. About half a billion dollars annually for REA loans. These are repaid with interest and repayments are over $100 million ahead of schedule.

C. A market research program: The $28 million appropriated for this program last year is financing over 600 projects, the results of which are already benefiting industry and the public as well as farmers. Studies already completed have provided:

(a) New handling methods now saving the grain trade over $1 million annually.

(b) Techniques which cut industry's cost of storing cotton by $2 million per season.

(c) Processes reducing food handling cost by $6 million annually in the city of Philadelphia alone.

D. Federal meat inspection, which cost about $19 million annually: The sole purpose of Federal meat inspection is to assure the public of a clean, wholesome supply of meat. It is, in effect, a program for policing the packing industry.

E. The brucellosis eradication program: This one cost around $22 million annually and its primary goal is public health protection.

F. The International Wheat Agreement, which has been costing about $20 million annually. This program helps provide farmers a higher price for wheat—but it also helps members of the grain trade expand their export business—and profits.

G. The universally popular school-lunch program: In terms of cash and commodities, USDA contributed around $284 million to this program last year. Several million schoolchildren shared the benefits of this program. (Among these are those whose fathers are writing editorials referring to the program as a part of the $6½ or $7 billion subsidy to farmers.)

H. The supervision and operation of 181 million acres of national forests: These are maintained and managed (by the Government) for the production of timber, regulation of streamflow, flood control, water power, irrigation, navigation, and municipal water supply—all in the interest of the public. Furthermore, over 45 million citizens took advantage of the recreational facilities of national forests last year.

USDA appropriations editorially referred to as "a subsidy to farmers," or, "the cost of the price support program," are also used to pay for the operation of rural development program, Extension Service, retirement program for some 83,000 USDA employees, Commodity Exchange Authority, and many other USDA activities, which serve the general public as well as farmers.

SUBSIDIES TO FARMERS AND OTHERS

A report issued by the House Committee on Agriculture on June 25, 1958, states that farm price support losses from 1933 to 1958, have cost taxpayers $5,173,746,788.

The House Committee on Appropriations, however, reports the following taxpayer subsidies:

Mail subsidies (10-year period, 1946–56)	$5,968,000,000
Business reconversion payments	43,262,000,000
Subsidies to maritime organizations (1938 through 1957)	3,500,000,000
Subsidies to airlines (1938 through 1957)	614,000,000

SHIP LINE SUBSIDIES

The December 12, 1958, issue of Wall Street Journal reports that subsidies to U.S. ship line operators run $120 million annually, and that, if approved, requests now before the Maritime Board will bring the total to $220 million.

The U.S. News & World Report for August 8, 1958, reports that the Government is building two new steamships for ship line operators.

One, *The America*, is to cost taxpayers $120 million; it will sell for $47 million.

The other, *The President Washington*, is to cost Uncle Sam about $80 million and it will sell for $35 million.

This is not so say that all subsidies are wrong or that they are right; it is clear proof that subsidies are not an exclusive benefit of farmers.

Effect of farmer's price upon retail costs

Cotton products	Farm value	Retail price	If farmers donated the cotton, the retail price would be—
Overalls	$0.65	$3.30	$2.65
Pajamas	.35	3.00	2.65
Broadcloth shirt	.28	3.94	3.66
Work shirt	.26	1.61	1.35
Socks	.07	.50	.43
Work trousers	.51	3.58	3.07
Housedress	.33	3.34	3.01
Yard goods (percale) per yard	.09	.51	.42
Bedspread	1.45	6.31	4.86
Sheet	.74	2.35	1.61

INFLUENCE OF FARM PRODUCTS ON INCREASED COST OF LIVING

[Price index (1947–49 equals 100)]

Nineteen hundred and fifty-seven: (a) Clothing, 105; (b) Food, 115; (c) All consumer items, 120; (d) Rent, 135; (e) Medical care, 138; (f) Hospital charges, 195; (g) All medical care, 140; (h) Physicians' services, 138; (i) Dental care, 130.

NOTE.—Food and clothing—products of the farm—up less than any other item.

RELATIONSHIP BETWEEN WHEAT AND BREAD PRICES

In 1948, farmers were getting $2.81 per bushel for wheat and consumers were paying 13.8 cents for a 1-pound loaf of bread.

By 1955, the farmer's price had dropped to $2.14 per bushel and the consumer's cost had climbed to 17.5 cents per loaf.

But by 1957, the farmer was getting only $2.00 per bushel for wheat, and the consumer was paying 18.8 cents per loaf for bread.

Thus, between 1948 and 1957 wheat prices dropped 29 percent and bread prices increased 38 percent.

FOOD A BARGAIN IN TERMS OF WAGES

One hour's pay would buy (a) 6.4 one pound loaves of bread in 1929, and 11 loaves in 1957; (b) 1.2 pounds of steak in 1929, and 2.2 pounds in 1957; (c) 7.8 pints of milk in 1929, and 16.6 pints in 1957; (d) 1 pound of butter in 1929, and 2.8 pounds in 1957; (e) 1.3 pounds of bacon in 1929, and 2.8 pounds in 1957; (f) 1.1 dozen eggs in 1929, and 3.8 dozen in 1957; (g) 17.7 pounds of potatoes in 1929, and 36.3 pounds in 1957; (h) 1.3 dozen oranges in 1929, and 3.6 dozen in 1957.

Weekly wages—beef prices (1950–58):

Between February 1950, and February 1958, the average New York retail price of a pound of beef increased from 70 cents to 74 cents.

During the same period, average weekly earnings of factory workers increased from $59.33 to $80.85.

Thus, beef prices increased 5.7 percent while weekly earnings increased 35 percent, and the amount of working time required to buy a pound of beef dropped from 30 to 19 minutes.

TRENDS IN FARM PRICE AND CONSUMER COST OF FOODS

In 1951, farmers received $20.2 billion for producing food that cost consumers $43 billion.

In 1957, farmers received $19.5 billion for producing about 11 percent more food that cost consumers $50.4 billion.

Thus, consumers paid $7.4 billion more and farmers received $700 million fewer for about 11 percent more food.

Furthermore, in the food industry during that period, corporate profits increased $700 million, labor costs $3.6 billion, transportation costs $1 billion and other business expenses $2.8 billion.

WHY FOOD PRICES RISE?

Between 1947 and 1957, the cost of the family food market basket increased $243.

Here is why:

(a) The farm value of food involved increased $3.

(b) Labor costs increased $130.

(c) Transportation costs increased $33.

(d) Other business expenses advanced $73.

(e) Charges to pay Federal income taxes were up $4.

MILK PRICES

In 1952, when producer prices were supported at 90 percent of parity, consumers were paying an average of 22.8 cents per quart for milk.

By April 1958, producer price supports had been dropped to 75 percent of parity and consumer prices had advanced to 25.3 cents per quart.

Furthermore, the April 1958 producer price was about the same as it had been a year earlier, but consumer prices had advanced from 24.6 to 25.3 cents per quart. (Even so, the return from 6½ minutes of work would buy a quart of milk, whereas 10 years earlier, it took 10 minutes.)

FARM FACTS

Here is one to think about:

A 10-percent increase in farm prices could (a) increase consumer food cost 4 percent; (b) increase net farm income 50 percent.

Here is how it figures:

Farmers receive 39 cents from each $1 spent for food. Therefore, if we increase the farmer's price by 10 percent, consumers will pay 3.9 cents more or about $1.04 for food that now cost $1 (4 percent increase).

The farmer has about 80 cents expense on each $1 of sales. In other words, if his total sales run $10,000, his expense is about $8,000 and profit $2,000.

Increase his price 10 percent and his profit increases $1,000, or 50 percent.

Thus, if no one else were to act, a 10-percent increase in farm price would increase the farmer's net income by 50 percent and food cost 4 percent.

THE FARMER'S INVESTMENT

The typical midwestern farm represents an investment of about $50,000 per worker.

That compares with about $15,000 per worker in industry.

Farmers have $3 invested in production for every $1 that is invested in the marketing of their products.

FARM EFFICIENCY

The number of persons supported by 1 farm worker was 6.9 in 1900, 10.6 in 1940, 15.9 in 1950, and 23.5 in 1958.

FARMERS ARE CUSTOMERS

Farmers and ranchers are among the biggest customers of American industry.

For example:

There are 12 million tractors, cars, and trucks on the U.S. farms. Agriculture buys more petroleum than any other industry.

Farmers provide a market for 6½ million tons of finished steel annually.

Rubber used on the farms of America would put tires on nearly 6 million automobiles annually.

Sixteen percent of the gross freight revenue is from agricultural products.

Agriculture consumes 50 million tons of chemicals each year.

Agriculture uses more electric power than Chicago, Detroit, Houston, Baltimore, and Boston combined.

CHANGE IN WHOLESALE PRICE INDEX

From June 1955 to July 1957: Farm products, up 1.1; processed foods, up 3.2; other than farm products and processed foods, up 8.7; all commodities, up 7.2.

TRENDS IN NET FARM INCOME

The $13 billion net farm income from 1958 was 20 percent above that for 1957.

However, this is 24 percent less than that for 1947; and it is also less than that for any year between 1946 and 1954.

AGRIBUSINESS

About 10 million persons actually work on the farms of America.

In the total agriculture economy, about 25 million workers are gainfully employed as follows:

(a) Six million in manufacturing and selling farm production supplies.

(b) Ten million actually on the farm.

(c) Nine million are processing and distributing farm commodities.

Thus, approximately 25 million workers, or 40 percent (approximately) of our gainfully employed, are involved in the production and distribution of food and fiber from the farms of America.

While the actual farm population has steadily declined, this total number engaged in the total agriculture economy has remained fairly stable over a long period of years.

COMPARISON OF FARM AND NONFARM INCOME

In 1957, per capita farm income was $967, while per capita nonfarm income was $2,082. ($309 of the farmers' $967 was for work done off the farm).

During that year, the hourly income for farm labor and management was 69 cents while workers in manufacturing industries received $2.07 per hour.

The above figures are for all farmers, what about the bigger and more efficient?

During 1956, farm families operating the Nation's 2,213,000 commercial farms received an average income of $5,415 while all nonfarm families, including those living on skid row and public relief, received an income of $6,900.

FARM EFFICIENCY AND FARM INCOME

Efficiency is essential to continued success in any business, but increased efficiency has not provided farmers an equitable income.

For example, between 1950 and 1958, output per farm worker increased 26 percent. During the same period, total per capita farm income dropped from $983 to $967—and per capita income for work done on the farm dropped even more—from $751 to $658.

The trouble is, of course, that increased efficiency on the farm has little influence on many off-the-farm forces which determine the economic pattern in which farmers operate.

DEATH OF FORMER SENATOR JOSEPH F. GUFFEY, OF PENNSYLVANIA

Mr. HILL. Mr. President, it was with deep regret that I learned the sad news of the death on last Friday night, of our former colleague and my good friend, Joe Guffey, of Pennsylvania.

The glory of man, says Solomon, is strength, and Joe Guffey was strong. He was strong physically, as evidenced by his long life of 88 years; strong in his steadfast loyalty to his friends; strong in his devotion to the principles of truth and justice and humanity, strong in the courage with which he fought against tremendous odds for these principles, and strong in his faith in the people and in our country.

When Joe was only 24 years old he was Secretary of the Board of Civil Service Examiners at the Pittsburgh Post Office and was the recipient of a letter from Theodore Roosevelt, the then Chairman of the U.S. Civil Service Commission, thanking him for zealous and efficient service and stating that the Commission congratulated itself upon having him as Secretary of the Board.

All of his adult life Joe Guffey was intensely interested in politics and the affairs of Government. He served two terms in the Senate from 1935 to 1947 and was the only Pennsylvania Democrat in more than 100 years to be so honored by his party and the voters of the State. In the Senate he was a fighting New Dealer who never once failed, who never lowered his arm in battle but who always pressed on and fought on for the New Deal programs that saved the Nation and led the American people out of the distress and suffering of the great depression. Two of his many accomplishments were the passage of the Guffey Coal Act and the Guffey Merchant Marine Act. He stood side by side with Franklin Roosevelt in marshaling America's strength and building the mighty forces that brought our victory in World War II.

Joe Guffey did so much for so many, but the three things that he was proudest of was the number of young men that he had helped to secure a college education, his unwavering support of Woodrow Wilson, particularly the financial support which he gave that made possible Wilson's famous trip across the country to the west coast fighting for the League of Nations, and the fact that Franklin Roosevelt received more votes from Pennsylvania than from any other State for the nomination for President in the 1932 Democratic Convention.

For nearly four decades Joe Guffey's uncle, the late Col. James M. Guffey, was Pennsylvania's leading Democrat,

but Joe Guffey broke with him to become one of the original supporters of Woodrow Wilson for President. Wilson had no stancher friend or more active supporter through the years than Joe Guffey. Not many days before his death Woodrow Wilson wrote Joe Guffey, "I often think of you and hope that you realize how much I value your generous friendship. It cheers me to learn that I may soon have the pleasure of a talk with you."

Joe Guffey and Franklin Roosevelt were coworkers for Woodrow Wilson and Joe was one of the original supporters of Franklin Roosevelt for President. In speaking of Roosevelt, Joe said, "Over a lifetime in politics our paths had steadily converged; in convention after convention and campaign after campaign we had made the same fight for the same things, until finally our efforts united in the battle for the New Deal." As Franklin Roosevelt was the gallant leader, Joe Guffey was the gallant comrade in arms.

Joe Guffey was a Democrat who served the party indefatigably and who fervently echoed the words of that dashing cavalryman of political conflict, the late beloved Pat Harrison of Mississippi—"I love my party better than anything in the world except my country."

Today we say hail and farewell to the friend, the warrior, the patriot, the statesman, the champion of the people's welfare, the great American, Joe Guffey.

To his devoted sister, Emma Guffey Miller, a great woman and an outstanding leader, and to all his family we express our deep sympathy.

THE CALIFORNIA POPPY

Mr. KUCHEL. Mr. President, champions of various forms of floral and horticultural beauty have spoken lately in this Chamber, each advocating selection of his favorite bloom as the national flower of the United States.

The mounting enthusiasm displayed by exponents of the rose, the carnation, the marigold, the corn tassel, and the bluegrass, prompts speculation that the Congress may become the setting for a botanical sweepstakes.

In that event, Mr. President, I believe sympathetic and favorable consideration should be given the utterly incomparable Golden Poppy of California. I wish to enter the bloom which has so fascinated human beings for more than two centuries that its host of designations includes "Copa de Oro" (Cup of Gold). "Land of Fire" is one of the terms used to describe a scene where it blossoms in colorful profusion.

The California poppy is the harbinger of the beauty of our State. It welcomes travelers of the 20th century just as in early days it served as a veritable beacon for seafarers who gazed in awe at rolling foothills glowing with a golden sheen.

Athough most breath-taking when seen in an eye-catching blanket as a spring flower, the ubiquitous and brilliant California poppy is so adaptable and hardy that it will be welcoming my colleagues from across the aisle in midsummer when—like the gold seekers of a century ago—they trek to the Pacific coast in search of a candidate for the Presidency of this great Nation.

I wish to alert my Democratic brethren who will attend the Democratic National Convention in 1960, to observe the grandeur of the poppy they will see blooming even in the desert as they approach Los Angeles by automobile or railroad train.

I trust that while reveling in other beauties of our State—the seashore, the mountains, the forests, and the unique animate and inanimate attractions of spectacular Hollywood—delegates and visitors to the Democratic convention will not be unmoved by the California State flower. I am certain they will understand why its incomparable coloring and satinlike sheen long have delighted lovers of nature.

It would not be inappropriate, Mr. President, to note also that California's golden appeal to Americas of the opposite political faith is reflected in our State motto as well as typified by our State flower. The inspiring Greek exclamation "Eureka"—meaning "I have found it"—historically echoes the triumphant cry of the gold hunter. According to legend, native Indians believed that the yellow metal the white man held so precious was a collection of fallen petals of the golden poppy. Considering their present bewilderment, it is not inconceivable that the delegates to the 1960 Democratic National Convention will shout with relief "Eureka" when they finally agree upon a nominee. Who knows but that one from this Chamber may be chosen?

The various exponents of other entries in our botanical sweepstakes have noted utilitarian features of their favorites as a factor to be given weight in selecting a national flower. The California poppy is no floral do-nothing such as those of which it sometimes is said "neither do they spin." On the contrary, California's Indians found its feathery foliage when boiled made nourishing food and early Spaniards extracted a hair dressing from oils derived from the plant.

The inspirational character of the golden poppy should not be overlooked. Perhaps it will be equally as uplifting to my brethren across the aisle in 1960 as it was to an Indian man and his young squaw in a lasting California legend. This touching story relates how a great drought came upon the land, followed by pestilence, famine, and intense cold. Only these two survived the rigors of arduous times. In response to their prayers, the Great Spirit sent the "Fire Flower" to drive away the cold and to fill the land with warmth and plenty.

I submit a blossom and plant of such romance and versatility, to say nothing more of its hardiness and significance, deserves the most careful consideration in the choosing of a national flower.

THE PROBLEM OF TEACHER SALARIES

Mr. MURRAY. Mr. President, since 30 other Senators and I joined in the introduction of Senate bill 2, which would provide Federal support to the States for school construction and teachers salaries, I have received many letters from all over the country pointing out the need for enactment of the bill.

I should like to quote from a letter I have received from one of the more than 200,000 public school teachers who receive less than $3,500 annually:

> In your press release you said, "The average salary of classroom teachers for 1958–59 is estimated at $4,775." Do you know what my annual teaching salary was? It was $3,492 for the year of 1957–58, and it will be the same for this school year. What are my teaching qualifications? I have an A.B. degree (and at one time I had 11 hours' work on my masters degree; that has now expired, because I could not finish the required work for my masters degree within the required time, due to my financial condition), a lifetime teaching certificate, and I am now teaching my 25th year. * * *
>
> You may say there are scholarships or fellowships available, but have you ever tried to get one? I have, but I have never gotten one. Practically all of the scholarships are for teachers of science or mathematics. Not all of the teachers can be teachers of these two courses; therefore, what about the other teachers, and how about solving the problem of keeping one's family while he is attending the college during the summer? Surely every teacher would like to continue his studies, but the married teachers have a family to support. You cannot stretch a dollar further than a dollar. What is going to happen when the older teachers have to retire, and the new teachers apply for positions in States that pay a higher wage scale? Then too, since they are new and young, they do not have the ties that a married teacher or an older teacher has. They can accept a position in a State that ranks near the top in salary scale. Then, too, are there as many preparing for the teaching profession as the schools need? Lack of an adequate salary does not interest the young boys and girls to prepare for a teaching position when they can earn a better wage in industry. You can help the public school teachers.
>
> This letter was not sponsored by an organization, but contains my personal thoughts. I hope that you will read my letter, and that you will give it thought. I thank you.

Mr. President, in my view, enactment of legislation to assist the States in building desperately needed schools and in providing a sufficient number of teachers and a decent salary for them is deserving of the highest priority.

SEVENTY-FIVE YEARS OF UNINTERRUPTED FAST MAIL SERVICE BY BURLINGTON RAILROAD BETWEEN CHICAGO AND COUNCIL BLUFFS-OMAHA

Mr. CURTIS. Mr. President, March 10, 1959, marks an occasion of historic interest involving the U.S. Post Office Department and one of the Nation's great railroads.

In the formative years of our country the transportation of the U.S. mail was of great importance and responsibility, just as it is today. By the year 1884 the volume of mail from the East destined to California and many points in the West had grown to considerable proportions. There was then railroad service to handle this mail from the East to Chicago, and also from Omaha, Nebr., westward to California. Getting this mail from Chicago to Omaha posed a problem

to postal officials that was solved when the Honorable Walter Q. Gresham, Postmaster General, and two assistants went to Chicago and completed arrangements with the Chicago, Burlington & Quincy Railroad to inaugurate a train service between Chicago and Council Bluffs-Omaha to move this eastern mail on fast, dependable schedules. The first train left Chicago the night of March 10, 1884, making possible a continuous movement of mail from the East to the Far West.

The Burlington Railroad has handled the fast mail between Chicago and Council Bluffs-Omaha ever since; and March 10, 1959 marks 75 years of uninterrupted service by the railroad to the Post Office Department. Recognition is due the Burlington on this occasion. Recognition should also be given to the vital part the railroads have had down through the years in the growth and development of our Nation.

RESOLUTIONS OF THE 14TH NATIONAL CONFERENCE ON HIGHER EDUCATION

Mr. HUMPHREY. Mr. President, on Tuesday, March 3, 1959, I had the privilege of addressing the National Conference on Higher Education in Chicago, a conference representing the top leadership of American colleges and universities in a 4-day meeting.

At the conclusion of the meeting, the conference adopted 10 conference resolutions, each of which commends itself to the attention of a broad audience.

I invite particular attention to Resolution No. 2 which commends the Congress for its action in passing the National Defense Education Act and urgently recommends that the Congress appropriate the funds authorized by the act.

This resolution also recommends that the forgiveness provisions of title 2 of the act be extended to those recipients of loans who later teach in any institution of higher learning as defined in section 103 of this act. This resolution goes on to oppose the requirement of an affidavit disclaiming belief or membership in subversive organizations on the part of individuals receiving payments or loans. In each of these recommendations, I strongly concur.

Resolution No. 5 calls attention to the continued need to provide financial assistance for talented students, and supports a program of additional scholarships, fellowships, grants-in-aid and loan assistance to those with ability but with limited financial means. I invite attention to the fact that I have introduced legislation which would provide 46,000 scholarships for talented students, with the size of the stipend dependent on need.

I also commend Resolution No. 8 which urges that leaders in higher education do all in their power at the local, State, and National levels to provide equality of educational opportunity without discrimination because of race, creed, or sex. Such a vigorous statement of belief and intention by this distinguished conference cannot help but have far-reaching consequences in our educational institutions.

I am very pleased indeed to note that Resolution No. 9 of the 10 resolutions specifically commends the idea of an international education development fund which I proposed for the first time at the conference on March 3. The association urges that educators and other interested citizens give serious consideration and support to the objectives of this proposal.

I intend shortly to present to the Senate a specific legislative proposal for such a foundation, and at the moment I am conferring with interested groups in higher education in the drafting of this important legislation.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD the entire preamble and text of the resolutions adopted by the participants in the 14th National Conference on Higher Education at Chicago, March 3, 1959.

There being no objection, the preamble and resolutions were ordered to be printed in the RECORD, as follows:

RESOLUTIONS ADOPTED BY PARTICIPANTS IN THE 14TH NATIONAL CONFERENCE ON HIGHER EDUCATION

PREAMBLE

Higher education in 1959 finds itself in a race against time. This is a race to maintain national defense, foster international understanding and cooperation, and find the perspectives necessary to meet the many needs of curriculum, facilities, staffs, and students which colleges and universities will face in the future.

Our national survival depends on the full development of all intellectual resources. Well-educated persons are needed in all fields of endeavor. Only an informed, competent citizenry can possibly deal with the complex problems of the space age. Higher education has the awesome responsibility to educate specialists and citizens, soldiers and civilians, lighting their paths toward learning and wisdom. Higher education is a necessity to offset the forces of fusion and fission which threaten to destroy our world. The ultimate defense of our society rests on the educated minds and informed understanding of a free people.

Higher education has a responsibility not only to help maintain national defense but also to help foster international sanity. Never before has need for improved communications, for mutual understanding, for cultural interchange among peoples been so great. It is higher education's sober responsibility to help lead Americans out of the provincialism of the present into an awareness of the needs, concerns, interests, and perspectives of the world community of which we are a part.

America's institutions of higher learning have achieved much in the past. We call upon them to strive for greater achievements in the future. We urge them to extend educational opportunities, and to continue to seek excellence in all aspects of their programs. We urge them to continue their valuable experimentation with courses of study and methods of teaching.

Responding to the threefold challenge is no easy task. To win the race against time means unparalleled accomplishment. To lose it means disaster. This America cannot afford. This effort will call for increased expenditure of time, thought, and energy on the part of educators and of increased financial support on the part of the public.

As members of the 14th National Conference on Higher Education we call upon educators to lead in imparting that vision and understanding which are essential to the perpetuation of our free society.

CONFERENCE RESOLUTIONS

1. Higher education and national defense: The 14th National Conference on Higher Education recognizes that colleges and universities must and will continue to respond to the necessity of maintaining and increasing the intellectual strength and broad competence required for national survival. The Federal Government, in executing its responsibilities for defense, must recognize that enduring strength is built from many talents, and that we must be prepared to engage in a conflict of ideas as well as a competition for technical supremacy.

2. The National Defense Education Act:

(a) The 14th National Conference on Higher Education commends the Congress of the United States for its action in passing the National Defense Education Act and urgently recommends that the Congress appropriate the funds authorized by the act, and adequate funds for its administration by the Office of Education. We also commend the Office of Education for its efforts under adverse circumstances to implement this act.

(b) We recommend that the forgiveness provisions of title II of the National Defense Education Act be extended to those recipients of loans who later teach in any institution of higher learning as defined in section 103 of this act.

(c) The 14th National Conference on Higher Education opposes the requirement of an affidavit disclaiming belief or membership in subversive organizations on the part of individuals receiving payments or loans, because we believe in equality of treatment with respect to Federal assistance and object to the singling out of students receiving this aid as a special group to demand expressions of loyalty from them. We, therefore, recommend amendment of section 1001(f) of the National Defense Education Act so as to remove this requirement.

3. The college housing loan program: We commend the Senate of the United States for acting promptly to increase the funds available for Federal college housing loans and for extending the program to include loans for construction of academic facilities. The 14th National Conference on Higher Education urges the Congress to adopt this legislation so that higher institutions may have the benefit of low-cost loans for construction. The conference further urges that the professional services of the U.S. Office of Education be more directly involved than at present in the administration of the college construction loan program.

4. ROTC facilities: The 14th National Conference on Higher Education urges the Congress to establish a program of Federal participation in meeting construction and maintenance costs of physical plant facilities used for ROTC programs.

5. Financial assistance to talented youth: The 14th National Conference on Higher Education calls attention to the continued need to provide financial assistance for talented students. It firmly believes that the Federal and State Governments as well as private agencies can and must provide additional scholarships, fellowships, grants-in-aid and loan assistance so that those with ability but with limited financial means may secure a higher education. Such assistance should be available to those entering any field of study. Furthermore, the size of the stipend should be related to the individual's financial need.

6. Recruitment of college teachers: The 14th National Conference on Higher Education recognizes the critical need for qualified college teachers now and in the years ahead. We encourage colleges and universities granting higher degrees to develop well-defined programs preparing students for college teaching. We encourage the coun-

seling of promising students into these programs. We bespeak the cooperation of Federal and State Governments, as well as foundations and other agencies, to provide financial and other supports for prospective college teachers.

7. Experimentation in higher education: The 14th National Conference on Higher Education commends colleges and universities for their experimentation in curricula, teaching, student selection, and use of facilities. We urge that in order to meet the demands they face, colleges and universities experiment constantly with better ways of achieving their objectives, evaluate, act on and publicize their results. We also urge that foundations and other donors continue and expand their generous aid to educational experimentation.

8. Equality of opportunity in educational institutions: In keeping with our democratic ideal of equality of opportunity, and mindful of the requirements of national security and survival, the 14th National Conference on Higher Education urges that leaders in higher education do all in their power, at the local, State, and National levels, to provide equality of educational opportunity without discrimination because of race, creed, or sex.

We commend those individuals and agencies whose leadership and example have contributed toward the achievement of equal educational opportunity by eliminating racial segregation in educational institutions. Since we believe that the public schools are a bulwark of a democratic nation, we deplore the closing of public schools as an alternative to complying with the decisions of the courts. We urge individuals, as well as public and private agencies, to continue their efforts toward the elimination of racial segregation from educational institutions and organizations.

9. International educational development fund: The 14th National Conference on Higher Education commends the idea of an international educational development fund, as presented by Senator HUBERT H. HUMPHREY on March 3, 1959, to this conference, and urges that educators and other interested citizens give serious consideration and support to the objectives of his proposal.

10. Appreciation: The 14th National Conference on Higher Education expresses appreciation to President Russell Cooper and the executive committee, to Dr. Leland Medsker and his planning committee, to Dr. G. Kerry Smith and to the hard-working staff of the association for providing leadership in American higher education, to the principal speakers and conference leaders for a better understanding of basic issues; to the Varsity Glee Club of Purdue University, to the Congress Hotel and the city of Chicago for cordial hospitality.

We express appreciation to the various mediums of communication for their objective and thorough coverage of the meetings, and to all who helped make this conference an outstanding success.

Resolutions Committee: Charles C. Cole, Jr., chairman; Robert G. Bone; T. W. Cole; Glenn Kendall; William McGlothlin; Jerome J. Marchetti, S. J.; Peter Masiko, Jr.; Harrison Sasscer, consultant.

RUMANIAN FREEDOM AND THE BERLIN CRISIS

Mr. DODD. Mr. President, as we approach new negotiations with Soviet Russia, it is well to remember an anniversary that passed almost unnoticed on March 6.

On the 6th of March 1945, 3 weeks after the Yalta Declaration, a Soviet Communist puppet government was installed in Bucharest by the famous Vyshinski diktat. The Red Army had already disarmed the police force, occupied the government buildings and was patrolling the streets with tanks. Behind Vishinsky's arrogance and violence were the guns of Marshal Malinovski. While Rumania was being occupied by the Red Army, 19 Rumanian divisions were fighting alongside the Allies in Hungary and Czechoslovakia.

This puppet government was recognized in January 1946 by the United States and, despite the bloody and fraudulent elections conducted by the Communists in November 1946, the United States signed a peace treaty with them on February 10, 1947. This treaty has been constantly and systematically violated by the stooge government in Bucharest. The human rights and political liberties of the Rumanian people have been absolutely destroyed. The military provisions of the treaty have been cynically infringed and the country transformed by the Soviet agents into a Russian base directed against the West. Notwithstanding, the Bucharest government was admitted to the United Nations, December 1955, by means of the famous package deal.

Since the Hungarian uprising the Russians have tightened their control on Rumania. A new wave of terror and persecution is reported from the country. Arrests, deportations and the whole gamut of police state abuses are mounting. Economic exploitation has greatly impoverished a country which was previously considered as the granary of Europe and which possessed the most important deposits of oil on the Continent outside Russia.

The Rumanian question is a part, although not in the immediate forefront, of the complex issue raised by the Berlin crisis. By the force of circumstances Berlin has become the beacon of freedom in a sea of expanding Soviet slavery. The real background of the Berlin issue is not merely the German problem. It is the whole area of Central and Eastern Europe. The Russians are working to confuse the real positions in any future negotiation on Europe by the imposition of the Soviet puppet governments of Poland and Czechoslovakia at the conference table. Thus they reckon to take out of the hands of the United States the trump card of a counterattack on the issue of the Soviet domination of Central and East Europe.

While I am on this subject, I was pleased to hear and I am grateful for the remarks of the distinguished Senator from Kentucky [Mr. COOPER], in which he specifically exempted me, the able senior Senator from New York, and other Senators from the category concerning which he spoke, and having to do with certain speeches on the floor of the Senate about the Berlin situation and the world situation.

When I spoke on this floor a week and more ago I had a very specific and limited purpose in mind. I spoke because I truly believed that there was apathy and confusion abroad in this land with respect to this critical Berlin situation. I wished to give an alarm; and I hope I did. I was not trying to point out any deficiency in our military defenses, because I am not specially informed on that subject. I am not a military man. But I realize that there are those among us who are informed. I believe they should speak up. We should have the benefit of their informed judgment. Now I think there has been a change in the last 2 weeks. I believe that Members of the Senate who have spoken—and there have been many—have done a real service to the country, and that we have achieved a degree of national unity, cleared up some confusion, encouraged our friends, and forewarned our enemies.

There was a good meeting at the White House on Friday; and there have been many expressions of unity on both sides of the aisle. Every foreign policy statement from spokesmen of their party in recent days has reflected a clear resolve to stand firm in Berlin. Now we are partially over that hill, it seems to me. But I would not have my colleagues, or those beyond these walls, understand me as saying that everything is now all right. There are many grave problems which still plague us. There does remain a serious need for doing all that can be done in the next 3 months to prepare our economy and military defense for whatever may lie ahead.

The administration and Congress must be ready with standby programs of economic controls, in case they are needed.

I do not know why the administration does not want standby controls. Certain disciplines are absolutely necessary at a time of grave national crisis. I hope my colleagues will think about this problem and speak up, and do what they can to urge that controls be placed on a standby basis through the action of Congress.

So we have more to do than to unite and stand firm on Berlin. There is other work to do. Adequate stockpiles of essential materials must be ready. Our civilian defense program needs immediate attention. Scheduled reductions in military strength must be postponed. Whatever can be done in so short a period to strengthen our Strategic Air Command must be done. Plans for the activating of Reserve units must be in complete readiness. Our military policy is based upon the assumption that we could destroy the Soviet Union if they attacked us and that Kremlin knowledge of this will prevent any such attack.

The success of this policy depends upon Soviet awareness of free world unity and military strength and it is important that in coming weeks we take every step necessary to make it crystal clear to the Kremlin that we have this unity and this strength. Fearful and awful as the prospect is, the American people have made up their minds that they are faced with a decision which involves a choice between freedom or slavery. We have chosen freedom.

Let the Communist slave masters take note. May they recall our past record when confronted by a similar situation.

ELEVATION OF METROPOLITAN JAMES A. COUCOUZES AS GREEK ORTHODOX ARCHBISHOP OF NORTH AND SOUTH AMERICA

Mr. KEFAUVER. Mr. President——

Mr. McNAMARA. Mr. President——

The PRESIDING OFFICER. The Chair recognizes the Senator from Tennessee. The Chair will endeavor to be fair in recognizing Senators, and will alternate recognitions from both sides of the aisle.

Mr. McNAMARA. Mr. President, in order to be entirely fair, the recognitions should be on the basis of 2 to 1. There are approximately 60 Members on this side, and 30 on the other side of the aisle. Let us not carry fairness too far.

The PRESIDING OFFICER. The Chair will take that into consideration.

Mr. KEFAUVER. Mr. President, church and lay leaders from all corners of the Nation are celebrating the election of Archbishop James A. Coucouzes as spiritual leader for the more than 6 million Greek Orthodox in North and South America.

Archbishop Coucouzes is the first American citizen ever to be entrusted with the task of guiding communicants in this hemisphere.

The new archbishop obtained his citizenship during his 12 years of service as dean of the Boston Cathedral of the Annunciation. He will assume his new duties in New York and thus carry on the fine spiritual work of the late Archbishop Michael.

Archbishop Coucouzes is a dedicated and devoted church leader. He is well qualified and has the experience, wisdom, and maturity to fill this great post for his church.

The Deacon James Coucouzes was ordained to the priesthood at Holy Trinity Church, Lowell, Mass., less than 20 years ago. A particularly astute student, he earned his master's degree in sacred theology from Harvard Divinity School in 1945 during his deanship at the cathedral. He also attended Boston University School of Theology.

During his Boston service, he was a member of the mixed council of the Church-Laity Congress of the church. He was active in promoting the GOYA movement and a spiritual adviser to Philoptohos and fraternal groups.

For a year prior to his elevation to a bishopric, the then Father Coucouzes served as vicar general of diocese III, including New England and eastern Canada. In December 1954 the then cathedral dean was named dean of the theology school.

Just 4 years ago he was elevated to a bishopric. Recently he has been stationed as personal representative of the Ecumenical Patriarch to the World Council of Churches in Geneva, Switzerland.

The new archbishop is one of the outstanding spiritual leaders of our generation and his unanimous election by the Holy Synod should serve as an inspiration to all of us.

THE PURCHASE OF A GENERATOR FOR THE TENNESSEE VALLEY AUTHORITY'S COLBERT STEAM PLANT

Mr. KEFAUVER. Mr. President, a considerable blanket of fog has been generated around the recent purchase of a huge generator for the Tennessee Valley Authority's Colbert steamplant near Tuscumbia, Ala.

I wish to attempt to cut through this fog and draw a clear picture of what I feel to be the indisputable, hard facts about this contract—as painful as they may be to some.

The TVA has been under fire directed by two large firms in the United States because the contract for this 500,000-kilowatt turbogenerator was awarded to a British firm.

Nobody regrets more than I that any American firm or its employees should lose work such as this, but the truth frequently hurts.

I believe I know why these two American firms—Westinghouse and General Electric—were unable to compete for this contract.

GE and Westinghouse are two of only three American firms which manufacture large turbogenerators. Since 1951, the prices charged by these three firms for such equipment have increased by more than 50 percent. In the same period, the wholesale price of all commodities has increased only about 5 percent.

Westinghouse and GE make other products, too, including refrigerators, air conditioners, and other appliances. Prices on these products have, in many instances, decreased over the same period.

There are many firms making these appliances. GE and Westinghouse have been forced to compete on a price basis in these fields. It would be interesting to know whether GE and Westinghouse, because of their bigness, would actually be able to meet this appliance price competition if they did not have monopoly profits from other ventures, such as turbogenerators.

In the turbogenerator field, little or no price competition exists in this country. Thus the price goes right through the roof and keeps on going. It is the same story that we have been hearing in the big steel and automobile industry hearings before the Antitrust and Monopoly Subcommittee. It is the story of administered prices. Where big business gains an exclusive grip on the market, the price goes up, up, up.

In the case of the TVA contract for the turbogenerator, we can see one end result of the evil—American firms lose out on the business of our own American TVA.

I have been getting mail from stockholders and employees of these two big outfits. Protect our investment, say the stockholders. Save our jobs, say the employees. Buy American, cry GE and Westinghouse.

Should the TVA pay a premium of $6 million to answer these letters and pleas? Should the subscribers to TVA electric power, individual and industry alike, pay the price in increased rates to answer these cries for help?

Or should General Electric and Westinghouse take a real, hard look at their pricing structure and profits and ask themselves this question: "Why can't we make turbogenerators that compete in price with a British firm when we can make air conditioners that meet the prices of our competitors here at home?"

I think GE and Westinghouse, and the exclusive monopoly they share, need to take this hard look before they talk of TVA hurting GE and Westinghouse stockholders and employees.

TVA had reason to invite bids from abroad. It has been disturbed for some time by the skyrocketing price of turbogenerators. GE and Westinghouse have sold millions of dollars worth of such equipment to TVA. I think if they want to continue to sell they will have to find a way to compete.

When the bids were opened on the Colbert plant turbogenerators, and before they were evaluated for comparison on such points as guaranteed efficiency of machine, differences in escalation of prices, and willingness of the manufacturer to pay damages for late delivery, GE and Westinghouse were only $70,000 apart on their bids and almost $6 million higher than the British firm, C. A. Parsons & Co., Ltd.

In the evaluation, the Parsons price was firm while the GE and Westinghouse bids were subject to escalation clauses. After adjustment, the bids compared as follows: Parsons, $13,140,700; Westinghouse, $19,453,725; GE, $19,673,780.

Westinghouse and GE were then more than $6 million higher than Parsons. Moreover, only Parsons was agreeable to payment of damages for late delivery. GE and Westinghouse took specific exception to this provision.

And what is more, Parsons was still $6 million lower than GE and Westinghouse after including in the Parsons bid about $4 million in Buy American and import duty requirements to protect domestic bidders.

The import duty figure of $1.5 million alone was enough to protect the U.S. manufacturers against differences in labor costs.

Parsons enjoy a good record of delivery on schedule and backs it up with a penalty clause. It maintains service facilities and personnel in Canada, as favorably located as those of the domestic firms' facilities.

Parsons' reputation and record of high standards of quality and efficiency were investigated fully by TVA before the firm was invited to bid. And TVA is required by law to accept the lowest bid.

Now, if Parsons can make, deliver and back up a turbogenerator, including import duty and Buy American provisions, for $6 million less than GE and Westinghouse can, who shall TVA buy from?

The answer seems simple and sad.

And the question that follows automatically has an even more painful clarity. It is: "Why can GE and Westinghouse not come anywhere close to competing?"

Only GE and Westinghouse can provide the answer—to TVA, to the American consumer, to their own stockholders and employees.

GE and Westinghouse might try something like this: "As long as our prices are administered in this atmosphere of monopoly, we just will not get the business. When we face up to the fact that realistic price competition is still a factor to be reckoned with, even in the turbogenerator field, we will find a way to compete—and that means we will still make a reasonable profit, we will still give our stockholders a fair return on their investment, and we will still pay our employees a fair wage."

I hope these remarks have helped cut through the fog that has been thrown around the Colbert steamplant turbogenerator matter. And I hope, also, that I have been able to throw some light on the key role administered prices have played in this.

It is an unusually clear demonstration of how monopoly eliminates price competition and pushes prices ruthlessly upward. Only in this instance, a British firm put the spotlight on this unhealthy condition in our economy and underscored the primary part it plays in our continuing inflationary spiral.

In support of my remarks I introduce for the RECORD the full statement of TVA concerning the award of the Colbert steamplant turbogenerator contract. It is an unanswerable defense of the contract award, as painful as this truth may be.

I ask unanimous consent that the statement may be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY TVA ON PURCHASE OF TURBOGENERATOR FROM C. A. PARSONS & CO., LTD., ENGLAND

On February 6, 1959, TVA purchased a 500,000 kilowatt turbogenerator, to be installed at the Colbert steamplant near Tuscumbia, Ala., from C. A. Parsons & Co., Ltd., of England. The delivered price will be $12,095,800.

The purchase, made under competitive bidding procedures required by the TVA Act, was based on the following considerations:

1. The evaluated Parsons bid was more than $6 million lower than the evaluated bids of the only other bidders—Westinghouse Electric Corp. and General Electric Co.—both American firms.

2. Full compliance with the provisions of the Buy American Act and established national policy on foreign purchases.

3. A determination that Parsons is qualified, technically competent, and adequately equipped to build and deliver the turbogenerator on schedule.

4. Assurance that Parsons is able to provide promptly, any repair service and replacement parts which may be necessary during the life of the machine.

Prior to the final action by the TVA Board in purchasing the turbogenerator from C. A. Parsons, all the factors involved, including such considerations as national security, were subjected to a detailed and intensive study.

Some subsequent public comment indicates a lack of understanding or of facts on the matter. This statement has been prepared to provide those facts.

WHY DID TVA SEEK FOREIGN BIDS?

For some time TVA has been disturbed by the rising prices of turbogenerators. There are only three American firms which manufacture large turbogenerators. Since 1951 the prices charged by these manufacturers for such equipment have increased by more than 50 percent, while the average wholesale price of all commodities has increased only about 5 percent.

It was this history of price increases by the only United States suppliers which led TVA to invite bids from qualified foreign manufacturers as well as domestic ones.

WHO WAS INVITED TO BID?

TVA invited bids from the three United States manufacturers and the two leading British manufacturers of large steampower generating equipment. Bids were received from three companies: the Westinghouse Corp., the General Electric Co., and C. A. Parsons & Co., Ltd.

In its invitation to bidders TVA set forth certain factors that would be taken into account in comparing bids. These included differences in guaranteed efficiency of the machine, differences in escalation of prices, and willingness of the manufacturer to pay specified damages if the machine were not delivered on time.

COMPARISON OF THE BIDS

Before reflecting the evaluation factors just referred to, the base bids received were as follows:

Parsons (including duty)	$12,095,800
General Electric	17,563,000
Westinghouse	17,633,000

The Parsons price was firm, while the bids from General Electric and Westinghouse were subject to escalation clauses. After adjustments for efficiency and escalation, the evaluated bids compared as follows:

Parsons	$13,140,700
Westinghouse	19,453,725
General Electric	19,673,780

The evaluated General Electric and Westinghouse bids were thus nearly 50 percent higher than the Parsons bid.

Moreover, of the three bidders only Parsons indicated a willingness to accept a contract containing the provision specified in the invitation for payment of damages in the event of delay in delivery. General Electric and Westinghouse both took specific exception to the provision. This exception constituted a material deviation from the terms of the invitation which rendered their bids unresponsive and unacceptable even if one of them had been a low bidder.

This provision for liquidated damages is a very important one. A number of the large generating units which TVA has bought in recent years have been delivered late, and TVA has had to incure substantial additional costs as a result. Inclusion of a liquidated damages provision in the final contract gives TVA added assurance that Parsons will give its full attention to making delivery within the time necessary to meet TVA's requirements as specified in the invitation.

NATIONAL POLICY ON THE ACCEPTANCE OF FOREIGN BIDS BY FEDERAL AGENCIES

National policy governing purchases of foreign equipment has been established by the Congress in the Buy American Act and by the President, in Executive Order 10582 of December 17, 1954, prescribing the manner in which all Federal agencies shall apply the Buy American Act. The act provides generally for purchases of domestic articles, materials, and supplies, unless their cost is determined to be unreasonable as compared to foreign goods. The Executive order provides that ordinarily the offered prices of materials of domestic origin shall be deemed to be unreasonable and purchase shall be made from competing foreign source if the domestic price exceeds the amount of a foreign bid by more than 6 percent. If the low domestic bidder is in an area of substantial unemployment, a 12-percent differential is used in accordance with a recommendation of the Council on Foreign Economic Policy.

TVA'S INVITATION FAVORED DOMESTIC MANUFACTURERS

TVA stated in its invitation for bids on the 500,000 kilowatt turbogenerator that it would accept the lowest bid from a U.S. manufacturer if it did not exceed the lowest foreign bid by more than 20 percent. (Such an increase in the price advantage for domestic manufacturers is permitted under the Executive order if the Government agency involved determines that it has sufficient reason to increase the differential. If, under these conditions, purchase is made from a domestic manufacturer the agency is required to submit a special report on the matter to the President.)

This price advantage given to U.S. manufacturers was in addition to the import duty which would have to be paid by the foreign manufacturer.

The import duty which will be paid by Parsons amounts to about $1.5 million. The additional 20 percent advantage provided for domestic manufacturers, based on Parsons' evaluated bid, was over $2.6 million. Therefore, the total price advantage enjoyed by domestic bidders as a result of these two items alone amounted to over $4 million. Further, foreign bidders had other added costs for such items as transoccan shipping and marine insurance.

DO LOW FOREIGN WAGES ACCOUNT FOR THE DIFFERENCE IN BIDS?

One explanation which has been offered for the inability of American manufacturers to meet the foreign price competition in this field, is the difference in wages paid in this country and abroad.

Wages paid to workers in the electrical industry in England are lower than those paid by domestic manufacturers. Westinghouse says that British labor receives only 37 percent of the hourly rate paid to the electrical workers here. General Electric has suggested that the ratio is 40 percent.

Westinghouse has told TVA that 1,080,000 man-hours of work in its shops would have been involved in building the turbogenerator. General Electric is quoted as saying that 600 man-years of work, which is closely comparable to the Westinghouse man-hour estimate, would have been required. The Bureau of Labor Statistics reports the average hourly wage rate in the electrical manufacturing industry for October 1958 was $2.28.

The foregoing figures suggest that differences in labor costs would be in the neighborhood of $1.5 million, and this does not allow for any greater manufacturing efficiency in the larger U.S. plants of General Electric and Westinghouse. This computed difference is less than half the price advantage provided for domestic manufacturers. In fact, it appears that the import duty is adequate to protect U.S. turbogenerator manufacturers against differences in labor costs.

THE COMPETENCE OF C. A. PARSONS & CO., LTD.

C. A. Parsons was a pioneer in steam turbines. Outside of the United States the Parsons Co. is the largest manufacturer of such equipment in the free world. Half of the turbogenerators it builds are exported. For example, it has built most of the steam power generating equipment that is operating in Canada. It has an English order for a 550,000-kilowatt unit. In fact, Parsons & Co. and General Electric are the only two companies in the world

known to be building units as large as 500,000 kilowatts, General Electric now being engaged in building one such unit, which TVA ordered from it in the fall of 1957.

Before any supplier, whether domestic or foreign, is invited to submit bids on large power equipment, TVA first satisfies itself as to the company's ability to meet high standards of quality and efficiency. Further, TVA must be satisfied with the ability of the supplier to provide repairs and replacement parts with reasonable speed. In the case of the Parsons Co., as with other approved bidders, TVA appraised these qualifications by an inspection of the company's facilities and detailed discussions with its responsible officials and engineers. TVA has determined to its full satisfaction that this British firm has the plant, equipment, skills, and manpower necessary to build and service an efficient and reliable machine. Further, Parsons maintains service facilities and personnel in Canada, which are as favorably located as the corresponding facilities of the U.S. firms.

NATIONAL SECURITY

All the foregoing has a bearing on the effect on national security of this purchase from a British firm. The Parsons Co. has a good record of delivery on schedule, and its guarantee is backed up by a penalty clause in the contract. There are similar assurances that the machine will be highly efficient.

Fears that competition by foreign firms will result in all or most large turbogenerators being manufactured abroad, thereby eliminating American productive capacity as a supply source in defense emergencies, are unfounded.

It appears that the total capacity in the entire free world for producing such equipment is so limited that all of it, both in Europe and the United States, will normally be required to supply the large turbogenerators necessary to meet the rapidly increasing demands of this Nation and others for electric energy.

In the event of total war, the problem of repair or replacement of generating units would be about the same whether they had been manufactured domestically or abroad. Any realistic contemplation of such a war must assume that American turbogenerator manufacturing plants could be destroyed or damaged in the same attack which might damage or destroy the unit installed in the Colbert steamplant. Early repair or replacement would seem unlikely no matter where the unit had been built.

In event of a less extensive attack or acts of sabotage, it should be recognized that generating units manufactured by all the major American suppliers are incorporated in the TVA system. Widespread damage to the system could result in heavy demands on all these suppliers, both by TVA and by utilities in other sections of the country. Addition of the Parsons unit to the TVA system increases the number of suppliers who can be called on in the event of such an emergency and thereby reduces the risk of delay in getting maximum capacity back into service.

Economical operation of the TVA power system, to which the saving of more than $6 million contributes, is important in the national defense budget, since half of the power from the TVA system goes to Federal defense installations. Introduction of real price competition into the turbogenerator manufacturing field makes a contribution to combating inflation. At the same time, purchase of the unit from Parsons strengthens the economic position of our ally, Great Britain.

For national security, strong allies, a healthy world trade, essential industries strengthened by stimulation of competition, are likely to be at least as important as the location of specific powerplant repair facilities. These basic purposes are served by the award of the contract under discussion to Parsons of England.

IMPACT ON EMPLOYMENT AND NATIONAL ECONOMY

TVA would regret any real net loss of employment for American workers from its purchase of an English turbogenerator. However, it seems more likely that there will be a net benefit to American labor. TVA will make payment in dollars for its purchase from Parsons. It can reasonably be assumed that these dollars will be used to finance British purchases of other goods either in the United States or in third countries which will in turn use the dollars to make purchases in the United States. Those dollars can be expected to create and pay for as many man-hours of work in the United States as would have resulted from domestic manufacture of the turbogenerator.

In addition, the saving of over $6 million affects TVA's ability to provide low-cost power to farms, homes, and industrial concerns within its power service area. The availability of ample power at the lowest cost stimulates industrial employment, and enables the home consumers of this power to continue to provide the best market in the Nation for electrical appliances. The money TVA invests in generating equipment is exceeded by the purchases by consumers of TVA power of electrical appliances and equipment—more than $2 billion worth since the end of World War II—of which General Electric and Westinghouse are leading suppliers.

THE TURBOGENERATOR WILL BE PAID FOR BY THE USERS OF TVA POWER

Contrary to the impression that prevails in some quarters, the money to be spent for the turbogenerator will not come from taxes. The cost will be met from power revenues paid by the users of TVA power.

THE COMMUTER TRANSPORTATION SITUATION IN URBAN AREAS

Mr. KEATING. Mr. President, I have joined in sponsoring the measure introduced by the distinguished Senator from New Jersey, because I feel strongly that we must focus attention on a problem which is becoming increasingly acute; namely, the transportation situation which faces the mass of commuters in our urban areas. It cannot be stated categorically that the provisions of this legislation are effective or complete solutions to the commuter problem. I do say that the Federal Government, the States, and localities, and the railroads must cooperate in this area lest many of our citizens be deprived of the transportation so vital to their livelihood.

In passing the Transportation Act of 1958, the Congress demonstrated its concern over the financial plight of the Nation's railroads. And let me add that I have not wavered in my desire to restore this industry, so important to our national security and economic well-being, to a position of health and vitality. That is the reason for my sponsorship with Senator JAVITS and Senator SALTONSTALL, of legislation to permit railroad corporations to take full advantage of tax relief measures enacted or granted by the States and their political subdivisions. At the same time, we cannot in all good conscience, overlook the needs of the commuting public.

I am fully aware that the great measure of passenger traffic losses sustained by the railroads is due to urban or interurban commuting service, particularly in the Northeast, and that many of the factors involved are subject to the control of State and local government. Yet, I do not believe it was the intent of the Congress, in approving the Transportation Act of 1958, to permit undue discontinuance of commuter service before needed solutions are found and put into operation. In this connection, I commend the Interstate and Foreign Commerce Committee for the study it is undertaking, which includes consideration of "the kind and the amount of railroad passenger service necessary to serve the public and to provide for the national defense." I therefore urge the committee, in recognition of this problem, also to take emergency action in order to alleviate the serious problem with respect to the discontinuance of commuter service.

Mr. President, I have received a telegram from the chairman of the New York State Public Service Commission outlining the views of the State of New York on this problem.

I ask unanimous consent to have the text of the telegram printed in the RECORD at this point.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

The Honorable KENNETH B. KEATING,
Senate Office Building,
Washington, D.C.:

Congressional reevaluation of section 13a of the Interstate Commerce Act, as added by the Transportation Act of 1958, is more than called for. The New York Public Service Commission's recent reports to the Governor, the legislature, and the people of this State (January 26, 1959) pertaining to the Railroad industry, set forth the case for "revision of a misguided national transportation policy which would appear to be bent deliberately toward the destruction not the preservation of the country's railroad industry in general and the passenger service portion thereof in particular" (p. 40). In this respect, the commission had particular reference to the passenger discontinuance authorizations conferred upon the railroads by the Transportation Act of 1958 (p. 16, 31–33) as follows:

"At the moment, it would appear that by action of the last Congress, the railroads (under no restraint to initiate discontinuance action) and the Interstate Commerce Commission (severely over-subscribed in any effort to defer it) together hold in their hands exclusively, the key to the preservation of all rail passenger service in this State and country.

"That, we submit, is an awesome power to be exercised and an awesome responsibility to be discharged, both with marked caution. If such does not prove to be the experience, any State and local governmental assistance which might conceivably be extended to the industry pales into insignificance and per force becomes the essence of futility." (33).

As you know, at Governor Rockefeller's instigation, we in New York are moving with dispatch to carry out the recommendations of the report and other suggestions for State and local governmental assistance to preserve vitally necessary rail passenger service here. Any action which you, Senator JAVITS, and other New York congressional representatives may initiate to prevent the disappearance of those services before the full impact of the State's efforts can be realized,

will be a great contribution to the public welfare. Under section 13a, as interpreted and applied by the Interstate Commerce Commission and the courts, the sudden termination of much of our essential rail service—including commuter service—may be accomplished at the whim of the industry and without opportunity for presentation or adjudication of the public interest in the matter.

That, I submit, is not a healthy situation of affairs under any circumstances.

JAMES A. LUNDY,
Chairman, New York Public Service Commission.

ANNIVERSARY OF THE ENSLAVEMENT OF RUMANIA

Mr. KEATING. Mr. President, 14 years have passed since the installation of a Communist dictatorship in Rumania. It was on March 6, 1945, that the Russians, in violation of the Yalta agreements—and, indeed, almost before the ink was dry on the documents—established their domination over Rumania.

As in the case of other nations behind the Iron Curtain, the Russian occupation has brought with it a ruthless exploitation of the land and stern repression of all who would oppose the dictates of the men in the Kremlin. Yet, the spirit of freedom continues to burn bright in the hearts and minds of the people of noble Rumania. They continue, through acts of sabotage and other means of silent resistance, to oppose their Communist overlords.

We in the free world must, by all the means at our command, assure these brave people behind the Iron Curtain that they are not forgotten. We must hope and pray for their liberation.

A part of this great effort demands that we remain strong militarily, and that we stand firm in the face of Russian attempts to divide the free world in its opposition to the international Communist conspiracy. The people of Rumania know that the only language the Soviets understand is firmness and strength. The sooner the American people recognize this, and the more solidly we apply it to situations such as the Russian-manufactured crisis over Berlin, the greater will be the hope for turning the Communist tide and speeding the day of universal peace.

On this occasion of the anniversary of Rumanian enslavement, then, let us rededicate ourselves to the freeing of these brave people. Let us unite in our resolve to work ever harder for the day when Rumania will once more take her rightful place among the family of free nations.

Mr. BRIDGES. Mr. President, March 6, 1959, marked the 14th anniversary since Rumania was subjugated by the Soviets. The continuing determination of the Rumanian people to again resume their rightful position as a free and independent nation can best be told through a letter I have received from the League of Free Rumanians. I ask unanimous consent that this letter be printed in the body of the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE LEAGUE OF FREE RUMANIANS,
New York, N.Y., March 5, 1959.

The Honorable STYLES BRIDGES,
U.S. Senator from New Hampshire.

DEAR SENATOR: This 6th of March will mark the dark anniversary of 14 years since Rumania has been militarily occupied and politically enslaved by the Soviets.

Knowing your clear-sighted and courageous militant stand against Communist imperialistic expansion and infiltration, we respectfully appeal to you to call attention to the ordeal of the Rumanian people at the hands of the expoliting ruthless tyranny of Moscow.

We know you feel it is the interest of the American people not to forget that the Rumanians, an old Latin and Christian nation, being a part of the European-American community of civilization and an advance post in the defense of this community, although under the Soviet yoke, are preserving their inner allegiance to its values and ideals. All intelligence we receive coming from Rumania, assures us of the determination of the people to continue their resistance and be prepared to stand up, at a critical moment, on the Western side.

These national explosive forces in Rumania, as well as in the rest of Eastern Europe, are a permanently suspended threat for the Russian bridgehead of aggressive expansion the Kremlin is trying to maintain and consolidate in the center of Europe. The last Russian political moves concerning Berlin stress the anxiety of the Soviets to add a new, decisive prop to the consolidation of this bridgehead. The brutal repression of the Hungarian revolt was not enough, they need to destroy that last bastion of freedom within their European springboard, a free Berlin. Either a neutralized Berlin, or one protected by United Nations token units of neutral Communists, such as Yugoslavs, Czechs, Poles, etc., or uncommitted such as Indians and Egyptians, will mean the liquidation of that symbol of freedom which is Berlin, a perpetual sore spot under their very noses.

Not only the Germans, but the Rumanians and the other peoples are watching Berlin, for they know that as long as the Russians cannot eliminate it by obtaining recognition of the East German Communists, or through neutralization, the freezing of the Soviet domination status quo in Europe will not be completely achieved and the resistance of the enslaved will not be dealt a mortal blow.

The resistance of the Rumanian people, although not getting publicity in the Western coexistence press, is widespread, diverse, and persistent. The economic sabotage directed against the plans of the socialist camp has taken such proportions that a new wave of repressive terror is under way. Life imprisonment and the death penalty are imposed at will for the slightest misdemeanors, in order to stem sabotage.

This state of things behind the Iron Curtain raises the question: Is it not in the interest of the United States in an approaching ministers' conference and eventual summit meeting, in discussing Berlin, to avail themselves of the weakest spot in the Russian armor, namely, the Soviet enforced domination in the whole of central and Eastern Europe?

It is extremely puzzling that even now when the Russians are demanding that the United States get out of Berlin, nobody on this side is demanding that the Soviets get out of Bucharest, Budapest, or Warsaw. It is true that Eastern Europe has been ceded to Russia and their Soviet stooge governments recognized in the hope of peace in our time, but as has become amply evident it has served no purpose and the aggressive aims of Russia are stronger than ever. Why, therefore, should one not make use of this powerful weapon of the rights and liberties of formerly free nations? We humbly believe, on the basis of direct knowledge of Russian political reactions and maneuvering, that it is a profound error of judgment to consider that making such a retort would impair one's negotiating position with the Russians; on the contrary, the Kremlin understands and takes seriously only negotiations from strength, using all available means which exploit the weakness of the opponent.

On this sad day, the Rumanians are looking toward the United States and any word of encouragement coming from you will deeply be appreciated by Rumanians in their enslaved country as by those in the free world.

Please accept our sincere gratitude for your ever kind sympathy and understanding.

I remain,

Yours respectfully,
MIHAIL FARCASANU,
President.

THE AMERICAN FARM SCHOOL IN GREECE

Mr. KEATING. Mr. President, for 55 years, the American Farm School in Greece has been educating the sons of farming families of Macedonia and Greece to become better farmers, better Christians and better citizens.

The American Farm School is now headed by Bruce M. Lansdale, the third director in the school's 55 year history. Mr. Lansdale is a graduate of Monroe High School in Rochester, N.Y., and the University of Rochester, with a master's degree from Cornell University. He is currently visiting in the United States.

The American Farm School was founded in 1903 by the Reverend John Henry House and opened its doors to its first class of 12 students in 1904. It was incorporated in this same year under the laws of the State of New York as the Thessalonica Agricultural and Industrial Institute—it has become known affectionately and familiarly both in Greece and in this country under the shorter title—and is still operating under the charter granted in that year.

The school is authorized to operate under the laws of the Kingdom of Greece and, as an educational institution located in that country, derives in a small measure financial support from the Greek treasury. At irregular intervals through the years our Government has also, through grants from one or another of the Government agencies connected with the mutual security program, provided financial assistance. Currently the school enjoys a scholarship grant under the provisions of Public Law 480, and an application is pending for assistance, to be employed for capital improvements, from funds available under the International Cooperation Administration Mutual Securities Act, section 400(c).

Since founding, however, the school has depended in very large measure down through the years for financial support from the contributions of private citizens, chiefly generous and thoughtful Americans.

From an original enrollment of 12 students, who studied in a single building located on a campus comprising 50 acres, the school today has increased its enrollment to 200 boys, its buildings to 50 and its holdings of land to 340 acres. It is especially noteworthy—and, I believe, unique—that, through the efforts of the students—who learn by doing—the faculty and the staff, the sale of farm and animal products thus produced provide more than 60 cents of every dollar of the cost of operating the school.

In addition to the regular 4-year course for farm boys, the school has given for the past 5 years a series of short courses—at the urging of and cooperation with the Ministry of Agriculture of the Greek Government—for farmers and their wives, their elder sons and daughters, ranging in duration from 2 weeks to 2 months. The subjects taught range from tractor driving for girls—a defense measure—to beekeeping for elders as a supplement to cash income in a country 65 percent agricultural.

Mr. President, this school finds support for its expanding program of service through committees of friends and contributors in a number of cities throughout the Eastern United States. It is a tremendously worthwhile enterprise which has accomplished great good, both for the residents of Macedonia and Greece and for the cause of friendly international relations. I know that all my colleagues will join me in saying Godspeed to Mr. Lansdale and his associates.

I now desire to turn to another subject.

The PRESIDING OFFICER. The Senator from New York has the floor.

ANNIVERSARY OF THE BIRTH OF THE GREATEST CZECH OF THEM ALL: THOMAS G. MASARYK

Mr. KEATING. Mr. President, March 7 marked the anniversary of the birth of a great man, Thomas G. Masaryk, the father and founder of the Czechoslovakian Republic. This day is celebrated by all who love freedom, including those today trapped behind the Iron Curtain. Before Czechoslovakia was overrun by the Communist hordes, it was celebrated there as a national holiday. Today its observance is limited to covert commemorations by those brave people who continue to hold high the torch of freedom in spite of the oppressive tactics of their occupiers.

Here in America, March 7 serves as a fitting occasion for rededication to the cause of freedom for which Masaryk worked throughout his life.

Thomas G. Masaryk was a noted scholar and writer, whose contributions on the subject of democracy will live forever. But he was also a man of action. He led the way to the liberation of his people, and for 17 fruitful years he served as President of the newly formed Republic. His tenure in office was characterized by wisdom, tolerance, patience, and significant progress for his beloved land.

His death in 1937 saved Masaryk from witnessing the terrible tragedies which followed for Czechoslovakia—including the Munich fiasco, the awful years of Nazi occupation, and the even worse hell of domination by the Communists. Today in Czechoslovakia, the name Masaryk is revered by those dedicated to freeing that land. It is feared by the Communist overlords, who seek by all means at their command to stamp out the spirit of freedom and liberty which his name signifies.

Because Czechoslovakia today writhes in the chains of Communist domination, it is important for us in the free world to do all we can to offer hope and encouragement to her people. We must assure those behind the Iron Curtain that they are not forgotten.

By our observance of the anniversary of the birth of the great Masaryk, we are contributing to this effort. The life of this far-seeing patriot is truly an inspiration to all men everywhere who yearn for freedom or who work to spread liberty to all sectors of the globe.

Surely a people who produced a giant such as Masaryk will once again free itself from oppression and rejoin the world of free men. We pray that day will come soon. Then, the Czech people, themselves, will be able to join us on future occasions in celebrating once more the birthday of their greatest leader, Thomas G. Masaryk.

CONSERVATION IS MORE THAN A WORD; IT IS ALSO THE MAN

Mr. NEUBERGER. Mr. President, "conservation" became a household word because of Gifford Pinchot, Teddy Roosevelt, and the national forests. Since 1905 the U.S. Forest Service has been protecting and building our forests for our people to use and enjoy.

Our national forests are more than an everlasting source of wood, grass, water, and recreation—they are a part of our Nation's moral fiber. As we care for our forests and their resources so well we display our national interest in a vigorous, forward-looking, growing America. Our treatment of our natural resources today fixes unchangeably our resource base for tomorrow.

Because man possesses the ability to so change the forest, this wonder of nature is also the work of man. The men who manage our forests are our link with nature. Upon their excellence, their ability, their experience, their training, and their dedication to duty rests the future of the forest.

In Oregon, we have been fortunate to have many outstanding foresters in charge of our forests. Dr. Richard McArdle—the present Chief of the Forest Service—worked there early in his career. Lyle F. Watts, his able predecessor, is an Oregonian. Ed Cliff, who is now in charge of national forest administration, spent much of his career in Oregon.

The U.S. Forest Service has been noted for its outstanding success in developing a genuine career service free of the vicissitudes of political appointments. In this atmosphere many outstanding conservation leaders have developed.

I can think of no finer example today than a young man who has risen from a tree planter in 1933 on the old Columbia National Forest to Forest Supervisor of the Willamette National Forest. It is reasonable to expect perhaps that Bob Aufderheide, who got his start in what is now the Gifford Pinchot National Forest, should exhibit the same conscientious devotion to duty as did Pinchot himself.

Bob Aufderheide has done a truly outstanding job. The Willamette National Forest is in the heart of Oregon's forest industry. Over 400 million board feet of timber are cut from its timber stands each year—and it alone accounts for over 10 percent of the entire Forest Service income. Over 400,000 people use its recreational facilities. It has been the scene of extensive dam construction work by the Corps of Engineers. It is a center for applied forest management research. It has a 400,000-acre wilderness area on the crest of the Cascade Mountains.

It takes real leadership to administer more than 1,500,000 acres of growing forest and Bob Aufderheide has displayed not only leadership but outstanding judgment and human understanding. He has, by example, stimulated his associates on this great forest to respond with the best of their abilities. This in my opinion is the test of leadership because the job he has is too big for one man to do alone. He has been extremely capable in securing cooperation from those who use the forest.

To me, Bob Aufderheide's career exemplifies the response to public duty that too often we take for granted. I do not want to let it go unnoticed because we depend upon Bob and others like him to not only do their job but do it well.

It often is the custom when a man high in government retires to eulogize his great accomplishments. I think it far better that we also should remember those who work outside the national spotlight, and to call attention to their great work while they are still engaged in it.

Mr. President, I ask unanimous consent that the 1958 annual report of the Willamette National Forest and my letter of February 4, 1959, to Forest Supervisor Bob Aufderheide be printed in the RECORD following these remarks.

There being no objection, the report and letter were ordered to be printed in the RECORD, as follows:

WILLAMETTE NATIONAL FOREST 1958

1958 HIGHLIGHTS

Last year, for the first time, we were able to obtain the foresters we could finance. Consequently, we were able to obtain most of our objectives. Our most noteworthy accomplishment was selling the new allowable cuts established by the reinventory completed the year before. Our 1958 sale program called for the sale of 610 million board feet; our accomplishment was 668 million board feet. The sale of this timber will permit the purchasers to take advantage of any improved market condition that may occur in 1959.

Another real accomplishment was the initiation of a $200,000 construction program. We are building new dwellings, offices, warehouses, and work camps, and are thus getting set to provide the extra services indicated by the greater cuts of timber and other public demands.

We had a rough fire season and obtained excellent help from the logging industry. This fine cooperation kept our losses down to reasonable levels.

Recreational use continues to expand rapidly, and all our facilities were filled on most weekends. Heretofore full capacity would occur only on special holiday weekends such as the Fourth of July. Our allotment for recreation was less than in 1957. Available funds were used to replace worn-out facilities in existing camps, and we were unable to do much in the way of new campgrounds. We completed a road into Big Lake, and this beautiful lake will now be accessible to the motoring recreationist.

Coordinating all the activities on the forest and adjusting conflicts that threaten other important uses and values continues to be an evergrowing job. We assure you that we shall continue to keep the Willamette forest a good place for recreation.

We appreciate your continued interest and help and will welcome any suggestions you have.

Sincerely,

ROBERT AUFDERHEIDE,
Forest Supervisor.

GENERAL ADMINISTRATION

Good progress has been made in easing our housing problems, and as a result we have been able to recruit a few more foresters to help get the job done. The following facilities were constructed at ranger stations or work centers during the past year: three 12-man bunkhouses, one 20-man bunkhouse, two warehouses, three 20-man messhalls, seven 3-bedroom dwellings, two water systems.

Also, a residence and lot were purchased at Mill City which will serve as an office and headquarters site for the new ranger district to be split off the Detroit district. The completion of the purchase of six residences which formerly were owned by the Army Engineers at Mill City was accomplished, and these buildings were rehabilitated and will serve the new district. Similar accomplishments are hoped for during the present year to further relieve the operational problems that have hampered our progress.

In an operation of this size, personnel and crews are not static. Transfers, military furloughs and resignations, as well as seasonal fluctuations, necessitate changes. Our technical force seems to average about 60 foresters assigned to the various activities as needs dictate, but with timber management receiving by far the greatest number. Maximum employment on the forest totaled 455 for a short period in the late summer. This did not include firefighters.

This force of foresters utilizes our finances and limits the standard of management we can observe in the handling of the resource. Additional management funds would provide for more intense management and the harvesting of salvageable volume by thinning.

TIMBER MANAGEMENT

New goals were set and won in the sales business during 1958, and the attainment of the harvesting of the allowable annual cut does not seem far off. The following figures tell the story for the past year.

	Over $2,000 value	Under $2,000 value	Total
Number of sales made	138	526	664
Volume sold (thousand feet board measure)	638,727.0	29,950.0	668,677.0
Value all sales	$12,697,805.35		
Volume cut (thousand feet board measure)	477,218.05		
Total value of cut	$10,397,448		

These figures apply to the entire sale program, which includes all types of forest products measured or converted into board-foot figures.

Presale work was carried on to provide for the early selling of the allowable annual cut volume for each working circle during the present year.

The reinventory of the timber resource in the South Santiam drainage was completed in the early fall. Now the office computation of the new allowable annual cut must be done before the project is complete. However, an interim adjusted volume of 85 MM is being used for planning and sales purposes until a computed figure is obtained.

A new transplant nursery was established on the Lowell District, and 85 M Douglas-fir 2–1 transplants were produced for use in reforesting some of our more severe sites. Plans are for the expansion of this program and the production of approximately a half million transplants this year.

The reforestation of our cutover lands continues to be top priority. During the year, 5,000 acres were stocked with 2,600,000 seedlings and transplants.

Two new scale stations were built—one on the McKenzie River near Blue River and on Fall Creek near Lowell. These stations can handle 4 trucks at a time and as many as 175 loads of logs have been handled through these stations in an 8-hour day.

SOIL AND WATERSHED MANAGEMENT

The Cougar Reservoir on the South Fork McKenzie drainage has now been logged and cleared and the slash disposed of by burning. This phase of the dam project was completed during 1958. Similarly, most of the Hills Creek Reservoir work on the Middle Fork Willamette drainage was accomplished. This achievement on these projects during the past fire season is noteworthy and eliminates a serious fire potential which was a major problem.

Replacement roads are now being constructed above the flood line on each project. These should be completed in 1959.

Continued attention is given to the problem of soil disturbance in our development work. Studies have been made of all of the forest roads which will lead to the stabilizing of back slopes, embankments, etc.

Through timber sale procedure we are eliminating logjams and drift from stream channels. The opening of the channels eliminates much of the danger associated with flood conditions.

This year we received our first allocation of funds for rehabilitation and channel improvement on Salt Creek near Oakridge. Several large drifts were cleaned up and obstructions were bunched and burned. This work should do much toward eliminating the periodic damaging floods experienced in this drainage in past years.

The water and soils program will continue to expand under the multiple-use concept of management. Continuing studies are being carried on at the Andrews Experimental Forest to determine the impact of logging methods, size of units, road construction, and other forces which affect water runoff and the quantity and quality of water produced.

RECREATION AND OTHER LAND USE

The mild winter of 1957–58 caused little damage to our trails and allowed for the early maintenance of many of the high-country recreation routes. Approximately 1,200 miles of our 1,800 miles of trails were maintained. An additional 2 miles of construction was accomplished on the Obsidian Trail—this completes the new trail from Frog Camp to the Skyline Trail.

Reconstruction was done on the Marian Lake trail and on the Oregon Skyline Trail from Jefferson Park to Pamelia Lake and from the Maxwell Shelter to the North Santiam Highway. Additional work is planned on other sections this year.

Campground work has been about equally divided between rehabilitation of old camps and expansion with new projects. The Fall Creek area camps received a complete overhaul with some expansion of facilities. Several new shelters were constructed at the Clark Creek organization site. These were badly needed and will be used by youth groups camping in the area.

The campground roads and parking areas at Clear Lake, Scott Lake, and Olallie were much improved during the summer.

On the Detroit District, new campgrounds were established at Hoover Falls and on Piety Island. This latter one is unique in that it is accessible only by boat. However, the popularity of this reservoir for fishing and boating insures a heavy season-long use.

In several campgrounds in the McKenzie Bridge area, a light cutting of some very old and defective trees was accomplished. The cutting of these defective trees eliminates the possibility of their blowing over in severe windstorms with resulting damage to the improvements or harm to the campers. Careful thought has been given to their removal. In the establishing of new camps, younger stands are often considered more desirable.

Land-use plans were completed for the McKenzie and Blue River Districts. Study continues on other areas where multiple use can be practiced through wise use of water, utilization of timber, and the full realization of the recreation and esthetic values.

Rights-of-way problems continue as more roads are needed to reach the untapped resources needing management and land and timber values increase. The cooperation we receive from the private landowners is good and minimizes many of the problems. However, legal requirements are often-times frustrating and occasionally upset time schedules which have been established.

WILDLIFE AND RANGE MANAGEMENT

The grazing of domestic stock on this forest is a minor use. However, the utilization of the forage resource by game animals is recognized and considered in the application of the multiple-use concept. As the cutting of the old-growth stands progress, the cutover areas will be utilized by big game animals until the young stands shade out the browse and forage plants. Thus, the regulated management of the timber resource will insure a constant habitat for the deer and elk, and we have multiple use. Also, the hunting provided because of the game population figures in our recreation use.

FIRE CONTROL AND SLASH DISPOSAL

The 1958 fire season was the worst since 1951. One hundred thirty-eight fires burned 1,284 acres, which was much greater than the 5-year average of 84 fires and 151 acres. Improvement over 1957 was noted in the man-caused fire statistic. Thirty-eight fires burned 88 acres this year, while in 1957 43 fires burned 300 acres.

The excellent cooperation of loggers and industrial workers, coupled with good prevention tactics, enabled us to get by without a serious logging operation fire. The number of man-caused fires is still too high, but the decrease over the past year may still be significant, considering the critical fire weather and the increase in recreation and other man use of the forest experienced in 1958. It is hoped the decrease indicates a trend rather than a happenstance. If it is a trend, it points up that our forest users are aware of the serious damage done by fire and are taking steps to prevent them.

On the night of August 24, 70 fires were set by a severe dry lightning storm which

passed over the north half of the forest. At this time there had been no trace of precipitation for almost 9 weeks, and forest fuels were tinder dry and explosive. Two of the lightning-set fires were raging infernos when the first firemen reached them. The Dry Creek fire was controlled within several days, after burning about 100 acres, while the Canyon Creek fire was not controlled until it had burned 1,025 acres and several hundred experienced firefighters from distant points in western Oregon had been called into the battle.

In the suppression of this rash of lightning fires, smokejumpers, aircraft, helicopters, tractors, pumps and other machines were used extensively in controlling the blazes. The smokejumpers made 38 jumps to 13 fires. Three helicopters were used in transporting men on the Canyon Creek fire and on several of the smaller fires. Several hundred men and almost 12,000 pounds of cargo was airlifted from the base camp to the firelines and to "heliports" and an air camp set near the top of the fire.

In addition, two conventional aircraft were used for dropping a total of 16,000 pounds of cargo to 5 fires which were remote from roads or trails. Air tankers were used on several fires and dropped 13,500 gallons of borate slurry and 700 gallons of wet water to aid in the control. This is a newer innovation in fire control technique and shows great promise for the future as the technique becomes perfected.

The 1958 fires did not destroy an exceptionally large volume of timber, but other resource damage resulted which makes them costly. In several cases where timber was killed, plans have already been made for salvaging it.

A new lookout tower and house was built on Indian Ridge this year as a replacement. Plans are now under way for a new lookout house on Fuji Mountain in 1959. This mountain is familiar to many of the Waldo Lake visitors.

Our achievements in slash burning were very gratifying in that we burned all of the areas of current slash as well as several areas which had been carried for several years. A total of 5,500 acres of clear-cut slash was burned by Forest Service and operator crews. In most cases, excellent burns resulted and the areas were left in an almost ideal condition for reforesting.

Private landowners having slash within the protective boundary were equally as successful in the handling of their slash areas.

As previously stated, most of the slash remaining on the reservoir projects was burned during the fall period. These two projects had a total slash acreage of 4,100.

ENGINEERING AND ROAD CONSTRUCTION

Road surveying and designing by Forest Service crews are now being accomplished for all of our major timber sale roads. We are getting started on the job of staking the location for construction by the timber purchasers. The doing of this work by Forest Service crews makes possible better estimating for all concerned. Also, it eliminates much of the delay in starting road construction after purchase of the timber.

Some work has been done in controlling roadside brush by spraying. It is hoped that the application of a dormant spray will prevent sprouting or leafing in the spring.

The Bureau of Public Roads has contracted for the paving of 11 miles of the Belknap Springs Forest Highway which was recently graded. It is hoped grading of the several miles remaining in the middle, and which was cleared this past year, will be accomplished this year. This will provide an all weather route between the McKenzie and the South Santiam Highways and a more direct route into much of eastern Oregon.

The following is a list of our 1958 accomplishments:

1. Road surveyed for Forest Service design, 187.
2. Road located for operator design, 20 miles.
3. Road built under timber sale contract, 144 miles.
4. Estimated value of road built by operators, $4,445,000.
5. Bridges built by Bureau of Public Roads, 9.
6. Bridges built by Forest Service, 2.
7. Major culverts bought, for installation by purchasers, 24.
8. Road maintained by purchasers, 650 miles.
9. Road maintained by Forest Service, 550 miles.
10. Trails maintained by Forest Service, 1,140 miles.
11. Telephone lines maintained by Forest Service, 600 miles.
12. Radios maintained, 175.
13. Vehicles maintained, 129 units.

WILLAMETTE NATIONAL FOREST DIRECTORY

Forest supervisor's office, Post Office Building, Post Office Box 1272, Eugene, Oreg. (DI 4-5291).

Robert Aufderheide, forest supervisor.
Edward L. Peltier, timber management.
Warren M. Pressentin, fire control.
Edwin C. Stout, engineering.
Loyd Bransford, recreation and other land use.
Clyde L. Quam, administrative officer.

District rangers: Alvin L. Sorseth, Detroit district (Detroit 552), Detroit, Oreg.; Orval Jess, Cascadia district (Sweet Home, Empire 7-2828), Foster, Oreg.; Raymond L. Hornbeck, McKenzie district (Blue River, Valley 2-3482), McKenzie Bridge, Oreg.; Edward W. Anderson, Blue River district (Blue River, Valley 2-3516, Blue River, Oreg.; Ralph L. Worstell, Lowell district (Lowell, Webster 7-2114), Lowell, Oreg.; Stanley I. Undi, Oakridge district (Oakridge, Sunset 2-1721), Oakridge, Oreg.; W. David Kolb, Rigdon district (Oakridge, Sunset 2-3051), Oakridge, Oreg.

Forest statistics

County:	Acres
Clackamas	914
Douglas	50,628
Jefferson	832
Lane	961,028
Linn	464,614
Marion	137,326
Total	1,615,342

Of this forest total, over one-third (620,300 acres) is in areas either reserved from timber cutting or not suited to timber production.

Willamette National Forest receipts and expenditures, fiscal year 1958

	Receipts	Expenditures	
		Operating	Investments
National forest protection and management (includes brush disposal)	[1] $181,982	$907,679	$102,529
Fighting forest fires		103,915	
Forest pest control		342	
Road and trail system, construction and maintenance		94,944	603,395
Cooperative deposits (including timber deposits for stand improvement)	217,071	103,868	129,286
National forest receipts to forest reserve fund	8,264,083		
Total	8,663,136	1,210,748	835,210
Total operating receipts and expenditures	8,663,136	2,045,958	
(1) a. Operating expenditures	1,210,748		
b. Estimated annual depreciation on roads, trails, and other improvements in place on June 30, 1958	806,572		
	2,017,320		
Amount by which receipts exceed operating expenditures, plus estimated depreciation	6,645,816		

[1] Brush disposal deposit.

NOTE.—During the fiscal year ending June 30, 1958, we cut 15,610,000 board feet of timber valued at $463,155 on lands having O. & C. status (formerly controverted) but which are administered by the forest service. This revenue is not included in this statement of receipts and expenditures but merges with other O. & C. receipts for distribution of 75 percent to the O. & C. counties.

Twenty-five percent of national forest receipts is distributed to the counties in which national forest land is located for roads and schools. Distribution from the Willamette National Forest receipts was as follows:

Clackamas	$1,169.19
Douglas	64,763.38
Jefferson	1,064.30
Lane	1,230,721.76
Linn	592,701.11
Marion	175,601.03
Total	2,066,020.77

The above payments amounted to approximately $1.25 per acre for each national-forest acre in each of the above six counties. Adding 75 percent of the $463,155 of revenue from the O. & C. lands gives a total return in excess of $1.50 per acre.

PORTLAND, OREG., *February 4, 1959.*

Mr. ROBERT AUFDERHEIDE,
Forest Supervisor,
Willamette National Forest,
Eugene, Oreg.

DEAR BOB: I want to express to everyone on the Willamette National Forest my appreciation for the wonderful job you have done during 1958. The annual report that you just sent to me gives good evidence of this excellence.

I particularly want to congratulate you on your timber sales accomplishments, which were in excess of your plans. That is a situation which did not prevail on every forest, and I think it is a real credit to the teamwork and leadership you have developed.

I am glad to see that you are making progress in recreational improvement work although I realize that the funds are not sufficient to do the necessary job.

I know that your fire-control record, while it suffered this year statistically, did not suffer in terms of the strong effort you must have made to control the 138 fires that you had to cope with.

Please accept my best wishes for 1959. I hope that you are fully recovered from your recent hospitalization and that you will now continue to enjoy good health.

Sincerely,

RICHARD L. NEUBERGER,
United States Senator.

A REACTION AGAINST TYRANNY

Mr. BRIDGES. Mr. President, the latest issue of Human Events contains an article defining the term "reactionary." This article was written by Mr. John J. Synon, a California industrial accident commissioner, who, I understand, is a frequent contributor to California newspapers. His discourse on just what is a reactionary is worthy of the attention of all of us, and I ask unanimous consent that it be inserted in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A REACTION AGAINST TYRANNY—I'VE BEEN CALLED A NAME

(By John J. Synon)

I do a column for a downstate daily whose publisher recently told me I am one of the most reactionary characters he's ever known.

He runs my stuff, I think, because he gets a kick out of the occasional blue furies I manage whenever my nape is rubbed the wrong way. My low flashpoint, he says, stirs up his readers. Which is reason enough for him to print me—he sells papers for a living. But why call me a reactionary?

Literally, I suppose I am. Who isn't? Only the dead don't react.

Yet the stinging phrase rings in my ears, for there is nothing hidebound about me. Certainly I'm against indiscriminate foreign aid. Who in his right mind isn't—bucketing dollars all over the world like madmen slopping a billion hogs? And, yes, I am opposed to compulsory unionism. I think it outrageous, this forcing people against their will into private organizations. Conceding these views, are they enough to pin a label on me?

What is the definition of a reactionary? I don't know and I can't find out. I can tell you what an egghead is, a New Dealer, a mugwump, a know-nothing. I even remember what Democrats were. But I've never seen a definition of a political reactionary, one I'd accept.

I keep plowing around for a definition, for some little succinct phrase that will salve my editor-bruised feelings, but I can't find one. The best I can do is much too long. By whatever title, this is my creed: You let me alone and I'll let you alone.

Does that make me a reactionary? I call my publisher friend a Socialist and I can prove, by Webster's dictionary, that he's a Socialist. On the other hand, he calls himself a Democrat but I defy him to prove that.

I call myself a Republican, and when I want to emphasize what I am I call myself a "black Republican." I do that even though the blood of my Virginia relatives changes cycle whenever I do. The Republican Party was born to free men, our black people, and because I haven't forgot that historical fact I call myself—despite the wincing of those who are forced to associate with me—I call myself a black Republican.

I remember how my party came into being and I couldn't be anything else, for I believe with all my heart that every man should be free, the captain of his soul. Which, parenthetically, is why I oppose compulsory unionism. And since we prefer an orderly society (I suppose we prefer civilization), with freedom must go responsibility. The two are inexorably coupled. What sort of freedom is it when a person shucks responsibility? Somebody must assume the burden you dodge and if you refuse it, then you must—to maintain order—take direction from another.

The Socialists press for the abdication of responsibility, of personal liberty. They say, in return, you shall have a planned economy. This is a euphemism, you must know, for a much plainer phrase. It means, "Let uncle tell you what to do."

Who's uncle? "Uncle" is a bunch of egghead jerks who have no understanding of your problems as an individual and care less. They look at the broad picture, and you with your problems at home and at the butcher shop have no meaning.

Today they set the price of your pork chops and of your milk and they do it so as to make them prohibitively costly. How long since the butcher has given you a savory soupbone for the dog? Or a peppermint stick for Junior? And the sales Mama once knew are things long gone. There was a day when shopping, next to the honeymoon, was the greatest thrill in Mama's life. That bargain hunter par excellence could, in 2 days of cagy foraging, save Papa half the bill.

No longer. They've got Mama fair-traded nigh into schizophrenia.

When I was a boy, before the era of the common man, a workman labored and was paid. And what he got was his, brother, all his, for he had earned it. The man who worked for wages had no more connection with the tax collector than presently he has with sputnik.

When I was a boy, a man who worked for wages had heard of the tax collector, sure, but gave him no personal application for he knew no direct taxation and the indirect bite was so small as to make it inconsequential. Government meant little to him.

What happened? The man who presently works for wages, even the poorest, works 3 months every year, just to feed that insatiable Moloch, the Federal Government. The best he can expect in return is something they call social security. And, yes, you guessed it, I'm against that, too.

I don't remember the exact figures, I'm no statistician, yet I recall, for every dollar Joe the Drudge pays in he will take out 30, maybe 20, I don't know, some outlandish sum. There is nothing equal to that this side of Reno. Think of it, 30 to 1. Even the racetracks don't pay off like that, more than once or twice a meet—not if they want to stay in business. Then how does the Federal Government do it?

Easy. They've got the "broad picture" in mind so they steal it by the billions from others—and from the very beneficiaries they pay it to. Already the thing is dishing out more than it is taking in, and in the future the outgo will mount until the difference becomes astronomical. And where will the difference come from?

Why, through greater and greater taxation, by floated Government paper, paid for by the depreciated currency—where else?

And yet this thing was sold to the people, is being sold now, as a form of insurance. I oppose social security as we know it because I am opposed to my Government working a confidence game on the people.

That makes me a reactionary. So be it.

Every dispassionate person who ever tried to teach me something of life told me liberty is the greatest treasure of them all. And every bit of history I've ever read hammers home their meaning. I remembered their words in the twenties, when the Russian peasants by the millions starved to death because they were not allowed to fend for themselves.

And I remembered when our State Department issued its white paper trying to make me believe the Red Chinese were agrarian reformers, and I remembered and cheered the courage of the free Chinese when Chiang threw out old Vinegar Joe Stilwell. And later, in Laos and across the world in East Berlin and a bit later in Hungary, I remembered.

I remembered the words of Patrick Henry and never felt them outmoded. And I don't think them outmoded now, reactionary though I may be.

How can a person forget? Having remembered as the lights of the world grew dim, how can I forget as I see our homegrown tyrants stealing upon my own personal freedom? I can't, nor shall I. For it makes little difference to me how you steal my liberty so long as you steal it.

What essential difference is there between a labor camp and forced membership in a trade union? There is only a difference in degree, for in neither case is the individual allowed to exercise his "inalienable" right of free choice.

And to this I react.

I have no mind to harp on labor unions, to the exclusion of other infringers on our liberty. Their counterparts, the employers who conspire with union bosses to bilk the consumer, are no better. As the labor chiefs drive to compel every wage earner to join their ranks, so businessmen sometimes tell the bosses to cut down the number of firms in an industry, so that those left—those playing ball with the unions—can charge monopoly-sized prices.

There is but one hope, there has always been but one hope, and that is in the fight for the rights of the individual.

We must never quit.

If we give way to the cynic and wait for the ax to fall, then indeed there is no hope. For a number of reasons, material and moral, we have to keep on fighting. And if they beat us today, we'll beat them tomorrow.

I have no desire to be a plush cushion slave, as enticing as that may sound, for such slaves—having no voice of their own—have a way of losing their cushions. After all, these eggheads who do the planning are incapable of creating anything, and unless you create for them they won't have the wherewithall to slake old Moloch's thirst.

When the planners have reached the last farthing of your earned dollar, what then? Who is going to do the creating? Not me—there is nothing in it for me. And not you either, and for the very same reason. Yet the day will come when the last cent is controlled, unless we fight on.

This land of ours was built on hope and certain assurances. If a man worked, produced, he could keep what he earned, do as he pleased so long as he did not impinge on another. This was the meaning of the Declaration of Independence, the fireball that lit liberty's torch, that brought us to the top of the heap. Without hope of gain for effort expended, there is no hope. And without hope, no life worth the living.

Reactionary, indeed.

POLITICAL PARTIES

Mr. BRIDGES. Mr. President, the latest issue of the Saturday Evening Post contains an editorial which I believe merits consideration of all those who seek political office and who are interested in the continued well-being of a political party. Significantly, the editorial bears the title "A Party Can Change Its Image; But Will the Public Buy it?"

The editorial notes that "there are millions of other people to whom the Republican Party looks like an organization of middle-of-the-road folks who are worried about what is happening to the dollar and wonder if we really need to give away quite so much money to foreigners." I ask unanimous consent that the editorial be printed at this point following my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A PARTY CAN CHANGE ITS IMAGE; BUT WILL THE PUBLIC BUY IT?

Some people are becoming increasingly restive over all this talk about images. Hardly a day passes without a newspaper columnist or a politician demanding that the Republican Party, the motion-picture industry, the Old South, United States Steel, and Vice President NIXON should do something about their images.

One trouble with becoming unduly concerned about one's image is that nobody is entirely sure what it is. The Democrats and leftwing propagandists, for example, have terrified a lot of Republicans into believing that their party's image is a fat old plutocrat who lives on dividends and hates the workers. This may be the image of the GOP as conveyed to some people, mainly liberal Democrats and some professors in college-economics faculties; but there are millions of other people to whom the Republican Party looks like an organization of middle-of-the-road folks who are worried about what is happening to the dollar and wonder if we really need to give away quite so much money to foreigners.

Anyway, while the leaders of various groups are busy revising their images, the public mocks up its own images of people and parties, relying less on clay from public-relations pottery works than on such information it can get on the subject being imaged, as Walter Winchell used to put it when printing a birth notice 4 or 5 months in advance. The leftwing effort to establish the image of Senator HARRY F. BYRD of Virginia as a slave driver in an apple orchard was a flop. People like or dislike the Senator according to their views on economy in government. The leftwing did manage to set up an image of Vice President NIXON which they used to stick pins in, and some of the Vice President's admirers think he should counter with an image more attractive to leftwingers. Actually, Mr. NIXON has done pretty well by just being himself.

Labor Leader George Meany's image is pretty good, not because of anything the image mongers have done for him, but because he has a mind of his own and lets people know it. The man who, when so many so-called leaders were slobbering over Mikoyan, indicated that he wouldn't give the Soviet slave driver the time of day makes his own image without professional help.

And speaking of labor leaders, look at Jimmy Hoffa. He has the worst possible image. Judges, grand juries, Senate committees, ordinary citizens denounce him daily. The jail door yawns, but does not slam on him. If all the smear experts in the Nation had gone to work to give Jimmy Hoffa an image that would stop a clock, they couldn't do any better than he has done for himself. But as far as we know, Hoffa has hired no men in gray-flannel suits to devise a new and nicer Hoffa image. He just lets the old mug ride.

The result is that the teamsters greet Hoffa whenever he emerges from a committee hearing or a grand-jury room with shouts of "He's our boy," and ballots to match. This creates an unpopular image for the Teamsters Union in the eyes of millions of Americans, but up to now nothing has been done to inconvenience Hoffa and his allies. If an image like Hoffa's upsets so few people, why should the G.O.P., or even the maneating shark, have its image lifted?

THE FEDERAL BUDGET

Mr. BYRD of Virginia. Mr. President, I have followed with great interest the controversy over the Federal budget during the past few weeks.

I think the debate is very useful. I hope it may lead to some reduction in nonessential spending which is so urgently needed.

To date these discussions have been useful primarily because they are beginning to show how Congress has lost effective control over the rate of Federal spending.

There are signs that the debate is throwing a little light in a few dark corners where tremendous back door spending and other expenditures outside of effective control are hidden.

In this connection I request unanimous consent that a statement I have prepared relative to authority to spend from public debt receipts be made a part of my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

One such dark corner is the growing contrivance to evade both appropriation review and control by writing final authority to spend from Federal debt receipts directly into substantive law.

We can count upward of $200 billion provided for expenditure through this method—outside of appropriation control—since inception of the modernized version of this technique for Reconstruction Finance Corporation.

This total assumes the $6.1 billion budgeted for the current year, and includes $25 billion in unused authority remaining in unexpended balances, and $163 billion provided to Federal spending agencies as of last June 30—$97.7 billion in initial expenditures and $64.9 billion in refundings.

But this is not the whole story. Great sums of this money have gone into Federal spending programs financed out of revolving funds. Some of this money has been used over and over again—each time with neither appropriation control nor review.

In fact, it would be difficult to calculate gross spending out of these revolving funds financed out of the Federal debt, but the total runs to untold billions.

Authority to spend from debt receipts is only one of the numerous methods of bypassing effective appropriation control now in practice, but it rates first examination because its characteristics are doubly damnable.

It not only circumvents the appropriation process; but by its nature authority to spend from debt receipts is a statutory mandate to increase the Federal debt by every dollar drawn out of the Treasury under this type of spending authorization.

When use of debt receipts, instead of appropriations, is authorized by law to finance a spending program, the effect is to prohibit the use of other Treasury receipts, such as those from taxes; the debt must be increased under the law.

I suspect that many citizens of this Nation, and perhaps some Members of Congress would be surprised to learn that there never was an appropriation for the $3,750 million British loan.

Under this loan expenditures totaling $2,050 million were made in fiscal year 1947 and $1,700 million in 1948, at the convenience and desire of the British Government, and charged directly into the American Federal debt.

I am not quarreling with the purposes of the British loan. I cite it at this late date only as an example of one type of Federal spending outside the appropriation process.

And, like too many Federal loans of all kinds, payments on the British loan in terms of both principal and interest have been made neither in full nor on time.

It is contended that authority to spend from debt receipts is used largely to finance programs involving Federal loans, and when the loans are repaid the receipts may be used to reduce the debt.

In theory this may sound plausible. But I assure you that it over-simplifies the manner in which these programs work.

And, as chairman of the Senate Finance Committee which was called upon last year to raise the statutory debt limit twice within 6 months, I suggest that neither the Congress nor the American taxpayer should rely on this theory with confidence.

The nature of programs generally financed by this method raises questions as to whether, when, and if so by how much, the Federal debt is reduced by repayments from the agencies involved.

Agencies authorized to draw on Federal debt receipts are usually Government corporations or so-called business-type operations engaged in long-term loans or advances in the fields of housing, business, agricultural surpluses, foreign aid, etc.

In most cases, when the funds are drawn down from the debt, the money is deposited in agency revolving funds from which the loans, advances, etc., are made. But when the agency collects repayments the money does not go to the Treasury for reduction of the debt. It goes back into the agency revolving fund for reuse.

When the agencies do make payments to the Treasury, it is not unusual for them to be refunded, refinanced, or followed by requests for new debt spending authority.

Statements that these agencies cost the Government nothing, or that they are making money, should be accepted with caution.

In the first place the Government should not do business with taxpayers for a profit.

In the second place, the ultimate costs of these agencies are difficult to determine even in liquidation. You can measure a snake when it is dead, but the complex financial structure used for many of these programs defies determination of profit or loss.

The old Home Owners Loan Corporation is the example usually held up as a successful operation which paid back its loans. Patient examination of its complicated liquidation now is raising doubts despite the fact that it was accomplished under conditions of housing scarcity and rising inflation.

Except for administrative expense limitation, the appropriations committees have little reason to know most of these debt spending agencies exist—until they get in trouble.

But when they work themselves into a position where they cannot pay their debts to the Treasury, they hasten through the appropriations committees with requests to wipe out the debt.

They do this in one of two ways. They either request appropriations out of the general revenue of the Treasury to restore impaired capital, or they request cancellation of their notes held by the Treasury.

In either case, the effect is shotgun action through the appropriation process.

Since the establishment of RFC, $20.8 billion of debt owed to the Treasury by these agencies has been wiped off the books by this process—nearly $16½ billion in note cancellations, more than $4½ billion in restoration of capital. Cash recoveries against these note cancellations to date have totaled less than $3 billion.

More than $12 billion of debt owed the Treasury by RFC was canceled. Restoration of capital for Commodity Credit Corporation has totaled more than $4.5 billion, and $3.3 billion of CCC notes have been canceled.

These debt spending agencies can be financed through the orthodox appropriation control procedure. This fact is conclusively demonstrated by experience with Rural

Electrification Administration and Farmers Home Administration.

Both of these agencies make loans. Both are authorized to spend from public debt receipts, but the amounts they can spend are determined under regular appropriation bills, subject to annual review and control.

When repayments are collected by these agencies, the money goes directly into miscellaneous receipts of the Treasury. They are not allowed to accumulate collections for reuse outside of appropriation control in some autonomous revolving fund.

I am pleased to note that this practice of authorizing expenditures by Federal agencies outside of appropriation control is coming to light in the current controversy.

I commend Senator STROM THURMOND of South Carolina and Representative HOWARD SMITH of Virginia for introducing bills, in the Senate and House respectively, seeking to curb sub rosa financing.

There are other practices which contribute to ineffective expenditure control through the appropriation process, such as building up huge unexpended balances, permanent appropriations, contract authority, use of foreign currencies, etc.

A great deal needs to be done to bring order and responsibility out of the fiscal legislation jungle we have allowed to grow up.

I shall have more to say on these subjects and some proposals to make in the very near future.

RESPONSIBILITY OF THE INDIVIDUAL SENATOR—ITS DISINTEGRATION, PART II—THE DETERMINATION OF SENATE DEMOCRATIC POLICY

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, morning business is concluded.

Mr. PROXMIRE. Mr. President, I make this speech in the spirit which I think was extremely well described by the senior Senator from Texas [Mr. JOHNSON], our majority leader, when he spoke a week ago last Saturday night. This is what he said:

> This does not mean that there should not be discussion, debate, dissension, and disagreement. That is the right and the strength of free men.
>
> This is in the Democratic tradition. It is in the great tradition of freedom to disagree. I pray it always will be. We have it in the U.S. Senate, and we have it in the Democratic Party. This is a part of our heritage.
>
> We have our fights; we keep them in the open and talk them out. Then united we stand.

In that spirit I should like to continue and say that this is the second in my series of speeches on the disintegration of the right and duty for all Democratic Senators to determine our party's programs and policies in the U.S. Senate.

On February 23 I contended that the decision of our leadership not to call caucuses in recent years of all Democrats for the purpose of determining a legislative program has destroyed this right and duty. The absence of Democratic caucuses is, of course, fundamental.

It is also widely recognized and conceded.

What has not been discussed is the way policy is in fact determined in my party in the Senate.

The cold fact is that Democratic policy in the Senate is made entirely on an ad lib, off-the-cuff basis. The initiative as well as the final decision is almost always resolved by the majority leader himself on the basis of his own judgment of what is desirable and what is possible.

This is not to say that the individual Democratic Senator doesn't play a part in determining policy. His individual vote and whatever influence he may have that goes beyond his individual vote is a factor in the majority leader's calculus. But it is the majority leader who does the computing of the possible. And the critical point is that he does it without the overall conscious guidance of Senate Democrats either in caucus or in policy committee. It is my position that this is an unnecessary delegation of responsibility by Democratic Senators. In the vast majority of democratic legislative bodies throughout this country and the world, no such delegation is found necessary for action.

I have found that to be the case in State legislatures in this country and in parliamentary bodies elsewhere.

So today I shall try to establish that the policy committee usually does not and the majority leader usually does in fact decide Senate Democratic policy. Secondly, I will discuss the consequences of this on the Senate as one of the world's great deliberative and educational bodies. Here, too, the rights and duties of individual Senators are seriously involved. And, of course, the consequences on the understanding of our Government by our own people and persons throughout the world is great.

THE POLICY COMMITTEE

Congress has made only one effort in recent years to create a law that would provide a framework within which the policies of our parties could be determined. Extremely exhaustive and thorough hearings were held by the Joint Committee on the Organization of Congress some 13 years ago. The legislative history of the law setting up policy committees that emerged from these hearings is a little complicated, because the bill introduced following the original committee report and which set up policy committees in both Houses of Congress was defeated in the House after having passed the Senate. After this rejection of policy committees in both Houses, policy committees for both parties were set up in the Senate.

Mr. President, what I am about to say is not intended in criticism or derogation of anyone. There is nothing personal in these remarks. These policy committees were set up before our present Democratic leadership was elected. Therefore, this is something established in the past. The members of our Democratic policy committee include men who are among the most illustrious who have ever served in this body. Their character and ability is beyond question.

But, Mr. President, it is a simple truth that there is no visible similarity whatsoever between the purposes of the policy committee as set forth in the committee report on which the idea of policy committees was originally conceived and what the Democratic policy committee appears to be doing.

Mr. President, I am going to read the preamble to the specific recommendations that proposed the creation of policy committees in the report of the Joint Committee on the Reorganization of Congress on March 4, 1946:

> Strong recommendations were made for formal expression within the Congress of the main policies of the majority and minority parties. These recommendations called for some mechanism which could bring about more party accountability for policies and pledges announced and made in the national platforms of the major political parties * * * only through the expression of the will of the people by their support of political parties on the basis of their platform pledges can the majority will be determined.

So a prime purpose of the policy committee according to the committee report was to serve as a mechanism for translating platform promises into law.

The report goes on to point out the role of the party caucuses within Congress to serve as an intermediate agency between the people who vote Republican or Democratic and the Republican or Democratic policy committees.

It then recommends that the policy committee:

First:

> Formulate the overall legislative policy of the two parties.

Second:

> Meet frequently to consider its role in expediting consideration and passage of matters pledged to the people by their party.

Third:

> On issues where party policy is involved the decisions of these policy committees would be formally announced in proceedings of Congress, and formal records would be kept of such decisions. No member of either party would be required to follow such announced party policy except as he chose to do so. Each member would be free to vote as he saw fit, but the record of his action would be available to the public as a means of holding both the party and the individual accountable.

Fourth:

> Membership on all policy committees would automatically expire at the close of each Congress.

Mr. President, there is no evidence that a single one of these recommendations has been followed even in part by the Democratic policy committee and there is ample evidence that all of them have been ignored.

Of course under the law the Senate policy committees can operate exactly as they see fit. They have no legal, and of course they have no moral obligation to follow the recommendations of the committee report I have quoted. This is because the Senate policy committees were set up after the original bill was defeated. I am sure the wise and experienced men on the policy committee are acting in complete accordance with their own excellent judgment—and I mean this sincerely—on how they can best serve their party and country. But it cannot be denied, Mr. President, that the great preponderance of testimony before the committee that recommended the establishment of policy committees in the first place, the recommendations

of the committee itself in its report and virtually all the visible and evident thinking that has been done on this matter supports a policy committee that would establish and—what is just as important—communicate to all party Senators—the party's policies. It is true that these policies according to the committee report were to have been broadly outlined in general in caucus. And of course no caucuses have been meeting to provide these broad general guidelines.

Now, Mr. President, let us consider how the Democratic policy committee does in fact operate. I said it was within the framework which was recommended in the committee report. It is not a discussion of how the policy committees should operate, because the Democratic policy committee operates privately. It is not easy to discover how it operates. But fortunately an unusually competent political scientist, Prof. Hugh Bone, of the University of Washington, has conducted a conscientious investigation of the policy committees and has published his findings in the American Political Science Review—that was in June of 1956, and more recently he has updated his study in a 1958 publication entitled "Party Committees and National Politics."

Mr. President, this is what Dr. Bone finds out about the policy committee:

First:

Nowhere have the Democrats set down the functions for their policy committee.

Second:

In talking with Senators and their assistants one finds, some Senators find the committees, particularly the Democratic committees, do very little, while others purport to see a few real achievements. This is because of the absence of standards for judging what the committees are supposed to do and can do.

Third:

The conclusion is inescapable that the policy committees are misnamed. They have never been policy bodies in the sense of considering and investigating alternatives of public policy, and they have never put forth an overall congressional party program. The committees do not assume leadership in drawing up a general legislative program but consider certain proposals on an ad hoc basis as they arise or are due for consideration on the floor. Some important policies receive little or no discussion in the committee, and only rarely have committees labeled their decisions as party policies.

This is the heart of the Bone finding. Professor Bone states:

Fourth:

On Capitol Hill the usefulness and accomplishments of the policy committees are recognized in three fields: Service and research—

The Democratic policy committee staff does this for the majority leader not individual Senators—

education—

Since the Democratic policy committee as such does not communicate with other Democratic Senators except in providing vote cards after roll call votes on the Senate floor, this function is limited—

and legislative scheduling.

In this respect Bone finds:

Scheduling in the real sense of the word involves discussion of strategy, decision as to sequence and consideration of timing. Neither policy committee as a committee, appears to have gone into these matters with any degree of regularity.

Fifth:

Policy committee sessions are meetings of some of the men of power in the Senate at which political strategy, policy, program, and adverse other matters are discussed.

Sixth. Meetings of the Democratic policy committee are private. No reports of any kind are made to other Democratic Senators.

I again quote Professor Bone:

Seventh:

Chairman LYNDON JOHNSON more than his predecessors has perceived the policy committee as a strategic device and weapon. The committee is used to set up issues in a way that will permit a maximum number of Democrats to go along with the position of the leadership.

Now, Mr. President, Professor Bone brings to this study the objectivity of an expert and disinterested observer. At the same time Professor Bone would be the first to agree that Senators who have served in this body and on the policy committee for many years could provide impressive contradiction of his description if they wish to do so. But in the absence of such refutation it would seem to me to follow that we should reexamine the argument that is, I admit, honestly made by a number of shrewd and experienced Senators and Senate observers that the party caucus should not make policy because the Democratic policy committee already does it and does it better than a caucus could. The fact is that the policy committee makes and purports to make no overall party policy.

In all fairness, Professor Bone and Dr. Malcolm Jewell, of the University of Kentucky, another political scientist who has devoted much time and study to the policy committee, far from being critical of the majority leader or the policy committee praise both. I think they would both contend that under Senator JOHNSON's leadership the policy committee has contributed more than ever before to the achievement of Democratic unity on critical issues and beyond this to broad bipartisan unity on issues.

And of course the members of the policy committee are indeed unusually important in determining the nature of Democratic policy in the Senate. Because they are influential men in the Senate they are prime factors in the majority leader's calculus. He, not they—and this is the absolute and vital distinction—takes the fundamental initiative to determine what in his judgment is possible in the Senate. He, not they, determines the overall program and the timing of that program in the Senate. He, not they, decides whether the Democratic party platform or the recommendations of the Democratic advisory committee should or should not become touchstones of party policy. And he, not they, determines that the whole membership of the Democratic Party in the Senate should not be called into the traditional caucus to pass on some or any of the party's policies.

Mr. President, this method of procedure is in direct contradiction to the great bulk of testimony that was heard before the Joint Committee on the Reorganization of Congress and the report and recommendations that grew out of that testimony.

Mr. MONRONEY. Mr. President, will the Senator yield for a question?

Mr. PROXMIRE. I yield for a question.

Mr. MONRONEY. It is really not a question; it is a comment I wish to make.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that I may yield to the Senator from Oklahoma for a comment, without losing the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MONRONEY. I will defend to the last ditch the right of any individual Senator to speak about, to criticize, or to seek to correct the procedures of the Senate, or to strengthen any of the policymaking processes of the Senate. I am completely in agreement that the distinguished Senator from Wisconsin should exercise those rights and vigorously. I do not wish what I have to say to be in any way construed as denying this right to any Senator or as discouraging him from making such comments.

Since I was directly connected, together with the predecessor of the distinguished junior Senator from Wisconsin, the late Senator Robert La Follette, Jr.——

Mr. PROXMIRE. I am very happy that the distinguished Senator from Oklahoma is taking part in the colloquy, because he was the cochairman of the joint committee—the La Follette-Monroney committee—and it was the Senator from Oklahoma who had much to do with the hearings, perhaps more than any other Member of Congress, on the Legislative Reorganization Act.

Mr. MONRONEY. I must deny that compliment. The former Senator from Wisconsin was the moving force, and, as the Senator has said, was responsible for the passage of the bill by the Senate before the House acted.

I believe it should be made clear for the record that the suggestion and recommendation for a policy committee was contained in the bill of Senator La Follette which was passed by this body. It provided for policy committees in the Senate and in the House. The Senate accepted the bill with that provision.

There were some 60 or 70 innovations in procedure, as the bill was an omnibus bill. When the bill reached the House, it was my difficult job to try to get it to the floor in the closing days of the session. The then Speaker of the House, who is the present Speaker of the House, and the then minority leader, Mr. JOE MARTIN, took a strong

position against policy committees for the House of Representatives.

The bill was not defeated; it was amended. The section providing for policy committees was stricken from the bill. The mechanics were that the House bill was substituted for the Senate bill. But in so doing, not being able to legislate for the Senate, it was necessary for the House to strike out the entire paragraph, since it included the language relating to both the House and the Senate. It was too late in the session for the bill to go to conference; consequently, the bill was passed without the provisions for policy committees.

The Senate quickly adopted a resolution setting up a policy committee. It did not include any endorsement of the recommendation of the original committee. It was merely a rush job to give the Senate a chance to try out a policy committee.

I disagree with the distinguished Senator from Wisconsin that the policy committee has been an ineffective bit of mechanics. Certainly it has not reached the stratospheric position which the dreams of so many authors of bills sometimes contemplate. But I may say, based on my experience of some 21 years in watching the Senate operate, and some 8 years of membership in the Senate, that I have never seen a time when the policy as determined by the leadership—and by that I mean the majority Members of the Democratic Party—has been so clearly expressed, so easily identified, and so well known to the public as it has been during the years of the incumbency of the present majority leader.

I have served under other majority leaders. In those days it was difficult to learn what the Democratic Party policy was, because it was all over the lot. There was no focal point. There was no possibility of identifying it. That was one of the primary reasons why we had recommended for inclusion in the Reorganization Act provision designed to insure that party responsibility and party accountability should be identifiable on the floor of each House.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield.

Mr. PROXMIRE. Would the Senator maintain that party policy is announced or indicated in any way by the policy committee at the present time?

Mr. MONRONEY. As an individual Member of the Senate, I have not had much trouble in learning what the party policy is. Sometimes the party leaders do not agree with my ideas, but that is partly my fault, because I have failed to avail myself of the opportunity of requesting to be heard by the policy committee.

Certainly the majority leader, who is our normal means of communication with the policy committee, is always open to me. I do not happen to be a member of the inner circle; I am a relatively junior Senator; but I have never found a day when I could not communicate with the majority leader. I have also found that such communications receive consideration; and later, when proposed legislation was reported, it would reflect, at least to some degree, those recommendations.

Mr. PROXMIRE. Can the Senator from Oklahoma cite to me a single example, in either the 83d, the 84th, or the 85th Congress, when the policy of the Democratic Party was expressed in any kind of communication to Senators, or can he give me an example or an instance in which party policy was declared in advance and was known?

Mr. MONRONEY. I think the party policy was rather clearly known to every Member of the Senate and everyone in the Press Gallery. The policy of the party was made known to the representatives of the press, especially the persons who report the proceedings of the two Houses.

During the years of the leadership of the distinguished Senator from Texas [Mr. JOHNSON], I do not think anyone, from the page boys to the doormen to the members of the Press Gallery, Radio Gallery, and Periodical Gallery, has had much trouble in learning what position the leadership was taking on whether to bring up a civil rights bill, such as was done in 1957 for the first time in about 90 years, or to learn the stand of the party concerning other matters of proposed legislation.

When the majority leader tells me that he plans to call up an airport bill or some other bill, I can depend upon it that party action has been taken, and that the bill will come to the floor with the support of the Democratic Party policy committee.

Mr. PROXMIRE. I still ask that the Senator from Oklahoma give me a single instance of party policy which has been promulgated, expressed, communicated, or made known in any way. I ask him what our policy now is on the budget. Is it the policy of the Democratic Party to favor a balanced budget or an unbalanced budget? Do we want a surplus? Do we favor increasing taxes? Do we favor decreasing taxes? I have not heard any policy expressed by the Democratic policy committee this year or last year on those subjects.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield to the Senator from Montana.

Mr. MANSFIELD. The Senator from Wisconsin attended the last two caucuses of the Democratic Party, at the opening of this session and the opening of the last session, did he not?

Mr. PROXMIRE. Yes; I did.

Mr. MANSFIELD. Did not the majority leader at both caucuses lay before all of us what our policy should be for the rest of the coming year, and enumerate the items one by one?

Mr. PROXMIRE. The Senator from Texas made an excellent speech, a speech which was released by him to the press. But I did not hear anyone say that it was the policy of the Democratic Party for the 86th Congress. Perhaps it was. It was an expression by the most influential man in the Senate of his viewpoint on the kind of program we should have. There was no request for discussion. There was no notion expressed that it should be approved or disapproved. It was not broken down in any way. There were no agenda for considering how we should proceed.

The majority leader made an excellent speech, but it seems to me it could hardly be said to be the policy of the Democratic Party.

Mr. MANSFIELD. Did not the Senator from Wisconsin, sometime in mid-November, after the election, endorse, in effect, what the majority leader endorsed as the program for this year?

Mr. PROXMIRE. I am delighted that the Senator from Montana has made this statement, because it is something which has been haunting me to some extent. I stated to Jack Bell, of the Associated Press, that it was an excellent program. I thought it was. But I had no idea that it was supposed to be "the" program; that that was all which was to be considered. There was no proposal for civil rights or for aid to education. I am very much interested in action being taken on those measures. But I would not expect the Senator from Texas to make a press release, which is communicated to the entire country, and which would be read by all Senators, and expect it to be understood that it was the Democratic policy for the 86th Congress.

Mr. MANSFIELD. Does the Senator from Wisconsin recall offhand what happened to the calendar last year, especially what bills, if any, were held back? Does he recall, most particularly, what was the action of the policy committee—so long as we are on that subject, and before we go to the standing committees—on the three Supreme Court bills concerning which there was much discussion and some dissension? Does the Senator from Wisconsin recall that the policy committee, under the leadership of the distinguished senior Senator from Texas [Mr. JOHNSON], reported those three bills?

Mr. PROXMIRE. I recall that the bills were reported. They were on the floor for debate. I had no idea that there was an established Democratic Party policy on those bills. It seems to me that we came to a decision on them on the floor; no policy on them was communicated to me, although I heard rumors that the majority leader took a certain position or another position.

Mr. MANSFIELD. Did the Senator from Wisconsin understand that the position of the leadership was one way or the other on those bills?

Mr. PROXMIRE. Yes; but no policy was communicated to me.

I say the policy should be communicated to all Senators; but insofar as the fiscal program of the Government, and so forth, are concerned, I have not received any communication regarding what our policy is or what it should be.

Mr. MANSFIELD. If a policy were laid down, would the Senator from Wisconsin follow it?

Mr. PROXMIRE. I would be very, very much influenced by it. Once the policy is laid down, we can debate it and can amend it; and then the Democratic Senators will be in a position to do something about it.

Mr. MANSFIELD. But why do it in private or in caucus or behind closed doors? Why not do it in the open, in public, so all of us can debate it and discuss it?

Mr. PROXMIRE. Then let us do that. But I am pointing out that that is not being done on the floor of the Senate. The floor has historically been the place where matters are debated and decided. But now they are not decided on the floor. Instead, they are decided in private, over the telephone, with a few of the top Members, by and large. No doubt that is a very efficient procedure; but I believe such matters should be decided on a much broader basis.

Mr. MANSFIELD. Can the Senator from Wisconsin mention any proposals made to the policy committee which the policy committee did not bring to the floor for debate?

Mr. PROXMIRE. There were a number of bills; and I have particularly in mind one bill on which I felt the policy should have been handled on the floor. I should have liked to have an opportunity, somehow, in some kind of caucus, to express my position on that bill. I frequently stated my position on it on the floor. It is a bill providing for massive Federal aid for education.

Mr. MANSFIELD. We did report such a bill.

Mr. PROXMIRE. Oh, yes; and the bill was amended. The Senator from Michigan submitted his amendment, and it received some votes. Of course, on the floor we can always attempt to amend proposed legislation; but there is an enormous difference and a great disadvantage when one has to submit amendments against the committee and against the leadership, and when one must put himself in such a position that the leadership is pretty much constrained to go against him, because the leadership has to go along with the committees.

Mr. MANSFIELD. But if a bill does not suit an individual Senator, then, as the Senator from Wisconsin has said, such a Senator has a right to propose amendments to it on the floor. But certainly each Senator is equal, and has a right to do what he wishes to do on the floor, in the open, and to address the whole country.

Now let me ask about keeping back proposed legislation: Last year was the Senator from Wisconsin interested in getting the Chicago-Lake Michigan drainage bill brought to the floor for consideration?

Mr. PROXMIRE. The bill came on the floor for consideration, despite the fact that I did object to its coming on in quite the form in which it did. I did my best to oppose that bill. However, I do not contend that I have any more power than any other Senator has. In fact, I have far less than most have. I exercised my rights, under the rules, to do what I could to prevent the passage of a bill which I thought was against the public interest.

Mr. MANSFIELD. The Senator from Wisconsin is too modest, because, as I recall the outcome of that particular measure, he was very successful in stopping it.

Mr. PROXMIRE. I thank the Senator from Montana.

Mr. MONRONEY. Mr. President, will the Senator from Wisconsin yield again, so that we may revert to the matter of policy committees versus caucuses?

The PRESIDING OFFICER (Mr. Moss in the chair). Does the Senator from Wisconsin yield to the Senator from Oklahoma?

Mr. PROXMIRE. I yield.

Mr. MONRONEY. The Senator from Wisconsin seems to attribute to the Reorganization Act the fact that we put more trust and confidence in caucuses, and that because the caucuses have been so successful, the policy committee was to be an arm of the caucuses. I should like to clear up that point by stating that both Senator La Follette and I looked to the policy committeee as a means of centralizing and making known the party policy on individual issues as they came before the committee.

This was after we had observed the failure of caucuses to bring about anything except a further diffusion of party policy. This was voiced by all the Members who would announce to the press their own ideas and their own recollections about what was said in a private, closed caucus.

Mr. PROXMIRE. On that point, let me call attention to page 12 of the report of the La Follette-Monroney committee, in the sixth paragraph, where we find the following:

> Under the American party system there are always two main groups, each checking the other and offering the choice of alternative courses of action. Around these two groups Congressmen can rally and express themselves, helping in party caucuses to determine the policy for their group.

That is set forth in the report which was submitted by the committee headed by the Senator from Oklahoma and Senator La Follette; and it seems to me it is a rather emphatic expression of the desirability of having the parties meet in caucus and make responsible decisions and communicate them.

Mr. MONRONEY. If we had relied on the party caucus system, there would have been no reason for a policy committee. However, there was recognition of a failure to meet at regular intervals—let us say monthly—in caucus, to bring about anything other than utter chaos by such party caucuses, particularly in the case of the House of Representatives; and therefore we tried to formalize the system of party responsibility and accountability in party policy committees.

The one thing I believe we have failed to do is to provide that all policy committees shall automatically expire at the close of each Congress. The failure to make such a provision was a great disappointment to me. But, in view of the fact that such a provision was not included in the law, I think they have been entirely justified in using the old seniority system for everything that transpires in regard to committees.

Mr. PROXMIRE. Certainly, and I have said so.

Mr. MONRONEY. And I believe that if all members of the policy committees were to resign tomorrow, they would be reelected the next day.

Mr. PROXMIRE. Certainly; I do not question that for a moment.

Mr. MONRONEY. I believe we should concern ourselves with the election of new Senators to the policy committees, rather than allege a failure of the system. New Members should be elected to them, anyway.

I believe the present system is far better than the system of caucuses which once was used; and I think the action now being taken is helping, both formally and informally, to ascertain the views of Senators who are interested enough to communicate with members of the policy committee or with the leadership, in order to help establish the policy which Senators wish them to discuss.

Personally, I am going to ask the majority leader and the party policy committee to permit me to go before that committee. That is my duty. If I have an important issue, I certainly should request that privilege, in order to lay the matter before those who are the party leaders. I intend to urge that we take up the matters of high interest rates, tight-money policy, and the $2 billion excess in the public debt. I think these are matters on which the Democratic policy should speak, and should speak with firmness.

But I do not think we can come forth at the beginning of a session with some well-packaged, neatly wrapped decisions and say, "This is the Democratic Party policy for this year." All of us are reasonable, and we know that the policy and the situation change from day to day. We know that Senators on this side of the aisle are not able to get together instantly on all questions. They are no more able to do this than are the Senators on the other side of the aisle.

As for the Legislative Reorganization Act, I do not believe it proper for anyone to take the view that, because that act has not been applied in the way we recommended, it is a travesty of congressional reorganization. The Congress has already gone far more than half way toward the accomplishment of what that act was designed to do; and from my communications with the policy committee and with the majority leader, I know that all Senators have a right to go before them and to urge that their views be made parts of the party policy. Refusing this, we still have the right to advise on policy, as I intend to do on the tight money issue, and as I know the distinguished Senator will do on the tight money issue, or on the wasting of money in the President's budget while refusing school aid or aid for depressed areas. I believe the mechanism is there, and if the Senator will cooperate, it will be there to get a party voice on these important questions.

Mr. PROXMIRE. What the Senator has said is excellent. I am delighted to hear that all Senators who feel very strongly on legislation may go before the policy committee and make their position known. I did not know it before. It was not communicated to me. Perhaps it was known by other Senators. What the

Senator has said is constructive and helpful.

I should like to ask the Senator from Oklahoma if he would favor making the deliberations of the policy committee available to other Senators, so they can come into the policy committee when they wish, and so they can observe what is going on, or appear if they desire.

Mr. MONRONEY. My understanding is that the policy committee is open. It has always been open to me, and I am sure to others who have asked for the privilege.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. MANSFIELD. I wish to corroborate what the Senator from Oklahoma has said. Any time the Senator desires to appear before the policy committee he may do so. That privilege is available to every other Member of the Senate, and always has been, so far as I know. I am a junior Senator, too. During the 6 years I have been in the Senate that has been the custom. I understand it will continue to be the custom. It applies to every other Senator.

Mr. PROXMIRE. To be realistic about this matter, as I understand, the policy committee meets on Tuesdays, or at least regularly on some day during the week. The committee meets for lunch. It would seem to me it would be an imposition, and be perhaps a little brash, for a junior Senator or for a Senator who has not been here long to invite himself to lunch with these distinguished Members of the Senate. I cannot see how all Members of the Senate on the majority side could be invited to come into the small dining room in which I understand the policy committee meets, and take part of the fare there available. I wonder what kind of notice the policy committee would want.

Mr. MANSFIELD. A Senator is invited to come at any time. So far as I am concerned, there is no difference between a junior Senator and a senior Senator. If one is a Senator, that is all the requirement necessary. Incidentally, we all pay for our luncheon ourselves. Many Members come after the luncheon is over and make their pleas or express their desires about a particular matter under discussion. There never has been steamrolling in the policy committee. Any Senator may express himself.

If the Senator will go back to the record of the last Congress, he will find there were very, very few bills that, once reported out of legislative committee to the policy committee, did not reach the floor. That includes every kind of controversial bill one can think of.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. PROXMIRE. Before I yield to the Senator from Connecticut, I should like to say it is fine to learn that the policy committee is open and available to all Senators. A real contribution has been made, and it is gratifying to learn that is the situation. However, that does not modify the principal point I am making, which is that, on the basis of observations of objective persons who like the way the policy committee and the majority leader operate, the policy committee is not making policy. They are just not doing it. I am going to point out why there is no policy being made, and document that position.

I yield now to the Senator from Connecticut.

Mr. BUSH. Mr. President, if I may speak in a slightly lighter vein for a moment, I wish to congratulate the Senator from Wisconsin today for the program he is advocating for our friends across the aisle, because he is advocating exactly what the Republican Senators have been doing for some time.

Mr. PROXMIRE. If the Senator will yield at that point, they have been doing it for some time——

Mr. BUSH. Let me complete my observation.

Mr. PROXMIRE. Very well.

Mr. BUSH. We simply have luncheon as a body every Tuesday. That is the time when any Senator may bring up a point with reference to our policy, and it is done.

Mr. MANSFIELD. But there are so few of them. [Laughter.]

Mr. BUSH. We get along all right. Let me say this: Since we have been doing it, in the past 2 years our number in the Senate has decreased from 46 to 34. [Laughter.]

Mr. PROXMIRE. Let me say to the Senator from Connecticut, before he finishes, this is the most compelling argument that I have heard against my position. It is very persuasive. [Laughter.]

Mr. BUSH. In view of our experience, let me wish the Senator from Wisconsin luck. [Laughter.]

Mr. MANSFIELD. Mr. President, if the Senator will yield, one can see the results of the weekly caucuses held by the Republican Party Members of the Senate. Their number in this body decreased from 47 or 48 to 34. Let us hope, because of the caucuses they are continuing to have weekly, that come 1960, the Members of their party in this body will be still smaller in number.

The Senator from Wisconsin has stated that one of the points he wishes to emphasize is that the policy committee does not make policy. Of course it does not. The legislative committees make policy. Once a bill is reported out of a committee to the policy committee, it is up to the policy committee to get it to the floor. The Senator knows that under the law there are only seven members on the policy committee. If the Senator from Wisconsin wants to have that committee expanded, I suggest he introduce a measure to that effect. I assure him it will be given the most earnest and serious consideration. At the present time the committee is stymied as to the number of its members. So far as I am concerned, I am merely a file closer. I am an ex officio member.

Mr. PROXMIRE. I thank the Senator. I resume my prepared text.

THE STANDING COMMITTEES

Every Democratic Senator has at least two major standing committee assignments. It is widely recognized that the majority leader was responsible for proposing and carrying out the reform that made this policy possible. In doing this the majority leader, of course, permitted every Democratic Senator to play a substantial role in determining the content of the legislation that comes before the Senate. For this the majority leader deserves credit. But the role of the committee in determining policy is sharply limited, and, of course, the committee is not a partisan body. It is bipartisan. There is rarely an attempt to determine party consensus on legislation within the committee. Every man interrogates witnesses, if he wishes, speaks in executive session, and votes in marking up bills without any regard to a party program, because he has no way of knowing what the party program is. He is not told.

Let me illustrate what I mean by describing my experience with this year's housing legislation.

Perhaps the most significant and telling fact about what happened was that, as a member of the majority party, and as a member of the committee that conducted the hearings and reported out the bill, I was never informed, and I am still not informed, on the methods and procedures by which this year's Senate bill was handled by the majority leadership.

Superficially, the record shows that S. 57 was introduced on January 9; that the Banking and Currency Committee was given its full complement of members on January 14; that hearings took place during the period January 22 through January 28; that the bill was marked up during executive sessions on January 30 and February 2; debated on February 4 and 5; and passed on February 5.

As a member of the committee, I had an opportunity to question witnesses during open hearings, to participate in putting the bill together during executive sessions, and to state my separate views in the report on the bill. I have no quarrel with the committee procedures. And I have nothing but great respect and admiration for the expertness and fairness of the junior Senator from Alabama, who managed the bill through committee. But I still remember vividly the atmosphere of haste that permeated the committee's deliberations, first in scheduling the executive session within 2 days after the close of hearings, and again in rushing the bill to the Senate floor for debate 2 days after the committee completed its work on the bill, even though 5 out of the 15 members needed time for stating their separate views on various aspects of the bill. I will not say the bill was railroaded through, but it was like being in a railroad station, being assured by the stationmaster that the train will stop at the station to take on passengers, while right in front of your eyes you see the train barreling on by.

When the bill came to the floor, the senior Senator from Ohio [Mr. LAUSCHE], the senior Senator from Pennsylvania [Mr. CLARK], and I strenuously objected to this tremendous haste and pressure for speed, arguing that it was

pointless. The Senator from Pennsylvania [Mr. CLARK] predicted accurately that the House would be unlikely to finish their housing bill for some time. But we were called into session the next morning at 11 a.m., and kept in session until 7:16 p.m., and the next day from 11 a.m. until 10:25 p.m., or for nearly 12 hours until the bill flashed through and passed.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. MANSFIELD. What was the status of the FHA, financially speaking, at that time?

Mr. PROXMIRE. As I understand the status of the FHA, it was that the FHA would have been benefited if it had been possible to get the bill passed in a hurry.

Mr. MANSFIELD. The FHA was getting pretty close to the borderline in its cash; was it not?

Mr. PROXMIRE. The Senator is correct.

Mr. MANSFIELD. Was not the bill basically the same bill which was considered and passed in this body a year ago?

Mr. PROXMIRE. There were some extremely important changes.

Mr. MANSFIELD. Is it not true that at the time the bill was taken up it was the only bill on the calendar?

Mr. PROXMIRE. I do not know whether the airport bill was on the calendar then or not.

Mr. MANSFIELD. No; it was not.

Mr. PROXMIRE. I presume the assistant majority leader is correct.

Mr. MANSFIELD. I checked the matter, and at that time the housing bill was the only bill on the calendar. Naturally, in an endeavor to get a start, we scheduled consideration of the bill as soon as the bill was reported from the committee, so that the Members of the Senate would have a chance to vote on it. This may not be the type of bill the Senator from Wisconsin wants, and I can understand his point of view. Sometimes we cannot get all we want and we have to take the best we can get. The Senator knows, of course, what has happened to the bill since it passed this body and reached the House of Representatives.

Mr. PROXMIRE. Yes. That is my point.

Mr. President, the day after this enormously significant housing bill swept through, the airport bill was taken up and passed the same day. From that day, February 6, for a full month, not a single significant legislative matter came before this body.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. MANSFIELD. The Senator will recall—and I am sure the Senator has looked at the calendar every day—that for almost a month there were practically no measures reported from the committees.

Mr. PROXMIRE. Exactly.

Mr. MANSFIELD. If the Senator will look at the calendar now he will find that there are very few measures on the calendar, and most of those are of a private nature. A few of those are controversial. These private bills will be taken up at the first available opportunity.

As I look at the calendar, haphazardly, it seems to me that the first two pages cover measures of that kind, which are usually noncontroversial. There are some controversial measures on the third page.

I believe the majority leader did the same thing today before the Senate that he did before the policy committee last week, which was to announce what the program would be. I believe the majority leader has even gone so far as to indicate—and I stand to be corrected if I am wrong—some measures which have not yet been reported by the committees, as being scheduled for consideration before the Easter recess, if at all possible. I have in mind the bill for extension of the draft. I do not know that the bill has been reported by the committee. If it has not been reported, I know it is the intention of the majority leader to have the bill taken up as soon as possible. I believe the day mentioned was Wednesday or Thursday of this week.

So far as the calendar is concerned, I do not know what more one could ask. We have done the best we could. We give consideration to the bills as soon as the bills are reported.

I think, as the distinguished Senator from Oklahoma has said, the main function of the policy committee is, to get the measures to the floor as soon as possible, where all of the Senators will have an opportunity to express their views.

Mr. PROXMIRE. I will say, Mr. President, that the distinguished assistant majority leader has confirmed my whole point completely. My point was that there was nothing for the Senate to do for 1 month, during which time we could have had a thorough consideration of the housing bill.

The housing bill still has not passed the House of Representatives.

Mr. MANSFIELD. That is correct.

Mr. PROXMIRE. The bill—that has not passed—has not become law does not help the FHA.

Mr. MANSFIELD. I do not recall that the Senator from Wisconsin made an all-out fight that we should debate and debate and debate on the bill. The Senator has a right to do that. Of course, as the Senator knows, any Member of the Senate still has the right to unlimited debate, if he wants to use it for educational purposes.

Mr. PROXMIRE. The RECORD will show that the junior Senator from Wisconsin rose on February 4 and requested that the bill be held up for a day or so until we could get in our minority views.

Mr. President, one of the reasons why we were not able to go into a thorough discussion is that we felt the bill was hurried through.

As I said before, the Rains bill, the entirely separate and distinct House of Representatives bill still has not gone through the House. So that literally nothing was accomplished by this haste. It is true that there was a 1 week recess or vacation period for the convenience of Members during the Lincoln Birthday week. But, Mr. President, for all floor legislative purposes the Senate spent a month doing nothing. There was ample time during this period to permit a full perusal by all members of the committee report and the hearings on the housing bill. There was time for a week or even 2 weeks of debate and consideration of a complex bill deeply affecting the public interest and costing the taxpayer heavily.

Mr. President, I want to return for a few minutes a little later to the consequences on this body of the terrific pressure to hurry up and to rush through legislation.

Mr. LONG. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield to the junior Senator from Louisiana.

Mr. LONG. If the Senator really objects to the haste regarding legislation, and feels that the national interest is being prejudiced, he should be cognizant of the fact that every Senator who is a Member of this body, particularly if he has the talent and ability of the junior Senator from Wisconsin, has the ability to see to it that nothing is passed in undue haste, As a matter of fact, I can recall a number of times when Senators have felt that something was being rushed improperly. I have seen a number of Senators, when they had such an idea, demonstrate their ability to see to it that the rush was terminated, and that the Senate was held in session until it was willing to agree to correct the situation.

Perhaps the Senator does not recall, but I remember when one Member of the Senate felt we were being run over when a motion was made to table one of his motions. After the Senate tabled the motion the Senator informed the Senate that all other Senators could go home and get a good night's rest and come back the next day, when he would still be talking—and that is exactly what happened.

I believe the Senator will find that, while there are many things Senators may not be able to do, one of the things Senators can do is prevent anything from being rushed through in undue haste. That is one right I have tried to preserve in the Senate. A number of us have felt that way. I assure the Senator that is his right, and I hope it will always be.

Mr. PROXMIRE. Certainly, I may say to the junior Senator from Louisiana, any Senator may talk at length on a specific bill. But what I am talking about is what I think would be a great help to the country and to the membership of the Senate if the leadership would not put Senators in a position so that when they talked about legislation they would feel that they were holding up the Senate, standing in the way of an adjournment or a recess, and keeping the Senate in session until very late at night. We were put in this position artificially, so far as the housing bill was concerned, because there was no reason why the bill could not have been held over until after the Lincoln Day recess. That would not have affected the housing industry in any way. Then we could have come to the floor, without imposing

on any other Senators, for a lengthy discussion.

No Senator wants to offend another Senator by holding him away from an engagement he has, or from a speaking engagement he has to make, which would be affected, and affected adversely, by lengthy debate.

Mr. LONG. Mr. President, will the Senator yield further?

Mr. PROXMIRE. I yield.

Mr. LONG. I think the Senator will find that the housing bill, which the Senator says was rushed through so rapidly, actually was taken up by unanimous consent. If I recall correctly, under the rule it would have been necessary for the bill to lie over until the Senate adjourned and came back into session on another day. It was apparently not just Democratic policy, but by the unanimous agreement of the Senate, that the bill was taken up and its passage expedited.

Mr. PROXMIRE. That is exactly correct.

Mr. LONG. The Senator could have objected.

Mr. PROXMIRE. This is the difficult position a Senator does not like to be put in. Nobody likes to be put in the position of objecting to unanimous consent agreements and causing trouble for other Senators. One does not like to alienate his colleagues. It seems to me it is asking Senators to do something which is offensive, and which they simply will not do by following that procedure. That is not the way consideration of measures should be handled.

Mr. LONG. From time to time it has been done and, frankly, in my opinion we should do it more.

Mr. PROXMIRE. Why?

Mr. LONG. We should object when we think objection is proper. We should not sit and decline to object and then later upbraid somebody for doing something to which we had every right to object.

Mr. PROXMIRE. I am not making this speech or this argument simply because I think the housing bill was rushed through. I am using the housing bill as an example of a number of bills which went through like the wind before and which may go through quicker at this session. I am going to discuss a number of bills in terms of attendance and in terms of hours of rollcalls and all details as to what happened. I think we can see that there has been a definite and significant change in the U.S. Senate, a change no one Senator can expect to take responsibility for or should be expected to take responsibility for as an individual.

It seems to me that this is a leadership decision. That is why I am making this as a general statement, rather than specifically objecting to each bill as it comes up.

Mr. LONG. The Senator has certainly selected a poor example if he means to prove his case by the housing bill. He says that bill was rushed through the Senate. The bill was brought up by unanimous consent. When unanimous consent was given, we had the right to assume that every Senator, whether Democratic or Republican, was willing to expedite the process of getting to it immediately, although we were bypassing the Senate rules in doing so.

When the majority leader felt that he desired to keep the Senate in session and vote on the bill on a certain day, any Senator had the right to inform the majority leader, or anyone else, that the Senate would not pass the bill that night. Any Senator who objected to the passage of the bill could offer amendments and insist upon quorum calls, make speeches, and delay the passage of the bill. There were many measures open to him if he felt that consideration of the bill should not be expedited and that the bill should not be voted upon as early as circumstances would permit.

Mr. PROXMIRE. Of course, individual Senators can object, and stand in the way of leadership whenever they wish to do so. I am finding that it is not a particularly desirable or easy thing to do.

This drive to rush legislation through committee and to propel it to the floor with debate held to a minimum by night sessions and leadership pressure to meet a recess deadline not only contributes further to the disintegration of the rights and duties of individual Senators. It also prejudices the great role the Senate of the United States has traditionally played in our history as a deliberative and educational body.

Now, Mr. President, I return to the 1959 housing bill experience as an example of the impact of leadership on individual Democratic members of the committee.

S. 57, at the time of its introduction, was widely reported in the press as the Democratic bill. It was also made known by the majority leader that the bill had a high priority in the legislative scheduling of bills. I agree that housing is an important domestic matter. But so are education, and a host of other subjects.

It is also important for a responsible party leadership not only to find the party consensus on individual bills—the parts of the whole that make up the party's program for the year—but also to find and express the party position on vital overall issues, such as budget and fiscal aspects of an individual bill.

At the moment the housing bill is under attack not so much on its merits as a housing bill, but rather from the point of view of overall budget and fiscal policy. The administration is leading this attack on the basis of a comprehensive set of assumptions and theories.

But the majority leadership can far better meet this attack on the housing bill by formulating an alternative or competing approach, which not only supports the specific bill, in this case the housing bill, but also sets forth the majority party position on a variety of measures within the general framework of budget and fiscal policy.

The formulation of such an overall budget and fiscal policy to support the passage of a particular bill is an appropriate, in fact an indispensable, function of a party caucus.

Mr. NEUBERGER. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield to the Senator from Oregon.

Mr. NEUBERGER. I should like to obtain some information from the Senator from Wisconsin.

I gather that the Senator from Wisconsin is seeking more democracy in the Senate. I, too, should like to see more democracy in the Senate. When the Senator says that "the formulation of such an overall budget and fiscal policy to support the passage of a particular bill is an appropriate, in fact an indispensable, function of a party caucus." what does he mean? Does he mean that the party caucus should take a vote?

Mr. PROXMIRE. I think it would be desirable if the party caucus could take a vote, although that would not be essential.

Mr. NEUBERGER. How would a policy be formulated unless the caucus took a vote? Suppose the party met in caucus for 3 hours. Unless the caucus took a vote, how would a policy be formulated?

Mr. PROXMIRE. I am sure the junior Senator from Oregon has been present at meetings at which policies have been formulated without a vote. I do not pretend that in connection with something as important and controversial as the policy we are discussing, agreement can inevitably be reached without a vote. However, it is possible to obtain an expression from most of the members present, which shows what the general sentiment is. I agree that if a precise expression of sentiment is desired, there must be a vote; but not always.

The point is that a caucus is a desirable way to find out what the Democratic Party in the Senate thinks—whether or not it favors a balanced budget, for example. Suppose there were a vote on that question. It seems to me that would be a precise, logical, understandable subject on which there could be a vote.

Mr. NEUBERGER. Let us find out what the Senator is really talking about. I have read very carefully his speech of several weeks ago. I have been quite unable to determine just what policy the Senator wishes. First, I should like to ask this question: Does the Senator honestly believe, and will he state for the CONGRESSIONAL RECORD, that 64 men can meet and formulate a policy without voting upon it? The Senator used the word "formulate."

Mr. PROXMIRE. Under most circumstances, I think that is probably correct. Under most circumstances, it would be necessary to have a vote. However, as I previously stated—and I think it is perfectly sensible and consistent—there are certain subjects with respect to which a vote would not be necessary. If we had a caucus on some question like the Berlin crisis, I think it is perfectly understandable that it would be possible to obtain some kind of consensus that would be unanimous, without a vote. It may be that such circumstances are rare.

The distinguished Governor of a great State—not the State of Wisconsin—told me that whenever his administration had a bill or proposal which was considered to be essential, a caucus of the party in the State legislature was always called. He told me that never once did the party lose a vote on the floor. He said that it was not a matter of voting or binding the members of the caucus, but rather a matter of explanation, a question of all members of the party understanding what the position of the leadership was, and being informed as to the situation.

I agree that under many circumstances it would be desirable to have a vote.

Mr. NEUBERGER. I should like to pursue the inquiry a little further. The Senator is shifting the scenery on us. I am not talking about the Governor of a State, or a State legislature. I am talking about the language in the Senator's own speech. What I wish to know is how a Democratic Party caucus would formulate a policy on the budget, for example, or on other fiscal questions, without voting on such a policy. I wish the Senator would explain that to me.

Mr. PROXMIRE. I will tell the junior Senator from Oregon that we probably would have a vote upon it.

Mr. NEUBERGER. That is fine. There would be a vote. After the vote is taken, what is the situation? Let us assume that the vote might be to hold the line at $77 billion, or that $3 billion or $4 billion should be added to the budget. That is a purely hypothetical situation. After the vote is taken, is the majority leader bound to carry out the policy which has been formulated?

Mr. PROXMIRE. I should say that the majority leader can and should call a caucus whenever he thinks the situation is such that the party should reconsider or modify its position. I believe that the majority leader should not exercise his powers as the head of the party in the Senate unless he is reflecting the majority opinion of the Democratic Senators in caucus.

Mr. NEUBERGER. So the majority leader should carry out the policy which has been formulated, to use the Senator's own words. Is that correct?

Mr. PROXMIRE. That is correct.

Mr. NEUBERGER. What about individual Democratic Senators? What about the other 64 Senators, including the Senator from Illinois [Mr. DOUGLAS], the Senator from Wisconsin [Mr. PROXMIRE], the junior Senator from Oregon——

Mr. PROXMIRE. Let me say, in that connection, that I think the majority leader has every right—and this has been the practice in many State legislatures—to disagree with the position taken by the majority of members of his party. However, what he does under such circumstances is to step aside. He no longer acts as majority leader. The assistant majority leader takes over. He directs and leads the majority position on the floor. The majority leader votes in any way he desires. His conscience is not imposed upon. He votes according to his conscience. He is free to do so, as are all other Senators.

Mr. NEUBERGER. Does the Senator believe that when a caucus takes a vote in formulating a policy, that vote should be binding on members of the caucus?

Mr. PROXMIRE. I do not.

Mr. NEUBERGER. On February 23 the Senator cited to us with great approval the policies followed by the Democratic Party under Majority Leader John Kern, when Woodrow Wilson was President.

Mr. PROXMIRE. At the time I did so, I believe I said that it would be unwise for us to follow the practice of binding members in caucuses.

Mr. NEUBERGER. Let me read what the Senator said:

> I think Senators can hardly do better than go back to the period from 1913 to 1916 and consider how the Democratic majority operated; and it was a thin majority at that time. It was a majority which did not have the vast superiority we now have, a superiority, virtually, of two to one. The majority at that time was very close. It was also a majority having dissident groups, just as ours has, perhaps more so.
>
> The majority of that time was a majority confronted with a tremendously difficult situation, including a change in the Presidency. But it was a majority which fulfilled its responsibility by passing some of the most significant legislation this Nation has ever seen. The entire New Freedom program of President Wilson was passed in the period from 1913 to 1916. There were not occasional caucuses; there were frequent caucuses. The Democratic Senators operated as a unit. The Democratic leader, John Kern, who was a splendid majority leader, took his direction from the unified decision of all Democratic Senators.

The Senator goes on to cite with glowing approval that every Democratic Senator in that period, unless I am mistaken, was bound by the decision of the caucus.

Mr. PROXMIRE. I have said that. I have also said that I did not believe that under the present circumstances it would be practical, possible, wise, or necessary for the Democratic caucus to so bind Senators.

Mr. NEUBERGER. Why, then, did the Senator say we should take a lesson from that period?

Mr. PROXMIRE. Because they used the caucus. While I do not approve of everything they did in caucus, I approve of the general fact that all Senators should have an opportunity to express their position on the question of the leadership position, because the leadership position expresses the opinion of Democrats as a whole. I took exception to the technique that was used to bind all Members.

Mr. NEUBERGER. Is it not possible that the technique was at the root of the success that was achieved?

Mr. PROXMIRE. That is possible. However, there have been caucuses which have been effective without binding the Members. We had caucuses in the legislature in Wisconsin. We held them at weekly intervals. Toward the end of the session we held them daily. As a result, every Democratic pledge in the platform was introduced as a bill and was voted on by the legislature, and every one of them was supported by a majority of the Democrats. However, they were not bound under those circumstances.

Mr. NEUBERGER. I have read the Senator's earlier speech with interest, and I have read his present speech with interest.

Mr. PROXMIRE. I thank the Senator for reading my speeches. That is a real compliment.

Mr. NEUBERGER. It is commendable that this issue should be discussed by the Senator. However, I believe—and I hope my mind will be changed—that although the Senator hopes to have more democracy in the Senate, I feel that a return to a caucus system which would bind all Members would result in infinitely less democracy in the Senate. I believe it to be a system which the great liberals like the elder La Follette, from the Senator's State, and George Norris, who was the greatest modern Senator, and perhaps the greatest Senator of all time, have denounced as "King Caucus." I am saying this from memory, but George Norris, I believe, many times was critical, in speeches on the floor of the Senate and before civic bodies, of what he described as "King Caucus." I hope the Senator from Wisconsin is not proposing to take us back to what the illustrious liberals of the past fought so strenuously against.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. DOUGLAS. While the Senator from Wisconsin has used the term "caucus," does he not really intend to use the term "conference"?

Mr. PROXMIRE. That is correct. I believe there is a distinction. What I have in mind is a meeting of Senators to secure information in order to try to get together, and to see if it is possible to arrive at a party determination, and to use that understanding for the direction and guidance of the leadership.

Mr. DOUGLAS. I am very glad that the Senator from Wisconsin has cleared up that matter. Historically I can remember that when I came to the Senate, in 1949, the then Democratic leader, my friend and colleague Scott Lucas, called, I believe, two conferences. One dealt with proposals for the revision of the Taft-Hartley law. It was made perfectly clear that no Senator was to be bound by any decision of the conference; indeed, it was made clear that there were to be no decisions reached, but that the issues would be discussed, and that an attempt, at least, would be made to see how much agreement there was within the party.

I believe that the discussion which went on at the conference was very helpful indeed. I believe it is this, rather than a binding, definite, iron-clad pledge, that the Senator from Wisconsin was advocating.

Mr. PROXMIRE. Exactly. I thank the Senator from Illinois.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. MANSFIELD. I should like to ask the distinguished Senator a few questions. First, I should like to have him know that I have read his speech several times—both his former speech and

his speech today—and I have enjoyed the position he is taking about getting back to conferences or caucuses.

Mr. PROXMIRE. I should like to say that I could not be more flattered. There is no Member of the Senate who I would rather have read a speech of mine than the Senator from Montana. When he tells me that he has read a speech of mine more than once, I just cannot say any more.

Mr. MANSFIELD. I could not be more flattered. Getting back to conferences or caucuses, I believe that there is very little difference between them. However, I should like to ask the Senator whether he is advocating that conference or caucuses be held in secret or in the open.

Mr. PROXMIRE. I would prefer to have them held in the open. That would be a startling departure from the usual practice, I know. We have just started the practice in Wisconsin. I believe it would be a desirable practice to follow. However, whether it be in private or in the open, or whether it be called a conference or a caucus, every Senator should be given an opportunity to express himself for the benefit of all Democratic Senators and to provide guidance to the leadership. That would be very desirable in any event.

Mr. MANSFIELD. As I understand, the Senator is in favor of either secret or open caucuses or conferences. What does he call this session? This is an open conference, an open caucus. Every Member has the right to speak. I should like to point out, also, that if the Senator is asking for an open caucus, then what he has in mind is a repetition of what is done on the floor. I say that because once a measure is brought before us, every Senator is entitled to make his position known, and can make requests. Did I understand the Senator to say that he did not believe Senators are allowed long enough time for debate?

Mr. PROXMIRE. Let me say to the distinguished Senator from Montana that there is all the difference in the world between talking on the floor in an attempt to influence one's colleagues on the one hand and taking a part in determining the leadership position that will be taken on legislation, and what the overall leadership position is to be before the bill reaches the floor on the other. As the senior Senator from Michigan [Mr. MCNAMARA] has just pointed out to me, the timing also can be crucial.

When a bill reaches the floor of the Senate, the die is usually cast by the position the leadership takes.

Mr. MANSFIELD. Every time I ask the Senator a question he replies by saying that that is the point, and then he starts on something else. Does the Senator believe that there has not been enough debate on bills before this body?

Mr. PROXMIRE. I think there has not been enough debate in recent years; yes.

Mr. MANSFIELD. The Senator, earlier in his speech, said:

> This drive to rush legislation through committee and to propel it to the floor with debate held to a minimum by night sessions and leadership pressure to meet a recess deadline not only contributes further to the disintegration of the rights and duties of individual Senators, it also prejudices the great role the Senate of the United States has traditionally played in our history as a deliberative and educational body.

May I ask the distinguished Senator from Wisconsin whether he believes in the right of unlimited debate and believes in that right for the purpose of educating his colleagues and the country at large?

Mr. PROXMIRE. I say to the Senator that I believe in the right of protracted, lengthy, thorough, and comprehensive debate, lasting even as long as 2 months.

Mr. MANSFIELD. The Senator has proved my point.

Mr. PROXMIRE. That was the proposal made by the distinguished senior Senator from Illinois in his antifilibuster fight and I supported it.

Mr. President, the absence of such a party policy gives the leadership a blank check to exercise any kind of off-the-cuff, improvising direction for our party he chooses. In the absence of such a declaration of policy only the majority leader knows where our party is going and even he does not have to make up his mind in advance. The parts that add up at the end of the session to a Senate program are put together without any advanced plan or program that anyone knows about. It is a brilliantly instinctive performance by a man who has been called an authentic political genius. It has great verve and dash and appeal in what otherwise appears to be a leaderless National Government. We can describe it as glowingly as we wish, but we cannot describe it as responsible to: First, other Democratic Senators; second, our Democratic platform; third, the Democratic policy committee; fourth, or, even any advance pronouncement by the majority leader himself.

Mr. President, in the absence of such a party policy as a basis for Senators to cast their votes in committee and on the floor, we as Senators can have no idea of the direction in which our votes will lead us. We are evading our obligation to be responsible. And, Mr. President, the times shout out for responsibility.

Let me pose this question in the framework of the extremely grave crisis which our Nation—our very civilization in fact, faces today.

In his state of the Union message to Congress on January 9, President Eisenhower posed the central question before us in these words:

> Can government based upon liberty and the God-given rights of man, permanently endure when ceaselessly challenged by a dictatorship, hostile to our mode of life, and controlling an economic and military strength of great and growing power?

Mr. President, I submit that the President of the United States was entirely correct in posing the central question that confronts us in terms as strong and grave as this. This means to me that every step the Nation takes must be measured by the test of how well it will serve the Nation's needs in respect to meeting the grave challenge that confronts us.

No committee of the Senate is or can be vested with the responsibility of reviewing our overall national needs in any time—and certainly not in a time of crisis such as this—to establish a meaningfully comprehensive policy for the direction of our national efforts toward the principle objective which must dominate our Nation's life.

The Banking and Currency Committee, of which I am a member, includes many of the Nation's best minds in the field of housing policy. There may be no better qualified group of men in the country to evaluate the Nation's needs for housing legislation, and to write the most practical and efficient legislation to meet those needs.

But who is to determine the policy question of how the need for housing relates to our needs for other things? Who is to determine how much of the housing we need we can afford? Who is to determine whether other national needs are more urgent, whether in the light of the unprecendented dangers which confront us, we ought to afford other things with a higher priority of usefulness to our national fight for the survival of our civilization?

Congressional policy, as it is formulated through the uncoordinated action of diverse and autonomous committees, necessarily lacks the unified, comprehensive direction which is dictated by the needs of a nation that is locked in a deadly struggle for survival. It cannot be otherwise; the decentralized committee system by its very nature cannot, without the influence of overall policy direction, produce a comprehensive policy which is consistent with a central purpose related to the Nation's central needs.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.
